3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.750. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

**4. Reservations**

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

**5. Payment and Delivery**

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in Section 3.5. must be made or completed on or before Wednesday, June 3, 1987. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, June 1, 1987. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Wednesday, June 3, 1987. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

**6. General Provisions**

6.1. As fiscal agents of the United States, Federal Reserve Bank are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is

pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

*Fiscal Assistant Secretary.*

## Customs Service

**[T.D. 87-68]**

## Current Fee Charged Operators of Foreign Trade Zones

**AGENCY:** U.S. Customs Service, Department of the Treasury.

**ACTION:** Notice of annual fee.

**SUMMARY:** This document advises the public of the 1987 annual fee charged operators of foreign trade zones. The fees are charged to reimburse the Customs budget for services rendered including audit, inspection, and related costs. The fees are projected on the basis of actual resources that have been allocated to the various Customs regions to support the positions authorized for the program.

**EFFECTIVE DATE:** June 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** John Hall, Office of Inspection and Control, (202-566-8151) or Marcus Sircus, Regulatory, Audit Division (202-566-2812).

**SUPPLEMENTARY INFORMATION:**

### Background

Section 146.5, Customs Regulations (19 CFR 146.5), provides that each operator of a foreign trade zone will be charged a nonrefundable annual fee for each activated zone as provided in section 81n, Tariff Act of 1930, as amended (19 U.S.C. 81n). This annual fee is separate and distinct from the user fee statute under section 13031(a) of the Consolidated Omnibus Budget Reconciliation Act of 1985, as amended (19 U.S.C. 58c). This annual fee covers the cost of the additional Customs service required under the Act as provided in 19 U.S.C. 81n and Part 146, Customs Regulations (19 CFR Part 146). The costs of entry processing are not included in this fee. The purpose of the annual fee is to reimburse the Customs appropriation for services rendered, including audit-inspection and related costs. The fee is projected on the basis of actual resources that have been allocated to the various Customs regions to support the positions authorized for the program.

The calculation included salary, plus 37 percent fringe benefits (§ 24.17(d), Customs Regulations (19 CFR 24.17(d)), plus 15 percent administrative overhead charges (§ 24.27(a), Customs Regulations (19 CFR 24.27(a)), and 1.3 percent Medicare compensation costs (§ 24.17(f), Customs Regulations (19 CFR 24.17(f)).

The first annual fee for foreign trade zone operators was set forth in the Appendix to T.D. 86-16, published in the Federal Register on February 11, 1986 (51 FR 5040), as a 3-tiered fee. Through negotiations with the foreign trade zone community, a 5-tiered structure was adopted for calendar year 1986. The 5-tiered structure was preferred to more equitably distribute the cost among zones in the middle tier of the original 3-tier structure. A 5-tier structure will continue for calendar year 1987. There are currently 76 Tier 1 locations, 25 Tier 2 locations, 16 Tier 3 locations, 9 Tier 4 locations, and 13 Tier 5 locations for a total of 133 locations.

The tier assignment for 1987 is based on the total number of admissions to the zone plus transfers from the zone (as defined in § 146.1, Customs Regulations (19 CFR 146.1)), during Fiscal year 1986, of merchandise in foreign or zone-restricted status. However, in the case of merchandise delivered directly to zones under §§ 146.39 and 146.40, Customs Regulations (19 CFR 146.39, 146.40), and weekly permits for transportation and/or expertation under § 146.68, Customs Regulations (19 CFR 146.68), the tier assignment is based on the number of shipments in foreign or zone restricted status to or from the zone, as applicable, covered by immediate transportation or cartage documents during Fiscal Year 1986.

The foreign trade zone operators fee for 1987 is $1,400 for Tier 1, $3,850 for Tier 2, $8,600 for Tier 3, $17,660 for Tier 4, and $33,600 for Tier 5. The fees were based on the actual resources for 18 Customs positions authorized for the audit-inspection program. The total calculation came to $930,882, and was rounded to $930,000. If Customs collects the above-stated fee from each zone, the total collected will be $930,190.

### New Facilities

New foreign trade zones approved or activated after October 1, 1986, will automatically pay the Tier 1 fee; however, if a new zone (never previously approved or activated) is approved or activated after December 31, 1986, the Tier 1 fee will be prorated over the full and fractional number of months remaining in Calendar Year 1987.

### Determination

It has been determined that the annual fee for foreign trade zone operators for Calendar Year 1987 is as follows:

Tier 1 (0-300 transactions)=$1,400
Tier 2 (301-800 transactions)=$3,850
Tier 3 (801-1,500 transactions)=$8,600
Tier 4 (1,501-3,000 transactions)=$17,660
Tier 5 (3,001 or more transactions)=$33,600

The annual fee shall be due and payable in accordance with §§ 113.73(d) and 146.5, Customs Regulations (19 CFR 113.73(d), 146.5).

The effective date for this Notice is (30 days after date of publication in the Federal Register).

Dated: May 15, 1987.

Michael H. Lane,

*Acting Commissioner of Customs.*

# Sunshine Act Meetings

Federal Register
Vol. 52, No. 101
Wednesday, May 27, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

**CONSUMER PRODUCT SAFETY COMMISSION**

**TIME AND DATE:** 10:00 a.m., Wednesday, May 27, 1987.

**LOCATION:** Room 556, Westwood Towers, 5401 Westbard Avenue, Bethesda, MD.

**STATUS:** Open to the Public.

**MATTERS TO BE CONSIDERED:**

*1. Election of Vice Chairman*

The Commission will elect a vice chairman for the term beginning June 1, 1987 and ending May 31, 1988.

*2. FY '89 Planning Issues*

The Commission will consider fiscal year 1989 planning issues.

*3. Kerosene Heaters: '86 Report*

The staff will brief the Commission concerning the project on kerosene heater flammability.

**FOR A RECORDED MESSAGE CONTAINING THE LATEST AGENDA INFORMATION, CALL:** 301-492-5709.

**CONTACT PERSON FOR ADDITIONAL INFORMATION:** Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, MD. 20207 301-492-6800.

May 21, 1987.

**FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION**

May 20, 1987.

**TIME AND DATE:** 10:00 a.m., Thursday, May 28, 1987.

**PLACE:** Room 600, 1730 K Street, NW., Washington, DC.

**STATUS:** Closed (Pursuant to 5 U.S.C. 552b(c)(10)).

**MATTERS TO BE CONSIDERED:** The Commission will consider and act upon the following:

1. NACCO Mining Company, LAKE 85-87-R, etc. (Issues include consideration of requirements for taking enforcement actions under section 104(d) of the Mine Act, 30 U.S.C. 814(d).)
2. Emerald Mines Corporation, PENN 85-298-R. (Issues are same as above.)
3. White County Coal Corporation, LAKE 86-82-R, etc. (Issues are same as above.)
4. Greenwich Collieries, PENN 85-188-R, etc. (Issues are same as above.)

It was determined by a unanimous vote of Commissioners that these items be heard in closed session.

**CONTACT PERSON FOR MORE INFORMATION:** Jean Ellen (202) 653-5629.

Jean H. Ellen,
*Agenda Clerk.*

**FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS**

**TIME AND DATE:** 11:00 a.m., Monday, June 1, 1987.

**PLACE:** Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC. 20551.

**STATUS:** Closed.

**MATTERS TO BE CONSIDERED:**

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

**CONTACT PERSON FOR MORE INFORMATION:** Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcment of bank and bank holding company applications scheduled for the meeting.

Dated: May 22, 1987.

James McAfee,
*Associate Secretary of the Board.*

**TENNESSEE VALLEY AUTHORITY**

**"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT:** Published May 20, 1987 (52 FR 19017).

**PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING:** 3 p.m. (e.d.t.), Friday, May 22, 1987.

**PREVIOUSLY ANNOUNCED PLACE OF MEETING:** TVA Chattanooga Office Complex, Missionary Ridge Building, 1101 Market Street, Chattanooga, Tennessee.

**STATUS:** Open.

**CHANGE IN DESCRIPTION OF ITEM:** The following is a clarification of an item on the previously announced agenda:

D—Personnel Items

2. Delegation of authority to Manager of Nuclear Power to enter into a contract for the services of G.L. Rogers to assume a TVA Office of Nuclear Power line management position, as a contract manager, not as a regular TVA employee.

**CONTACT PERSON FOR MORE INFORMATION:** Alan Carmichael, Director of Information, or a member of his staff can respond to requests for information about this meeting. Call 615-632-8000 or 632-6000 (News Desk), Knoxville, Tennessee. Information is also available at TVA's Washington Office, 202-245-0101.

**SUPPLEMENTARY INFORMATION:**

**TVA Board Action**

The TVA Board of Directors has found, the public interest not requiring otherwise, that TVA business requires a clarification in the subject matter of the previously announced agenda item and that no earlier announcement of this change was possible.

The members of the TVA Board voted to approve the above findings and their approvals are recorded below:

Dated: May 21, 1987.

Approved.

C.H. Dean, Jr.,
*Director and Chairman.*

John B. Waters,
*Director.*

# Corrections

Federal Register
Vol. 52, No. 101
Wednesday, May 27, 1987

This section of the FEDERAL REGISTER contains editorial corrections of previously published Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 147

[FRL 3150-2]

### Underground Injection Control Programs for Certain Indian Lands

*Correction*

In proposed rule document 87-10048 beginning on page 17696 in the issue of Monday, May 11, 1987, make the following corrections:

**§ 147.3000 [Corrected]**

1. On page 17702, in the second column, in § 147.3000(b), in the third line, the effective date "June 10, 1987" should not have appeared. Insert in its place "(30 days after publication of the final rule in the Federal Register)".

**§ 147.3100 [Corrected]**

2. Make the same correction on page 17704, in the second column, in § 147.3100(b), in the sixth line.

BILLING CODE 1505-01-D

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 60

[AD-FRL-3005-8]

### Standards of Performance for New Stationary Sources

*Correction*

In rule document 86-13148 beginning on page 21164 in the issue of Wednesday, June 11, 1986, make the following correction:

**Appendix A—[Corrected]**

In Appendix A, on page 21171, Figures 6C-3, 6C-4, and 6C-5 should have appeared as set forth below:

**Figure 6C-3.—Analysis of Calibration Gases**

Date _____
Analytic method used _____

| | Gas concentration (indicate units) | | |

48 CFR Part 1 et al.
Federal Acquisition Regulation; Final Rule

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 1, 2, 4, 5, 13, 15, 16, 19, 22, 25, 27, 28, 31, 32, 36, 49, 52, and 53

[Federal Acquisition Circular 84-26]

Federal Acquisition Regulation

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: Federal Acquisition Circular (FAC) 84-26 amends the Federal Acquisition Regulation (FAR) with respect to the following: Contract Reporting under $25,000; Synopsis of Contract Award Update; Solicitations, Oral, Purchases over $1,000; Price Negotiation Memoranda; Use of FAR 52.222-28, Equal Opportunity Preaward Clearance of Subcontracts in Construction Contracts; Trade Agreements Act, Application to Ammunition, FAR 25.403; Change the word "bonds" to "guarantees"; Revision to FAR 31.105, Construction Cost Principles; Reasonableness of Contract Costs (FAR Part 31) and Cost Reasonableness Demonstration by Contractors; Stock Appreciation Rights; Legislative Lobbying Costs; Selling and Marketing; FAR Index; and Editorial Corrections.

EFFECTIVE DATE: July 30, 1987.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, General Services Administration, FAR Secretariat, Room 4041, GS Building, Washington, DC 20405, Telephone (202) 523-4755.

SUPPLEMENTARY INFORMATION:

A. Public Comments

*FAC 84-26, Items I, II, III, V, VI, VII, XIII, and XIV.* Public comments have not been solicited with respect to these revisions since such revisions either (a) do not alter the substantive meaning of any coverage in the FAR having a significant impact on contractors or offerors, or (b) do not have a significant effect beyond agency internal operating procedures.

*FAC 84-26, Item IV.* A notice of proposed rule was published in the Federal Register on April 22, 1986 (51 FR 15264), recommending revisions to FAR 15.806(a) (8) and (9) to expand the existing requirements to summarize proposed recommended and negotiated amounts in price negotiation memoranda. As a result of these public comments, only minor changes were made to the proposed rule. The changes specifically require that the summary be in terms of major cost elements. Also specifically required is the summary of the Government's negotiation objective and the "considered negotiated" amounts. The additional set of requirements applies only where cost analysis is used to determine price reasonableness. The coverage does not define or list "major cost element" because of the many varied titles and descriptions of cost elements used by the thousands of contractors who are required to submit cost data to the Government in support of contract prices.

*FAC 84-26, Item VIII.* The Civilian Agency Acquisition Council (CAAC) and the Defense Acquisition Regulatory Council (DARC) have considered the public comments solicited in the Federal Register on April 22, 1986 (51 FR 15264). The majority of the responses either supported or had no comment on the proposed rule. In response to one recommendation, FAR 31.105(d)(2)(i)(B) was amended to add additional examples of predetermined schedules of construction equipment use rates. No other changes were made to the proposed rule which specifically precludes the acceptance of unallowable costs as a result of using construction equipment ownership and operating cost schedules.

*FAC 84-26, Item IX.* The CAAC and the DARC have considered the public comments solicited in the Federal Register on March 3, 1986 (51 FR 7379). The Councils have concluded that an amendment to the FAR is necessary to ensure that only reasonable costs are paid under Government contracts. Moreover, the amendment is based on section 933 of Pub. L. 99-145. The revisions to FAR 31.201-3 shift the burden of proof on the issue of reasonableness of contract costs from the Government to the contractor and abolish the presumption of reasonableness which is sometimes attached to incurred costs. Additionally, the revisions simplify the list of considerations that impact reasonableness determinations.

*FAC 84-26, Item X.* The DARC and the CAAC have considered the comments solicited in the Federal Register on April 14, 1986 (51 FR 12876), and have approved revisions to FAR 31.205-6(i) as a final rule. Of 25 responses, 24 either concurred or had no comment. No substantive changes were made to the proposed rule.

*FAC 84-26, Item XI.* A proposed rule was published for comment in the Federal Register on May 29, 1986 (51 FR 19308). Twenty-four comments were received, of which 20 were from Federal agencies. Twenty of the 24 either concurred or had no comment. The DARC and the CAAC have considered the comments and incorporated technical changes to meet substantive recommendations in the 4 other comments.

*FAC 84-26, Item XII.* The revision to FAR 31.205-36 is not considered a significant change and therefore public comments were not solicited. The revision was based on a public comment received in connection with a revision to FAR 31.205-36 made in FAC 84-15. See FAC Item XII for a detailed explanation of this revision.

B. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because these final rules do not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501, et seq.

C. Regulatory Flexibility Act

*FAC 84-26, Items I, II, III, V, VI, VII, XIII, and XIV.* Analyses of these revisions indicate that they are not "significant revisions" as defined in FAR 1.501-1; i.e., they do not alter the substantive meaning of any coverage in the FAR having a significant cost or administrative impact on contractors or offerors, or a significant effect beyond the internal operating procedures of the issuing agencies. Accordingly, and consistent with section 1212 of Pub. L. 98-525 and section 302 of Pub. L. 98-577 pertaining to publication of proposed regulations (as implemented in FAR Subpart 1.5, Agency and Public Participation), solicitation of agency and public views on these revisions is not required. Since such solicitation is not required, the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) does not apply.

*FAC 84-26, Item IV.* The Regulatory Flexibility Act (5 U.S.C. 601, et seq.) does not apply because the revision is not a "significant" revision as defined in FAR 1.501-1; i.e., it does not alter the substantive meaning of any coverage in the FAR having a significant cost or administrative impact on contractors or offerors, or a significant effect beyond the internal operating procedures of the issuing agencies. Comments were solicited on the impact of the revision on small entities; however, no comments were received to indicate that there will be a significant economic impact on a substantial number of small entities.

*FAC 84–26, Item VIII.* It is certified that the revision to FAR 31.105 will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because it represents no change in existing policy. FAR 31.109(c) already prohibits contracting officers from agreeing to a treatment of costs inconsistent with FAR Part 31. The revised wording of FAR 31.105 merely clarifies a policy which might be overlooked when predetermined equipment rate schedules are authorized for determining construction equipment ownership and operating costs.

*FAC 84–26, Item IX.* It is certified that the rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because the coverage is designed to clarify the term "reasonable cost" and to shift the burden of proof for establishing the reasonableness of a cost to the contractor when a cost is challenged by the contracting officer or the contracting officer's representative. A prudent business should already be maintaining adequate documentation to satisfy this burden of proof.

*FAC 84–26, Item X.* It is certified that this change to FAR 31.205–6(i) will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because:

(a) The revisions dealing with deletion of the term "measurement date" are technical corrections resulting from improper use of the term and no change in policy is intended, and

(b) The new coverage on junior stock options only restates the policy of nonrecognition of market appreciation as contract cost.

*FAC 84–26, Item XI.* It is certified that the revision of FAR 31.205–22 will not have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because it only clarifies the intent of the present coverage and makes no significant revision in the rules regarding legislative lobbying costs.

*FAC 84–26, Item XII.* It is certified that this rule will not have a significant impact on a substantial number of small entities for the following reasons:

(a) Most small entities do business with the Government on a fixed-price, competitive basis. None of the cost principles apply to these contracts.

(b) This rule simply clarifies that prior policy will be continued.

**List of Subjects in 48 CFR Parts 1, 2, 4, 5, 13, 15, 16, 19, 22, 25, 27, 28, 31, 32, 36, 46, 52, and 53**

Government procurement.

Dated: May 20, 1987.

**Harry S. Rosinski,**

*Acting Director, Office of Federal Acquisition and Regulatory Policy.*

**Federal Acquisition Circular**

[Number 84–26]

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 84–26 is effective July 30, 1987.

**Eleanor R. Spector,**

*Deputy Assistant Secretary of Defense for Procurement.*

May 11, 1987.

**Terence C. Golden,**

*Administrator, GSA.*

**S.J. Evans,**

*Assistant Administrator for Procurement, NASA.*

Federal Acquisition Circular (FAC) 84–26 amends the Federal Acquisition Regulation as specified below.

**Item I—Contract Reporting Under $25,000**

FAR 4.601(a) is being revised to eliminate the requirement to retain certain records for procurements of $25,000 or less when small purchases are not used.

**Item II—Synopsis of Contract Award Update**

Pub. L. 98–577, Small Business and Federal Procurement Competition Enhancement Act of 1984, changed the law relating to the synopsis of contract awards. The language included as FAR 5.301 implements the law.

**Item III—Solicitations, Oral, Purchases Over $1,000**

It is general policy to solicit quotations orally under small purchase procedures while recognizing that instances may arise where written solicitations are more practical or economical. FAR 13.106(b)(2) is being revised to remove redundancy and clarify this policy in simple terms.

**Item IV—Price Negotiation Memoranda**

FAR 15.808(a)(8) is revised to require that the price negotiation memorandum (PNM) clearly document the major cost elements of the contractor's proposal, the field or other pricing recommendations, and how the contracting officer used this information to establish the Government's negotiation position and reach the agreement. FAR 15.808(a)(9) is revised to require that direction from external sources that has a significant bearing on the contract action be documented in the PNM.

**Item V—Use of FAR 52.222–36, Equal Opportunity Preaward Clearance of Subcontracts in Construction Contracts**

FAR 22.810(g) is revised to be consistent with FAR 22.805 and the policies of the Office of Federal Contract Compliance Programs (OFCCP) as published in 41 CFR 60–1.20(d).

**Item VI—Trade Agreements Act, Application to Ammunition, FAR 25.403**

FAR 25.403, which specifies exemptions from the requirements of Subpart 25.4, Purchases Under the Trade Agreements Act of 1979, is being revised to make an appropriate adjustment in the description of the exemption for purchases of arms, ammunition, or war materials, or purchases indispensable for national security or for national defense purposes.

**Item VII—Change the Word "Bonds" to "Guarantees"**

FAR 28.101–1(b) is revised to make the language compatible with the language in FAR clause 52.228–1 by inserting the word "guarantees" for the word "bonds". FAR 28.101–1(b) and FAR 28.101–3(b) are revised to permit agencies to require only separate bid bonds as bid guarantees for construction contracts.

**Item VIII—Revision to FAR 31.105, Construction Cost Principles**

FAR 31.105 is amended to specifically preclude the acceptance of unallowable costs as a result of using a predetermined schedule of construction equipment use rates. Presently, contractors are permitted to use such schedules to determine construction equipment costs when actual costs cannot be determined from their accounting records. The revised wording clarifies an implicit policy which might be overlooked when the schedules are authorized and used. FAR 31.105 is also amended to add additional examples of predetermined schedules of construction equipment use rates.

**Item IX—Reasonableness of Contract Costs (FAR Part 31) and Cost Reasonableness Demonstration by Contractors**

FAR 31.201–3 is amended to shift the burden of proof on the issue of reasonableness of contract costs from the Government to the contractor and abolish the presumption of reasonableness which is sometimes

attached to incurred costs. In addition, the revision simplifies the list of considerations that impact reasonableness determinations. The amendment is considered necessary to ensure that only reasonable costs are paid under Government contracts. Moreover, the amendment is based on section 933 of Pub. L. 99–145.

**Item X—Stock Appreciation Rights**

FAR 31.205–6(i) is amended to make certain clarifying technical corrections and minor compatible expansions of existing policy.

The first change being made is a technical clarification of an existing rule regarding stock appreciation rights and phantom stock plans. While the date intended for cost measurement purposes was clear from the previous parenthetical coverage, use of the term "measurement date" had created a potential ambiguity in view of that term's different meaning under cost accounting standards and generally accepted accounting principles. The revision eliminates that term.

Another change introduces new coverage on the cost of junior stock conversions which is compatible with the policy in the rest of this subsection. That policy is to not recognize market appreciation or dividend equivalents as allowable contract costs.

The final change has an independent subparagraph for each of the four topics covered in paragraph 31.205–6(i).

**Item XI—Legislative Lobbying Costs**

FAR 31.205–22, Legislative lobbying costs, paragraph (f), is rewritten to clarify that detailed activity records for an individual employee need not be maintained during any particular calendar month when *both:* (1) The employee engages in lobbying activities 25 percent or less of the employee's compensated hours of employment during that calendar month, *and* (2) within the preceding 5-year period the contractor has not materially misstated allowable or unallowable costs of any nature, including legislative lobbying costs.

The "25 percent" rule is an extraordinary waiver of only the special recordkeeping requirements. It is extended only to those contractors who have demonstrated that their cost representations are fair and accurate over an extended time period. Complaints have been received that some contractors have denied Government auditors access to records regularly maintained (e.g., time, attendance, and other payroll records), on the basis of the "25 percent" rule in FAR 31.205–22(f). Accordingly, paragraph (f) is revised to clarify its original intent that records usually maintained to demonstrate the allowability of costs must continue to be maintained and made available for audit.

**Item XII—Selling and Marketing**

FAC 84–15 dated April 7, 1988, substantially revised FAR 31.205–38, Selling Costs. This revision responded to Section 911 of Pub. L. 99–145, which directed that the cost principle be clarified. As revised, FAR 31.205–38 establishes a comprehensive Government policy on the allowability of selling costs. In so doing, the new cost principle specifically incorporates elements of cost that are treated in separate cost principles, such as advertising, public relations, and bid and proposal costs. While incorporating separate cost principles into FAR 31.205–38 makes it more coherent and definitive, this express recognition has expanded the scope of "selling costs" beyond that covered previously by FAR 31.205–38.

After reviewing public comments on the original proposal, as well as internal input, the DARC and the CAAC have concluded that paragraph (f) of FAR 31.205–38 may, because of the expanded concept of "selling costs," have unintended side effects. More specifically, paragraph (f) disallows foreign selling costs on U.S. Government contracts for U.S. Government requirements. While the Councils intended this statement simply to preserve prior policy concerning foreign selling costs, as directed by Section 8071 of Pub. L. 99–190, FAR 31.205–38's generally expanded scope has the effect of making costs, principally bid and proposal costs associated with foreign sales, unallowable on U.S. Government contracts for U.S. Government requirements. To correct this unintended effect (i.e., expansion of the disallowance to categories of cost beyond those addressed by Congress when the funding limitation was enacted), the Councils have modified paragraph (f) to limit the restriction associated with foreign sales to "direct selling efforts," as defined in FAR 31.205–38(c). This category of costs most closely approximates those foreign selling costs which were made unallowable by paragraph (b) of FAR 31.205–38 as in effect on April 1, 1984, and whose compensation is prohibited by Pub. L. 99–190.

**Item XIII—FAR Index**

Replacement pages are provided for the looseleaf version of the FAR Index to effect changes made necessary by FAC's 84–1 through 84–23. (The index is provided for information only; it is not regulatory and is not codified in 48 CFR.)

**Item XIV—Editorial Corrections**

Therefore, 48 CFR Parts 1, 2, 4, 5, 13, 15, 16, 19, 22, 25, 27, 28, 31, 32, 36, 46, 52, and 53 are amended as set forth below.

1. The authority citation for 48 CFR Parts 1, 2, 4, 5, 13, 15, 16, 19, 22, 25, 27, 28, 31, 32, 36, 46, 52, and 53 continues to read as follows:

**Authority:** 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2473(c).

## PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

**1.105 [Amended]**

2. Section 1.105 is amended by removing FAR segment 9.5 and corresponding OMB control number.

## PART 2—DEFINITIONS OF WORDS AND TERMS

**2.101 [Amended]**

3. Section 2.101 is amended by removing in the fourth sentence of the definition "Contract" the reference "41 U.S.C. 501" and inserting in its place the reference "31 U.S.C. 6301".

## PART 4—ADMINISTRATIVE MATTERS

**4.601 [Amended]**

4. Section 4.601 is amended by removing in paragraph (a) the words ", other than small purchases," and inserting in their place the words "exceeding $25,000".

## PART 5—PUBLICIZING CONTRACT ACTIONS

**5.206 [Amended]**

5. Section 5.206 is amended by removing in paragraph (a)(2) the words "formal advertising" and inserting in their place the words "sealed bidding".

6. Section 5.301 is revised to read as follows:

**5.301 General.**

(a) Except for contract actions described in paragraph (b) of this section, contracting officers shall synopsize in the CBD awards exceeding $25,000 that are likely to result in the award of any subcontracts. However, the dollar threshold is not a prohibition against publicizing an award of a smaller amount when publicizing would be advantageous to industry or to the Government.

(b) A notice is not required under paragraph (a) of this section if—

(1) The notice would disclose the executive agency's needs and the disclosure of such needs would compromise the national security;

(2) The award results from acceptance of an unsolicited research proposal that demonstrates a unique and innovative research concept and publication of any notice would disclose the originality of thought or innovativeness of the proposed research or would disclose proprietary information associated with the proposal;

(3) The award results from a proposal submitted under the Small Business Innovation Development Act of 1982 (Pub. L. 97-219);

(4) The contract action is an order placed under a requirements contract;

(5) The award is made for perishable subsistence supplies; or

(6) The award is for utility services, other than telecommunications services, and only one source is available.

## PART 13—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

### 13.106 [Amended]

7. Section 13.106 is amended by inserting in paragraph (b)(2) following the word "when" the words "obtaining oral quotations is not considered economical or practical." and removing the remainder of the paragraph.

### 13.402 [Amended]

8. Section 13.402 is amended by removing in the second sentence the words "Treasury Fiscal Requirements" and inserting in their place the words "Treasury Financial" and by removing in the third sentence the words "Bureau of Financial Operations, Fiscal Service" and inserting in their place the words "Financial Management Service".

## PART 15—CONTRACTING BY NEGOTIATION

9. Section 15.806 is amended by revising paragraphs (a)(8) and (a)(9) to read as follows:

### 15.806 Price negotiation memorandum.

(a) * * *

(8) A summary of the contractor's proposal, the field pricing report recommendations, and the reasons for any pertinent variances from the field pricing report recommendations. Where the determination of price reasonableness is based on cost analysis, the summary shall address the amount of each major cost element: (i) proposed by the contractor, (ii) recommended by the field or other pricing assistance report (if any), (iii) contained in the Government's negotiation objective, and (iv) considered negotiated as a part of the price.

(9) The most significant facts or considerations controlling the establishment of the prenegotiation price objective and the negotiated price including an explanation of any significant differences between the two positions. To the extent such direction is received, the price negotiation memorandum (PNM) shall discuss and quantify the impact of direction given by Congress, other agencies, and higher level officials (i.e., officials who would not normally exercise authority during the award and review process for the instant contract action) if the direction has had a significant effect on the action.

* * * * *

## PART 16—TYPES OF CONTRACTS

### 16.203-4 [Amended]

10. Section 16.203-4 is amended by inserting in paragraph (b)(1)(i) the word "contract" following the word "price".

## PART 19—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

### 19.705-6 [Amended]

11. Section 19.705-6 is amended by removing in paragraph (c)(1) the words "formally advertised" and inserting in their place the words "sealed bid".

## PART 22—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITION

### 22.807 [Amended]

12. Section 22.807 is amended by removing in paragraph (d)(2) the words "formally advertised" and inserting in their place the words "sealed bid" and by removing the words "formal advertising" and inserting in their place the words "sealed bidding".

13. Section 22.810 is amended by revising paragraph (g) to read as follows:

### 22.810 Solicitation provisions and contract clauses.

* * * * *

(g) The contracting officer shall insert the clause at 52.222-26, Equal Opportunity Preaward Clearance of Subcontracts, in solicitations and contracts, except for construction, when the amount of the contract is expected to be for $1 million or more and the contract includes the clause prescribed in paragraph (a), (b), or (c) of 44.204.

* * * * *

### 22.1303 [Amended]

14. Section 22.1303 is amended by removing in the third sentence of paragraph (d) the words "formal advertising" and inserting in their place the words "sealed bidding".

### 22.1403 [Amended]

15. Section 22.1403 is amended by removing in the third sentence of paragraph (d) the words "formal advertising" and inserting in their place the words "sealed bidding".

## PART 25—FOREIGN ACQUISITION

16. Section 25.403 is amended by revising paragraph (d) to read as follows:

### 25.403 Exceptions.

* * * * *

(d)(1) Purchases of arms, ammunition or war materials, or purchases indispensable for national security or for national defense purposes, by the Department of Defense, as provided in departmental regulations;

(2) Purchases indispensable for national security or for national defense purposes, subject to policies established by the U.S. Trade Representative.

* * * * *

## PART 27—PATENTS, DATA, AND COPYRIGHTS

### 27.204-1 [Amended]

17. Section 27.204-1 is amended by removing in paragraph (a)(2) the words "formally advertised" and inserting in their place the words "sealed bid".

## PART 28—BONDS AND INSURANCE

18. Section 28.101-1 is amended by revising paragraph (b) to read as follows:

### 28.101-1 Policy on use.

* * * * *

(b) All types of bid guarantees are acceptable for supply or service contracts (see annual bid bonds and annual performance bonds coverage in 28.001). Only separate bid guarantees are acceptable in connection with construction contracts. Agencies may specify that only separate bid bonds are acceptable in connection with construction contracts.

19. Section 28.101-3 is amended by adding in paragraph (b) a final sentence to read as follows:

### 28.101-3 Contract clause.

* * * * *

(b) * * * This clause may be appropriately modified for use in connection with construction

solicitations and contracts when the agency has specified that only separate bid bonds are acceptable in accordance with 28.101–1(b).

## PART 31—CONTRACT COST PRINCIPLES

20. Section 31.105 is amended by revising paragraph (d)(2)(i)(A) and the first sentence of (d)(2)(i)(B) to read as follows:

**31.105 Construction and architect-engineer contracts.**

(d) * * *
(2) * * *
(i) * * *

(A) Actual cost data shall be used when such data can be determined for both ownership and operating costs for each piece of equipment, or groups of similar serial or series equipment, from the contractor's accounting records. When such costs cannot be so determined, the contracting agency may specify the use of a particular schedule of predetermined rates or any part thereof to determine ownership and operating costs of construction equipment (see subdivisions (d)(2)(i)(B) and (C) of this section). However, costs otherwise unallowable under this part shall not become allowable through the use of any schedule (see 31.109(c)). For example, schedules need to be adjusted for Government contract costing purposes if they are based on replacement cost, include unallowable interest costs, or use improper cost of money rates or computations. Contracting officers should review the computations and factors included within the specified schedule and ensure that unallowable or unacceptably computed factors are not allowed in cost submissions.

(B) Predetermined schedules of construction equipment use rates (e.g., the Construction Equipment Ownership and Operating Expense Schedule published by the U.S. Army Corps of Engineers, industry sponsored construction equipment cost guides, or commercially published schedules of construction equipment use cost) provide average ownership and operating rates for construction equipment. * * *

* * * * *

21. Section 31.201–3 is revised to read as follows:

**31.201–3 Determining reasonableness.**

(a) A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person in the conduct of competitive business. Reasonableness of specific costs must be examined with particular care in connection with firms or their separate divisions that may not be subject to effective competitive restraints. No presumption of reasonableness shall be attached to the incurrence of costs by a contractor. If an initial review of the facts results in a challenge of a specific cost by the contracting officer or the contracting officer's representative, the burden of proof shall be upon the contractor to establish that such cost is reasonable.

(b) What is reasonable depends upon a variety of considerations and circumstances, including—

(1) Whether it is the type of cost generally recognized as ordinary and necessary for the conduct of the contractor's business or the contract performance;

(2) Generally accepted sound business practices, arm's length bargaining, and Federal and State laws and regulations;

(3) The contractor's responsibilities to the Government, other customers, the owners of the business, employees, and the public at large; and

(4) Any significant deviations from the contractor's established practices.

22. Section 31.205–6 is amended by revising paragraph (i) to read as follows:

**31.205–6 Compensation for personal services.**

* * * * *

(i) *Stock options, stock appreciation rights, phantom stock plans, and junior stock conversions.*

(1) The cost of stock options awarded to employees to purchase stock of the contractor or of an affiliate will be treated as deferred compensation and must comply with the requirements of paragraph (k) of this subsection. The allowable cost of stock options is limited to the difference between the option price and the market price on the first date on which the option price and the number of shares are known. Accordingly, when the stock option price is equal to or greater than the market price on that date, then no costs are allowable for contract costing purposes.

(2) Stock appreciation rights are rights granted to employees by contractors to receive the increase in value, or appreciation, of company stock even though the employee neither purchases the stock nor receives title to it. Stock appreciation rights will be treated as deferred compensation and must comply with the requirements of paragraph (k) of this subsection. The allowable cost of stock appreciation rights is limited to the difference between the stock-appreciation-right base price from which appreciation will be measured and the market price on the first date on which both the number of shares and the stock-appreciation-right base price are known. Accordingly, when the stock-appreciation-right base price is equal to or greater than the market price on that date, then no costs are allowable for contract costing purposes.

(3) In phantom-stock-type plans, contractors assign or attribute contingent shares of stock to employees as if the employees own the stock, even though the employees neither purchase the stock nor receive title to it. Under these plans, an employee's account may be increased by the equivalent of dividends paid and any appreciation in the market price of the stock over the price of the stock on the first date on which the number of shares awarded is known. Such increases in employee accounts for dividend equivalents and market price appreciation are unallowable.

(4) Junior stock is a class of equity stock that (i) is sold to employees at a price below that of the contractor's common stock, (ii) carries reduced dividend and voting rights, and (iii) is convertible to common stock upon the attainment of specified corporate goals. Costs associated with the conversion of junior stock into common stock are not allowable, whether or not they are accounted for as compensation costs.

23. Section 31.205–22 is amended by revising paragraph (f) to read as follows:

**31.205–22 Legislative lobbying costs.**

* * * * *

(f) Time logs, calendars, or similar records shall not be required to be created for purposes of complying with this subsection during any particular calendar month when—

(1) The employee engages in lobbying (as defined in paragraphs (a) and (b) of this subsection) 25 percent or less of the employee's compensated hours of employment during that calendar month; and

(2) Within the preceding 5-year period, the organization has not materially misstated allowable or unallowable costs of any nature, including legislative lobbying costs.

When the conditions of subparagraphs (f)(1) and (2) of this subsection are met, contractors are not required to establish records to support the allowability of claimed costs in addition to records already required or maintained. Also, when the conditions of subparagraphs (f)(1) and (2) of this subsection are met, the absence of time logs, calendars, or similar records will not serve as a basis for disallowing costs by contesting estimates of

lobbying time spent by employees during a calendar month.

24. Section 31.205–38 is amended by revising paragraph (f) to read as follows:

**31.205–38 Selling costs.**

* * * * *

(f) Notwithstanding any other provision of this subsection, costs of direct selling efforts, as defined in paragraph (c) of this subsection, incurred in connection with potential and actual Foreign Military Sales, as defined by the Arms Export Contract Act, or foreign sales of military products or services are unallowable on U.S. Government contracts for U.S. Government requirements.

* * * * *

## PART 32—CONTRACT FINANCING

**32.406 [Amended]**

25. Section 32.406 is amended by removing in the second sentence of paragraph (a) the words "Treasury Fiscal Requirements" and inserting in their place the words "Treasury Financial".

## PART 36—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

**36.701 [Amended]**

26. Section 36.701 is amended by adding in the first sentence of paragraph (a) within the parentheses the word "Contract" following the word "Construction"; by removing in the second sentence of paragraph (b) the word "advertised" and inserting in its place the words "sealed bid"; and by removing in paragraph (d) the words "an advertised" and inserting in its place the words "a sealed bid".

## PART 49—TERMINATION OF CONTRACTS

**49.109–7 [Amended]**

27. Section 49.109–7 is amended by removing in the first sentence of paragraph (g) the words "Court of Claims" and inserting in their place the words "Claims Court".

## PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

**52.219–9 [Amended]**

28. Section 52.219–9 is amended by removing in the introductory text of *Alternate I* of the clause the words "formal advertising" and inserting in their place the words "sealed bidding".

**52.228–1 [Amended]**

29. Section 52.228–1 is amended by inserting a period in the introductory text following the word "contracts" and removing the remainder of the sentence.

## PART 53—FORMS

**53.214 [Amended]**

30. Section 53.214 is amended by redesignating the existing paragraphs (d), (e), (f), and (g) as paragraphs (e), (f), (g), and (h), and by reserving paragraph (d).

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

34 CFR Part 319

Training Personnel for the Education of the Handicapped

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the Training of Personnel for the Education of the Handicapped Program under Part D of the Education of the Handicapped Act (EHA). These proposed regulations are needed to implement new requirements under section 632 of the EHA, as amended in 1986. Section 632 authorizes grants to State educational agencies (SEAs) and institutions of higher education (IHEs). The intended effect of these proposed regulations is to clarify the statutory requirements and to improve the operation of the program.

DATE: Comments must be received on or before June 26, 1987.

ADDRESS: Comments concerning these proposed regulations should be addressed to Dr. Norman Howe, Division of Personnel Preparation, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 3511—M/S 2313), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Dr. Norman Howe, Telephone: (202) 732-1068.

SUPPLEMENTARY INFORMATION: The Training Personnel for the Education of the Handicapped Program is authorized by sections 631 and 632 of the EHA. Section 631 creates three specific subprograms, providing for grants to (1) nonprofit organizations for parent training and information, (2) IHEs and nonprofit organizations for training personnel for careers in special education, and (3) IHEs and nonprofit organizations for special projects. Section 632 provides for grants to SEAs and IHEs for preservice and inservice personnel training.

In the past, the regulations implementing all four subprograms were included under 34 CFR Part 318, and the same selection criteria were used in reviewing all applications submitted under that part. However, in order to clarify the separate requirements for the subprograms, and to propose separate selection criteria, 34 CFR Part 318 will be divided into three separate parts. The proposed regulations for the three subprograms authorized by section 631 will be published later, since these regulations will not affect awards made in fiscal year 1987.

The new proposed Part 319 would contain the regulations for the Grants to State Educational Agencies and Institutions of Higher Education Program, authorized by section 632. Two separate components are addressed in the proposed regulations: mandatory State grants and competitive grants.

Under the State grant program, each SEA that submits an eligible application that proposes preservice or inservice training activities designed to meet the personnel needs identified in the State's comprehensive system of personnel development will receive a State grant.

The amount each SEA receives is based on its score on criteria established in the regulations. In fiscal year 1987, an SEA that is eligible to receive a non-competing continuation grant under a previously funded multi-year project may receive that grant at the previously budgeted amount. If the SEA receives a continuation grant, it may not also receive a new State grant. An application notice for State grants is published in this issue of the Federal Register.

Under the competitive grant program, SEAs and IHEs may compete for additional funds according to designated annual priorities. The Secretary would select applications for funding within these priorities based on the selection criteria established in these regulations.

The proposed priority for fiscal year 1987, also published in this issue of the Federal Register, would support projects that demonstrate cooperation between SEAs and IHEs to provide preservice training of personnel for careers in special education of infants, toddlers, children and youth, or supervisors of those personnel.

**Executive Order 12291**

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

**Regulatory Flexibility Act Certification**

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

**Paperwork Reduction Act of 1980**

Sections 319.20, 319.21 and 319.35 contain information collection requirements. As required by the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Reguatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: Joseph F. Lackey, Jr.

**Invitation to Comment**

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 4928, Switzer Building, 330 C Street, SW., Washington, DC 20202, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week, except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

**Assessment of Educational Impact**

The Secretary particularly requests comments on whether the regulations in the document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

**List of Subjects in 34 CFR Part 319**

Colleges and universities, Education, Education of handicapped, Education-training, Grant programs-education, Reporting and recordkeeping requirements, State educational agencies, Teachers.

(Catalog of Federal Domestic Assistance No. 84.029; Training Personnel for the Education of the Handicapped)

Dated: April 3, 1987.

William J. Bennett,

*Secretary of Education.*

The Secretary proposes to amend Title 34 of the Code of Federal

BEST COPY AVAILABLE

Regulations by adding a new Part 319 to read as follows:

## PART 319—TRAINING PERSONNEL FOR THE EDUCATION OF THE HANDICAPPED—GRANTS TO STATE EDUCATIONAL AGENCIES AND INSTITUTIONS OF HIGHER EDUCATION

### Subpart A—General

Sec.

319.1 What is the purpose of this part?
319.2 Who is eligible for an award?
319.3 What activities may the Secretary fund?
319.4 What regulations apply to this program?
319.5 What definitions apply to this program?
319.6—319.9 [Reserved]

### Subpart B—How Does One Apply for an Award?

319.10 What must an institution of higher education that proposes to provide preservice training demonstrate in its application?
319.11—319.19 [Reserved]

### Subpart C—How Does the Secretary Make an Award?

319.20 How does the Secretary determine the amount of a State grant?
319.21 What selection criteria does the Secretary use in the competitive grant program?
319.22—319.29 [Reserved]

### Subpart D—What Conditions Must be Met After an Award?

319.30 Is student financial assistance authorized?
319.31 What are the student financial assistance criteria?
319.32 What amount of assistance is authorized?
319.33 What financial assistance is authorized for part-time students?
319.34 May the grantee use funds if a financially assisted student withdraws or is dismissed?
319.35 What types of reports are required?
319.36—319.39 [Reserved]

Authority: 20 U.S.C. 1432 and 1434, unless otherwise noted.

### Subpart A—General

#### § 319.1 What is the purpose of this part?

(a) *General.* The Secretary funds a State grant program and a competitive grant program under this part to assist in establishing and maintaining preservice and inservice training programs that prepare personnel to meet the needs of infants, toddlers, children, and youth with handicaps.

(b) *State grant program.* Under the State grant program, the Secretary makes a grant to each State educational agency.

(c) *Competitive grant program.* Under the competitive grant program, the Secretary may make grants to State educational agencies (in addition to the grants awarded under the State grant program) or institutions of higher education.

(Authority: 20 U.S.C. 1432)

#### § 319.2 Who is eligible for an award?

(a) State educational agencies are eligible for awards under both the State grant and the competitive grant programs in § 319.1.

(b) Institutions of higher education are eligible for awards under the competitive grant program in § 319.1(c).

(Authority: 20 U.S.C. 1432)

#### § 319.3 What activities may the Secretary fund?

(a) The Secretary supports preservice and inservice training programs that prepare professionals and paraprofessionals, or their supervisors to serve infants, toddlers, children, or youth with handicaps.

(b) Any activities assisted under this part must be consistent with the personnel needs identified in the State's comprehensive system of personnel development.

(Authority: 20 U.S.C. 1432)

#### § 319.4 What regulations apply to this program?

The following regulations apply to assistance under this program.

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), Part 75 (Direct Grant Programs), Part 77 (Definitions that Apply to Department Regulations), and Part 78 (Education Appeal Board).

(b) The regulations in this Part 319.

(Authority: 20 U.S.C. 1432)

#### § 319.5 What definitions apply to this program?

The following terms used in this part are defined in 34 CFR 77.1:

Applicant
Application
Award
Department
EDGAR
Fiscal Year
Grant period
Preschool
Project
Public
Secretary
State
State educational agency

(Authority: 20 U.S.C. 1432)

#### §§ 319.6—319.9 [Reserved]

### Subpart B—How Does One Apply for an Award?

#### § 319.10 What must an institution of higher education that proposes to provide preservice training demonstrate in its application?

An institution of higher education that proposes to provide preservice training must demonstrate that it meets State and professionally recognized standards for the training of special education and related services personnel, as evidenced by appropriate State and professional accreditation, unless—as indicated in a published priority of the Secretary—the grant is for the purpose of assisting the applicant to meet those standards.

(Authority: 20 U.S.C. 1432)

#### §§ 319.11—319.19 [Reserved]

### Subpart C—How Does the Secretary Make an Award?

#### § 319.20 How does the Secretary determine the amount of a State grant?

(a) The Secretary determines the amount of a grant under § 319.1(a) based upon the applicant's need for assistance under this part and the quality of its application.

(b) The Secretary assesses the applicant's need for assistance and the quality of its application based on the criteria set forth in § 319.21(b), except for § 319.21(b)(2)(viii).

(c) In determining the quality of the plan of operation under § 319.21(b)(3), the Secretary considers the extent of participatory planning among agenices and insititutions involved in activities of the State's comprehensive system of personnnel development.

(Authority: 20 U.S.C. 1432)

#### § 319.21 What selection criteria does the Secretary use in the competitive grant program?

(a) The Secretary uses the criteria in paragraph (b) of this section to evaluate an application for a competitive grant.

(b)(1) *Extent of need for the project.* (30 points) The Secretary reviews each application to determine—

(i) The overall needs addressed by the project;

(ii) The extent to which the project addresses the personnel needs identified in the State's comprehensive system of personnel development; and

(iii) How the project relates to actual and projected personnel needs for certified teachers in the State as identified by the State educational agency in its annual data report required

under section 618 of the Education of the Handicapped Act.

(2) *Program content.* (20 points) The Secretary reviews each application to determine the extent to which—

(i) Competencies that each trainee will acquire and how the competencies will be evaluated are identified;

(ii) Substantive content of the project is appropriate for the attainment of professional knowledge and competencies that are necessary for the provision of quality educational services to handicapped children and youth;

(iii) Benefits to be gained by the number of trainees expected to be graduated or employed over the next five years are described;

(iv) Appropriate methods, procedures, techniques, and instructional media or materials are used in the preparation of personnel who serve children with handicaps;

(v) If relevant, appropriate practicum facilities are accessible to the applicant and students, and are used for such activities as observation, participation, practice teaching, laboratory or clinical experience, internships, and other supervised experiences of adequate scope, and length;

(vi) If relevant, practicum facilities for model programs provide state-of-the-art educational services, including use of current and innovative curriculum materials, instructional procedures, and equipment;

(vii) Program philosophy, program objectives, and activities implemented to attain program objectives are related to the educational needs of children and youth with handicaps; and

(viii) This project will complement and build upon grants under the State grant program.

(3) *Plan of operation.* (15 points) The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(i) High quality in the design of the project;

(ii) An effective plan of management that ensures proper and efficient administration of the project;

(iii) How the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) How the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or handicapping condition.

(4) *Evaluation plan.* (15 points) The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(i) Are appropriate for the project; and

(ii) To the extent possible, are objective and produce data that are quantifiable including, but not limited to, the number of trainees graduated or hired. (See 34 CFR 75.590, Evaluation by the grantee).

(5) *Quality of key personnel.* (10 points) The Secretary reviews each application to determine the quality of the key personnel the applicant plans to use on the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(5)(i) and (ii) of this section plans to commit to the project;

(iv) How the applicant, as a part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition; and

(v) Evidence of the trainer's past experience and training in fields related to the objectives of the project.

(6) *Adequacy of resources.* (5 points) The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment, and supplies.

(7) *Budget and cost-effectiveness.* (5 points) The Secretary reviews each application to determine the extent to which—

(i) The budget is adequate to support the project; and

(ii) Costs are reasonable in relation to the objectives of the project.

(Authority: 20 U.S.C. 1432)

§§ 319.22—319.29 [Reserved]

## Subpart D—What Conditions Must be Met After an Award?

### § 319.30 Is student financial assistance authorized?

A grantee may use grant funds to provide traineeships or stipends.

(Authority: 20 U.S.C. 1432)

### § 319.31 What are the student financial assistance criteria?

Direct financial assistance may be paid to students only in preservice programs if—

(a) The student is qualified for admission to the program of study;

(b) The student maintains satisfactory progress in a course of study, as defined in 34 CFR 668.16(e);

(c) The student demonstrates need for financial assistance as determined by criteria established by the grantee; and

(d) The student—

(1) Is a U.S. citizen or National;

(2) Is a permanent resident of the Republic of the Marshall Islands, Federated States of Micronesia, Republic of Palau, or the Commonwealth of the Northern Mariana Islands; or

(3) Provides evidence from the U.S. Immigration and Naturalization Service that he or she—

(i) Is a lawful permanent resident of the United States; or

(ii) Is in the United States for other than a temporary purpose with the intention of becoming a citizen or permanent resident.

(Authority: 20 U.S.C. 1432)

### § 319.32 What amount of assistance is authorized?

Subject to the limitations in §§ 319.33, a grantee shall disburse financial assistance to students in amounts consistent with established policies of the grantee that are relevant to providing financial assistance to part-time and full-time students, including policy relevant to the use of financial assistance for dependents.

### § 319.33 What financial assistance is authorized for part-time students?

(a) Students enrolled for less than a full-time academic year may receive a traineeship or a stipend.

(b) Part-time students who are receiving financial assistance from other public or private agencies or institutions for training are not eligible for financial assistance under this section.

(Authority: 20 U.S.C. 1432)

### § 319.34 May the grantee use funds if a financially assisted student withdraws or is dismissed?

Financial assistance awarded to a student that is unexpended because the student withdraws or is dismissed from the training program may be used for other project costs, including awards to other students, during the grant period.

(Authority: 20 U.S.C. 1432)

### § 319.35 What types of reports are required?

(a) Not more than sixty days after the end of any fiscal year, each recipient of a grant during such fiscal year shall prepare and submit a report to the Secretary. Each report shall be in such form and detail as the Secretary

determines to be appropriate, and shall include–

(1) The number of individuals trained under the grant by category of training and level of training; and

(2) The number of individuals trained under the grant receiving degrees and certification, by category and level of training.

(Authority: 20 U.S.C. 1434)

§§ 319.36–319.39 [Reserved]

DEPARTMENT OF EDUCATION

[CFDA No. 84.029H]

**Notice Inviting Applications for New State Grant Awards Under the Training Personnel for the Education of the Handicapped Program for Fiscal Year 1987**

*Purpose:* To increase the quantity and improve the quality of personnel to educate handicapped children and youth. Applications for State grants may be submitted by State educational agencies (SEAs). SEAs that apply for a continuation grant for fiscal year 1987 are not eligible for a new State grant in fiscal year 1987.

*Deadline for Transmittal of Applications:* July 13, 1987.

*Applications Available:* June 1, 1987.

*Estimated Range of Awards:* $50,000 to $85,000.

*Estimated Average Size of Awards:* $75,000.

*Estimated Number of Awards:* 30.

*Average Project Period:* 3 years.

*Applicable Regulations:* (a) When adopted in final form, the Notice of Proposed Rulemaking for the Training Personnel for the Education of the Handicapped Program, 34 CFR 319; and (b) the Education Department General Administrative Regulations, 34 CFR 74, 75, 77, and 78. A notice of proposed rulemaking is published in this issue of the **Federal Register**. Applicants should prepare their applications based on the proposed regulations. If substantive changes are made when the final regulations are published, applicants will be given the opportunity to amend or resubmit their applications.

*For Applications or Information Contact:* Frank S. King, Office of Special Education Programs, U.S. Department of Education, 400 Maryland Avenue SW. (Switzer Building, Room 3511–M/S 2313), Washington, DC 20202. Telephone: (202) 732–1086.

*Program authority:* 20 U.S.C. 1432.

Dated: May 21, 1987.

**Office of Special Education and Rehabilitative Services Training Personnel**

**State Educational Agency and Institutions of Higher Education; Proposed Annual Funding Priority**

AGENCY: Department of Education.

ACTION: Notice of proposed annual funding priority.

SUMMARY: The Secretary proposes an annual funding priority under the Grants to State Educational Agencies (SEAs) and Institutions of Higher Education (IHEs) Program. This priority supports awards for preservice training on a cooperative basis between SEAs and IHEs to prepare personnel to serve children with handicaps. Applications for awards would be jointly signed by the SEA and the IHE(s) involved in carrying out the preservice training.

DATE: Comments must be received on or before June 26, 1987.

ADDRESSES: Comments should be addressed to Richard Champion, Division of Educational Services, Office of Special Education Programs, Department of Education, 400 Maryland Avenue SW., (Switzer Building, Room 4625), Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Richard Champion. Telephone: (202) 732–1153.

SUPPLEMENTARY INFORMATION: The Training Personnel for the Education of the Handicapped is authorized by sections 631 and 632 of Part D of the Education of the Handicapped Act (EHA). This program is designed to increase the quantity and improve the quality of personnel available to educate infants, toddlers, children, and youth with handicaps. Section 632 of the EHA provides Federal financial assistance for projects designed to establish and maintain preservice training programs to prepare personnel to meet the needs of infants, toddlers, children and youth with handicaps, consistent with the personnel needs identified in the State's comprehensive system of personnel development.

The Secretary believes that the SEAs' responsibility for developing and implementing Comprehensive Systems of Personnel Development gives them a vital interest in the Department's personnel training programs. Further, he is of the opinion that SEAs in future years should play a larger role in meeting the demand for teachers of children with handicaps under this program. Therefore, he seeks comment on how the involvement of State education agencies in this program can be increased and enhanced in future years.

**Proposed Priority**

In accordance with Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(3), the Secretary proposes to give an absolute preference to each application that meets the following priority:

1. Awards will only be made for preservice training of personnel for careers in special education of infants, toddlers, children and youth, or supervisors of those personnel.

2. Applications must demonstrate evidence of a cooperative effort between SEAs and IHEs in jointly planning the project, and in on-going coordination for purposes of carrying out, monitoring, and evaluating the project.

3. Training must be consistent with personnel needs identified in the State's or, if applicable, the adjacent State(s)' comprehensive system of personnel development.

4. Applications must (a) be jointly signed by the SEA and the IHE(s) involved in carrying out the project, and (b) specify whether a party other than the SEA will be the fiscal agent.

**Period of Award**

The project funded under this priority will be funded for a period of 12 to 60 months. However, most projects will be for 36 months. Awards will be subject to the availability of Federal funds.

**Invitation to Comment**

Interested persons are invited to submit comments and recommendations regarding this proposed priority.

All comments submitted in response to the priority will be available for public inspection, during and after the comment period, in Room 4625, Switzer Building, 330 C Street SW., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

**Office of Special Education and Rehabilitative Services**

**34 CFR Part 363**

**State supported Employment Services Program; Notice of Proposed Rulemaking**

DEPARTMENT OF EDUCATION
Office of Special Education and Rehabilitative Services
34 CFR Part 363

## The State Supported Employment Services Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to add a new part to provide for a new formula grant program for State supported employment services. The regulations in this new part would implement Amendments to the Rehabilitation Act of 1973 made by Pub. L. 99-506, the Rehabilitation Act Amendments of 1986.

DATES: Comments must be received on or before June 26, 1987.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Justin W. Dart, Jr., Commissioner, Rehabilitation Services Administration, Mary E. Switzer Building, 330 C Street, SW., Washington, DC 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Delores Watkins, Rehabilitation Services Administration, Department of Education, Switzer Building, Room 3322, Washington, DC 20202, (202) 732-1369.

SUPPLEMENTARY INFORMATION:

*Supported Employment Formula Grant Program.* The Rehabilitation Act Amendments of 1986 authorize a new formula grant State Supported Employment Services Program. This program provides grants to assist States in developing and implementing collaborative programs with appropriate public agencies and private nonprofit organizations for training and traditionally time-limited post-employment services leading to supported employment for individuals with severe handicaps. The Supported Employment Program is intended to provide services to individuals who, because of the severity of their handicaps, would not traditionally be eligible for vocational rehabilitation services. Individuals who are eligible for services under the program must not be able to function independently in employment without intensive on-going support services and must require these on-going support services for the duration of their employment. Under the proposed regulations, individuals who are eligible for supported employment services must also be receiving services from, or eligible for, other State, Federal, or private programs that provide on-going support services.

The statute defines "supported employment" to mean competitive work in an integrated work setting for individuals who, because of their handicaps, need on-going support services to perform that work. Supported employment is limited to individuals with severe handicaps for whom competitive employment has not traditionally occurred, or individuals for whom competitive employment has been interrupted or intermittent as a result of a severe disability. It includes transitional employment for individuals with chronic mental illness. Although the term "supported employment" is defined in the statute, the Secretary considers it essential to define and clarify certain undefined terms used within the statutory definition, as well as the concept of traditionally time-limited post-employment services, in order to ensure a consistent programmatic intepretation. The proposed regulations in § 363.7, therefore, define the following terms: (1) Competitive work; (2) integrated work setting; (3) on-going support services; (4) transitional employment for individuals with chronic mental illness; and (5) traditionally time-limited post-employment services.

### Supported Employment Definitions

The term "supported employment" contains three elements: (1) Competitive work; (2) an integrated work setting; and (3) the provision of on-going support services. The proposed regulations define "competitive work" to mean "work that is performed on a full-time basis or on a part-time basis, averaging at least 20 hours per week, and for which an individual is compensated in accordance with the Fair Labor Standards Act." The Fair Labor Standards Act allows employers the flexibility to compensate workers with handicaps at a wage level that is: (1) Lower than the minimum wage; (2) commensurate with those wages paid to non-handicapped individuals employed in the same locality and performing the same type, quality, and quantity of work; and (3) related to the individual's productivity. The use of these standards is designed to ensure that individuals with severe handicaps under this program receive fair and competitive wages—not just "token" wages such as those received by many individuals with severe handicaps in work activity centers.

The regulations propose, at § 363.7, to define "integrated work setting" by describing three types of job sites that provide for integration of handicapped and non-handicapped individuals. The definition recognizes that maximum integration in a work setting may not always be feasible for every individual with severe handicaps under this program. The proposed regulations define one kind of integrated work setting as a job site where most co-workers are not handicapped and handicapped individuals are not part of a work group of other handicapped individuals. A second permissible kind of integrated work setting would be a job site where most co-workers are not handicapped and individuals with handicaps are of a small work group of not more than eight individuals with handicaps. A third option would include a job site where the individual works alone or a job site where all co-workers are part of a small work group of not more than eight individuals, all of whom have handicaps. However, in this case an individual with severe handicaps must have regular contact with non-handicapped individuals, other than personnel providing on-going support services, in the immediate work setting—since there is no actual integration at the particular job site. The proposed standard limiting a small work group to a maximum of eight handicapped individuals is based on data and information collected from Statewide Supported Employment Demonstration projects funded by the Office of Special Education and Rehabilitative Services in fiscal year 1985.

This data indicates that individuals with severe handicaps are not integrated meaningfully in work settings if they are placed in a group of more than eight individuals with handicaps. The Secretary is particularly interested in receiving comments on the use of this standard.

The proposed regulations, at § 363.7, define "on-going support services" as continuous or periodic job skill training services provided at least twice monthly at the work site throughout the term of employment to enable the individual to perform the work. The term would also include other support services provided at or away from the work site, such as transportation, personal care services, and counseling of family members, if skill training services are needed by, and provided to, that individual at the work site. The proposed requirement that "on-going support services" be provided at least twice monthly at the work site is intended to distinguish individuals with handicaps who are able to function independently with minimal

or no job support services from individuals with severe handicaps who are not able to function independently and who need on-going support services to maintain employment. Individuals who need on-going services less than twice monthly would not need supported employment services. The Secretary is particularly interested in receiving comments on whether any additional limitations should be provided on the types of services that would qualify as "on-going support services"

The proposed regulations, at § 363.7, define "transitional employment for individuals with chronic mental illness" to mean competitive employment in an integrated work setting for individuals with chronic mental illness who may need on-going job skills training or other support services provided either at the work site or away from the work site to perform the work. The job placement may not necessarily be a permanent employment outcome for the individual. The proposed definition recognizes that individuals with chronic mental illness may need off-site support services, such as psychiatric counseling, but may not necessarily need job skill training services required by individuals with other types of disabilities who are placed in supported employment. The proposed definition also clarifies the transitional nature of a supported employment placement for individuals with chronic mental illness by recognizing that the placement may not necessarily be the final employment outcome and may be needed only to enable the individual to adjust to the stress of competitive employment.

The proposed regulations, at § 363.7, define "traditionally time-limited post-employment services" as services that are needed to support and maintain an individual with severe handicaps in employment, are based on an assessment by the State of the individual's needs as specified in an individualized written rehabilitation program, and are provided for a period of time not to exceed 18 months before transition is made to extended services provided under a cooperative agreement pursuant to § 363.50. The proposed definition defines "time-limited" to mean not more than 18 months of program support by the designated state unit for any one severely handicapped individual. Although 18 months is established as an outside limit, current data indicates that most individuals will progress to extended services in a much shorter time, usually within six to twelve months. Under this program, extended services must be provided to each individual, following termination of time-limited services by the State vocational rehabilitation agency. Extended services must be financed by public funds, other than Title VI, Part C funds, or by funds from private nonprofit organizations.

### Planning Grants

The statute permits the State agency to request a planning grant for fiscal year 1987 only—in place of receiving a services delivery grant. The statute further requires that planning grants be used for activities designed to facilitate the State's use of its allotment for supported employment services. Planning grants may not exceed an 18-month period and may not exceed $250,000 for any one State. The proposed regulations in § 363.5 require that a State conduct specific activities under a planning grant to ensure that it develops its capacity to delivery supported employment services after the expiration of the planning grant. Required activities are: (1) Developing a Statewide needs assessment for supported employment services; (2) developing and evaluating collaborative arrangements and agreements with State agencies and nonprofit agencies and organizations to ensure that extended services are available from other sources when time-limited services provided under this program are terminated; and (3) developing goals, priorities, policies and procedures for the use of allotments for supported employment services. In addition, the proposed regulations at § 363.5 permit States to conduct certain other planning grant activities: (1) Seeking participation in the development of the State plan by individuals with severe handicaps, their parents, guardians, and providers of services to them; (2) developing sites to test and evaluate the provision of supported employment services; and (3) conducting other activities necessary to prepare for and implement a system of supported employment service delivery.

### Service Grants

The statute authorizes States to conduct the following activities under a supported employment services formula grant: (1) Evaluating rehabilitation potential, under either the Title I program or this program, for individuals with severe handicaps to determine eligibility for supported employment; (2) developing jobs for individuals with severe handicaps; and (3) providing time-limited post-employment services, including on-the-job and other training, needed to support the individual in employment. This statutory provision is implemented in the regulations at proposed § 363.4.

### Collaborative Agreements

The statute requires that States, in applying for a formula grant, demonstrate evidence of collaboration with and funding from other State agencies and nonprofit organizations to assist in the provision of supported employment services. This provision is implemented in the proposed regulations at § 363.50, which requires States to develop collaborative agreements that specify, at a minimum: (1) The training and traditionally time-limited services to be provided by the State vocational rehabilitation agency under this program; (2) the on-going or extended services to be provided by other State agencies and private nonprofit organizations after termination of time-limited services under this program; (3) the estimated funds to be expended by the participating agency or organizations in implementing the agreement; and (4) the projected number of individuals with severe handicaps who will receive supported employment services under the agreement.

### Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

### Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

The small entities that would be affected by these regulations are private nonprofit organizations providing on-going support services to individuals with handicaps or small employers providing supported employment placements. However, the regulations would not have a significant economic impact on the organizations affected because the regulations would not impose excessive regulatory burden or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

### Paperwork Reduction Act of 1980

Sections 363.11 and 363.52 contain information collection requirements. As

required by section 3504(h) of the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: Joseph F. Lackey, Jr.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3222, Switzer Building, 330 C Street SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paper Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

(Catalog of Federal Domestic Assistance Number 84.187, State Supported Employment Services Program)

Dated: May 8, 1987.

William J. Bennett,

*Secretary of Education.*

The Secretary proposes to amend Chapter III of Title 34 of the Code of Federal Regulations by adding a new Part 363 to read as follows:

## PART 363—THE STATE SUPPORTED EMPLOYMENT SERVICES PROGRAM

Subpart A—General

Sec.

363.1 What is the State Supported Employment Services Program?
363.2 Who is eligible for an award?
363.3 Who is eligible for services?
363.4 What kinds of activities may the Secretary fund?
363.5 What kinds of activities may the Secretary fund under a planning grant?
363.6 What regulations apply?
363.7 What definitions apply to the State Supported Employment Services Program?

Subpart B—How Does a State Apply for a Grant?

363.10 What documents must a State submit to receive a grant?
363.11 What information and assurances must be included in the State plan supplement?

Subpart C—How Does the Secretary Make a Grant?

363.20 How does the Secretary allocate funds?
363.21 How does the Secretary reallocate funds?

Subparts D-E [Reserved]

Subpart F—What Post-Award Conditions Must Be Met by a State?

363.50 What collaborative agreements must the State develop?
363.51 What are the allowable administrative costs?
363.52 What are the information collection and reporting requirements?
363.53 What special conditions apply to services and activities under this program?

Authority: 29 U.S.C. 795j–q, unless otherwise noted.

Subpart A—General

§ 363.1 What is the State Supported Employment Service Program?

(a) Under the State Supported Employment Services Program, the Secretary provides grants to assist States in developing and implementing programs of supported employment for individuals with severe handicaps.

(b) Grants under this program are intended to provide training and traditionally time-limited post-employment services to individuals with severe handicaps.

(Authority: 29 U.S.C. 795j)

§ 363.2 Who is eligible for an award?

Any State is eligible for an award under this program.

(Authority: 29 U.S.C. 795m(a))

§ 363.3 Who is eligible for services?

A State may provide services under this program to any individual who—

(a) Has severe handicaps;

(b) Has been determined by an evaluation of rehabilitation potential, as defined in section 7(5) of the Act, to have—

(1) The ability or potential to engage in a training program leading to supported employment;

(2) A need for on-going support services in order to perform competitive work; and

(3) The ability to work in a supported employment setting; and

(c) Is eligible for or is receiving on-going support services from State, Federal, or private programs, including mental retardation and social services programs.

(Authority: 29 U.S.C. 795k)

§ 363.4 What kinds of activities may the Secretary fund?

Under this program, the Secretary makes a grant to a State to conduct the following activities:

(a) Evaluation of the rehabilitation potential for supported employment of individuals with severe handicaps.

(b) Development of jobs for individuals with severe handicaps.

(c) Provisions of traditionally time-limited post-employment services that are needed to support the trainees in employment, such as—

(1) Intensive on-the-job training and other training provided by skilled job trainers for workers with severe handicaps;

(2) Provision of follow-up services, including regular contact with employers, trainees with severe handicaps, parents, guardians or other representatives of trainees, and other suitable professional and informed advisors in order to reinforce and stabilize the job placement; and

(3) Regular observations or supervision of individuals with severe handicaps at the work site.

(Authority: 29 U.S.C. 795a)

§ 363.5 What kinds of activities may the Secretary support under a planning grant?

(a) For fiscal year 1987 only, a State may request a planning grant in place of its allotment under this program.

(b) The State shall conduct activities under a planning grant that include the following, unless those activities have already been completed:

(1) Developing the Statewide needs assessment for supported employment services, as specified in § 363.11.

(2) Developing and evaluating collaborative agreements with State agencies and private nonprofit organizations.

(3) Developing goals, priorities, policies, and procedures for the provision of supported employment services to individuals with severe handicaps.

(c) The State may also conduct the following activities under a planning grant:

(1) Seeking participation in the development of a State plan supplement for supported employment services by individuals with severe handicaps, their parents or guardians, and providers of supported employment services.

(2) Developing sites to test and evaluate the provision of supported employment services.

(3) Other activities necessary to prepare for the implementation of a system of supported employment services.

(d) The requirements of §§ 363.11, 363.20, 363.21, and 363.50–363.52 do not apply to planning grants.

(e) The Secretary awards a planning grant of no more than $250,000 for up to 18 months.

(Authority: 29 U.S.C. 795l(c))

**§ 363.6 What regulations apply?**

The following regulations apply to the State Supported Employment Services Program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), Part 76 (State Administered Programs), Part 77 (Definitions that Apply to Department Regulations), Part 78 (Education Appeals Board) except for hearings under Subpart G of Part 861, and Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(b) The regulations in this Part 363.

(c) The following regulations in 34 CFR Part 361 (The State Vocational Rehabilitation Services Program):

§ 361.32; § 361.33; § 361.34; § 361.40; § 361.41; § 361.48; and § 361.49.

(Authority: 29 U.S.C. 795j and 711(c))

**§ 363.7 What definitions apply to the State Support Employment Services Program?**

(a) As used in this part—

"Competitive work" means work that is performed on a full-time basis or on a part-time basis, averaging at least 20 hours per week, and for which an individual is compensated in accordance with the Fair Labor Standards Act;

"Integrated work setting" means job sites where—

(1)(i) Most co-workers are not handicapped; and

(ii) Individuals with handicaps are not part of a work group of other individuals with handicaps; or

(2)(i) Most co-workers are not handicapped; and

(ii) When a job site described in paragraph (1)(ii) of this definition is not possible, individuals with handicaps are part of a small work group of not more that eight individuals with handicaps; or

(3) If there are no co-workers or the only co-workers are members of a small work group of not more than eight individuals, all of whom have handicaps, individuals with handicaps have regular contact with non-handicapped individuals, other than personnel providing support services, in the immediate work setting;

"On-going support services" means continuous or periodic job skill training services provided at least twice monthly at the work site throughout the term of employment to enable the individual to perform the work. The term also includes other support services provided at or away from the work site, such as transportation, personal care services, and counseling to family members, if skill training services are also needed by, and provided to, that individual at the work site;

"Supported employment" means—

(1) Competitive work in an integrated work setting with on-going support services for individuals with severe handicaps for whom competitive employment—

(i) Has not traditionally occurred; or

(ii) Has been interrupted or intermittent as a result of severe handicaps; or

(2) Transitional employment for individuals with chronic mental illness; and

"Traditionally time-limited post-employment services" means services that are—

(1) Needed to support and maintain an individual with severe handicaps in employment;

(2) Based on an assessment by the State of the individual's needs as specified in an individualized written rehabilitation program; and

(3) Provided for a period not to exceed 18 months before transition is made to extended services provided under a cooperative agreement pursuant to § 363.50.

"Transitional employment for individuals with chronic mental illness" means competitive work in an integrated work setting for individuals with chronic mental illness who may need on-going jobs skill training at the work site or other support services provided either at the work site or away from the work site to perform the work. The job placement may not necessarily be a permanent employment outcome for the individual; and

(b) The following terms used in this part are defined in 34 CFR 77.1: Fiscal Year; Nonprofit; Private; Secretary; and State

(c) The following terms used in this part are defined in 34 CFR Part 361: Act; Designated state unit; Individual with handicaps; Individual with severe handicaps; and State plan

(Authority: 29 U.S.C. 709(18), 711(c), and 795l)

## Subpart B—How Does a State Apply for a Grant?

**§ 363.10 What documents must a State submit to receive a grant?**

To receive a grant under this part, a State must—

(a) Submit to the Secretary, as part of the State plan under 34 CFR Part 361, a State plan supplement that meets the requirements of § 363.11; or

(b) For fiscal year 1987 only, submit an application for a planning grant in place of its allotment under this program.

(Authority: 29 U.S.C. 795l(c) and 795m(a))

**§ 363.11 What information and assurances must be included in the State plan supplement?**

Each State plan supplement must—

(a) *Designated State agency.* Designate the State unit or units for vocational rehabilitation services identified in the State plan submitted under 34 CFR Part 361 as the State agency or agencies to administer this program;

(b) *Results of needs assessment.* Summarize the results of the needs assessment of individuals with severe handicaps conducted under Title I of the Act when that assessment identifies the need for supported employment services. The results of the needs assessment must address the coordination and use of information within the State relating to section 618(b)(3) of the Education of the Handicapped Act;

(c) *Quality, scope, and extent of services.* Describe the quality, scope, and extent of supported employment services to be provided to individuals with severe handicaps under this program. The description must address the timing of the transition to on-going support services referred to in § 363.50(b)(2);

(d) *Distribution of funds.* Describe the State's goals and plans with respect to the distribution of funds received under § 363.20;

(e) *Assurances.* Provide assurances that—

(1) An evaluation of rehabilitation potential, as defined in section 7(5) of the Act—either under this part or under 34 CFR Part 361—is provided for each individual with severe handicaps who receives services under this program;

(2) An individualized written rehabilitation program as specified in 34 CFR 361.40 and 361.41 will be developed—either under this part or under 34 CFR Part 361—outlining the services to be provided to each individual served under this program, including a description of the long-term, on-going services needed and the identification of the agency to provide the continuing support;

(3) Services provided to individuals under this program will be coordinated with the individualized written rehabilitation program or education plan as required under section 102 of the Act, section 123 of the Developmental Disabilities Act of 1984, and sections 612(4) and 614(5) of the Education of the Handicapped Act;

(4) The State will conduct periodic reviews of the progress of individuals assisted under this program to determine whether services provided to those individuals should be continued, modified, or discontinued;

(5) The designated State agency or agencies will expend no more than five percent of the State's allotment for administrative costs of carrying out this program; and

(6) The State will make maximum use of services from public agencies, private nonprofit organizations, and other appropriate resources in the community to carry out this program;

(f) *Collaboration.* Demonstrate evidence of collaboration by and funding from relevant State agencies and private nonprofit organizations to assist in the provision of on-going supported employment services following the termination of time-limited services under this part; and

(g) *Other information.* Contain such other information and be submitted in the form and in accordance with the procedures that the Secretary may require.

(Authority: 29 U.S.C. 795m))

## Subpart C—How Does the Secretary Make a Grant?

### § 363.20 How does the Secretary allocate funds?

The Secretary allocates funds under this program in accordance with section 633(a) of the Act.

(Authority: 29 U.S.C. 7951(c))

### § 363.21 How does the Secretary reallocate funds?

The Secretary reallocates funds in accordance with section 633(b) of the Act.

(Authority: 29 U.S.C. 7951(b))

## Subpart D–E [Reserved]

## Subpart F—What Post-Award Conditions Must Be Met by a State?

### § 363.50 What collaborative agreements must the State develop?

(a) A designated State unit must enter into one or more written cooperative agreements or memoranda of understanding with other appropriate State agencies and private nonprofit organizations to ensure collaboration in a plan to provide supported employment services to individuals with severe handicaps.

(b) A cooperative agreement or memorandum of understanding must, at a minimum, specify the following:

(1) The training and traditionally time-limited post-employment services to be provided by the designated State unit with funds received under this part.

(2) The on-going or extended services to be provided by the other State agencies and private nonprofit organizations, following the termination of time-limited services under this part.

(3) The estimated funds to be expended by the participating party or parties in implementing the agreement or memorandum.

(4) The projected number of individuals with severe handicaps who will receive supported employment services under the agreement or memorandum:

(Authority: 29 U.S.C. 795m(b)(4) and 795n(b))

### § 363.51 What are the allowable administrative costs?

(a) *Administrative costs-general.* Expenditures are allowable for the following administrative costs:

(1) Administration of the State plan supplement for this program.

(2) Planning, program development, and personnel development to implement a system of supported employment services.

(3) Monitoring, supervision, and evaluation of this program.

(4) Technical assistance to other State agencies, private nonprofit organizations, and businesses and industries.

(b) *Limitation on administrative costs.* Except for planning grants which the Secretary may award in fiscal year 1987, not more than five percent of a State's allotment may be expended for administrative costs for carrying out this program.

(Authority: 29 U.S.C. 7951(c) and 795m(b)(5))

### § 363.52 What are the information collection and reporting requirements?

(a) A State shall collect and report information as required in 34 CFR 361.23 for each individual with severe handicaps served under this program.

(b) The State shall collect and report separately information for—

(1) Supported employment clients served under this program; and

(2) Supported employment clients served under 34 CFR Part 361.

(Authority: 29 U.S.C. 712 and 795o)

### § 363.53 What special conditions apply to services and activities under this program?

Each grantee shall coordinate the services provided to an individual under this part and under 34 CFR Part 361 to ensure that the services are complementary and not duplicative.

(Authority: 29 U.S.C. 795 n and q)

# Department of Education

**Office of Special Education and Rehabilitative Services**

**34 CFR Parts 371 and 386**

**Handicapped American Indian Vocational Rehabilitation Service Projects; Rehabilitation Training; Rehabilitation Long-term Training; Notice of Proposed Rulemaking**

DEPARTMENT OF EDUCATION
Office of Special Education and Rehabilitative Services
34 CFR Parts 371 and 386

# Handicapped American Indian Vocational Rehabilitation Service Projects; Rehabilitation Training: Rehabilitation Long-term Training

AGENCY: Department of Education.
ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing grants to provide services to American Indians with handicaps and grants for long-term training to implement amendments to the Rehabilitation Act of 1973 made by Pub. L. 99–506, the Rehabilitation Act Amendments of 1986.

The proposed regulations would implement the new statutory provisions for these two programs. One new provision permits a consortium of governing bodies of Indian tribes to apply for a grant as a single applicant under the American Indians with handicaps program. Another new provision requires the recipient of a scholarship under the long-term training program to work for a State rehabilitation agency or a nonprofit rehabilitation or related agency for two years for each year of assistance received or repay all or part of the amount of the scholarship plus interest.

DATE: Comments must be received on or before June 26, 1987.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Albert Rotundo, Rehabilitation Service Administration, Mary E. Switzer Building, 330 C Street, SW., Washington, DC 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Toby Lawrence, Rehabilitation Services Administration, Department of Education, Switzer Building, Room 3326, Washington, DC 20202, (202) 732–1351.

SUPPLEMENTARY INFORMATION:

## American Indians With Handicaps Program

The amendments permit a consortium of Indian tribes to apply for a grant as a single applicant and permit a waiver of the non-federal share where the applicant demonstrates that it does not have sufficient resources to contribute to the cost of the project.

In the proposed regulations the phrase "handicapped American Indian" has been changed to "American Indian with handicaps" to be consistent with the general reference change made by Congress substituting "individual with handicaps" for "handicapped individual."

No change was needed to implement the statutory provisions regarding priority consideration for funding the continuation of previously funded programs; the provision prohibiting funding of a separate service delivery system for Indians in non-reservation areas; and the provision regarding traditional services used by Indian tribes. These provisions are covered by the existing regulations.

## Long-Term Training Program

The proposed regulations add rehabilitation engineering, physical education, rehabilitation workshop and facility personnel, and specialized personnel for supported employment, to the list of professional disciplines for which long-term training funds may be expended.

Consistent with the new statutory provisions regarding scholarships, the regulations require that, as a condition for receipt of a scholarship, a scholar must agree to work for a State rehabilitation agency, or a nonprofit rehabilitation or related agency for two years for each year of training, within ten years of completion of the training, or repay all or part of the scholarship plus interest and collection costs. The work requirement would be prorated for partial years of training.

To avoid excessive administrative burden, the proposed regulations limit the application of the work-or-repay provisions to training leading to a certificate or degree. A document certifying attendance at a training course is not considered a certificate under these provisions. Typically, individuals in non-degree or non-certificate training courses already will be working in eligible jobs.

The proposed regulations also implement the statutory provision that limits training assistance to a maximum of four years. The proposed regulations interpret the limitation to refer to academic years in order to accommodate part-time students. Scholars with handicaps that seriously affect the completion of training may be allowed one additional academic year to complete the course of training.

The proposed regulations place the responsibility for tracking the scholar during the period of obligation under a scholarship agreement on a grantee, but retain with the Secretary responsibility for enforcing the agreement, including granting deferrals or exceptions to repayment, determining the amount of interest and collection costs, and establishing a payment schedule, including the amount and frequency of payment if collection is necessary.

The proposed regulations implementing the scholarship provisions are similar to the regulations in 34 CFR Part 653 implementing the Congressional Teacher Scholarship Program. Those regulations were published in 52 FR 10008; March 27, 1987.

## Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

## Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. The small entities that would be affected by these regulations are institutions of higher education and Indian tribes. However, the regulations would not have a significant economic impact on these entities because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

## Paperwork Reduction Act of 1980

Sections 386.42, 386.44, and 386.46 contain information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these regulations to the Office of Management and Budget (OMB) for its review.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: Joseph F. Lackey, Jr.

## Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

William J. Bennett,

*Secretary of Education.*

The Secretary proposes to amend Parts 371 and 386 of Title 34 of the Code of Federal Regulations as follows:

## PART 371—HANDICAPPED AMERICAN INDIAN VOCATIONAL REHABILITATION SERVICE PROJECTS

1. The authority citation for Part 371 is revised to read as follows:

Authority: 29 U.S.C. 711(c) and 750, unless otherwise noted.

2. The title of Part 371 is revised to read as follows:

## PART 371—VOCATIONAL REHABILITATION SERVICE PROJECTS FOR AMERICAN INDIANS WITH HANDICAPS

### § 371.41 [Amended]

3. In § 371.41(a)(2), removes the words "the handicapped individual" and add, in their place, the words "an individual with handicaps."

### §§ 371.21 and 371.41 [Amended]

4. In Part 371, remove the words "handicapped individuals" and add, in their place, the words "individuals with handicaps" in the following places:

(a) § 371.21 (d) and (g); and

(b) § 371.41(b).

### §§ 371.10, 371.21, 371.30, 371.42, 371.43 [Amended]

5. In Part 371, remove the words "handicapped American Indians" and add, in their place, the words "American Indians with handicaps" in the following places:

(a) § 371.10;

(b) § 371.21 (c), (d), (f), and (h);

(c) § 371.30(f)(2) (i) and (ii);

(d) § 371.42; and

(e) § 371.43(b).

### §§ 371.21 and 371.43 [Amended]

6. In Part 371, remove the words "handicapped American Indian" and add, in their place, the words "American Indian with handicaps" in the following places:

(a) § 371.21(e); and

(b) § 371.43(a).

7. Section 371.1 is revised to read as follows:

### § 371.1 What is the Vocational Rehabilitation Service Program for American Indians with Handicaps?

This program is designed to provide vocational rehabilitation services to American Indians with handicaps who reside on Federal or State reservations in order to prepare them for suitable employment.

(Authority: Sec. 130(a) of the Act; 29 U.S.C. 750(a))

### § 371.2 [Amended]

8. In § 371.2, add the words "and consortia of such governing bodies" after "Indian tribes".

9. Section 371.4 is amended by removing the paragraph designations under (b), and adding the following definition in alphabetical order to read as follows:

### § 371.4 What definitions apply to this program?

* * * * *

(b) * * *

"Consortium" means two or more eligible governing bodies of Indian tribes that make application as a single applicant under an agreement whereby each governing body is legally responsible for carrying out all of the activities in the application.

(Authority: Secs. 12(c) and 130 of the Act; 29 U.S.C. 711(c) and 750)

### § 371.20 [Amended]

10. In § 371.20, add after "governing body" the words "or consortium".

11. In § 371.21, paragraph (i) is revised to read as follows:

### § 371.21 What are the special application requirements related to the State plan program?

* * * * *

(i) Any American Indian with handicaps who is an applicant or recipient of services, and who is dissatisfied with a determination made by a counselor or coordinator under this program and files a request for a review, will be afforded a review under procedures developed by the grantee comparable to those under the provisions of section 102(d) (1)–(3) of the Act.

(Authority: Secs. 12(c) and 102(d) of the Act; 29 U.S.C. 711(c) and 722(d))

* * * * *

12. Section 371.40 is revised to read as follows:

### § 371.40 What are the matching requirements?

(a) *Federal share.* Except as provided in paragraph (c) of this section, the Federal share may not be more than 90 percent of the total cost of the project.

(b) *Non-Federal share.* The non-Federal share of the cost of the project may be in cash or in kind, fairly valued.

(c) *Waiver of non-Federal share.* In order to carry out the purposes of the program, the Secretary may waive the non-Federal share requirement, in part or in whole, only if the applicant demonstrates that it does not have sufficient resources to contribute the non-Federal share of the cost of the project.

(Authority: Secs. 12(c) and 130(a) of the Act; 29 U.S.C. 711(c) and 750(c))

13. Section 371.42 is revised to read as follows:

### § 371.42 How are services to be administered under this program?

(a) *Directly or by contract.* A grantee under this Part may provide the vocational rehabilitation services directly or it may contract or otherwise enter into an agreement with a designated State unit, a rehabilitation facility, or another agency to assist in the implementation of the vocational rehabilitation service program for American Indians with handicaps.

(b) *Inter-tribal agreement.* A grantee under this Part may enter into an inter-tribal arrangement with governing bodies of other Indian tribes for carrying out a project that serves more than one Indian tribe.

(c) *Comparable service program.* To the maximum extent feasible, services provided by a grantee under this Part must be comparable to rehabilitation service provided under this title to other individuals with handicaps residing in the State.

(Authority: Secs. 12(c) and 130 of the Act; 29 U.S.C. 711(c) and 750)

## PART 386—REHABILITATION TRAINING: REHABILITATION LONG-TERM TRAINING

14. The authority citation for Part 386 is revised to read as follows:

Authority: 29 U.S.C. 711(c) and 774, unless otherwise noted.

15. Section 386.1 is revised to read as follows:

### § 386.1 What is the Rehabilitation Long-Term Training Program?

This program is designed to provide academic and non-academic training in areas of personnel shortages identified by the Secretary and published as a

notice in the Federal Register. These areas may include—

(a) Rehabilitation engineering;
(b) Rehabilitation medicine;
(c) Rehabilitation nursing;
(d) Rehabilitation counseling;
(e) Rehabilitation social work;
(f) Rehabilitation psychiatry;
(g) Rehabilitation psychology;
(h) Rehabilitation dentistry;
(i) Physical therapy;
(j) Occupational therapy;
(k) Speech-language pathology and audiology;
(l) Physical education;
(m) Therapeutic recreation;
(n) Rehabilitation facility administration;
(o) Vocational evaluation and work adjustment;
(p) Rehabilitation workshop and facility personnel;
(q) Prosthetics and orthotics;
(r) Rehabilitation of the blind;
(s) Rehabilitation of the deaf;
(t) Rehabilitation of the mentally ill;
(u) Rehabilitation job development and job placement;
(v) Specialized personnel for supported employment;
(w) Undergraduate education in the rehabilitation services;
(x) Rehabilitation administration;
(y) Independent living;
(z) Client assistance; and
(aa) Other fields contributing to the rehabilitation of individuals with handicaps, especially individuals with severe handicaps, including homebound or institutionalized individuals.

(Authority: Secs. 304 (a) and (b) of the Act; 29 U.S.C. 774 (a) and (b))

16. Section 386.4 is revised to read as follows:

**§ 386.4 What definitions apply to this program?**

The following definitions apply to this program:

(a) The definitions in 34 CFR Part 385.

(b) The following definitions:

*"Academic year"* means a full-time course of study—

(1) Taken for the period totaling at least 9 months; or

(2) Taken for the equivalent of at least 2 semesters, 2 trimesters, or 3 quarters.

*"Certificate"* means a recognized educational credential awarded by a grantee under this Part which attests to the completion of a specified series of courses or program of study.

*"Scholar"* means an individual who is enrolled in a certificate or degree granting course of study in one of the areas listed in § 386.1 and who receives assistance under this part.

*"Scholarship"* means a training award a scholar.

*"Training award"* means an award of financial assistance to an individual for training in one or more of the areas designated in § 386.1.

(Authority: Sec. 12(c) of the Act; 29 U.S.C. 711(c))

**§ 386.30 [Amended]**

17. In § 386.30(c), "baisis" is corrected to read "basis."

18. In § 386.30(h)(2)(iii), remove the words "physically and mentally handicapped persons, especially those who are severely handicapped" and add, in their place, the words "persons with handicaps, especially persons with severe handicaps".

19. Section 386.42 is revised to read as follows:

**§ 386.42 What are the requirements affecting applicants for and recipients of training awards?**

(a) An individual applying for a training award—

(1)(i) Shall produce documentation that the individual is—

(A) A U.S. citizen or national; or

(B) A permanent resident of the Republic of the Marshall Islands, Federated States of Micronesia, Republic of Palau, or the Commonwealth of the Northern Mariana Islands; or

(ii) Shall produce documentation from the U.S. Immigration and Naturalization Service that he or she—

(A) Is a lawful permanent resident of the United States; or

(B) Is in the United States for other than a temporary purpose with the intention of becoming a citizen or permanent resident; and

(2) Must not be an employee of the Federal government;

(3) Shall express interest in a career in clinical practice, administration, supervision, teaching, or research in the vocational rehabilitation or independent living rehabilitation of persons with handicaps, especially persons with severe handicaps; and

(4) Shall provide assurances that the individual expects to maintain or seek employment in a State vocational rehabilitation agency or in a nonprofit rehabilitation or related agency providing services to individuals with handicaps or individuals with severe handicaps under an agreement with a State agency.

(b) An individual who receives a training award—

(1) Shall receive the training at the educational institution or agency designated in the training award; and

(2) Must not accept payment of educational allowances from any other Federal, State, or local public or private nonprofit agency if that allowance is conditioned on an employment obligation that conflicts with the individual's obligation under § 386.42(a)(4) or § 386.44(c)(1).

(Authority: Secs. 12(c) and 304(b) of the Act; 29 U.S.C. 711(c) and 774(b))

20. A new § 386.43 is added to read as follows:

**§ 386.43 What are the additional requirements affecting scholars?**

(a) *Requirements for a scholar.* A scholar shall—

(1) Enter into a written agreement with grantee that meets the terms and conditions required in § 386.44;

(2) Be enrolled in a course of study leading to a certificate or degree in one of the fields designated in § 386.1; and

(3) Maintain satisfactory progress toward the certificate or degree as determined by the grantee.

(b) *Limits on scholarships.* (1) Assistance is limited to the individual's cost of attendance at the institution for no more than four academic years except that the grantee may allow one additional academic year if the grantee determines that an individual has a handicap that seriously affects the completion of the course of study.

(2) If a scholarship, when added to the amount the scholar is to receive for the same academic year under Title IV of the Higher Education Act, would otherwise exceed the scholar's cost of attendance, the grantee shall reduce the scholarship by the amount in which the combined awards would be in excess of the cost of attendance.

(Authority: Secs. 12(a) and 304(b) of the Act; 29 U.S.C. 711(c) and 774(b))

21. A new § 386.44 is added to read as follows:

**§ 386.44 What assurances must be provided by a grantee that intends to provide scholarships?**

A grantee under this Part that intends to grant scholarships shall provide the following assurances:

(a) *Requirement for agreement.* No individual will be provided a scholarship without entering into a written agreement containing the terms and conditions required by this section.

(b) *Disclosure to applicants.* The terms and conditions of the agreement that the grantee will enter into with a scholar will be fully disclosed in the application for scholarship.

(c) *Form and terms of agreement.* Each scholarship agreement with a grantee will be in such form and contain such terms as the Secretary requires.

including at a minimum the following provisions:

(1) Within the ten-year period after cessation of enrollment in the course of study for which the scholarship is awarded, the scholar will obtain and maintain employment—in a State rehabilitation agency or in a nonprofit rehabilitation or related agency providing services to individuals with handicaps under an agreement with a State agency—on a full-time basis for a period of not less than two years for each academic year for which a scholarship is received. The work requirement for portions of an academic year are pro-rated.

(2) The employment obligation in paragraph (c)(1) of this section as applied to a part-time scholar is based on the accumulated academic years of training for which scholarship is received.

(3) Until the scholar has satisfied the employment obligation described in paragraph (c)(1) of this section, the scholar will inform the grantee of any change of name, address or employment status and will document employment satisfying the terms of the agreement.

(4) Subject to the provisions in § 386.45 regarding a waiver or deferral, when the scholar enters repayment status under § 386.47(e), the amount of the scholarship that has not been retired through eligible employment will constitute a debt owed the United States that—

(i) Will be repaid by the scholar, including interest and costs of collection as provided in § 386.47; and

(ii) May be collected by the Secretary by any means permitted in Federal law for the collection of debts, in the case of the scholar's failure to meet the obligation of § 386.47.

(d) *Executed agreement.* The grantee will provide an original copy of the executed agreement to the Secretary.

(e) *Standards for satisfactory progress.* The grantee establishes, publishes, and applies reasonable standards for measuring whether a scholar is maintaining satisfactory progress in the scholar's course of study. The Secretary considers an institution's standards to be reasonable if the standards—

(1) Conform with the standards of satisfactory progress of the nationally recognized accrediting agency that accredits the institution, if the institution is accredited by such an agency, and if the agency has such standards;

(2) For a scholar enrolled in an eligible program who is to receive assistance under the Rehabilitation Act, are the same as or stricter than the institution's standards for a student enrolled in the same academic program who is not receiving assistance under the Rehabilitation Act; and

(3) Include the following elements:

(i) Grades, work projects completed, or comparable factors which are measurable against a norm;

(ii) A maximum time frame in which the scholar must complete the scholar's educational objective, degree, or certificate. The time frame shall be—

(A) Determined by the institution;

(B) Based on the scholar's enrollment status; and

(C) Divided into increments, not to exceed one academic year. At the end of each increment, the institution shall determine whether the scholar has successfully completed a minimum percentage of work toward the scholar's educational objective, degree, or certificate for all increments completed. The minumum percentage of work shall be the percentage represented by the number of increments completed by the scholar compared to the maximum time frame set by the instituion;

(iii) Consistent application of standards to all scholars within categories of students e.g., full-time, part-time, undergraduates, graduate students and programs established by the institution;

(iv) Specific policies defining the effect of course incompletes, withdrawals, repetitions, and noncredit remedial courses on satisfactory progress; and

(v) Specific procedures for appeal of a determination that a scholar is not making satisfactory progress and for reinstatement of aid.

(f) *Tracking system.* The grantee has established policies and procedures to determine compliance of the scholar with the terms of the agreement.

(g) *Reports.* The grantee makes reports to the Secretary that are necessary to carry out the Secretary's functions under this Part.

(Authority: Secs. 12(c) and 304(b) of the Act; 29 U.S.C. 711(c) and 774(b))

22. A new § 386.45 is added to read as follows:

**§ 386.45 Under what circumstances does the Secretary grant a deferral or exception to performance or repayment under a scholarship agreement?**

A deferral or repayment exception to the requirements of § 386.44(c)(1) may be granted, in whole or part, by the Secretary as follows:

(a) Repayment is not required if the scholar—

(1) Is unable to continue the course of study or perform the work obligation because of an impairment that is expected to continue indefinitely or result in death; or

(2) Has died.

(b) Repayment of a scholarship may be deferred during the time the scholar is—

(1) Engaging in a full-time course of study at an institution of higher education;

(2) Serving, not in excess of three years, on active duty as a member of the armed services of the United States;

(3) Serving as a volunteer under the Peace Corps Act;

(4) Serving as a full-time volunteer under Title I of the Domestic Volunteer Service Act of 1973;

(5) Temporarily totally disabled, for a period not to exceed three years; or

(6) Unable to secure employment as required by the agreement by reason of the care provided to a disabled spouse for a period not to exceed twelve months.

(Authority: Secs. 12(c) and 304(b) of the Act; 29 U.S.C. 711(c) and 744(b))

23. A new § 386.46 is added to read as follows:

**§ 386.46 What must a scholar do to obtain a deferral or exception to performance or repayment under a scholarship agreement?**

(a) *Written application.* A written application must be made to the Secretary to request a deferral or exception to performance or repayment of a scholarship.

(b) *Documentation.* (1) Documentation must be provided to substantiate the grounds for a deferral or exception.

(2) Documentation necessary to substantiate an exception under § 386.45(a)(1) or a deferral under § 386.45(b)(5) must include a sworn affidavit from a qualified physican.

(3) Documentation to substantiate an exception under § 386.45(a)(2) must include a death certificate or other evidence conclusive under State law.

(Authority: Secs. 12(c) and 304(b) of the Act; 29 U.S.C. 711(c) and 744(b))

24. A new § 386.47 is added to read as follows:

**§ 386.47 What are the consequences of a scholar's failure to meet the terms and conditions of a scholarship agreement?**

In the event of a failure to meet the terms and conditions of a scholarship agreement or to obtain a deferral or exception as provided in § 386.45, the scholar shall repay all or part of the scholarship.

(a) *Amount.* The amount of scholarship to be repaid is proportional to the employment obligation not completed.

(b) *Interest rate.* The Secretary charges the scholar interest on the unpaid balance owed in accordance with 31 U.S.C. 3717.

(c) *Interest accrual.*

(1) Interest on the unpaid balance accrues from the date the scholar is determined to have entered repayment status under paragraph (e) of this section.

(2) Any accrued interest is capitalized at the time the scholar's repayment schedule is established.

(3) No interest is charged for the period of time during which repayment has been deferred under § 380.45.

(d) *Collection costs.* Under the authority of 31 U.S.C. 3717, the Secretary may impose reasonable collection costs.

(e) *Repayment status.* A scholar enters repayment status on the first day of the first calendar month after the earliest of the following dates, as applicable:

(1) The date the scholar informs the Secretary he or she does not plan to fulfill the employment obligation under the agreement.

(2) Any date when the scholar's failure to begin or maintain employment makes it impossible for that individual to complete the employment obligation within the ten years after cessation of enrollment in the course of study.

(f) *Amounts and frequency of payment.* The scholar shall make payments to the Secretary that cover principal, interest, and collection costs according to a schedule established by the Secretary.

(Authority: Secs. 12(c) and 304(b) of the Act; 29 U.S.C. 711(c) and 744(b))

Title 3—

The President

Proclamation 5862 of May 23, 1987

## National Day of Mourning for the Victims of United States Ship STARK

By the President of the United States of America

A Proclamation

Every year, in the beautiful springtime, the American people pause on a special day to pay the heartfelt tribute of love and remembrance to all the sons and daughters of our land who have laid down their lives on the altar of liberty. This year, our Memorial Day remembrance is tinged with fresh sorrow as we honor and mourn the brave men taken from us a short week ago.

No words of ours can pay them the full tribute that is their due: their service, sacrifice, and love of country crown their memory on this day of grief and will do so as long as there is an America that defends freedom and honors its heroic champions. Let us pay tribute, then, to the dead and injured of United States Ship STARK by making their faithfulness and courage and love our own, ever and always. Without Americans like them, there would be no land of the free and no home of the brave; because of Americans like them, the lamp of liberty burns on undimmed, unvanquished, and unquenchable.

In solemn recognition of the valiant crew members of United States Ship STARK who lost their lives or were injured, the Congress, by House Joint Resolution 290, has designated May 25, 1987, as "National Day of Mourning for the Victims of the U.S.S. STARK" and has authorized and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby appoint Monday, May 25, 1987, as National Day of Mourning for the Victims of United States Ship STARK. I call upon all Americans to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 23rd day of May, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and eleventh.

Ronald Reagan

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC, Chicago, IL, and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

## THE FEDERAL REGISTER

## WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

### WASHINGTON, DC

WHEN: June 9, at 9 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: Gertrude E. Belton, 202-523-5237

### CHICAGO, IL

WHEN: July 8, at 9 a.m.
WHERE: Room 204A, Everett McKinley Dirksen Federal Building, 219 S. Dearborn Street, Chicago, IL.
RESERVATIONS: Call the Chicago Federal Information Center, 312-353-0339.

### BOSTON, MA

WHEN: July 15, at 9 a.m.
WHERE: Main Auditorium, Federal Building, 10 Causeway Street, Boston, MA.

# Rules and Regulations

Federal Register
Vol. 52, No. 102
Thursday, May 28, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 915 and 944

## Avocados Grown in South Florida and Imported Avocados; Maturity Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule establishes continuous minimum maturity requirements for shipments of fresh avocados grown in South Florida, and for avocados imported into the United States. The purpose of such maturity regulations is to prevent shipments of immature avocados to the fresh market. Providing fresh markets with mature fruit is important in creating and maintaining consumer satisfaction and sales. Such action is designed to promote orderly marketing conditions for avocados in the interest of producers and consumers.

DATES: Section 915.332 becomes effective May 28, 1987 and § 944.51 becomes effective June 1, 1987.

FOR FURTHER INFORMATION CONTACT: James M. Scanlon, Acting Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250, telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1, and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (the Act, 7 U.S.C. 601-674), and rules promulgated thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are an estimated 34 handlers of Florida avocados subject to regulation under the marketing order for avocados grown in South Florida, and an estimated 20 importers who import avocados into the United States. In addition, there are approximately 303 avocado producers in South Florida. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $100,000, and agricultural services firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers, importers, and producers are believed to be small entities.

Fresh Florida avocado shipments are projected at 1,200,000 bushels (55 pounds net weight) for the 1987-88 season, compared with fresh shipments of 956,217 bushels shipped in 1986-87, 1,110,130 bushels in 1985-86, and 1,149,017 bushels in 1984-85. Florida avocados are shipped every month of the year. The new season normally begins with light shipments of early varieties in late May or early June, with heavy shipments following in late June or early July. Florida avocados compete primarily with avocados produced in California, which had shipments of 6,792,172 bushels during the 12-month period which ended March 31, 1987. Avocados imported into the United States amounted to about 209,000 bushels in 1985-86.

Pursuant to the requirements set forth in the RFA, the Administrator of the Agricultural Marketing Service has considered the economic impact on small entities. This final rule establishes minimum maturity requirements applicable to fresh shipments of avocados grown in South Florida on a continuous basis beginning with the 1987-88 season. The requirements for Florida avocados are intended to prevent the shipment of immature avocados to improve buyer confidence in the marketplace, and foster increased consumption. Similar maturity requirements have been issued each year over the past several seasons, and Florida avocado producers and handlers have found such requirements beneficial in the successful marketing of their avocado crops.

Some Florida avocado shipments would be exempt from the maturity requirements. Handlers may ship up to 55 pounds of avocados during any one day under a minimum quantity exemption, and may make gift shipments of up to 20 pounds of avocados in individually addressed containers. Also, avocados utilized in commercial processing would not be covered by the maturity requirements.

The final rule also establishes minimum maturity requirements applicable to imported fresh avocados on a continuous basis. The import requirements are similar to the requirements in effect during the 1986-87 season. The application of such requirements to imported avocados is required pursuant to section 8e of the Act. That section requires that certain imported commodities, including avocados, must meet the same or comparable requirements applicable to the domestic commodity under a Federal marketing order. An exemption provision in the import maturity regulation permits persons to import up to 55 pounds of avocados exempt from the import requirements.

It is the Department's view that under the maturity regulations the impact of the regulation upon growers, handlers, and importers would not be adverse. The application of the maturity requirements to both Florida and imported avocados over the past several years have helped to assure that only mature avocados were shipped to fresh markets. The Avocado Administrative Committee continues to believe that the maturity requirements for Florida avocados are needed to improve grower returns. Although compliance with these maturity requirements would affect costs to handlers and importers, these costs appear to be significantly offset

when compared to the potential benefits of assuring the trade and consumers of mature avocados.

A proposed rule was issued April 17, 1987, and published in the Federal Register (52 FR 13088, April 24, 1987) pertaining to the proposed maturity requirements. Interested persons had until May 4, 1987 to file comments. No comments were received. However, based on a recommendation of the committee at its April 8, 1987 meeting, the shipping schedule for the Brookslate variety has been changed in this final rule from that in the proposed rule. In addition, minor typographical errors in the shipping schedules for the Hardee, Tower-2, and Catalina varieties have been corrected in this final rule.

The Florida avocado maturity regulation is issued under the marketing agreement, and Order No. 915, both as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The maturity requirements applicable to Florida avocado shipments were unanimously recommended by the Avocado Administrative Committee. The committee works with the Department in administering the marketing agreement and order program.

The Florida avocado maturity regulation establishes maturity requirements for fresh shipments of Florida avocados for the 1987–88 season and for succeeding seasons as well. These maturity requirements are in terms of minimum weights or diameters for specified time periods during the shipping season for 60 varieties and 2 seedling types of avocados grown in Florida. The starting date of the requirements is switched from Wednesday of each week to Monday of each week. Historically, the requirements have always begun on Moday each week. In 1986, the starting days were switched to Wednesday to assist handlers in selling to some major chain stores. However, the switch to Wednesday did not accomplish the industry's objectives and the committee decided to go back to Monday.

Such requirements are used primarily during the first part of the harvest season for each variety to make sure that the avocados are sufficiently mature to complete the ripening process prior to shipment. Another maturity requirement based on the skin color of the fruit is also used to determine maturity for certain varieties of avocados which turn red or purple when mature. A minimum grade requirement of U.S. No. 2 is currently in effect on a continuous basis for Florida avocados under § 915.306 (7 CFR Part 915). The maturity requirements are designed to make sure that all shipments of Florida avocados are mature, so as to provide consumer satisfaction essential for the successful marketing of the crop, and to provide the trade and consumers with an adequate supply of mature avocados in the interest of producers and consumers.

Florida avocado maturity regulation (§ 915.331—51 FR 18565, May 21, 1986; 52 FR 2100, January 20, 1987) and avocado import maturity regulation (§ 944.30—51 FR 18565, May 21, 1986) were issued May 16, 1986, as an interim final rule. A period was provided for interested persons to submit written comments on this rule. The comment period ended June 20, 1986, and no comments were received. Subsequently, the interim final rule was amended on January 14, 1987, to permit certain weights and diameters of Brookslate variety avocados to be shipped earlier than under the interim final rule (52 FR 2100, January 20, 1987). The minimum weight and diameter requirements established by the interim and amended interim final rules expired on February 17, 1987, and the color maturity requirements expired on April 30, 1987. In view of these circumstances, the Department has determined that no useful purpose would be served by issuing a final rule on the two previous interim actions.

As indicated earlier, the avocado import maturity regulation is issued under section 8e (7 U.S.C. 608e–1) of the Act. Section 8e of the Act requires that when certain domestically produced commodities, including avocados, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements. Comparable requirements may be issued whenever the Secretary determines that the application of restrictions under a marketing order to an imported commodity is not practicable because of variations in characteristics between the imported and domestic commodity. The avocado import maturity regulation is prescribed in § 944.31. That section establishes comparable minimum weight and diameter maturity requirements for avocados imported into the United States, based on the maturity requirements specified in paragraph (a)(2) of § 915.332 for avocados grown in Florida. Moreover, avocado import grade requirements are currently in effect on a continuous basis under § 944.28 (7 CFR Part 944). Such grade requirements specify that all avocados imported from all foreign countries must grade at least U.S. No. 2, which requires that the avocados be mature.

The domestic maturity requirements for specified periods are based on the growing, harvesting, and maturity periods for the various varieties of Florida avocados. The import maturity requirements for avocados grown in southern hemisphere countries such as Chile where practically all imported southern hemisphere avocados have originated in recent years, do not include minimum weight or diameter requirements. This is necessary because the growing, harvesting, and maturity periods for the various varieties of avocados grown in the southern hemisphere countries do not correspond with those in Florida, and it would be impracticable to apply the minimum weight or diameter requirements developed for Florida avocados to the imports from these origins. Avocados from foreign countries in close proximity to Florida with similar growing, harvesting, and maturity periods have met these maturity requirements without any apparent problems. Hence, the import maturity requirements applicable to avocados grown in northern hemisphere countries, such as the Bahamas, the Dominican Republic, and Costa Rica where practically all northern hemisphere imported avocados have originated in recent years, include minimum weight and diameter requirements.

The import maturity requirements based on skin color will apply to avocados which turn red or purple when mature grown in both the southern and northern hemispheres, because these varieties turn color when mature regardless of where grown. The U.S. No. 2 grade requirement also applies regardless of whether or not the avocados were grown in a southern or northern hemisphere country.

The maturity requirements contained in this final rule will continue in effect from marketing season to marketing season indefinitely unless modified, suspended, or terminated by the Secretary, upon the recommendation and information submitted by the committee, or upon other information available to the Secretary. Heretofore, maturity regulations issued under Marketing Order 915 were effective for a single marketing season. However, over the past several years the same maturity requirements have been imposed each season without substantial revision. The maturity requirements are expected to continue with little or no change from season to season. Therefore, it appears unnecessary to issue such regulations

for only a single season. In addition, this action should result in a reduction in operational costs to the committee and the government.

Although, the maturity requirements in the final rule would be effective for an indefinite period, the marketing order requires the committee to meet prior to or during each season to consider recommendations for modification, suspension, or termination of the Florida avocado regulation. Prior to the making of any such recommendations, the committee submits to the Secretary a marketing policy for the season including an analysis of supply and demand factors having a bearing on the marketing of the crop. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department evaluates committee recommendations and information submitted by the committee, comments filed, and other available information, and determines whether modification, suspension, or termination of the regulations on shipments of avocados would tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is hereby found that good cause exists for not postponing the effective date of this final rule until 30 days after publication in the Federal Register because: (1) This action is based upon the unanimous recommendation of the committee at a public meeting; (2) affected persons will not need additional time to comply with the maturity requirements specified in the rule; and (3) notice of the proposed maturity requirements was published in the Federal Register and no objections were received.

It is hereby found that establishing the maturity requirements, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

**List of Subjects**

*7 CFR Part 915*

Marketing agreements and orders, Avocados, Florida.

*7 CFR Part 944*

Food grades and standards, Imports, Avocados.

1. The authority citation for 7 CFR Parts 915 and 944 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

## PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

2. A new § 915.332 is added to read as follows:

**§ 915.332 Florida avocado maturity regulation.**

(a) No handler shall handle any variety of avocados grown in the production area unless:

(1) Any portion of the skin of the individual avocados has changed to the color normal for that fruit when mature for those varieties which normally change color to any shade of red or purple when mature, except for the Linda variety; or

(2) Such avocados meet the minimum weight or diameter requirements for the specified Monday through Sunday effective periods for each variety listed in the following TABLE I: *Provided*, That avocados may not be handled prior to the earliest date specified in column 2 of such table for the respective variety: *Provided further*, That up to a total of 10 percent, by count of the individual fruit in each lot may weigh less than the minimum specified or be less than the specified diameter, except that no such avocados shall be over 2 ounces lighter than the minimum weight specified for the variety: *Provided further*, That up to double such tolerance shall be permitted for fruit in an individual container in a lot.

[1] Avocados of the West Indian type varieties and the West Indian type seedlings not listed elsewhere in Table I.
[2] Avocados of the Guatemalan type varieties, hybrid varieties, and unidentified seedlings not listed elsewhere in Table I.

(b) The term "diameter" means the greatest dimension measured at a right angle to a straight line from the stem to the blossom end of the fruit.

## PART 944—FRUITS; IMPORT REGULATIONS

3. A new § 944.31 is added to read as follows:

### § 944.31 Avocado import maturity regulation.

(a) Pursuant to section 8e of the Act and Part 944-Fruits; Import Regulations, the importation into the United States of any avocados is prohibited unless such avocados meet the requirements specified in § 915.332 Florida Avocado Maturity Regulation, for avocados grown in South Florida under M.O. 915 (7 CFR Part 915): *Provided,* That the minimum weight or diameter maturity requirements for specific time periods for various varieties of avocados specified in paragraph (a)(2) of that section shall not apply to avocados grown in countries in the southern hemisphere.

(b) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, is designated as the

governmental inspection service for certifying the grade, size, quality, and maturity of avocados that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of avocados, is required on all imports. The inspection and certification services will be available upon application in accordance with the rules and regulations governing inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51) and in accordance with the regulation designating inspection services and procedure for obtaining inspection and certification (7 CFR 944.400).

(c) The term "importation" means release from custody of the United States Customs Service.

(d) Any person may import up to 55 pounds of avocados exempt from the requirements specified in this section.

(e) Any lot or portion thereof which fails to meet the import requirements prior to or after reconditioning may be exported or disposed of under the supervision of the Federal or Federal-State Inspection Service with the costs of certifying the disposal of such lot borne by the importer.

Dated: May 21, 1987.

Ronald L. Cioffi,

*Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

**7 CFR Part 1106**

**Milk in the Southwest Plains Marketing Area; Order Suspending a Certain Provision**

**AGENCY:** Agricultural Marketing Services, USDA.

**ACTION:** Suspension of a rule.

**SUMMARY:** This action suspends a portion of the "producer milk" definition of the Southwest Plains order for the months of May-August 1987. The suspension was requested by Mid-America Dairymen, Inc., a cooperative association that represents a substantial number of producers who supply milk for such market. The suspended provision requires that one day of a producer's milk production be physically received at a pool plant during the month to qualify such dairy farmer's milk for movement directly from the farm to nonpool manufacturing plants in such month. The action is necessary to eliminate uneconomic milk movements solely to qualify for pooling the milk of producers who have been supplying the market's fluid needs.

**EFFECTIVE DATE:** May 28, 1987, for the months of May-August 1987.

**FOR FURTHER INFORMATION CONTACT:** John F. Borovies, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agricultural, Washington, DC 20250, (202) 447-2089.

**SUPPLEMENTARY INFORMATION:** Prior document in this proceeding:

Notice of Proposed Suspension: Issued April 24, 1987; published May 5, 1987 (52 FR 16402).

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action lessens the regulatory impact of the order on certain milk handlers and assures that dairy farmers who have been supplying the market's fluid milk needs will continue to have their milk pooled and priced under the order and thereby receive the benefits that accure from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and of the order regulating the handling of milk in the Southwest Plains marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on May 5, 1987 (52 FR 16402) concerning a proposal to suspend a certain provision of the order. Interested persons were given an opportunity to file written data, views and arguments thereon. No views opposing the action were received.

After consideration of all relevant material, including the proposal in the notice and other available information, it is hereby found and determined that for the months of May-August 1987 the following provision of the order does not tend to effectuate the declared policy of the Act:

In § 1106.13, paragraph (d)(1) in its entirety.

**Statement of Consideration**

Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that represents and substantial number of producers who supply milk for the Southwest Plains market, requested that a portion of the "producer milk" definition be suspended for the months of May-August 1987. The order's "touch-base" provision, which requires that a dairy farmer's milk be physically received at a pool plant at least once during the month to qualify such person's milk for movement directly from the farm to manufacturing outlets in such month and still be pooled, is hereby suspended for the four-month period requested by proponent.

Two other suppliers of milk for the market, Associated Milk Producers, Inc., another cooperative that represents a substantial number of the market's producers, and Kraft, Inc., support this action.

Proponent cooperative is making uneconomic milk movements solely to qualify for pooling the milk it is marketing for dairy farmers under the terms and condition of the current order provisions. This action is warranted because of changes in the market's structure. Since the Foremost distributing plant at Springfield closed late last year, Mid-Am has experienced difficulty pooling all of its milk supplies located in the heavy production area of southwestern Missouri that have been associated with the Southwest Plains market. Mid-Am in unable to attach all of the milk of its southwestern Missouri producers with the conveniently located remaining distributing plant of Hiland Dairy at Springfield because such plant must account for 50 percent of its receipts as Class I route disposition to qualify as a pool plant. Because of the touch-base and Class I route disposition requirements that produces and plants must meet each month to qualify milk for pool status under the Southwest Plains order, some Mid-Am's milk was not pooled during March.

To prevent this from happening in the future, Mid-Am reassigned several producers located in the Springfield area to its pool balancing plant at Lebanon, Missouri, which is about 50 miles from Springfield and represents the nearest available pool plant. By hauling the milk to the Lebanon plant, the cooperative assures that such producers have met the touch-base requirement and that the milk of such dairy farmers may now be moved directly from the farm to nonpool plants for manufacturing. However, since the Lebanon plant does not have manufacturing facilities, the milk is reloaded and hauled back to the cooperative's nonpool manufacturing plant in Springfield.

A suspension is needed to prevent a continuation of these uneconomic milk marketing practices through the summer months. Without a suspension for the months requested, it would be necessary for Mid-Am to continue making such inefficient milk movements to ensure that the milk of its dairy farmers who

have been associated with the market will continue to share in the proceeds from the higher-valued fluid milk sales under the order.

This action will not permit handlers to pool additional milk under the order because the monthly percentage limits on diversions by handlers will continue to apply during the months of May-August. However, the suspension will provide more flexibility to the market's milk suppliers and thereby enable such handlers to market more efficiently the milk of dairy farmers. Accordingly, the "touch-base" provision is suspended for the months of May-August 1987.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure a continuation of orderly marketing conditions in the marketing area in that it will ensure that dairy farmers who have been supplying the market's fluid needs will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded an opportunity to file written data, views or arguments concerning this suspension action. No comments in opposition to this action were received.

Therefore, good cause exists for making this order effective upon publication in the Federal Register.

**List of Subjects in 7 CFR Part 1106**

Milk marketing orders, Milk, Dairy products.

*It is therefore ordered,* That the aforesaid provision of § 1106.13(d)(1) of the Southwest Plains order is hereby suspended for the months of May-August 1987.

**PART 1106—MILK IN THE SOUTHWEST PLAINS MARKETING AREA**

**[Airspace Docket No. 87–ASO–5]**

## Proposed Designation of Transition Area, Roxboro, NC

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** The amendment designates the Roxboro, North Carolina, transition area to accommodate Instrument Flight Rule (IFR) operations at Person County Airport. This action lowers the base of controlled airspace from 1,200 to 700 feet above the surface in the vicinity of the airport. An instrument approach procedure, based on the proposed Person County nondirectional radio beacon (RBN), has been developed to serve the airport and the controlled airspace is required for protection of IFR aeronautical activities.

**EFFECTIVE DATE:** 0901 UTC; July 30, 1987.

**FOR FURTHER INFORMATION CONTACT:** Herbert A. Wachsman, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

**SUPPLEMENTARY INFORMATION:**

**History**

On February 24, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by designating the Roxboro, North Carolina, transition area. This action will provide controlled airspace for executing a new instrument approach procedure to Person County Airport. The operating status of the airport is changed from VFR to IFR and establishment of the RBN approved (51 FR 47255). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6C dated January 2, 1987.

**The Rule**

This amendment to Part 71 of the Federal Aviation Regulations designates the Roxboro, North Carolina, transition area to accommodate IFR operations at the Person County Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routing amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (IFR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition area.

**Adoption of the Amendment**

**PART 71—[AMENDED]**

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

**Roxboro, North Carolina (New)**

That airspace extending upward from 700' above the surface within a 6.5 mile radius of the Person County Airport (Lat. 36°17'57"N., Long. 78°59'01"W.).

Issued in East Point, Georgia, on May 13, 1987.

**William D. Wood,**

*Acting Manager, Air Traffic Division, Southern Region.*

BILLING CODE 4910-13-M

14 CFR Part 95

[Docket No. 25382; Amdt. No. 337]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: June 4, 1987.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFS–230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribes new, amended, suspended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference.

The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adoping this amendment is unnecessary, impracticable, and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 95

Aircraft, Airspace.

Issued in Washington, DC on May 20, 1987.

William T. Brennan,

*Acting Director of Flight Standards.*

Adoption of the Amendment

Accordingly and pursuant to the authority delegated to me by the Administrator, Part 95 of the Federal Aviation Regulations (14 CFR Part 95) is amended as follows effective at 0901 GMT:

PART 95—[AMENDED]

1. The authority citation for Part 95 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354 and 1510; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 95 is amended to read as follows:

[Docket No. 25272; Amdt. No. 1347]

## Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

*Incorporation by reference*—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

*For Examination—*

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

*For Purchase—*

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

*By Subscription—*

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFS–230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

## U.S. Trade in Services; Benchmark Survey of Selected Services Transactions With Unaffiliated Foreign Persons—1986

**AGENCY:** Bureau of Economic Analysis, Commerce.

**ACTION:** Final rule.

**SUMMARY:** This notice sets forth final rules providing for a new survey, the BE-20 Benchmark Survey of Selected Services Transactions with Unaffiliated Foreign Persons, covering 1986. The data from the survey will be used to develop U.S. trade policy and support U.S. negotiations on services trade with foreign countries. They will enable the Government to better assess U.S. competitiveness in, and institute export promotion programs for, services industries. They will also result in improvement in U.S. balance of payments statistics and in the ability of U.S. services businesses to identify and evaluate market opportunities.

The survey is to be conducted by the Bureau of Economic Analysis, U.S. Department of Commerce, under the International Investment and Trade in Services Survey Act. These rules implement a portion of the President's responsibilities for collecting data on U.S. services trade under the Act. These responsibilities have been delegated to the Secretary of Commerce, who has redelegated them to BEA. This final rulemaking will amend 15 CFR Part 801, as published in the Federal Register on March 6, 1986.

**DATES:** These rules will be effective June 29, 1987. The BE-20 survey forms will be mailed to potential respondents near the end of June; potential respondents should allow a reasonable time for receipt of the form before requesting one from BEA. The due date for completed reports is September 30, 1987.

**FOR FURTHER INFORMATION CONTACT:** George R. Kruer, Chief, International Investment Division (BE-50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; phone (202) 523-0657.

**SUPPLEMENTARY INFORMATION:**

### Background

In the February 26, 1987 Federal Register, volume 52, No. 38 (52 FR 5785), BEA published a notice of proposed rulemaking to implement the new BE-20 Benchmark Survey of Selected Services Transactions with Unaffiliated Foreign Persons—1986.

No comments were received on the proposed rule. A few comments were received on the draft survey form during its review by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). One comment affected the definition of a "transaction." Because that definition also appears in the rule, the change in the definition on the form necessitated a parallel change in the rule. The change in definition was for purposes of clarification only and did not affect its substance.

BEST COPY AVAILABLE

**Executive Order 12291**

BEA has determined that this final rule is not "major" as defined in E.O. 12291 because it is not likely to result in:

(1) An annual effect on the economy of $100 millon or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

**Paperwork Reduction Act**

The collection of information requirement in these final rules has been approved by OMB (OMB No. 0608–0058).

**Regulatory Flexibility Act**

The General Counsel, Department of Commerce, has certified to the Chief Counsel for Advocacy, Small Business Administration, under provisions of the Regulatory Flexibility Act (5 U.S.C. 605 (b)), that this rule will not have a significant economic impact on a substantial number of small entities. Most small business will be excluded from reporting data on a mandatory basis, as a result of the $250,000 cutoff level applicable to individual transactions under the survey's mandatory reporting requirement. Also, under the survey's voluntary reporting provision, the $500,000 cutoff level applicable to total transactions of a given type will exclude many other small businesses from reporting any data at all. Those that do have reportable transactions are requested to provide judgmental estimates only of the total amount of transactions of a given type, not disaggregated by country. This voluntary reporting provision ensures that smaller businesses with significant international transactions can be covered, but with the minimum burden possible. Even if a small business is required to file on a mandatory basis, or chooses to report information on a voluntary basis, it is unlikely to be very diversified and will probably report data only on the one schedule relevant to its particular activity. Thus, the burden for small businesses should be low and a regulatory flexibility analysis was not prepared.

**List of Subjects in 15 CFR Part 801**

Economic statistics, Foreign trade, Reporting and recordkeeping requirements, Services.

Dated: May 4, 1987.

**Allan H. Young,**

*Director, Bureau of Economic Analysis.*

For the reasons set forth in the preamble, 15 CFR Part 801 is amended as follows:

**PART 801—[AMENDED]**

1. The authority citation for 15 CFR Part 801 continues to read as follows:

**Authority:** 5 U.S.C. 301, 22 U.S.C. 3101–3108, and E.O. 11961, as amended.

2. Section 801.9(a) is revised to read as follows:

**§ 801.9 Reports required.**

(a) *Benchmark surveys.* BE–20, Benchmark Survey of Selected Services Transactions with Unaffiliated Foreign Persons: Section 4(a)(4) of the Act (22 U.S.C. 3103) provides that benchmark surveys of trade in services between U.S. and unaffiliated foreign persons be conducted, but not more frequently than every 5 years. The survey is referred to as the "BE–20." Specific reporting requirements, exemption levels, and the year of coverage of a given BE–20 survey may be found in § 801.10.

* * * * *

3. Section 801.10 is added to read as follows:

**§ 801.10 Rules and regulations for the BE–20, Benchmark Survey of Selected Services Transactions with Unaffiliated Foreign Persons—1986.**

A BE–20, Benchmark Survey of Selected Services Transactions with Unaffiliated Foreign Persons, will be conducted covering companies' 1986 fiscal year. All legal authorities, provisions, definitions, and requirements contained in §§ 801.1 through 801.9(a) are applicable to this survey. Additional rules and regulations for the BE–20 survey are given below. More detailed instructions are given on the report form itself.

(a) The BE–20 survey consists of two Parts and six Schedules, A–F. Part I (Name, Address, and Determination of Reporting Status) requests information needed to determine whether a report is required and which schedules apply. Part II (Identification and Selected Financial and Operating Data of U.S. Reporter) requests information about the reporting entity. Each of the six schedules covers a different type or group of services and is to be completed only if the U.S. Reporter has transactions of the type(s) covered by the particular schedule.

(b) *Who is to report and transactions to be reported.* (1) Mandatory reporting—A BE–20 report is *required* from each U.S. person who has one or more individual sale *or* purchase transactions in excess of $250,000 with an unaffiliated foreign person in any of the services listed in paragraph (d) of this section during the U.S. person's 1986 fiscal year.

(i) The determination of whether a U.S. person is subject to this mandatory reporting requirement may be judgmental, that is, based on the judgment of knowledgeable persons in a company who can identify reportable transactions on a recall basis, with a reasonable degree of certainty without conducting a detailed manual records search.

(ii) Reporters who must file pursuant to this mandatory reporting requirement must complete Parts I and II of Form BE–20 and all applicable schedules. The total amounts of individual transactions exceeding $250,000 that are applicable to a particular schedule are to be entered in the appropriate column(s) on line 1, section A of the schedule. In addition, these amounts must be distributed below line 1 to the country(ies) involved in the transaction(s).

(2) Voluntary reporting—U.S. persons receiving a copy of the survey are *requested* to provide, for each of the services listed in paragraph (d) of this section, supplemental estimates of individual sale or purchase transactions with unaffiliated foreign persons that are $250,000 or less but for which the total value exceeds $500,000 during the U.S. person's 1986 fiscal year. These estimates are requested whether or not the U.S. Reporter also had activity to report under the mandatory reporting requirement in paragraph (b)(1) of this section.

(i) Provision of this information is voluntary. The estimates may be judgmental, that is, based on recall, without conducting a detailed manual records search.

(ii) The total amounts of transactions applicable to a particular schedule are to be entered in the appropriate column(s) on line 39, section B of the schedule; they are *not* to be disaggregated by country. Reporters filing voluntary information only and who have *no* individual transactions exceeding $250,000 should also complete Part I, section A, B, and C of Form BE–20, answering "no" for each type of service listed in Part I, Section B. They should not complete Part II of Form BE–20.

(3) Any U.S. person receiving the BE–20 survey form from BEA, even if the person is not subject to the mandatory reporting requirement in paragraph (b)(1) of this section and is not filing

information on a voluntary basis pursuant to paragraph (b)(2) of this section, must nevertheless complete and return to BEA Part I of the form, answering "no" for each type of service listed in Part I, Section B, and indicating in Part I, section C that no voluntary data are being reported. This requirement is necessary to ensure compliance with reporting requirements and efficient administration of the Act by eliminating unnecessary followup contact.

(c) *BE–20 definition of transaction.* (1) For purposes of the BE–20 survey, a "transaction" is defined as the total value, as entered on the respondent's books, of services sold to or purchased from an unaffiliated foreign person during the respondent's 1986 fiscal year.

(2) Notwithstanding paragraph (c)(1), of this section, in the following cases, a "transaction" is to be measured by an item other than sales or purchases in determining whether the thresholds for mandatory or voluntary reporting are exceeded:

(i) Advertising: Advertising agencies should use gross billings to unaffiliated foreign persons, including funds passed through to media companies and not included in the agency's income statement.

(ii) Telecommunications: for jointly provided (basic) services, receipts from foreign persons for messages or leased lines originating abroad, and payouts to foreign persons for messages or leased lines originating in the United States, should be used.

(iii) Performing arts, sports, and other performances, presentations, and events: Fees are defined net of allowances for expenses.

(iv) Employment agencies and temporary help supply services: Receipts and payments should include any funds for compensation of workers carried on the payroll of the agency or supply service, as well as for agency fees.

(d) *Covered types of services.* Only the services listed below are covered by the BE–20 survey. Other services, such as transportation, reinsurance, lending and borrowing and related fees and charges, brokerage fees, royalties and license fees, etc., are NOT covered. Covered services are:

(1) Advertising services—Preparation of advertising and placement of such advertising in media, including charges for media space and time.

(2) Computer and data processing services—Data entry, processing (both batch and remote), and tabulation; computer systems analysis, design, and engineering; software, both custom programming and prepackaged, including rights to use, reproduce, or distribute such software; equipment leasing (except financial leasing); integrated hardware/software systems; and other computer services (e.g., timesharing, maintenance, and repair).

(3) Data base and other information services—Business and economic data base services, including business news, stock quotation, and financial information services; medical, legal, technical, demographic, bibliographic, and similar data base services; general news services, such as those purchased from a news syndicate; and other information services, including reservation systems and credit reporting and authorization systems.

(4) Telecommunications services. (i) Message telephone, telex, telegram, and other jointly provided (basic) services—Receipts from foreign persons (communications companies and postal, telephone, and telegraph agencies (PTT's)) for own share of revenues for transmitting messages originating abroad to U.S. destinations, and payouts to foreign persons (communications companies and PTT's) for their share of revenues for transmitting messages originating in the United States to foreign destinations. For messages originating in foreign countries and routed through the United States (for example, from Caribbean countries via the United States to Western Europe), includes receipts from the foreign person originating the message and payouts to the country of destination. Also includes receipts for transmitting messages between foreign points when not routed through the United States. Includes packet switched services when not offered in connection with enhanced services, and other regulated services of the type reportable to the FCC on Report 4361.

(ii) Private leased channel services—Receipts from foreign persons for circuits and channels terminating in the United States and for circuits and channels between foreign points, and payouts to foreign persons for leased channels and circuits terminating in foreign countries.

(iii) Value added (enhanced) services—Telecommunications services that add value or function above and beyond the telecommunications transport services that deliver the value-added services to end users. They can include electronic mail, voice mail, code and protocol processing, and management of data networks; facsimile services and videoconferencing; and other value-added (enhanced) services.

(iv) Support services—Services related to the maintenance and repair of telecommunications equipment; ground station services; capacity leasing for transiting; and launching of communications satellites.

(5) Agricultural services—Soil preparation services, crop services, veterinary and other animal services, farm labor and management services, and landscape and horticultural services.

(6) Research and development, and commercial testing, laboratory services—Laboratory and other physical research and development and product testing. Excludes medical and dental laboratory services.

(7) Management, consulting, and public relations services—Management services, except management of health care facilities (see paragraph (d)(8) of this section); consulting services, except consulting engineering services related to actual or proposed construction or mining services projects (see paragraph (d)(18) of this section) and computer consulting (see paragraph (d)(2) of this section); and public relations services, except those that are an integral part of an advertising campaign (see paragraph (d)(1) of this section). Excludes management and operation of a foreign business by a U.S. person, or of a U.S. business by a foreign person, where operating staff as well as management is provided. (Generally, such operations would be deemed to constitute a foreign affiliate of the U.S. person, or a U.S. affiliate of the foreign person, to be reported in BEA's direct investment surveys, rather than in this survey.)

(8) Management of health care facilities—Management of hospitals, nursing homes, and other health care facilities. If operating staff is provided, generally should be reported in BEA's direct investment surveys, rather than in this survey.

(9) Accounting, auditing, and bookkeeping services, etc.—Excludes data processing and tabulating services (see paragraph (d)(2) of this section).

(10) Legal services—Legal advice or other legal services.

(11) Educational and training services—Educational or training services provided on a contract or fee basis. Excludes tuition and fees charged to individual foreign students U.S. educational institutions or to individual U.S. students by foreign educational institutions. Also excludes training done by a U.S. or foreign manufacturer in connection with the sale of a good (see paragraph (d)(15) of this section).

(12) Mailing, reproduction, and commercial art—Direct mail advertising services; blueprinting, photocopying, and other reproduction services, including those in connection with direct

mail advertising; commercial photography, art, and graphic services; and stenographic services.

(13) Employment agencies and temporary help supply services—Employment services and provision of temporary help and personnel to perform services for others on a contract or fee basis. Where workers are carried on the payroll of the agency, includes receipts from or payments to unaffiliated foreign persons covering the compensation of workers, as well as agency fees.

(14) Industrial engineering services—Engineering services related to the design of movable products, including product design services. Excludes engineering and architectural services that relate to immovable products, such as those that relate to actual or proposes construction or mining services projects (see paragraph (d)(18) of this section). Excludes computer systems engineering (see paragraph (d)(2) of this section). (Includes, however, services performed with the assistance of computers, such as computer-assisted design work.)

(15) Industrial-type maintenance and repair, installation, and training services. (i) Maintenance and repair services primarily to machinery and equipment. May also include small maintenance and repair work on buildings, structures, dams, highways, etc., but only to the extent that the work is not covered under paragraph (d)(18) of this section). Would include such services as the periodic overhaul of turbines or locomotives, the extinguishing of natural gas well fires, and refinery maintenance. Excludes computer maintenance and repair services (see paragraph (d)(2) of this section).

(ii) Installation, startup, and training services provided by a manufacturer in connection with the sale of goods. Do not include such services where the cost is included in the price of the goods and not separately billed or is declared as a part of the price of the goods on the shippers export or import declaration filed with the U.S. Customs Service; however, services provided at a price over and above that entered on the shippers export or import declaration should be included. These services would be reported elsewhere if not provided in connection with the sale of goods. For example, installation of machinery and equipment is normally considered a construction activity, and training personnel in the use of new machinery would ordinarily be reported as an educational or training service. However, this separate category has been provided for reporting such services when provided in connection with goods.

(16) Performing arts, sports, and other live performers, presentations, and events—Fees (net of allowances for expenses) for performances abroad by U.S. or foreign performers, and for performances in the United States by foreign performers. To be reported by U.S. management companies, booking agents, promoters, and presenters who book performers and events abroad by U.S. or foreign performers; U.S. performers who received funds directly from a foreign person rather than through a U.S. management company (or similar entity); and management companies, booking agents, promoters, and presenters who book performances in the United States by foreign performers. (As used here, "performers" means entertainers, sports teams, orchestras, dance companies, lecturers, and similar persons or performing groups.)

(17) Direct insurance—Applies only to insurance *purchased* from unaffiliated foreign insurance carriers and includes premiums (net of cancellations) paid to these carriers. A U.S. Reporter should not report direct transactions with a foreign insurance company that is its foreign affiliate; such transactions are to be reported on direct investment survey Form BE–577. A U.S. Reporter should, however, report direct transactions with a foreign insurance company that is an affiliate of another U.S. company, as the U.S. Reporter and the foreign insurance company are unaffilliated. Note that the criterion for reporting is whether the transaction is between a U.S. and an unaffiliated foreign person. It is immaterial whether the assets insured are located in the United States or abroad. Excludes reinsurance transactions with insurance companies resident abroad. When insurance is purchased through a broker, the guidelines for reporting transactions carried out through an intermediary, which are contained in the *General Instructions* to the survey, should be followed.

(18) Construction, engineering, architectural, and mining services—Covers only *purchases* of the following types of services: Services of general contractors in the fields of building and heavy construction; construction work by special trade contractors, such as the erection of structural steel for bridges and buildings and on-site electrical work; architectural engineering, and land-surveying services; and mining services, including oil and gas field services. Includes only those engineering services purchased in conjunction with construction and mining services projects; industrial engineering services, such as product design services, should be included under paragraph (d)(14) of this section. Includes services purchased in connection with proposed projects (e.g., feasibility studies) as well as projects that are actually being carried out. Note that the U.S. Reporter's *Sales* of construction, engineering, architectural, and mining services are not reportable in this survey, but on separate Form BE–47.

## FEDERAL TRADE COMMISSION

### 16 CFR Part 455

### Trade Regulation Rule; Sale of Used Motor Vehicles; Correction

**AGENCY:** Federal Trade Commission.

**ACTION:** Staff Compliance Guidelines; Correction.

**SUMMARY:** This document corrects a Commission document previously published in the **Federal Register** on Monday, May 18, 1987. 52 FR 18552. Appendixes A–E were inadvertently omitted from the previous publication.

**DATES:** Effective date: May 28, 1987. Written comments regarding the staff compliance guidelines will be accepted until July 17, 1987.

**ADDRESS:** Written comments on this action should be addressed to: Office of the Secretary, Federal Trade Commission, 6th & Pennsylvania Avenue, Washington, DC 20580. Comments should be captioned: "Comment on Staff Compliance Guidelines—Used Car Rule—FTC File No. 215–54."

**FOR FURTHER INFORMATION CONTACT:** Joyce E. Plyler (202/326–3021), Attorney, or Matthew D. Gold (202/326–3019), Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580.

**SUPPLEMENTARY INFORMATION:** Appendixes A–E.

☐ SERVICE CONTRACT. A service contract is available at an extra charge on this vehicle. Ask for details as to coverage, deductible, price, and exclusions. If you buy a service contract within 90 days of the time of sale, state law "implied warranties" may give you additional rights.

**PRE PURCHASE INSPECTION: ASK THE DEALER IF YOU MAY HAVE THIS VEHICLE INSPECTED BY YOUR MECHANIC EITHER ON OR OFF THE LOT.**

**SEE THE BACK OF THIS FORM** for important additional information, including a list of some major defects that may occur in used motor vehicles.

**Below is a list of some major defects that may occur in used motor vehicles.**

**Frame & Body**
- Frame-cracks, corrective welds, or rusted through
- Dogtracks—bent or twisted frame

**Engine**
- Oil leakage, excluding normal seepage
- Cracked block or head
- Belts missing or inoperable
- Knocks or misses related to camshaft lifters and push rods
- Abnormal exhaust discharge

**Transmission & Drive Shaft**
- Improper fluid level or leakage, excluding normal seepage
- Cracked or damaged case which is visible
- Abnormal noise or vibration caused by faulty transmission or drive shaft
- Improper shifting or functioning in any gear
- Manual clutch slips or cleaners

**Differential**
- Improper fluid level or leakage excluding normal seepage
- Cracked or damaged housing which is visible
- Abnormal noise or vibration caused by faulty differential

**Cooling System**
- Leakage including radiator
- Improperly functioning water pump

**Electrical System**
- Battery leakage
- Improperly functioning alternator, generator, battery, or starter

**Fuel System**
- Visible leakage

**Inoperable Accessories**
- Gauges or warning devices
- Air conditioner
- Heater & Defroster

**Brake System**
- Failure warning light broken
- Pedal not firm under pressure (DOT spec.)
- Not enough pedal reserve (DOT spec.)
- Does not stop vehicle in straight (DOT spec.)
- Hoses damaged
- Drum or rotor too thin (Mfgr. Specs)
- Lining or pad thickness less than 1/32 inch
- Power unit not operating or leaking
- Structural or mechanical parts damaged

**Steering System**
- Too much free play at steering wheel (DOT specs)
- Free play in linkage more than 1/4 inch
- Steering gear binds or jams
- Front wheels aligned improperly (DOT specs.)
- Power unit belts cracked or slipping
- Power unit fluid level improper

**Suspension System**
- Ball joint seals damaged
- Structural parts bent or damaged
- Stabilizer bar disconnected
- Spring broken
- Shock absorber mounting loose
- Rubber bushings damaged or missing
- Radius rod damaged or missing
- Shock absorber leaking or functioning improperly

**Tires**
- Tread depth less than 2/32 inch
- Sizes mismatched
- Visible damage

**Wheels**
- Visible cracks, damage or repairs
- Mounting bolts loose or missing

**Exhaust System**
- Leakage

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Release No. 34-24492]

## Delegation of Authority to the Director of the Division of Market Regulation

AGENCY: Securities and Exchange Commission.

ACTION: Final rule amendment.

SUMMARY: The Commission is amending its Rules of Practice to delegate authority to the Director of the Division of Market Regulation to exempt any transaction or transactions, either unconditionally or on specified terms and conditions, pursuant to Rule 10b–7(o) under the Securities Exchange Act of 1934 ("Exchange Act"). This amendment should facilitate prompt, careful review and consideration of applications for such exemptions.

The Commission is also amending its Rules of Practice to reflect the correct paragraph of Rule 10b–6 under the Exchange Act pursuant to which the Commission previously delegated exemption authority to the Director of the Division of Market Regulation under that rule.

EFFECTIVE DATE: May 21, 1987.

FOR FURTHER INFORMATION CONTACT: Elizabeth Jacobs, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, (202) 272–2848.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today announced two amendments to its Rules of Practice governing delegation of authority to the Division of Market Regulation.

The first amendment to Rule 30–3(a) of the Rules of Practice [1] authorizes the Director of the Division of Market Regulation to grant exemption where appropriate pursuant to Rule 10b–7(o) [2] under the Securities Exchange Act of 1934 ("Exchange Act").[3] This delegation of authority will facilitate prompt, careful review and consideration of application for such exemptions.

Additionally, the present text of Rule 30–3(a)(6) [4] indicates that the Commission delegated to the Director of the Division of Market Regulation the Commission's authority to grant exemptions from the provisions of Rule 10b–6 under the Exchange Act [5] pursuant to paragraph (f) of Rule 10b–6. Rule 30a–3(a)(6) is being amended to reflect that the correct reference to the exemptive provision is paragraph (h) of Rule 10b–6.

The Commission finds, in accordance with section 553(b)(A) of the Administrative Procedure Act [6], that this amendment relates solely to agency organization, procedure, or practice, and does not relate to a substantive rule. Accordingly, notice and opportunity for public comment are unnecessary, and publication of the amendment 30 days before its effective date is also unnecessary.

### List of Subjects in 17 CFR Part 200

Administrative practice and procedure, Freedom of Information, Privacy, Securities.

### Text of Amendment

The Commission hereby amends Title 17, Chapter II of Code of Federal Regulations as follows:

## PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

1. The authority citation for Part 200 continues to read in part as follows:

Authority: Secs. 19, 23, 48 Stat. 85, 901, as amended, sec. 20, 49 Stat. 833, sec. 319, 53 Stat. 1173, secs. 38, 211, 54 Stat. 841, 855, 15 U.S.C. 77s, 78w, 79t, 77sss, 80a, 80a–37, 80b–11 * * *

2. Section 200.30–3 is amended by revising paragraph (a)(6) to read as follows:

**§ 200.30–3 Delegation of authority to Director of Division of Market Regulation.**

* * * * *

(a) * * *

(6) Pursuant to Rule 10b–6(h) (§ 240.10b–6(h) of this chapter) and Rule 10b–7(o) (§ 240.10b–7(o) of this chapter), to grant requests for exemptions from Rule 10b–6 (§ 240.10b–6 of this chapter) and Rule 10b–7 (§ 240.10b–7 of this chapter);

* * * * *

By the Commission.
Dated: May 21, 1987.

Jonathan G. Katz,
*Secretary.*

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 282

[Docket No. RM79–14]

## Incremental Pricing Regulations Implementing the Incremental Pricing Provision of the Natural Gas Policy Act

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order Prescribing Incremental Pricing Thresholds.

SUMMARY: The Director of the Office of Pipeline and Producer Regulation is issuing the incremental pricing acquistion cost thresholds prescribed by Title II of the Natural Gas Policy Act and 18 CFR 282.304. The Act requires the Commission to compute and publish the threshold prices before the beginning of each month for which the figures apply. Any cost of natural gas above the applicable threshold is considered to be an incremental gas cost subject to incremental pricing surcharging.

EFFECTIVE DATE: June 1, 1987.

FOR FURTHER INFORMATION CONTACT: Richard P. O'Neill, Federal Energy Regulatory Commission, 825 N. Capitol Street, NE., Washington, DC 20426, (202) 357–8500.

SUPPLEMENTARY INFORMATION:

Issued: May 21, 1987.

Section 203 of the NGPA requires that the Commission compute and make available incremental pricing acquisition cost threshold prices prescribed in Title II before the beginning of any month for which such figures apply.

Pursuant to that mandate and pursuant to § 375.307(1) of the Commission's regulations, delegating the publication of such prices to the Director of the Office of Pipeline and Producer Regulation, the incremental pricing acquisition cost threshold prices for the month of June 1987 are issued by the publication of a price table for the month. The incremental pricing acquisition cost threshold prices for months prior to those reflected on the table are found in § 282.304.

The incremental pricing thresholds for June 1987 reflect a two-month lag adjustment described in the notice of the March 1, 1988 thresholds.

**List of Subjects in 18 CFR Part 282**

Natural gas.

Richard P. O'Neill,

*Director, Office of Pipeline and Producer Regulation.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

### 21 CFR Part 175

[Docket No. 87N-0137]

### Indirect Food Additives; Adhesives and Components of Coatings; Editorial Amendment

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is correcting a printer's error in § 175.105(c)(5) (21 CFR 175.105(c)(5)). This document sets forth the correct spelling for the monomer dioctyl maleate.

**DATES:** Effective May 28, 1987; written objections by June 29, 1987.

**ADDRESS:** Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Rada Proehl, Regulations Editorial Staff (HFC-222), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2994.

**SUPPLEMENTARY INFORMATION:** The agency is amending 21 CFR 175.105(c)(5) by correcting the spelling of the monomer "Dioctyl mateate" to "Dioctyl maleate".

Any person who will be adversely affected by this regulation may at any time on or before June 29, 1987 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

**List of Subjects in 21 CFR Part 175**

Adhesives, Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 175 is amended as follows:

## PART 175—INDIRECT FOOD ADDITIVES: ADHESIVES AND COMPONENTS OF COATINGS

1. The authority citation for 21 CFR Part 175 continues to read as follows:

**Authority:** Secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

**§ 175.105 [Amended]**

2. Section 175.105 *Adhesives* is amended in paragraph (c)(5) by correcting the spelling of "Dioctyl mateate" in the list under "Polymers: Homopolymers and copolymers of the following monomers:" to "Dioctyl maleate".

Dated: May 20, 1987.

John M. Taylor,

*Associate Commissioner for Regulatory Affairs.*

[FR Doc. 87-12060 Filed 5-27-87; 8:45 am]

BILLING CODE 4160-01-M

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

### 33 CFR Part 100

[CGD 05-87-28]

### Special Local Regulations for Harborfest 1987, Elizabeth River, Norfolk, VA

**AGENCY:** Coast Guard, DOT.

**ACTION:** Final rule.

**SUMMARY:** This rule implements 33 CFR 100.501 and establishes spectator anchorage areas for Harborfest 1987. This event will be held on the Elizabeth River, between the Norfolk and Portsmouth downtown areas. These special local regulations are needed to control vessel traffic within the immediate vicinity of the Harborfest activities due to the confined nature of the waterway and the expected congestion at the time of the events. The effect will be to restrict general navigation in the area for the safety of spectators and participants in the events.

**EFFECTIVE DATES:** The regulations in 33 CFR 100.501 and this rule are effective as follows:.

a. 9:30 a.m. to 8:00 p.m., June 5, 1987
b. 9:00 a.m. to 10:30 p.m., June 6, 1987
c. 9:00 a.m. to 6:00 p.m., June 7, 1987

**FOR FURTHER INFORMATION CONTACT:** Billy J. Stephenson, Chief, Boating Affairs Branch, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23705, (804) 398–6204.

**SUPPLEMENTARY INFORMATION:** In accordance with 5 U.S.C. 553, a notice of proposed rulemaking has not been published for these regulations and good cause exists for making them effective in less than 30 days from the date of publication. Following normal rulemaking procedures would have been impracticable. The application to hold the event was not received until April 22, 1987, and there was not sufficient time remaining to publish proposed rules in advance of the events or to provide for delayed effective dates.

**Drafting Information**

The drafters of this notice are Billy J. Stephenson, project officer, Chief, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, and Commander Robert J. Reining, project attorney, Fifth Coast Guard District Legal Office.

**Discussion of Proposed Regulation**

The City of Norfolk, Virginia has submitted an application to hold Harborfest 87 on June 5, 6, and 7, 1987, in the area covered by 33 CFR 100.501. Since this event is the type of event contemplated by these regulations and the safety of the participants and spectators viewing the event would be enhanced by the implementation of the Special Local Regulations for the Elizabeth River in 33 CFR 100.501, those regulations will be in effect during Harborfest 87. The three day City of Norfolk Harborfest, sponsored by Norfolk Harborfest, Inc., will consist of a navy jet fly over, aerobatic demonstrations, air sea rescue demonstration, U.S. Custom/U.S. Coast Guard demonstration, fire works, and numerous water events, including parade of sails, water ski exhibition, and various boat races. Commercial vessels will be permitted to transit the regulated area between events, and thus commercial traffic should not be severely disrupted at any given time. The regulations in 33 CFR 100.501 are implemented by publication of this rule. It also supplements those regulations by establishing spectator anchorage areas.

**List of Subjects in 33 CFR Part 100**

Marine safety, Navigation (water).

**Regulations**

**PART 100—[AMENDED]**

In consideration of the foregoing the regulations in § 100.501 of Title 33, Code of Federal Regulations apply to Harborfest 87 and Part 100 of Title 33, Code of Federal Regulations, is amended to read as follows:

1. The authority citation for Part 100 continues to read as follows:

**Authority:** 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. A temporary § 100.502 is added to read as follows:

**§ 100.502 Elizabeth River—Harborfest 87 spectator vessel anchorage areas.**

(a) *Anchorage areas.* (1) The waters adjacent to the Town Point Reach section of the Elizabeth River, bounded by the shore and a line drawn between Hospital Point at latitude 36°50'50.5" North, longitude 76°18'09" West, and the tip of the channelside pier at the Holiday Inn Marina at latitude 36°50'29.5" North, longitude 76°17'52.5" West.

(2) The waters adjacent to the Port Norfolk Reach section of the Elizabeth River, bounded by the shore and a line drawn between Hospital Point at latitude 36°50'55" North, longitude 76°18'14.5" West, and the tip of the southern most railroad pier at Port Norfolk at latitude 36°51'14.5" North, longitude 76°18'44" West.

(b) *Special local regulations.* Vessels anchored in the anchorage areas described in paragraph (a) of this section may remain in the Regulated Areas established by s 100.502 without the permission of the Patrol Commander.

**EFFECTIVE DATES:** This regulation is effective from 9:30 a.m. to 8:00 p.m. on June 5, 1987, 9:00 a.m. to 10:30 p.m., June 6, 1987, and 9:00 a.m. to 6:00 p.m., June 7, 1987.

Dated: May 18, 1987.

**B.F. Hollingsworth,**

*Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.*

## ENVIRONMENTAL PROTECTION AGENCY

**40 CFR Part 52**

**[A-4-FRL-3207-3; SC-016]**

**Approval and Promulgation of Implementation Plans, South Carolina; Stack Height Rules**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** In this action, EPA is approving revisions to the South Carolina State Implenetation Plan (SIP) submitted to EPA on June 11, 1986. South Carolina has revised its SIP to include Regulation No. 62.7, Good Engineering Practice Stack Height, and changes in Regulation No. 62.1, Definitions, Permit Requirements, and Emission Inventory. These regulations are equivalent to EPA requirements promulgated at Part 51 of Chapter I, Title 40, of the Code of Federal Regulations. EPA's approval of South Carolina's revisions will give the State full authority to implement and enforce the plan according to the State regulations.

**EFFECTIVE DATE:** This action will be effective on July 27, 1987, unless notice is received within 30 days that adverse or critical comments will be submitted.

**ADDRESSES:** Copies of the materials submitted by South Carolina may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460
Air Programs Branch, Region IV, Environmental Protection Agency, 345 Courtland Street, NE., Atlanta, Georgia 30365
South Carolina Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201

**FOR FURTHER INFORMATION CONTACT:** Beverly A. Thomas, EPA, Region IV, Air Programs Branch at above listed address, telephone 404/347-3286 or FTS 257-3286.

**SUPPLEMENTARY INFORMATION:** On June 17, 1986, the South Carolina Department of Health and Environmental Control

(DHEC) submitted as State Implementation Plan revisions Regulation No. 62.7, Good Engineering Practice Stack Height, and changes in Regulation No. 62.1, Definitions, Permit Requirements, and Emission Inventory. A public hearing was held on these revisions on March 31, 1986. Final approval by the DHEC Board was given on April 24, 1986.

In the Federal Register of July 8, 1985 (50 FR 27892), EPA published final regulations to implement Section 123 of the Clean Air Act (CAA), which regulates the manner in which dispersion of pollutants from a source may be considered in setting emission limitations. These regulations limit the amount of stack height or dispersion credit (dispersion techniques) a source can claim in the process of establishing its emission limitation. Dispersion techniques include the use of stack heights greater than 65 meters and use of other techniques to increase the dispersion of emissions rather than continuously reducing emissions from a source.

South Carolina has adopted definitions corresponding to EPA's GEP regulations. One difference between South Carolina regulations and EPA's is in the definition of GEP stack height. South Carolina has adopted the "one plus one-and-a-half times" formula as applying to all applicable stack heights. This was done since the alternative formula ("two and a half times") does not apply to any of the stacks in South Carolina. Since this approach would always be at least equal to the stringency of EPA's regulations, EPA is approving South Carolina's definition of GEP stack height. Under the rule governing permit applications, the State has required sources to submit information and calculations to demonstrate compliance with the Good Engineering Practice Stack Height rule. South Carolina regulations apply to both new and existing sources, thereby satifying requirements for State new source review regulations at 40 CFR 51.164.

*Final Action.* EPA has reviewed the submittal and found it to be equivalent to EPA's stack height requirements. Therefore, EPA is today approving South Carolina's Regulation 62.7 and changes in Regulation 62.1.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial issue and anticipates no adverse comments. This action will be effective 60 days from the date of the Federal Register notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective July 27, 1987.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 27, 1987. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

**PART 52—[AMENDED]**

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

**Subpart PP—South Carolina**

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.2120 is amended by adding paragraph (c)(28) to read as follows:

**§ 52.2120 Identification of plan.**

* * * * *

(c) * * *

(28) Stack height regulations were submitted to EPA on June 11, 1986.

(i) Incorporation by reference.

(A) Letter of June 11, 1986, from the South Carolina Department of Health and Environmental Control transmitting stack height regulations.

(B) Regulation 62.7, Good Engineering Practice Stack Height, adopted on April 24, 1986, and effective on May 23, 1986.

(C) Addition of item 10 to Section I, Definitions, of regulation 62.1, adopted on April 24, 1986, and effective on May 23, 1986.

(D) Addition of item A.2.f to Section II, Permit Requirements, of regulation 62.1, adopted on April 24, 1986, and effective on May 23, 1986.

(ii) Other material—none.

## Tolerance Exemption for Alpha-Butyl-Omega-Hydroxypoly(Oxypropylene) Block Polymer With Poly(Oxyethylene); Correction

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; correction.

**SUMMARY:** This document corrects a typographical error in 40 CFR 180.1001(e) that was inadvertently introduced in the Code of Federal Regulations (CFR) revised as of July 1, 1982, and has appeared in subsequent yearly editions.

**EFFECTIVE DATE:** May 28, 1987.

**FOR FURTHER INFORMATION CONTACT:**

Rosalind Gross, Registration Support and Emergency Response Branch, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Registration Support and Emergency Response Branch, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–7700.

**SUPPLEMENTARY INFORMATION:** In the Federal Register of February 13, 1973 (38 FR 4330), EPA added to 40 CFR 180.1001(e) the entry "*alpha*-Butyl-*omega*-hydroxypoly(oxypropylene) block polymer with poly(oxyethylene); molecular weight 2,400–3,500." The entry appeared correctly in the yearly revised editions of the CFR until the CFR volume "40 CFR Parts 150 to 189, Revised as of July 1, 1982," when the Greek letter delta was inadvertently substituted for *omega* in the chemical expression. The incorrect "delta" has appeared in subsequent yearly revisions of the CFR. This document corrects the typographical error that was inadvertently introduced into the CFR.

**11-Aminoundecanoic Acid; Determination of Significant New Use; Submission of Notice of Manufacture, Import, or Processing**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** EPA is promulgating a significant new use rule (SNUR) under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for 11-aminoundecanoic acid (11-AA) (CAS Number 2432-99-7). EPA believes that this substance may be hazardous to human health, and that the uses identified in this rule may result in significant human exposure. As a result of this rule, certain persons who intend to manufacture, import, or process this substance for a significant new use are required to notify EPA at least 90 days before commencing that activity. The required notice will furnish EPA with the opportunity to evaluate the intended use and, if necessary prohibit or limit that activity before it occurs.

EPA is also requiring under section 8(a) of TSCA that manufacturers, importers, and processors of 11-AA who are not covered by the SNUR notification requirements notify EPA of prospective manufacture, import, or processing of this chemical substance. This reporting rule will allow EPA to track the manufacture, import, processing, and end uses of this substance and to investigate the health and environmental impacts of such activities. Small businesses that manufacture, import, or process 11-AA are exempt from the section 8(a) reporting rule.

This rule was proposed in the Federal Register of July 22, 1986 (51 FR 26273).

**DATES:** In accordance with 40 CFR 23.5 (50 FR 7271), this rule shall be promulgated for purposes of judicial review at 1 p.m. eastern time on June 11, 1987. This rule becomes effective on July 13, 1987.

**FOR FURTHER INFORMATION CONTACT:**

Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St. SW., Washington, DC 20460, Telephone: (202-554-1404).

**SUPPLEMENTARY INFORMATION:**

## I. Authority

The Agency is promulgating this rule pursuant to sections 5(a)(2) and 8(a) of TSCA, 15 U.S.C. 2604(a)(2) and 2607(a).

Section 5(a)(2) of TSCA authorizes EPA to determine that a use of a chemical substance is a significant new use. This determination is made by rule after considering all relevant factors, including those listed in section 5(a)(2). Once EPA determines that a use of a chemical substance is a significant new use, section 5(a)(1)(B) of TSCA requires persons to submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use.

Persons subject to this SNUR must comply with the same notice requirements and EPA regulatory procedures as submitters of premanufacture notices (PMNs) under section 5(a)(1)(A) of TSCA. In particular, these requirements include the information submission requriements of sections 5(b) and (d)(1), the exemptions authorized by sections 5(h) (1), (2), (3), and (5), and the regulations at 40 CFR Part 720. Once EPA receives a SNUR notice, the Agency may take regulatory action under section 5(e), 5(f), 6, or 7 to control the activities for which it has received the notice. If EPA does not take action, section 5(g) of TSCA requires the Agency to explain in the Federal

Register its reasons for not taking action.

Persons who intend to export a substance identified in a proposed or final SNUR are subject to the export notification provisions of TSCA section 12(b). The regulations that interpret section 12(b) appear at 40 CFR Part 707. Persons who intend to import a chemical substance are subject to the TSCA section 13 import certification requirements, which are codified at 19 CFR 12.118 through 12.127 and 127.28. Persons who import a substance identified in a final SNUR must certify that they are in compliance with the SNUR requirements. The EPA policy in support of the import certification requirements appears at 40 CFR Part 707.

Section 8(a) of TSCA authorizes the Administrator to promulgate rules which require each person (other than a small manufacturer, importer, or processor) who manufactures, imports, or processes or who proposes to manufacture, import, or process a chemical substance to submit such reports as the Administrator may reasonably require.

## II. Applicability of General Provisions

In the Federal Register of September 5, 1984 (49 FR 35011), EPA promulgated general provisions applicable to SNURs (40 CFR Part 721, Subpart A). On April 22, 1986, EPA proposed revisions to the general provisions (51 FR 15104), some of which would apply to this SNUR. General provisions applicable to section 8(a) rules were published in the Federal Register of May 25, 1983 (40 CFR Part 704, Subpart A). These general provisions apply to this rule. The general provisions are discussed in detail in the cited Federal Register documents, and interested persons should refer to those documents for further information.

## III. Summary of this Rule

### *A. Significant New Use Rule*

EPA is designating any use of 11–AA other than as (1) an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process or (2) a component in photoprocessing solutions as significant new uses of this chemical substance. This rule requires persons who intend to manufacture, import, or process 11–AA for a significant new use to notify EPA at least 90 days before beginning such manufacture, import, or processing.

11–AA has been shown to cause cancer in laboratory animals. The only known uses for 11–AA are either as an intermediate in the manufacture of polymers or as a component in photoprocessing solutions. 11–AA is not subject to any Federal regulation that would notify the government of activities that might result in adverse exposures to this substance or provide a regulatory mechanism that could protect human health from potentially adverse exposures before they occurred.

EPA believes that the significant new uses and associated manufacture, import, or processing of 11–AA have a high potential to increase the magnitude and duration of exposure to this substance and to change the type or form of exposure from that which currently exists. Also, given the toxicity of this chemical substance, the reasonably anticipated situations that could result in exposure, and the lack of sufficient existing regulatory controls, individuals could be exposed to 11–AA at levels which may result in adverse effects.

The consideration of these factors has resulted in EPA's decision to designate any use of 11–AA other than as an intermediate in the manufacture of polymers in an enclosed process, when it is expected that the 11–AA will be fully polymerized during the manufacturing process, or as a component in photoprocessing solutions as a significant new use of this chemical substance. Persons intending to manufacture, import, or process 11–AA for a significant new use would be required to notify EPA 90 days before they begin such manufacture, import, or processing. Advance notification will allow EPA the opportunity to evaluate the risks related to an intended activity and to protect against adverse exposures to 11–AA before they can occur.

### *B. Section 8(a) Rule*

The SNUR described above will ensure EPA is notified in the event that 11–AA is manufactured, imported, or processed for the designated significant new uses. However, persons who manufacture or import 11–AA for use as an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process or as a component in photoprocessing solutions would not be required to report to EPA if the 11–AA they were manufacturing or importing was to be used for those ongoing uses. Persons could also process 11–AA for these ongoing uses, but certain portions of the processing operation (such as raw material transfer) could result in potentially high human exposures.

EPA is concerned that 11–AA manufacturing, importing, and processing activities associated with these ongoing uses could present the opportunity for human exposure to this chemical substance. Because the SNUR would not provide notification of manufacturing, importing, and processing activities associated with the ongoing uses, and because this substance is a possible human health hazard, EPA believes it is necessary to require reporting under TSCA section 8(a) for those ongoing 11–AA activities which would not be covered by the SNUR.

Therefore, EPA is requiring persons who intend to manufacture, import, or process 11–AA for use as an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process or for use as a component in photoprocessing solutions to notify EPA within 30 days after making a firm management decision to commit financial resources for such manufacturing, importing, or processing of 11–AA. Persons who initiated manufacturing, importing, or processing of 11–AA for these ongoing uses during the time period between July 22, 1986 and July 13, 1987 are required to notify EPA on or before August 10, 1987.

Persons who manufactured, imported, or processed 11–AA for use as an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process or for use as a component in photoprocessing solutions at any time during the 3 years ending July 22, 1986 are exempt from reporting. EPA is providing this exemption because the Agency has had the opportunity to evaluate ongoing 11–AA activities, and has found that adequate steps are currently being taken to minimize human exposure.

Small manufacturers (including importers) as described at 40 CFR 704.3 are exempt from reporting. Processors meeting the same size standards as those described for small manufacturers at 40 CFR 704.3 are also exempt from reporting (see § 704.25(a)(7)).

Persons subject to the section 8(a) rule are required to submit a PMN Form (EPA Form 7710–25). A copy of that form can be found at 40 CFR Part 720, Appendix A.

## IV. Discussion of Chemical Substance and Comments on Proposed Rule

### *A. Production and Use Data*

11–AA is imported into the U.S. by 1 company at a rate of approximately 9 million lbs. per year. There is no known manufacturer of 11–AA in the U.S. At the time this rule was proposed, the Agency believed that all of the imported 11–AA was used by one company for the manufacture of nylon 11. Two comments received on the proposed rule indicate that 11–AA is processed not only into nylon 11, but also into other polymers, copolymers, and multifunctional copolymers. The commenters, who process the 11–AA into these polymers, stated that the processing operations for the manufacture of nylon 11 as well as the other polymeric materials all take place under enclosed conditions as described in the proposed rule, and the 11–AA is fully polymerized during the process. EPA has therefore modified the significant new use description to provide that significant new use reporting is not required when 11–AA is used to make all polymers rather than just nylon 11. The definition of the term "polymer" used in this regulation is the same as that used for the Premanufacture Notification Exemption regulations codified at 40 CFR Part 723 (see § 723.250(b)).

The Agency has also modified the proposed definition of the term "Enclosed process" that was given in the proposed rule. The proposed definition did not account for possible releases through emergency pressure relief. The definition in the final rule includes such releases.

Another comment received on the proposed rule indicated that in addition to being used to manufacture polymeric materials, one company uses 11–AA as a component in photoprocessing solutions. EPA has modified the significant new use description to provide that significant new use reporting is not required for use of 11–AA as a component in photoprocessing solutions.

### *B. Health Effects*

Results of a National Toxicology Program (NTP) carcinogenesis bioassay on 11–AA published in May 1982 demonstrated limited evidence that 11–AA is carcinogenic in laboratory animals. Under the conditions of the bioassay, 11–AA was carcinogenic for male F344 rats, inducing neoplastic nodules in the liver and transitional cell carcinomas in the urinary bladder at a statistically significant ($p<0.01$) level. The substance was not carcinogenic for the female F344 rat. No clear evidence was found for the carcinogenicity of 11–AA in $B6C3F_1$ mice of either sex, although an increase in malignant lymphomas in male mice may have been associated with the administration of 11–AA. Other effects of 11–AA included a dose-related decrease in mean body weight gain and survival for male rats and mice of each sex, hyperplasia of transitional epithelium of the kidney and urinary bladder in rats of each sex, and mineralization of the kidney in mice of each sex.

EPA issued Guidelines for Carcinogen Risk Assessment in the **Federal Register** of September 24, 1986 (51 FR 33992). These guidelines define as Group C—Possible Human Carcinogen agents exhibiting: ". . . (a) Definitive malignant tumor response in a single well-conducted experiment, (b) marginal tumor response in studies having inadequate design or reporting, (c) benign but not malignant tumors with an agent showing no response in a variety of short-term tests for mutagenicity, and (d) marginal responses in a tissue known to have a high and variable background rate. . . ."

A limited review of the results of the NTP carcinogenesis bioassay on 11–AA indicates that the substance has been found to induce a definitive malignant tumor response in male rats, and may therefore be a possible human carcinogen according to the Agency's guidelines for carcinogen risk assessment.

Results from the NTP bioassay also demonstrate that 11–AA is capable of causing chronic and subchronic non-oncogenic effects in laboratory animals. For these reasons, EPA has concluded that exposure to the substance may present a risk of injury to human health.

One comment received on the proposed rule disagreed with EPA's interpretation of the available toxicity data as it applies to the SNUR rulemaking process. That commenter believed that the Agency overstated the carcinogenicity case for this substance and that more than a limited review of the data was required. The commenter also suggested that the findings of the NTP could be interpreted in a manner to show little or no carcinogenic hazard.

The results of the NTP carcinogenicity bioassay have recently been independently reviewed by the International Agency for Research on Cancer (IARC). IARC concluded that there is limited evidence for the carcinogenicity of 11–AA in experimental animals. These conclusions were presented in IARC Monographs, Volume 39. A copy of the Monograph on 11–AA is included in the public record for this rulemaking. That Monograph was not available to EPA at the time this rule was proposed.

In addition, section 5(a)(2) of TSCA does not require EPA to make a health (or environmental) hazard finding before promulgating a SNUR. The Agency is instead directed to consider factors related to human (or environmental) exposure. EPA's discussion of the possible carcinogenicity of 11–AA is not intended to demonstrate a health effects "finding" under TSCA. The Agency provided the health effects discussion of 11–AA in the proposed rule, and has included a similar discussion in this final rule, to show that the Agency is concerned about possible human health effects resulting from exposures to this chemical substance, and that monitoring future human exposures to 11–AA is warranted.

EPA is aware that the information available may not be sufficient to make a conclusive statement regarding possible risks to humans which may result from exposure to 11–AA. IARC has suggested that epidemiological data are necessary to evaluate the carcinogenicity of 11–AA to humans. The Agency therefore welcomes the voluntary submission of any information concerning the effects of 11–AA to human health. Of particular importance would be case reports or epidemiological studies. However, other data supporting or disproving the currently available health effects information would also be valuable. Such information should be submitted to EPA at the following address:

TSCA Public Information Section, OTS Document Processing Center (TS–790), Attention: FYI Coordinator, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Persons are potentially exposed to 11–AA during the manufacture of polymers. Based on information provided by current processors of 11–AA for this purpose, all processing of 11–AA takes place in enclosed operations. Workers engaged in manufacturing various ploymers from 11–AA wear safety glasses, face-shields, safety shoes, longsleeved shirts, rubber or cotton gloves, and dust masks or suitable respirators whenever exposure to 11–AA is possible. Plants are equipped with hooded exhaust areas and local exhaust at points of potential worker exposure to 11–AA.

During the manufacturer of polymers, monomeric 11–AA is expected to be fully polymerized. It is therefore unlikely

BEST COPY AVAILABLE

that persons will be exposed to 11–AA in products containing these polymers.

One commenter on the proposed rule stated that his company processed small quantities of 11–AA as a component of photoprocessing solutions. The commenter noted that in this processing operation, up to 3 employees are potentially exposed to 11–AA for less than a total of 4 hours per year. Exposures take place under controlled conditions, and steps are taken to minimize employee exposure.

At the time this rule was proposed, the only exposure to 11–AA that EPA was aware of was employee exposure during the manufacturer of nylon 11. The Agency has now had the opportunity to evaluate these previously unknown exposures. Although EPA is concerned about any human exposure to 11–AA, the facilities that process this substance are doing so under conditions which minimize human exposure. The reporting requirements for both the SNUR and section 8(a) portions of this rule have therefore been revised to exempt facilities currently engaged in these activities from further reporting unless they change their uses or operations.

## V. Alternatives

In the proposed rule, EPA considered alternative regulatory actions for 11–AA. No comments were received that addressed the regulatory approach chosen. EPA has therefore decided to proceed with the promulgation of a combined SNUR/section 8(a) rule for this substance.

## VI. Applicability of Proposal to Uses Occurring Before Promulgation of Final Rule

EPA believes that the intent of section 5(a)(1)(B) is best served by designating a use as a significant new use as of the proposal date of the SNUR rather than as of the promulgation of the final rule. If uses begun during the proposal period of the SNUR were considered ongoing as of the date of promulgation, it would be difficult for the Agency to establish SNUR notice requirements, because any person could defeat the SNUR by initiating the proposed significant new use before the rule became final; this interpretation of section 5 would make it extremely difficult for the Agency to establish SNUR notice requirements.

Thus, persons who began commercial manufacture, importation, or processing of 11–AA for a significant new use designated in this rule between proposal and promulgation of the SNUR must cease that activity before the effective date of this rule. To resume their activities, these persons must comply with all applicable SNUR notice requirements and wait until the notice review period, including all extensions, expires.

## VII. Test Data and Other Information

EPA recognizes that, under TSCA section 5, persons are not required to develop any particular test data before submitting a significant new use notice. Rather, persons are only required to submit test data in their possession or control and to describe any other data know to or reasonably ascertainable by them.

However, in view of the potential risks that may be posed by a significant new use of 11–AA, EPA encourages potential SNUR notice submitters to conduct tests that would permit a reasoned evaluation of risks posed by 11–AA when utilized for an intended use. The Agency believes that the results of epidemiological studies would help to characterize the potential carcinogenic hazard of 11–AA to humans. In addition, the Agency does not have any information available on the effects of 11–AA to the environment. These studies may not be the only means of addressing potential risks. SNUR notices submitted without accompanying test data may increase the likelihood that EPA would take action under section 5(e).

EPA encourages persons to consult with the Agency before selecting a protocol for testing the substance. As part of this optional prenotice consultation, EPA will discuss the test data it believes are necessary to evaluate a significant new use of the substance. Test data should be developed in accordance with TSCA Good Laboratory Practice Standards at 40 CFR Part 792. Failure to do so may lead the Agency to find such data to be insufficient to reasonably evaluate the health of environmental effects of the substance.

EPA urges notice submitters to provide detailed information on human exposure or environmental release that may result from the significant new use of 11–AA. In addition, EPA encourages persons to submit information on potential benefits of this substance and information on risks posed by the substance compared to risks posed by potential substitutes.

## VIII. Economic Impact

The Agency has evaluated the potential costs of establishing SNUR and section 8(a) reporting requirements for 11–AA. The estimated cost of reporting for a person subject to either the section 8(a) or SNUR portion of this rule is between $1,400 and $8,000 per notice submitted. This is the same estimated economic impact as discussed in the proposal for this rule. The Agency's complete economic analysis is available in the public record for this rule (OPTS–50552A and OPTS–82026A).

## IX. Rulemaking Record

EPA has established a record for this rulemaking (docket control numbers OPTS–50552A and OPTS–82026A). The record includes basic information considered by the Agency in developing this rule. The record now includes the following:

1. Economic analysis of the combined SNUR/section 8(a) rule for 11–AA.
2. A chemical hazard information profile for 11–AA.
3. The NTP carcinogenesis bioassay on 11–AA.
4. *IARC Monographs on the Evaluation of Carcinogenic Risk of Chemicals to Humans. Volume 39. Some Chemicals Used in Plastics and Elastomers.* 1986. Pages 339–345.
5. Comments received on the proposed rule.

A public version of this record is available in the OTS Public Information Office, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. The Public Information Office is located in Rm. NE–G004, 401 M St., SW., Washington, DC.

## X. Regulatory Assessment Requirements

### *A. Executive Order 12291*

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore requires a regulatory impact analysis. The Agency has determined that this rule is not "major" because it will not have an effect of $100 million or more on the economy. EPA also anticipates that this rule will not have a significant effect on competition, costs, or prices.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

### *B. Regulatory Flexibility Act*

Under the Regulatory Flexibility Act, 5 U.S.C. 605(b), EPA certifies that this rule will not have a significant impact on a substantial number of small businesses.

The Agency cannot determine whether persons affected by the SNUR are likely to be small businesses. However, because EPA has no evidence of recent commercial manufacture, import, or processing of 11–AA other than for the manufacture of polymers, or as a component in photoprocessing solutions, EPA believes that few manufacturers, importers, or processors

will submit significant new use notices. Therefore, although the costs of preparing a notice under the SNUR provisions might be significant for some small businesses, the number of such businesses affected is not expected to be substantial.

The section 8(a) rule will exempt "small" manufacturers (as defined in 40 CFR 704.4) and "small" processors from reporting on this chemical substance. Therefore, EPA has determined that the section 8(a) rule will not have a significant economic impact on a substantial number of small entities.

*C. Paperwork Reduction Act*

OMB has approved the information collection requirements contained in this rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and has assigned OMB Control Numbers 2070-0067 and 2070-0038.

**List of Subjects in 40 CFR Parts 704 and 721**

Chemicals, Environmental protection, Hazardous substances, Recordkeeping and reporting requirements, Significant new uses.

Dated: May 15, 1987.

John A. Moore,

*Assistant Administrator for Pesticides and Toxic Substances.*

Therefore, 40 CFR Chapter I is amended as follows:

**PART 704—[AMENDED]**

1. In Part 704:

a. The authority citation for Part 704 continues to read as follows:

Authority: 15 U.S.C. 2607(a).

b. By adding a new § 704.25 to read as follows:

**§ 704.25 11-Aminoundecanoic acid.**

(a) *Definitions.* (1) "11–AA" means the chemical substance 11-aminoundecanoic acid, CAS Number 2432–99–7.

(2) "Enclosed process" means a process that is designed and operated so that there is no intentional release of any substance present in the process. A process with fugitive, inadvertent, or emergency pressure relief releases remains an enclosed process so long as measures are taken to prevent worker exposure to an environmental contamination from the releases.

(3) "Internal subunit" means a subunit that is covalently linked to at least two other subunits. "Internal subunits" of polymer molecules are chemically derived from monomer molecules that have formed covalent links between two or more other molecules.

(4) "Monomer" means a chemical substance that has the capacity to form links between two or more other molecules.

(5) "Polymer" means a chemical substance that consists of at least a simple weight majority of polymer molecules but consists of less than a simple weight majority of molecules with the same molecular weight. Collectively, such polymer molecules must be distributed over a range of molecular weights wherein differences in molecular weight are primarily attributable to differences in the number of internal subunits.

(6) "Polymer molecule" means a molecule which includes at least four covalently linked subunits, at least two of which are internal subunits.

(7) "Small processor" means a processor that meets either the standard in paragraph (a)(7)(i) of this section or the standard in paragraph (a)(7)(ii) of this section.

(i) *First standard.* A processor of a chemical substance is small if its total annual sales, when combined with those of its parent company, if any, are less than $40 million. However, if the annual processing volume of a particular chemical substance at any individual site owned or controlled by the processor is greater than 45,400 kilograms (100,000 pounds), the processor shall not qualify as small for purposes of reporting on the processing of that chemical substance at that site, unless the processor qualifies as small under paragraph (a)(7)(ii) of this section.

(ii) *Second standard.* A processor of a chemical substance is small if its total annual sales, when combined with those of its parent company (if any), are less than $4 million, regardless of the quantity of the particular chemical substance processed by that company.

(iii) *Inflation index.* EPA will use the Inflation Index described in the definition of "small manufacturer" set forth in § 704.3, for purposes of adjusting the total annual sales values of this small processor definition. EPA will provide notice in the **Federal Register** when changing the total annual sales values of this definition.

(8) "Subunit" means an atom or group of associated atoms chemically derived from corresponding reactants.

(b) *Persons who must report.* Except as provided in paragraph (c) of this section, the following persons are subject to this section:

(1) Persons who manufacture or propose to manufacture 11–AA:

(i) For use as an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process, or

(ii) For use as a component in photoprocessing solutions.

(2) Persons who import or propose to import 11–AA:

(i) For use as an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process, or

(ii) For use as a component in photoprocessing solutions.

(3) Persons who process or propose to process 11–AA:

(i) For use as an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process, or

(ii) For use as a component in photoprocessing solutions.

(c) *Persons not subject to this section.* The following persons are not subject to this section:

(1) Small manufacturers (includes importers) as described in § 704.3.

(2) Small processors.

(3) Persons described in § 704.5.

(4) Persons who, at any time during the 3-year period ending July 22, 1986, manufactured, imported, or processed 11–AA:

(i) For use as a intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process, or

(ii) For use as a component in photoprocessing solutions.

(d) *What information to report.* Persons identified in paragraph (b) of this section must submit a Premanufacture Notice Form (EPA Form 7710–25) as described at 40 CFR Part 720, Appendix A.

(e) *When to report.* (1) Persons who intend to manufacture, import, or process 11–AA for use as an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process or for use as a component in photoprocessing solutions must notify EPA within 30 days after making a firm management decision to commit financial resources for the manufacturing, importing, or processing of 11–AA.

(2) Persons who initiated manufacturing, importing, or processing of 11–AA for use as an intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11–AA will be fully polymerized during the manufacturing process, or for use as a component in photoprocessing

solutions during the time period between July 22, 1986 and July 13, 1987 must notify EPA by August 10, 1987.

(f) *Recordkeeping.* Persons subject to the reporting requirements of this section must retain documentation of information contained in their reports for a period of 5 years from the date of submission of the report.

(g) *Where to send reports.* Reports must be submitted by certified mail to: Document Control Officer (TS-790), Office of Toxic Substances, United States Environmental Protection Agency, Room 201 East Tower, 401 M Street SW, Washington, DC 20460. ATTN: 11-AA Notification.

## PART 721—[AMENDED]

2. In Part 721:

a. The authority citation for Part 721 continues to read as follows:

Authority: 15 U.S.C. 2604 and 2607.

b. By adding a new § 721.109 to read as follows:

### § 721.109 11-Aminoundecanoic acid.

(a) *Chemical substance and significant new use subject to reporting.* (1) The chemical substance 11-aminoundecanoic acid, CAS Number 2432-99-7, is subject to reporting under this section for the significant new use described in paragraph (a)(2) of this section.

(2) The significant new use is any use other than as:

(i) An intermediate in the manufacture of polymers in an enclosed process when it is expected that the 11-aminoundecanoic acid will be fully polymerized during the manufacturing process, or

(ii) A component in photoprocessing solutions.

(b) *Specific requirements.* The provisions of Subpart A of this part apply to this section except as modified by this paragraph.

(1) *Definitions.* In addition to the definitions in § 721.3, the following definitions apply to this section:

(i) "Enclosed process" means a process that is designed and operated so that there is no intentional release of any substance present in the process. A process with fugitive, inadvertent, or emergency pressure relief releases remains an enclosed process so long as measures are taken to prevent worker exposure to and environmental contamination from the releases.

(ii) "Internal subunit" means a subunit that is covalently linked to at least two other subunits. "Internal subunits" of polymer molecules are chemically derived from monomer molecules that have formed covalent links between two or more other molecules.

(iii) "Monomer" means a chemical substance that has the capacity to form links between two or more other molecules.

(iv) "Polymer" means a chemical substance that consists of at least a simple weight majority of polymer molecules but consists of less than a simple weight majority of molecules with the same molecular weight. Collectively, such polymer molecules must be distributed over a range of molecular weights wherein differences in molecular weight are primarily attributable to differences in the number of internal subunits.

(v) "Polymer molecule" means a molecule which includes at least four covalently linked subunits, at least two of which are internal subunits.

(vi) "Subunit" means an atom or group of associated atoms chemically derived from corresponding reactants.

(2) [Reserved].

## 40 CFR Parts 795 and 799

[OPTS-42046D; FR 5209-5]

## Hydroquinone; Final Test Standards and Reporting Requirements

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** On December 30, 1985, EPA issued a final test rule establishing testing requirements under section 4(a) of the Toxic Substances Control Act (TSCA) for manufacturers and processors of hydroquinone (CAS No. 123-31-9). At that time, EPA also proposed that certain TSCA test guidelines and industry-submitted protocols be utilized as the test standards for the required studies and that test data be submitted within specified time frames. EPA has reviewed public comments on the proposal and has decided to promulgate a final rule that specifies certain of these guidelines, protocols, and schedules as the test standards and reporting requirements for the testing of hydroquinone.

**DATES:** In accordance with 40 CFR 23.5, this rule shall be promulgated for purposes of judicial review at 1 p.m. eastern ["daylight" or "standard" as appropriate] time on June 11, 1987. This rule shall become effective on July 13, 1987.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Rm. E-543, 401 M St. SW., Washington, DC 20460, (202) 554-1404.

SUPPLEMENTARY INFORMATION: In the Federal Register of December 30, 1985 (50 FR 53145), EPA issued a final Phase I rule under section 4(a) of TSCA to require toxicity testing of hydroquinone to evaluate hydroquinone's toxicokinetics and to determine its potential to produce nervous system, reproductive, and developmental toxicity (teratogenic effects). The Agency is now promulgating a final Phase II rule specifying the test standards and reporting requirements for this testing. This test standards rule for hydroquinone is being promulgated under 40 CFR 799.2200.

### I. Background

In the Federal Register of December 30, 1985, EPA issued a Phase I final rule pursuant to TSCA section 4 that established testing requirements for manufacturers and processors of hydroquinone. This Phase I rule specified the following testing requirements for hydroquinone: (1) Toxicokinetics; (2) reproductive effects; (3) developmental toxicity; and (4) nervous system effects.

As described in the Hydroquinone Proposed Testing Standards (50 FR 53160) and in a previous notice (50 FR 20652; May 17, 1985) EPA reviewed the method for development of test rules and, to expedite the section 4 rulemaking process, decided to utilize a single-phase approach for most rulemakings. With regard to the section 4 rulemaking for hydroquinone, EPA proposed applicable TSCA test guidelines and EPA-approved industry protocols as test standards. At the same time as the hydroquinone Phase I final test rule was being issued, TSCA test guidelines and EPA-approved industry protocols were available for all the testing requirements included in the Phase I final rule. After publication of the proposed hydroquinone test standards on December 30, 1985, a 45-day comment period was provided to allow the public, including the manufacturers and processors subject to the Phase I rule, to comment on the use of the TSCA guidelines and industry protocols.

Because EPA proposed applicable TSCA test guidelines and industry-submitted protocols as the test standards for the studies required by the hydroquinone Phase I final rule, persons subject to the rule, i.e., manufacturers

and processors of hydroquinone, were not required to submit proposed study plans and schedules for each of the required studies. Persons subject to the rule, however, were still required to submit notices of intent to test or exemption applications in accordance with 40 CFR 790.25. Once the final test standards are promulgated, persons who have notified EPA of their intent to test must submit study plans (which adhere to the promulgated test standards) no later than 45 days before the initiation of each required test. The responsibilities of processors of hydroquinone for testing or exemptions from testing responsibilities were discussed in the hydroquinone Phase I final rule (50 FR 53145).

On June 15, 1983 and prior to the Agency's issuance of the hydroquinone Phase I Proposed Rule, the Eastman Kodak Company notified EPA by letter (Ref. 1) of their intent to conduct voluntary toxicokinetic, mutagenicity, and teratology tests with hydroquinone and submitted the protocols for these studies to the Agency for review. Kodak also submitted protocols for additional confirmatory teratology and reproductive effects studies which they indicated would be conducted under their voluntary plan only after a joint evaluation by Kodak and EPA scientists of any additional EPA health concerns remaining after the initial testing. At the time of the submission of this voluntary testing package, EPA was in the process of concluding its review of the health and environmental effects testing needs for hydroquinone. While the Agency approved several of the Kodak testing protocols, EPA did not accept Kodak's voluntary testing program because the Agency was in the process of issuing a proposed test rule (49 FR 438; January 4, 1984) for hydroquinone that would require more complete health and environmental testing of the chemical.

Kodak, however, initiated its testing program and, sometime later, the manufacturers and importers of hydroquinone formed the Hydroquinone Panel, represented by the Chemical Manufacturers Association. Kodak, in concert with the Panel, is continuing its testing efforts. As part of its comments (Ref. 2) to the proposed Hydroquinone Test Standards (50 FR 53160) the Panel has notified EPA of its intent to sponsor the testing required in the final Phase I test rule for hydroquinone.

After review of the public comments, EPA is now promulgating a final Phase II rule adopting (with appropriate revisions based on public comment) formal test standards under which the manufacturers and processors of hydroquinone must conduct the health effects studies contained in the Phase I test rule for hydroquinone. These standards were proposed in the December 30, 1985 notice (50 FR 53160). These standards and requirements reflect the Agency's evaluation of comments received on the proposed test standards rule.

## II. Proposed Phase II Test Rule

### *A. Proposed Test Standards*

The final Phase I rule for hydroquinone required testing for toxicokinetics, developmental toxicity, reproductive effects, and nervous system effects.

The Agency proposed that the toxicokinetic guideline under 40 CFR 798.7650 now 40 CFR 795.235, which was contained in the proposed Phase II test standard rule, be adopted as the test standard for the required toxicokinetic testing.

EPA proposed that the developmental toxicity testing be conducted according to the protocols entitled "Protocol for a Teratology Study of Hydroquinone in Rats" and "Protocol for a Teratology Study of Hydroquinone in Rabbits", submitted to EPA by the Eastman Kodak Company on June 15, 1983 (Ref. 1) and that these industry-submitted protocols be adopted as the test standard for the required developmental toxicity testing.

EPA also proposed that the reproductive effects testing be conducted according to the protocol entitled "Protocol for a Two-Generation Reproduction Study in the Rat" submitted to EPA on June 15, 1983 (Ref. 1) and that this industry-submitted protocol be adopted as the test standard for the required reproductive effects testing.

Finally, the Agency proposed that TSCA test guidelines 40 CFR 798.6050 and 798.6400, describing a functional observational battery and neuropathology, respectively, be adopted as the test standards for the required neurotoxicity testing of hydroquinone.

### *B. Proposed Reporting Requirements*

EPA proposed that all data developed under the Phase II rule be developed in accordance with the final TSCA Good Laboratory Practice (GLP) Standards, which appear at 40 CFR Part 792.

The Agency proposed the following specific reporting requirements:

1. The toxicokinetic tests shall be completed and the final results submitted to the Agency within 1 year of the effective date of the final Phase II test rule. Interim progress reports shall be provided quarterly.

2. The developmental toxicity tests shall be completed and the final results submitted to the Agency within 18 months of the effective date of the final Phase II test rule. Interim progress reports shall be provided quarterly.

3. The two-generation reproductive effects toxicity test shall be completed and final results submitted to the Agency within 29 months of the effective date of the final Phase II test rule. Interim progress reports shall be provided quarterly.

4. The neurotoxicity tests shall be completed and final results submitted to the Agency within 1 year of the effective date of the final Phase II test rule. Interim progress reports shall be provided quarterly.

## III. Response to Public Comments

EPA requested comments on the use of the TSCA test guidelines and Agency-approved industry protocols as the test standards for the required testing of hydroquinone and the proposed schedules for the required testing. The Agency received written comments from the Hydroquinone Panel (Ref. 2); however, a public meeting was not requested.

In keeping with the intent of this Phase II rule, which is to establish the test standards and the scheduling of those tests, the Agency is responding to those industry comments which are relevant to those issues. However, issues in the comments concerning the necessity for testing have been previously discussed in the proposed and final phase I rule and are therefore not discussed here. No comments relating to the test standards for the developmental toxicity and reproductive effects testing were received.

### *A. Toxicokinetics*

The hydroquinone Phase I final rule required skin and oral dosing studies, which will provide data regarding both the rate and extent of absorption of hydroquinone through the skin. In the proposed Phase II test standards rule, the Agency proposed a specific test standard in § 798.7650 recodified as § 795.235 in this rule to be followed when conducting the required oral and dermal testing of hydroquinone in rats.

With regard to the dermal studies, the CMA Hydroquinone Panel has commented that EPA should require an *in vitro* study of the kinetics of hydroquinone penetration through rat skin in place of the proposed *in vivo* rat skin absorption study. They argue that data on dermal penetration in the rat can be obtained in a more reliable, rapid, and cost-effective manner by an

*in vitro* study and such a study would allow longer exposure periods and direct collection of quantitative data (Ref. 2).

Kodak supports their argument by citing a Kodak study of the percutaneous absorption of [U-$^{14}$C] hydroquinone in dogs (Refs. 2 and 6). Kodak argues that because the dog study showed very slow skin penetration (about 1.1 ug/cm$^2$/hr), similar tests in rats would not provide enough penetration to characterize metabolites and would provide only data on the skin penetration rate of hydroquinone through rat skin. The Panel adds that if their suggested *in vitro* study establishes a high rate (higher than the low rate expected by the Panel) they then can conduct an *in vivo* study.

The CMA Hydroquinone Panel requested a meeting with the Agency to discuss these issues, and the meeting was held on September 4, 1986 (Ref. 3). After reviewing (Refs. 4, 5, and 8) the arguments presented by the Hydroquinone Panel (Refs. 1, 6, and 7), the Agency rejects the modification to the test standard as proposed by the Panel. This decision is based on the following reasons: (1) The Agency believes that the dermal penetration study, "Percutaneous Absorption of Hydroquinone in Beagle Dogs," upon which the Panel has based its prediction of limited skin penetration in rats, has serious deficiencies. Deficiencies, such as the failure of the study to account for large amounts of the hydroquinone administered to the test animals, make it impossible for the Agency to reasonably predict the behavior of hydroquinone applied to other test animals such as rats or to the skin of humans exposed to hydroquinone. (2) While the Panel has suggested that they would perform an *in vivo* test if their suggested *in vitro* study shows a "high" skin penetration rate, they have not stated what level of absorption in the *in vitro* study or other factors would dictate that the *in vivo* study should also be conducted.

*B. Neurotoxicity*

With regard to the neurotoxicity testing required by the hydroquinone Phase I final test rule, the Agency proposed that the functional observational battery and neuropathology be conducted in accordance with 40 CFR 798.6050 and 798.6400, respectively.

In its comments, CMA's Hydroquinone Panel proposed that the functional-observational battery and the neuropathology examinations be conducted sequentially on the same group of rats. They comment that in conducting neurotoxicological evaluations, the best data would be expected from studies which integrate functional observations with microscopical observations. They add that a sequential study would also be the most cost-effective use of testing resources, would reduce the number of test animals, and would provide internal test controls. Critical analysis of any observed functional effects would be used to plan the pathologic examination.

The Panel suggested that the study be conducted by dosing the test animals at three levels and observing all the dosed animals as appropriate for the functional-observational battery. Neuropathology would then be conducted only on the high-dose group. No neuropathology would be conducted on animals receiving the lower doses, unless abnormal effects are observed during the study of the high-dose animals.

EPA believes that the functional-observational battery could indeed be carried out in conjunction with neuropathological assessment, and would spare committing additional animals to the toxicity evaluation. Neuropathological assessment should begin with the highest dose level and work downward until a no-observable-adverse-effects dose level is reached. According to the functional-observational battery testing guideline, the highest dose used should result in clear behavioral effects regardless of whether these are of a neural origin. Smaller doses are selected appropriately so as to provide information on the shape of the dose-response curve. The Agency agrees with the suggestion of a staged neuropathology examination, as described in the TSCA neuropathology test guidelines.

## IV. Final Phase II Test Rule

*A. Test Standards*

The TSCA test guidelines for toxicokinetic studies in 40 CFR 795.235, the neurotoxicity testing in 40 CFR 798.6050 and 798.6400 and the industry-submitted protocols for developmental toxicity and reproductive effects testing shall be the test standards for the testing of hydroquinone required under 40 CFR 799.2200. The Agency believes that the conduct of the required studies in accordance with these test standards is necessary to assure that the results are reliable and adequate.

The revised guidelines for tests included in this Phase II rule, published in the **Federal Register** of May 20, 1987 (52 FR 19056), are adopted in the test standards for the testing of hydroquinone. EPA has responded to comments concerning these guideline revisions and that response to comment document is contained in the record for this rulemaking (Ref. 9).

*B. Reporting Requirements*

The Agency is requiring that all data developed under this rule be reported in accordance with the TSCA Good Laboratory Practice Standards (40 CFR Part 792).

Test sponsors are required to submit individual study plans at least 45 days prior to the initiation of each study in accordance with 40 CFR 790.50.

The Agency is required by TSCA section 4(b)(1)(C) to specify the time period during which persons subject to a test rule must submit test data. On the basis of its experience with health effects testing, EPA is adopting the proposed schedule for the submission of final test results as the final Phase II rule schedule.

The Agency has revised the reporting requirement for the submission of interim progress reports for testing under section 4 of TSCA. Accordingly, the Agency now requires only 6-month interim progress reports on all studies for hydroquinone, as opposed to the quarterly reporting schedule contained in the proposed test standard rule.

TSCA section 14(b) governs Agency disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by this rule, the Agency will publish a notice of receipt in the **Federal Register** as required by section 4(d).

*C. Conditional Exemptions Granted*

The final rule for test rule development and exemption procedures (40 CFR Part 790) indicates that, when certain conditions are met, exemption applicants will be notified by certified mail or in the final Phase II test rule for a given substance that they have received conditional exemptions from test rule requirements. The exemptions granted are conditional because they will be given based on the assumption that the test sponsors will complete the required testing according to the test standards and reporting requirements established in the final Phase II test rule for the given substance. TSCA section 4(c)(4)(B) provides that if an exemption is granted prospectively (that is, on the basis that one or more persons are developing test data, rather than on the basis of prior test data submissions), the Agency must terminate the exemption if the test sponsor has not complied with the test rule.

Because sponsors have indicated to EPA by letter or intent (Ref. 1) their

agreement to sponsor all of the tests required for hydroquinone in the final Phase I test rule for this substance according to the test standards and reporting requirements established in this final Phase II test rule for hydroquinone, the Agency is hereby granting conditional exemptions to all exemption applicants for all of the testing required for hydroquinone in 40 CFR 799.2200.

*D. Judicial Review*

The promulgation date for the hydroquinone Phase I final rule was established as 1 p.m. eastern standard time on January 13, 1986 (50 FR 53145; December 30, 1985). EPA received no petitions for review of that Phase I final rule. Accordingly, any petition for judicial review of this Phase II final rule will be limited to a review of the test standards and reporting requirements for hydroquinone established in this rule.

*E. Other Provisions*

Section 4 findings, required testing, test substance specifications, persons required to test, enforcement provisions, and the economic analysis are presented in the final Phase I rule for hydroquinone (50 FR 53145).

## V. Rulemaking Record

EPA has established a record for this rulemaking, [docket number (OPTS-42048D]. This record includes basic information considered by the Agency in developing this rule, and appropriate Federal Register notices.

This record includes the following information:

*A. Supporting Documentation*

The supporting documentation for this rulemaking consists of the proposed and final Phase I test rules on hydroquinone and the proposed hydroquinone test standards rule.

*B. References*

(1) Eastman Kodak Company. Protocols for a Voluntary Test Program on Hydroquinone. Submitted to Steven Newburg-Rinn, Chief, Test Rules Development Branch. (June 15, 1983).

(2) Chemical Manufacturers Association. Comments on Hydroquinone; Proposed Testing Standards 50 FR 53160; December 30, 1985. Submitted by the Hydroquinone Program Panel of the Chemical Manufacturers Association. (February 13, 1986).

(3) Meeting summary. CMA Hydroquinone Panel and EPA's Office of Toxic Substances. (September 4, 1986).

(4) Memorandum USEPA. Charles Abernathy Ph.D., Health and Environmental Review Division, to Gary E. Timm, Existing Chemicals Assessment Division. (June 20, 1986).

(5) Memorandum. USEPA. Charles Abernathy Ph.D., Health and Environmental Review Division, to David Price, Existing Chemicals Assessment Division. (November 17, 1986).

(6) Letter. Geraldine Cox, Chemical Manufacturers Association, to David Price, Existing Chemicals Assessment Division. In attachment, discussion of *in vitro* and *in vivo* testing for skin absorption. (October 2, 1986).

(7) Letter. Kathryn Rosica, Chemical Manufacturers Association, to Document Control Officer, USEPA. Suggested *in vitro* study protocol. (May 28, 1986).

(8) Document review. Review and evaluation of Eastman Kodak Study—"The Percutaneous Absorption of U-$^{14}$C Hydroquinone in Beagle Dogs" by Research Evaluation Associates. (January 6, 1986).

(9) USEPA. "Response to Public Comments, Proposed Revision of TSCA Test Guidelines as published in 51 FR 1522 (January 14, 1986)". Test Rules Development Branch, Existing Chemicals Assessment Division, Office of Toxic Substances, Environmental Protection Agency, Washington, DC (January 1987).

The record is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in Rm. G-004, Northeast Mall, 401 M Street SW., Washington, DC 20460.

## VI. Other Regulatory Requirements

*A. Executive Order 12291*

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirements of a Regulatory Impact Analysis. This test rule is not major because it does not meet any of the criteria set forth in section 1(b) of the Order. The economic analysis of the testing of hydroquinone is discussed in the Phase I test rule (50 FR 53145; December 30, 1985).

This final Phase II test rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. No comments were received.

*B. Regulatory Flexibility Act*

Under the Regulatory Flexibility Act, (15 U.S.C. 601 *et seq.*, Pub L. 96-354, September 19, 1980), EPA is certifying that this rule will not have a significant impact on a substantial number of small businesses for the following reasons:

(1) There are not a substantial number of small businesses manufacturing hydroquinone.

(2) Small processors are not expected to perform testing themselves, or to participate in the organization of the testing efforts.

(3) Small processors will experience only very minor costs if any in securing exemption from testing requirements.

(4) Small processors are unlikely to be affected by reimbursement requirements, and any testing costs passed on to small processors through price increases will be small.

*C. Paperwork Reduction Act*

OMB has approved the information collection requirements contained in this final rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and has assigned OMB control number 2070-0033. No public comments on these requirements were submitted to the Office of Information and Regulatory Affairs of OMB.

**Lists of Subjects in 40 CFR Parts 795 and 799**

Testing, Environmental protection, Hazardous substances, Chemicals, Recordkeeping and reporting requirements.

Dated: May 11, 1987.

J.A. Moore,

*Assistant Administrator for Pesticides and Toxic Substances.*

Therefore, Chapter I of 40 CFR is amended as follows:

## PART 795—[AMENDED]

1. In Part 795:

a. The authority citation for Part 795 continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. Section 795.235 is added, to read as follows:

### § 795.235 Toxicokinetic Test.

(a) *Purpose.* These studies are designed to: (1) Determine the bioavailability of the test substance after dermal or oral treatment.

(2) Ascertain whether the metabolites of the test substance are similar after dermal (assuming significant penetration) and oral administration.

(3) Examine the effects of a multiple dosing regimen on the metabolism of the test substance after *per os* administration.

(b) *Definition of scope of study.* Absorption toxicokinetics refers to the bioavailability, i.e., the rate and extent of absorption of the test substance, and metabolism and excretion rates of the test substance after absorption.

(c) *Test procedures*—(1) *Animal selection*—(i) *Species.* The rat is the animal species of choice since it has been used extensively for absorption, metabolism, and toxicological studies.

(ii) *Rat strain.* Adult male and female Fischer 344 rats shall be used. At 7 to 9 weeks of age, the males should weigh 125 to 175 g and the females 110 to 150 g.

The rats shall be purchased from a reputable dealer and identified with ear tags upon arrival. The animals shall be randomly selected for the testing groups, and no unhealthy animal is to be used for experimentation.

(iii) *Animal care.* (A) Animal care and housing should be in accordance with Department of Health, Education and Welfare Publication No. (NIH)–78–23, 1978. "Guidelines for the Care and Use of Laboratory Animals," or its equivalent.

(B) The animals shall be housed in environmentally controlled rooms with 10 to 15 air changes per hour. The rooms shall be maintained at a temperature of 25±2 °C and humidity of 50±10 percent with a 12-hour light/dark cycle per day. The rats shall be kept in a quarantine facility for at least 7 days prior to use.

(C) During the acclimatization period, the rats shall be housed in polycarbonate cages on hardwood chip bedding. All animals shall be provided with certified feed and tap water *ad libitum.*

(iv) *Number of animals.* There shall be at least four animals of each sex in each experimental group.

(2) *Administration of test substance*—(i) *Test substance.* Test substance of at least 99 percent purity, commercially available, should be used as the test substance. Since both nonradioactive and radioactive (uniformly $^{14}$C-labelled) test substances are to be used, they should be chromatographed separately and analyzed together, to ascertain purity and identity. The use of $^{14}$C-labelled test substance, diluted with unlabeled test substance, is required for all of the studies under this section, unless otherwise specified, as it will greatly increase the reliability and sensitivity of the quantitative assays and facilitate the identification of metabolites.

(ii) *Dosage and treatment.* (A) Two doses shall be used in studies under this section, a "low" dose and a "high" dose. When administered orally, the "high" dose level should ideally induce some overt toxicity, such as weight loss. The "low" dose level should not induce observable effects attributable to the test substance. If feasible, the same "high" and "low" doses should be administered orally and dermally.

(B) Oral dosing shall be accomplished by gavage after dissolving the test substance in a suitable vehicle. For dermal treatment, the doses shall be administered in a suitable solvent and applied at a volume adequate to deliver the prescribed doses. The backs of the rats should be shaved with an electric clipper one day before treatment. The dose should be applied with a disposable micropipette on a specific area (2 cm$^2$ for rats) on the shaven skin. The dosed areas shall be occluded with an aluminum foil patch which is secured in place with adhesive tape.

(iii) *Determination of test substance kinetics.* Each experimental group shall contain at least four rats of each sex for a total of eight rats.

(a) *Oral studies.* (*1*) Group A shall be dosed once *per os* with the low dose of the test substance.

(*2*) Group B shall be dosed once *per os* with the high dose of the test substance.

(*3*) For the oral studies, the rats shall be placed in individual metabolic cages to facilitate collection of urine and feces at 8, 24, 48, 72, and 96 hours following administration. The cages shall be cleaned at each time period to collect any metabolites that might adhere to the metabolic cages.

(B) *Dermal Studies.* (*1*) Group C shall be dosed once dermally with the low dose of test substance.

(*2*) Group D shall be dosed once dermally with the high dose of test substance.

(*3*)(*i*) For the dermal studies, the test substance shall be applied for 24 hours. Immediately after application, each animal shall be placed in a separate metabolic cage for excreta collection. At the time of removal of the aluminum foil, the occluded area shall be washed with an appropriate solvent (see below), to remove any test substance that may be on the skin surface and the wash solvent assayed for the amount of test substance recovered. At the termination of the experiments, each animal shall be sacrificed and the exposed skin area removed. The skin (or an appropriate section) shall be solubilized and assayed for the test substance and its metabolites.

(*ii*) Before initiation of the dermal studies, an initial washing efficiency experiment shall be conducted to assess the removal of the applied test substance by washing the exposed skin area with soap and water or organic solvents. Four rats, two of each sex, shall be lightly anesthetized and then test substance applied to a specified area. After application (5 to 10 minutes), the areas should be washed with soap and water (two rats) or ethanol and water (two rats). The amount recovered shall be determined to assess efficacy of test substance removal by washing of the skin.

(C) *Repeated dosing study group E.* Four rats (two of each sex) shall receive a series of single daily oral doses of nonradioactive test substance over a period of at least 14 days, followed at 24 hours after the last dose by a single oral dose of $^{14}$C-labelled test substance. Each dose shall be at the low dose level.

(3) *Observation of animals*—(i) *Bioavailability*—(A) *Blood levels.* The levels of $^{14}$C shall be determined in whole blood, blood plasma, or blood serum at appropriate intervals from 1 to 96 hours after dosing rats in Groups A through E. Four rats (two of each sex) of each group shall be used for this purpose.

(B) *Urinary and fecal excretion.* The quantities of $^{14}$C excreted in the urine and feces by rats in groups A through E shall be determined at 8 hours, 24 hours, 48 hours, 72 hours, and 96 hours after dosing, and if necessary, daily thereafter until at least 90 percent of the applied dose has been excreted or until 7 days after dosing (whichever occurs first). Four animals (two of each sex) shall be used for these analyses.

(ii) *Biotransformation after oral and dermal dosing.* Appropriate qualitative and quantitative methods shall be used to assay the test substance and metabolites in the urine and fecal specimens collected from rat Groups A through D.

(iii) *Changes in Biotransformation.* Appropriate qualitative and quantitative assay methodology shall be used to compare the composition of $^{14}$C-labelled compounds in excreta collected at 14 and 48 hours after dosing rat Group A with those in the excreta collected at 24 and 48 hours after the $^{14}$C-labelled test substance dose in the repeated dose study (Group E).

(d) *Data and reporting*—(1) *Treatment of results.* Data should be summarized in tabular form.

(2) *Evaluation of results.* All observed results, quantitative or incidental, should be evaluated by an appropriate statistical method.

(3) *Test report.* In addition to the reporting requirements specified in the EPA Good Laboratory Practice Standards (40 CFR Part 792, Subpart J) the following specific information shall be reported:

(i) Specie(s) and strain(s) of laboratory animals.

(ii) Information on the degree (i.e., specific activity for a radiolabel) and site(s) of labeling of the test substance;

(iii) A full description of the sensitivity and precision of all procedures used to produce the data.

(iv) Percent absorption by oral and dermal routes of rats administered $^{14}$C-test substance.

(v) Quantity of isotope, together with percent recovery of administered dose in feces, urine, blood, and skin and skin washings (dermal study only for last two portions).

(vi) Quantity and distribution of $^{14}C$-labelled test substance in various tissues, including bone, brain, fat, gonads, heart, kidney, liver, lung, muscle, spleen, and residual carcass.

(vii) Counting efficacy data shall be made available to the Agency upon request.

**PART 799—[AMENDED]**

2. In Part 799:

a. The authority citation for Part 799 continues to read as follows:

**Authority:** 15 U.S.C. 2603, 2611, 2625.

b. By amending § 799.2200 by adding paragraphs (c)(1) (ii), (iii), (2) (ii), (iii), (3) (ii), (iii), (4) (ii), (iii), and (d) to read as follows:

**§ 799.2200 Hydroquinone.**

* * * * *

(c) * * *

(1) * * *

(ii) *Test standard.* The toxicokinetic testing shall be conducted in accordance with § 795.235 of this chapter.

(iii) *Reporting requirements.* (A) The toxicokinetic tests shall be completed and the final results submitted to the Agency within 1 year of the effective date of the Phase II final test rule.

(B) A progress report shall be provided 6 months from the effective date of the final Phase II rule.

(2) * * *

(ii) *Test standards.* The developmental toxicity testing shall be conducted according to the teratology study plans submitted to the EPA on June 15, 1983 (Eastman Kodak Company, 1983) and reviewed by the Agency as part of the study plan. Copies of the study plan are located in the public record for this test rule (Docket No. OPTS–42048D) and are available for inspection in the OPTS Reading Rm., G–004, Northeast Mall, 401 M. St., SW., Washington, DC 20460, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

(iii) *Reporting requirements.* (A) The Developmental toxicity tests shall be completed and the final results submitted to the Agency within 18 months of the effective date of the final Phase II rule.

(B) Interim progress reports shall be provided at 6-month intervals beginning 6 months from the effective date of the final Phase II rule.

(3) * * *

(ii) *Test standard.* The reproductive effects testing shall be conducted according to the two generation reproduction unit of the study plan, submitted to the EPA on June 15, 1983 (Eastman Kodak Company, 1983) and reviewed by the Agency as a part of the study plan. A copy of this study plan is located in the public record for this test rule (docket no. OPTS–42048D) and is available for inspection in the OPTS Reading Rm., G–004, Northeast Mall, 401 M Street SW., Washington, DC 20460, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

(iii) *Reporting requirements.* (A) The two-generation reproductive effects toxicity test shall be completed and final results submitted to the Agency within 29 months of the effective date of the final Phase II rule.

(B) Interim progress reports shall be provided at 6-month intervals beginning 6 months from the effective date of the final Phase II rule.

(4) * * *

(ii) *Test standards.* The neurotoxicity testing of hydroquinone, consisting of a functional observational battery and neuropathology shall be conducted in accordance with §§ 798.6050 and 798.6400, respectively, of this chapter. The functional-observational battery and the neuropathology assessment may be conducted sequentially on the same group of rats. Neuropathological assessment should begin with the highest dose level and work downward until a no-observable-adverse-effects dose is reached.

(iii) *Reporting requirements.* (A) The neurotoxicity tests shall be completed and final results submitted to the Agency within one year of the effective date of the final Phase II rule.

(B) Interim progress reports shall be provided 6 months from the effective date of the final Phase II rule.

(d) *Effective date.* The effective date of the final Phase II rule for hydroquinone is July 13, 1987.

## DEPARTMENT OF DEFENSE

### 48 CFR Parts 203 and 252

### Federal Acquisition Regulation Supplement; Conflicts of Interest in Defense Procurement; Correction

**AGENCY:** Department of Defense (DoD).

**ACTION:** Interim rule; correction.

**SUMMARY:** This document corrects an interim rule issuing changes to the DoD Federal Acquisition Regulation Supplement with respect to Conflicts of Interest in Defense Procurement, published in the Federal Register on April 16, 1987 (52 FR 12383). This action is necessary to add coverage which was previously omitted.

**FOR FURTHER INFORMATION CONTACT:** Mr. Charles W. Lloyd, Executive Secretary, DAR Council, (202) 697–7266.

**Charles W. Lloyd,**

*Executive Secretary, Defense Acquisition Regulatory Council.*

Accordingly, the Department of Defense is correcting 48 CFR Parts 203 and 252 as follows:

**PART 203—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST**

**203.170-2 [Corrected]**

Section 203.170–2 is corrected to add in the first sentence after the word "who" the words "left DoD service on or after April 16, 1987, and who".

**PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES**

**252.203-7002 [Corrected]**

Section 252.203–7002 is corrected to add in the first sentence of paragraph (b)(1) of the clause after the word "official" the words "who left DoD service on or after April 16, 1987, and"; and to add to paragraph (c)(1)(i) of the clause after the word "service" the words "(on or after April 16, 1987),".

### 48 CFR Parts 204, 205, 219, and 252

### Federal Acquisition Regulation Supplement; Set-Asides for Small Disadvantaged Business Concerns; Correction

**AGENCY:** Department of Defense (DoD)

**ACTION:** Interim rule; correction.

**SUMMARY:** This document corrects an interim rule issuing changes to the DoD FAR Supplement with respect to Set-Asides for Small Disadvantaged Business Concerns, which were published in the Federal Register on May 4, 1987 (52 FR 16263). This action is necessary to correct amendatory language and to make editorial corrections to the rule.

**FOR FURTHER INFORMATION CONTACT:** Mr. Charles W. Lloyd, Executive Secretary, ODASD(P)/DARS, c/o OUSD(A) Mail Room, Room 3D139, The Pentagon, Washington, DC 20301–3062.

**Charles W. Lloyd,**

*Executive Secretary, Defense Acquisition Regulatory Council.*

Accordingly, the Department of Defense is correcting 48 CFR Parts 204, 205, 219, and 252 as follows:

**PART 204—ADMINISTRATIVE MATTERS**

1. The amendatory language in paragraph 2 is corrected to remove the words "or 5" between the words "Code 4" and the word "below"; to change the word "paragraphs" to read "paragraph"; and to delete the words "and (v)" between the number "(iv)" and the words "to paragraph (e)(3)".

**204.671-5 [Corrected]**

2. The coverage in section 204.671-5 is amended by removing paragraph (e)(3)(v).

**PART 205—PUBLICIZING CONTRACT ACTIONS**

**205.202 [Removed]**

3. Paragraph 3 of the amendatory language is removed, and section 205.202 is removed.

**PART 219—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS**

**219.304 [Corrected]**

4. Section 219.304 is amended by changing in paragraph (b) the number of the provision from "252.7005" to "252.219-7005"; and by adding in paragraph (b) before the words "in lieu of" the words "(DoD FAR Supplement Deviation)".

**PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES**

**202.219-7005 [Correctly designated 252.219-7006]**

5. Section 202.219-7005 is corrected to read "252.219-7005" and the section is amended by adding to the section heading the words "(DoD FAR Supplement Deviation); by inserting in the introductory paragraph a colon after the word "provision" and removing the remainder of the introductory paragraph; by adding to the title of the clause the words "(DoD FAR Supplement Deviation)"; by removing in the date of the clause the letters "XXX" and inserting the word "(MAY"; and by adding to the clause paragraph (c), to read as follows:

**252.219-7005 Small disadvantaged business concern representation (DoD FAR Supplement Deviation).**

* * * * *

(c) The Offeror represents and certifies that the above information is true and understands that whoever for the purpose of securing a contract or subcontract under subsection (a) of section 1207 of Public Law 99-661, the FY 1987 National Defense Authorization Act, misrepresents the status of any concern or person as a small business concern owned and controlled by a minority (as described in subsection (a)) shall be punished by a fine of not less than $10,000 or by imprisonment for not more than a year, or both.

* * * * *

**252.219-7006 [Corrected]**

6. Section 252.219-7006 is amended by inserting in the introductory paragraph a colon after the word "clause" and removing the remainder of the paragraph; and by adding in the title of the clause in the blank space before the year "1987" the month "MAY".

[FR Doc. 87-12152 Filed 5-27-87; 8:45 am]

BILLING CODE 3810-01-M

---

**48 CFR Parts 214 and 215**

**Federal Acquisition Regulation Supplement; Technical Data**

**AGENCY:** Department of Defense (DoD).

**ACTION:** Final rule.

**SUMMARY:** The Defense Acquisition Regulatory Council has approved revisions to Parts 214 and 215 of the Defense Federal Acquisition Regulation Supplement (DFARS) to conform to coverage recently developed in Parts 227 and 252 to implement section 953 of the Defense Acquisition Improvement Act of 1986 (Pub. L. 99-500).

**EFFECTIVE DATE:** May 18, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mr. Charles W. Lloyd, Executive Secretary, DAR Council, ODASD(P)/DARS, c/o OUSD(A) Mail Room, Room 3D139, The Pentagon, Washington, DC 20301-3062, telephone (202) 697-7266.

**SUPPLEMENTARY INFORMATION:**

**A. Background**

Parts 214 and 215 of the Defense Federal Acquisition Regulation Supplement (DFARS) are revised to provide reference to recently developed coverage in Part 227 with regard to technical data.

**B. Regulatory Flexibility Act Information**

The changes are editorial in nature and do not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

**C. Paperwork Reduction Act Information**

The rule does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501 et seq.

**List of Subjects in 48 CFR Parts 214 and 215**

Government procurement.

Charles W. Lloyd,

*Executive Secretary, Defense Acquisition Regulatory Council.*

**Adoption of Amendments**

Therefore the DoD FAR Supplement is amended as set forth below.

1. The authority for 48 CFR Parts 214 and 215 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

**PART 214—SEALED BIDDING**

**214.201 [Amended]**

2. Section 214.201 is amended by removing the text of the section: "Reserved, pending determination to what extent guidance may be necessary." The section heading is retained as set forth below.

**214.201 Preparation of invitation for bids**

3. Section 214.201-2 is added to read as follows:

**214.201-2 Part I—The Schedule.**

When a DD Form 1423 is used to list technical data which is to be delivered under the contract in accordance with 227.475-1, it shall be designated as an exhibit and established, as such, in accordance with 204.7105.

**PART 215—CONTRACTING BY NEGOTIATION**

4. Section 215.406 is amended by removing the word "[Reserved]"; by removing the text of the section: "Reserved, pending determination to what extent guidance may be necessary."; and by adding a section heading to read as follows:

**215.406 Preparing Requests for Proposals (RFP's) and Requests for Quotations (RFQ's).**

5. Section 215.406-2 is added to read as follows:

**215.406-2 Part I—The Schedule.**

When a DD Form 1423 is used to list technical data which is to be delivered under the contract in accordance with 227.475-1, it shall be designated as an exhibit and established, as such, in accordance with 204.7105.

[FR Doc. 87-12153 Filed 5-27-87; 8:45 am]

BILLING CODE 3810-01-M

48 CFR Parts 216, 217, and 243

Federal Acquisition Regulation Supplement; Undefinitized Contract Actions (UCAs); Correction

AGENCY: Department of Defense (DoD).
ACTION: Interim rule; correction.

SUMMARY: This document corrects an interim rule on Undefinitized Contract Actions (UCAs) which was published in the Federal Register on Thursday, April 16, 1987 (52 FR 12387). The Action is necessary to correct language in the paragraph entitled "EFFECTIVE DATE". The Effective Date paragraph reads as follows:

EFFECTIVE DATE: April 16, 1987. (Effective on all undefinitized contract actions (UCAs) except for Foreign Military Sales; purchases of less than $25,000; special access programs; and congressionally-mandated long-lead procurement contracts.)

Charles W. Lloyd,
*Executive Secretary, Defense Acquisition Regulatory Council.*

BILLING CODE 3810-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Dockets No. 1-18, Notice 32; No. 70-27, Notice 31]

Federal Motor Vehicle Safety Standards; Hydraulic Brake Systems; Controls and Displays

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.
ACTION: Final rule.

SUMMARY: Federal Motor Vehicle Safety Standards No. 105, *Hydraulic Brake Systems*, and No. 101, *Controls and Displays*, have required telltales whose single function is indicating failure in the antilock portion of a brake system to read "ANTILOCK." This notice amends those standards to permit "ABS," an abbreviation for "Antilock Brake System," as an alternative.

DATES: The amendments made by this rule are effective June 29, 1987. Petitions for reconsideration must be received by June 29, 1987.

ADDRESS: Petitions for reconsideration should be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin Cavey, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202-366-5271).

SUPPLEMENTARY INFORMATION: Federal Motor Vehicle Safety Standard No. 105, *Hydraulic Brake Systems*, requires an indicator lamp, i.e., a telltale on the dashboard, to be activated whenever there is a total functional electrical failure in a antilock brake system. The manufacturer may meet this requirement by using a common indicator displaying the word "BRAKE," which also warns the driver about other types of brake failure. Alternatively, the manufacturer may provide a separate indicator for antilock failure.

If the manufacturer uses a separate indicator for antilock failure, Standard No. 105 and Standard No. 101, *Controls and Displays*, have specified that the indicator must read "ANTILOC" or "ANTI-LOCK." On April 16, 1986, NHTSA published a notice of proposed rulemaking (NPRM) in the Federal Register (51 FR 12900) to permit "ABS," an abbreviation for "Antilock Brake System," as an alternative.

As discussed in the NPRM, this rulemaking action resulted from a petition for rulemaking submitted by Mercedes-Benz. That company stated that the letters "ABS" have been used in automotive press articles and in manufacturers" print advertising, with few exceptions, for identifying brake systems with antilock capabilities. Copies of such publications were submitted with the petition. The petitioner contended that as antilock brake systems increase in availability, the abbreviation will be increasingly used by the media, in technical publications, and in owners' manuals, and is expected to remain synonymous with this type of brake system.

Mercedes also argued that if a manufacturer offers a system or feature not required by regulation, but provides a corresponding telltale required by regulation, that telltale message should be permitted to correspond with the campaigns developed to promote such safety systems. That company compared the use of "ABS" in its marketing of antilock braking systems to the use of "SRS" in marketing its Supplementary Restraint System.

In the NPRM, NHTSA stated that it believed that the primary issue it must consider in responding to Mercedes' petition is the recognizability and understanding of "ABS" as compared to "ANTILOCK," both by new car buyers and other drivers. For example, in deciding not to adopt the International Standards Organization (ISO) brake symbol as an alternative to the word "BRAKE" in common indicators, the agency noted a Society of Automotive Engineers (SAE) study indicating extremely low percentage recognition for the ISO brake symbol compared to the word "BRAKE," and the importance for safety of drivers understanding the meaning of the brake indicator lamp. See 50 FR 23430 (June 4, 1985).

NHTSA indicated in the NPRM that it was unaware of data concerning the recognizability and understanding of "ANTILOCK" or "ABS." The agency recognized that, unlike some identifying words and abbreviations, the abbreviation ABS appears to require learning by the driver in order to understand its meaning. However, given the use of ABS by the media and in marketing campaigns, the agency agreed with the petitioner that such learning is likely to be taking place and to continue to do so. The agency also noted that the word "ANTILOCK" requires learning by the driver in order to understand its meaning, since antilock technology is relatively new and unfamiliar to most drivers. NHTSA specifically requested comments and data on the recognizability and understanding of "ANTILOCK" and "ABS."

NHTSA received nine comments on the NPRM, some of which favored the proposal and some of which opposed it. Commenters supporting the proposal include Chrysler, Ford, Volkswagen, BMW, American Motors (AMC) and Volvo. Chrysler stated that with the expected increase in usage of antilock brake systems and accompanying owner information and advertising campaigns, both "ANTILOCK" and "ABS" should be recognizable and understandable to drivers of those cars. Ford stated that it supports the proposal since (1) it represents more efficient use of space in labeling a small telltale, (2) that company has used the term "ABS" to designate its antilock brake systems, (3) the "ABS" designation has been recoginzed by the International Standards Organization (ISO) as part of one of its proposals for an antilock brake symbol, and (4) that company probably would employ the "ABS" identification in its products worldwide if it is permitted by NHTSA for use in the United States. That company cited data suggesting that "ABS" currently has lower recognition than "ANTILOCK," but pointed out that an abstract symbol, such as "ABS," can be learned just like a word in another language or a new slang word. BMW asserted that since both antilock braking

systems and separate telltales for them are voluntarily provided, manufacturers should be provided maximum flexibility in telltale identification. That company stated that both messages are equally unknown to the driving public and that neither is self-explanatory. BMW also noted that, unlike the other required brake telltales, complete loss of this function does not interfere with normal braking. That commenter stated that this is reflected by Standard No. 101's traditional designation of the color yellow for this telltale, in contrast to red for the others, indicating less urgency. AMC acknowledged that the introduction of "ABS" would necessitate some education of drivers, but asserted that it is opportune that this be done now, as the new antilock technology is gradually being integrated into vehicle designs. Volkswagen noted that while the provision of multiple brake indicator lights can add significantly to the amount of information provided to the driver, the amount of information which can be printed on a telltale is usually quite limited. That company supported use of "ABS," arguing that inflexibility with regard to the abbreviated message to be displayed is not reasonable.

Commenters opposing the proposal include Honda, Renault, and a private individual, Mr. Robert F. Schlegel, Jr. Honda stated that other abbreviations for Antilock Brake System are in use by other manufacturers, including "ALB" (Anit-Lock Brake), "ASBS" (Anti-skid Brake System), "ESC" (Electronic Skid Control), and "SCS" (Stop-Control System). That commenter stated that these various abbreviations, including "ABS," are trademarks, and expressed concern that the wide use of "ABS" with the Bosch anti-lock brake system may lead consumers to believe that any vehicle with a telltale showing the letters "ABS" is equipped with a Bosch system. Based on this concern, Honda argued that it is neither wise nor lawful for NHTSA to permit such use. Renault similarly commented that the abbreviation "ABS" is commonly associated with a particular anti-skid device, or with a particular manufacturer. That company stated that there is no reason to assign a greater value to this abbreviation than to other ones which may appear. Renault stated that the French manufacturers have proposed a pictorial symbol for antilock failure to the ISO, which is also currently considering two other symbols. Since the ISO has not yet ruled on an international symbol for antilock failure, that commenter requested that Standards No. 101 and No. 105 not be amended at this time. Renault also argued that if "ABS" is permitted, other symbols, particularly those before the ISO, should also be permitted. Mr. Schlegel argued that the word "ANTILOCK" conveys more information than "ABS" to the vast majority of drivers, contending that symbols must provide a pictorial or verbal clue. According to that commenter, there are too many acronyms arriving lately, which are not understood by the general public.

After careful consideration of the comments, NHTSA has decided to permit the use of "ABS" as an alternative to "ANTILOCK." The use of multiple brake indicators can provide additional safety information to the driver, and the agency believes that greater flexibility is appropriate. The message "ABS" is considerably shorter than "ANTILOCK" and is therefore more easily incorporated into a small telltale.

NHTSA recognizes that "ABS" will require learning on the part of drivers. For example, in an informal survey of 40 Ford engineering employees, 15 percent associated "ABS" with antilock brakes, while 72 percent recognized the word "ANTILOCK." As indicated in information provided by Mercedes-Benz and BMW, however, the term "ABS" is being used in both press articles and advertising. NHTSA believes that drivers are learning the meaning of "ABS," and that such learning will continue. NHTSA notes that there are differences between this situation and that involved in the agency's decision not to permit use of the ISO brake symbol. First, the telltale for antilock failure is not as urgent or critical a warning as that for other types of brake failure. Second, there is extensive use of the term "ABS" in press articles and advertising, which is not the case for the ISO brake symbol. Third, as antilock technology is still in the early stages of being introduced to drivers, there is a unique opportunity for learning the term "ABS." By contrast, drivers have come to expect use of the word "BRAKE" for other types of brake failure.

While NHTSA believes that greater flexibility is appropriate, it does not believe it would be in the interest of safety to permit multiple acronyms or symbols. While permitting the use of "ABS" will facilitate the learning of that acronym by drivers, drivers cannot be expected to learn the meaning of multiple acronyms or symbols for the same message. NHTSA notes that this action may help facilitate international harmonization, since one of the symbols being considered by the ISO for antilock failure incorporates "ABS."

Since NHTSA considers it appropriate to permit only one alternative to "ANTILOCK," it is necessary that use of that alternative be available to all manufacturers. Accordingly, the agency contacted Mercedes-Benz concerning whether its parent company, Daimler-Benz, was willing to waive protection of its trademark and grant a general approval to use "ABS" for all types of antilock braking systems. Daimler-Benz executed a declaration, which included the following statement:

If the term "ABS" is permitted under 49 CFR Part 571, *Federal Motor Vehicle Safety Standards*, by the National Highway Traffic Safety Administration, United States Department of Transportation, as an alternative to "ANTILOCK" for identifying telltales for malfunctions in antilock brake systems, Daimler-Benz Aktiengesellschaft hereby declares that it waives the protection of its trademark and grants a general approval to use the term "ABS" as a symbol for all types of anti-lock brake systems.

The declaration executed by Daimler-Benz has been placed in the docket. NHTSA believes that the waiver resolves the trademark concerns raised by commenters. Since it is clear that all manufacturers can now use "ABS," the agency does not believe consumers will associate the term with any particular company.

Since this amendment imposes no new requirements but instead increases manufacturer flexibility by relieving a restriction, NHTSA has determined that an effective date of 30 days after publication in the **Federal Register** is in the public interest.

The agency has analyzed this amendment and determined that it is neither "major" within the meaning of Executive Order 12291 nor "significant" within the meaning of the Department of Transportation regulatory policies and procedures. The agency has determined that the economic effects of this amendment are so minimal that a full regulatory evaluation is not required. Since amendment imposes no new requirements but simply permits alternative identification of the telltale for antilock failure, any cost impacts would be in the nature of slight, nonquantifiable cost savings.

In accordance with the Regulatory Flexibility Act, NHTSA has evaluated the effects of this action on small entities. Based upon this evaluation, I certify that the amendment will not have a significant economic impact on a substantial number of small entities. Small businesses, small organizations, and small governmental units are

affected by the amendment only to the extent that they purchase motor vehicles. For the reasons discussed above, the amendment will not significantly affect vehicle prices. Accordingly, no regulatory flexibility analysis has been prepared.

Finally, the agency has considered the environmental implications of this rule in accordance with the National Environmental Policy Act of 1969 and determined that it will not significantly affect the human environment.

**List of Subjects in 49 CFR Part 571**

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

**PART 571—[AMENDED]**

In consideration of the foregoing, 49 CFR Part 571 is amended as follows:

1. The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

**§ 571.101 [Amended]**

2. In Table 2 of § 571.101, the identifying words or abbreviation for malfunction in anti-lock (row 9, column 3, above the dotted line) is revised to read as follows:

Antilock, Anti-lock, or ABS. Also see FMVSS 105.

**§ 571.105 [Amended]**

3. S5.3.5(a) of § 571.105 is revised to read as follows:

S5.3.5(a) Each indicator lamp shall display word, words or abbreviation, in accordance with the requirements of Standard No. 101 (49 CFR 571.101) and/or this section, which shall have letters not less than ⅛-inch high and be legible to the driver in daylight when lighted. Words in addition to those required by Standard No. 101 and/or this section and symbols may be provided for purposes of clarity.

4. S5.3.5(c)(1)(C) of § 571.105 is revised to read as follows:

(C) If a separate indicator lamp is provided for an anti-lock system, the single word "Antilock" or "Anti-lock", or the abbreviation "ABS", may be used for S5.3.1(c).

Issued on May 21, 1987.

## Regulations Governing the Taking and Importing of Marine Mammals

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Final rule; final notice of decision and issuance of a general permit.

**SUMMARY:** This action establishes regulations to govern the taking of marine mammals incidental to Japanese high seas salmon fishing in the North Pacific Ocean within the U.S. Exclusive Economic Zone (EEZ). The regulation provides for a general permit to be issued under the Marine Mammal Protection Act (MMPA) allowing an aggregate taking during the three year permit period of no more than 789 Dall's porpoise in the Bering Sea and 5,250 in the North Pacific Ocean, of which no more than 448 may be taken in the Bering Sea and no more than 2,494 may be taken from the North Pacific Ocean in any single calendar year. The NMFS will monitor the affected fishery to insure that the quotas are not exceeded.

**EFFECTIVE DATE:** The rulemaking and general permit become effective June 10, 1987.

**ADDRESS:** Assistant Administrator for Fisheries, NMFS, Washington, DC 20235. An FEIS, Economic Impact Analysis, ALJ Decision and copy of the General Permit are also available upon request.

**FOR FURTHER INFORMATION CONTACT:** Kenneth R. Hollingshead, Office of Protected Resources and Habitat Programs, NMFS, Washington, DC 20235, Telephone: 202/673-5351.

**SUPPLEMENTARY INFORMATION:** On August 20, 1986 (51 FR 29674) NOAA published a Notice of Receipt of Permit Application, Notice of Formal Hearing, Notice of Formal Hearing Procedures and a Notice of Proposed Regulation. The proposal and other relevant information were reviewed in a formal hearing before Administrative Law Judge (ALJ) Hugh J. Dolan, in Seattle, Washington, on December 1–7, 1986, in accordance with 5 U.S.C. 556 and 557 and 16 U.S.C. 1373(d). Opening briefs were filed on December 29, 1986, and reply briefs on January 19, 1987. The recommended decision of the ALJ was issued on March 6, 1987. Exceptions to the ALJ's recommended decision were filed on April 2, 1987. The parties participating in the hearing are listed in the Final Decision document.

I am now publishing the final decision and regulation governing the taking of marine mammals incidental to commercial salmon gillnet fishing, and issuing the related MMPA permit. As provided in 50 CFR 216.24(c)(6)(v), I am waiving the usual fee for certificates of inclusion issued under this permit.

Decision of the Under Secretary signed on May 14, 1987, on the Application of the Federation of Japan Salmon Fisheries Cooperative Association to Take Marine Mammals Incidental to Commercial Fishing Operations.

### I. Background

Japanese fishing vessels using drift gillnet gear are authorized by treaty to fish for salmon at certain times and places within that portion of the United States' exclusive economic zone (EEZ) west of 175° E. longitude. [1] The treaty requires Japanese vessels to abstain from salmon fishing at other times and in other parts of the North Pacific Ocean and the Bering Sea. Within the EEZ, the Japanese salmon fishery is subject to the Marine Mammal Protection Act (MMPA). [2] The MMPA, among other requirements, prohibits the capture of marine mammals by commercial fishing vessels within the EEZ unless such vessels have been issued an incidental take permit by the Secretary of Commerce. [3]

The Federation of Japan Salmon Fisheries Cooperative Association (Federation) received a 3-year general permit in 1981 that authorized its members an annual incidental take of 5,500 Dall's porpoise, 450 northern fur seals, and 25 northern (Steller) sea lions. [4] This permit was extended legislatively through June 9, 1987, on condition that further research be performed. [5] On July 23, 1986, the Federation applied for a new permit that would, in effect, extend the 1981 permit for 5 more years, through June 9, 1992.

Under the formal rulemaking procedures required by the MMPA, the National Marine Fisheries Service (NMFS) published two notices in the Federal Register of its intent to issue the requested permit for 5,500 Dall's porpoise and 450 northern fur seals from the Commander Islands stock. [6] These two notices also contained the statements required by section 103(d) of the MMPA concerning the status of each stock and the effects of any permitted taking on its optimum sustainable population (OSP). A Draft Environmental Impact Statement (DEIS) was also prepared and issued. [7] No

notice was published with respect to northern sea lions or northern fur seals from the Pribilof Islands because of separate agency action to list those stocks as depleted, a determination that precludes issuance of an incidental take permit under the MMPA. [8]

A formal hearing on the requested permit and associated regulations was conducted by Administrative Law Judge (ALJ), Hugh J. Dolan, in Seattle, Washington, on Dec. 1–7, 1986. The Federation, the National Marine Fisheries Service, the Marine Mammal Commission, the Kokechik Fishermen's Association, the Qaluyaat Fishermen's Association, Greenpeace International, Greenpeace USA, the American Humane Association, the American Society for the Prevention of Cruelty to Animals, the Animal Protection Institute, Friends of the Earth, Friends of the Whales, the Fund for Animals, the Humane Society of the U.S., the International Fund for Animal Welfare, the International Wildlife Coalition, the Massachusetts Society for the Prevention of Cruelty to Animals, the Society for Animal Protective Legislation, the Washington Humane Society, the Whale Center, the Sierra Club, and the Center for Environmental Education participated in these proceedings. ALJ Dolan considered over 3,500 pages of testimony, exhibits and legal briefs, before issuing his recommended decision, which is attached hereto. The ALJ recommends that a 5-year permit be issued to the Federation that would allow 1750 Dall's porpoise and 45 northern fur seals from the Commander Islands stock to be killed or seriously injured during 1987. For each of 4 subsequent years, the ALJ recommends that the quota for Dall's porpoise be reduced 5 per cent from the previous year. The ALJ also made findings and recommendations concerning permit terms and conditions and further research needs.

## II. Decision

1. Summary of the Decision. I find, based on the record of the hearing, the ALJ's recommended decision, the exceptions filed thereto, and the Final Environmental Impact Statement (FEIS), that there are two Dall's porpoise stocks affected by this decision, the Bering Sea stock and the western North Pacific Ocean stock, that both stocks are above the minimum levels of their optimum sustainable populations, that a 3-year block quota on the killing or serious injury of 6,039 Dall's porpoise with lower annual quotas for each stock will not be to the disadvantage of either stock. I further find that these incidental take quotas will maintain each stock above the minimum level of its optimum sustainable population for the duration of the permit and are consistent with the policies and purposes of the MMPA. I further find that the block and annual quotas are economically and technologically feasible at this time, but that lower quotas are not.

With respect to northern fur seals, I find that I am not able at this time to issue an incidental take permit because the record is unclear as to whether the Commander Islands stock is above the minimum level of its optimum sustainable population. Accordingly, and in recognition of the depleted status of the Pribilof Islands stock, the permit and the accompanying regulations allow no takings of northern fur seals.

2. Detailed Findings. The recommended decision of the ALJ is attached. In reaching my decision, I adopt and incorporate by reference, unless specifically noted otherwise, the description of the issues, the findings of fact, the conclusions of law, the accompanying rationale, and the methodology used by the ALJ in reaching his recommended decision.

### *a. Population Estimates—Dall's Porpoise*

#### (1) Classification of Stocks

I adopt the ALJ's finding that the best scientific evidence indicates there are three stocks of Dall's porpoise related to this proceeding. Those stocks are the Bering Sea stock, the eastern North Pacific Ocean stock, and the western North Pacific Ocean stock. I further adopt the ALJ's finding that the Japanese salmon fisheries affect only the Bering Sea and western North Pacific Ocean stocks. [9]

I recognize that the permit applicant, supported by some of the scientific data, contends that there is but one stock in the North Pacific Ocean. Although the Scientific data is subject to various interpretations, the ALJ determined that the weight of the evidence favored a separation of eastern and western stocks. [10] I agree. In any event, since it has been determined, *infra*, that the western North Pacific Ocean stock is above its OSP and that an allowable level of taking would not be to that stock's disadvantage, a separation of these two stocks does not affect the decision to issue an incidental take permit in this proceeding. Quite clearly, however, further research is necessary to better determine the relationship between Dall's porpoise in the eastern and western portions of the North Pacific Ocean. Due to the rapid expansion of the high seas squid fishery in waters beyond the U.S. EEZ, stock separation may become a critical factor in any subsequent MMPA proceedings.

#### (2) Present Population Levels

The ALJ adopted the NMFS procedure for estimating the present population of each stock of Dall's porpoise. [11] The approach used has been used by NMFS in other MMPA proceedings and is endorsed by the Marine Mammal Commission. Specifically, the ALJ determined that the use of the line transect methodology to determine density of animals within each area and the application of that density to limited portions of the Bering Sea and the western North Pacific Ocean provides the best scientific information as to the present numbers of Dall's porpoise in each stock. However, in agreeing with the NMFS procedure, the ALJ evidently overlooked the fact that the estimates he approved were for 1980, not 1985. The 1987 estimates must be derived by applying estimates of natural reproduction and estimates for kill by the various fisheries affecting each stock. Using figures approved by the ALJ, and adopted by me, *infra*, I find that the present population of the Bering Sea stock is 216,118 and that the present population of the western North Pacific Ocean stock is 692,854. [12]

#### (3) Status of Stocks

I adopt the procedure used by the ALJ to determine whether both Dall's porpoise stocks are presently within their OSP. [13] Specifically, I find that estimation of the pre-exploitation population for each stock to determine the population level which is the largest supportable within the ecosystem is the best methodology for determining the upper limit of OSP. This back-calculation procedure has been used in NMFS tuna/porpoise hearings and in the 1981 Dall's porpoise hearing and is supported by all parties as the appropriate methodology for estimating the pre-exploitation population. The parties disagree as to the time when exploitation commenced, the estimated natural recruitment rate, and the estimated kill rates of the various fisheries that are necessary to perform the back-calculation procedure. As a result there is considerable disagreement as to what the estimate of the pre-exploitation population should be.

(a) *Pre-Exploitation Date.* The ALJ found that the estimate of the 1961 population derived by back-calculation is the best scientific evidence as to the pre-exploitation population. Thus, in the absence of evidence that the ability of the ecosystem to support that population

has changed, the ALJ determined that population level is the best estimate of the upper bound of OSP. [14] Although there was some evidence presented that salmon fishing, and consequent Dall's porpoise mortalities, commenced sometime prior to 1941, the weight of the evidence suggests that the fishing was not extensive in the areas inhabited by these two stocks of Dall's porpoise and that the stocks would have fully recovered during the hiatus in fishing that occurred during and subsequent to World War II. I adopt the ALJ's finding and supporting rationale.

(b) *Maximum Net Reproduction Rate.* The point estimate of the maximum net reproduction rate (Rmax) for Dall's porpoise suggested by the parties ranged from .02 to .10. The ALJ adopted the conservative rate recommended by the Marine Mammal Commission, .04. [15] This rate was within a range of probable values suggested by NMFS, but less than the NMFS recommended rate, .06. I adopt the ALJ's recommendation and supporting rationale.

(c) *Kill Rates.* A great deal of evidence was presented regarding the present kill rates (Kt) for Dall's porpoise in the Japanese salmon fisheries and the multi-national high seas squid fishery. As found by the ALJ, the current evidence supports different rates of kill for the Japanese mothership fishery, for the land-based fishery, and for the various squid fisheries that incidentally take Dall's porpoise. The findings as to the present kill rate in each fishery are discussed below.

(i) *Mothership Fishery.* The ALJ found, and all parties to the proceeding agree, that the kill rate inside the U.S. EEZ is 0.47 Dall's porpoise per set of net. [16] The ALJ, also adopted the same rate for the mothership fishery south of the U.S. EEZ. [17] This figure is very close to the 0.46 figure reported by Japanese scientists and was not opposed by either NOAA or the Marine Mammal Commission. With respect to the Bering Sea beyond the U.S. EEZ, the ALJ found the kill rate to be 0.28, a figure supported by NMFS and the Marine Mammal Commission. [18] I adopt the ALJ's findings that the best scientific evidence suggests the kill rates are 0.47, 0.47, and 0.28 for the three areas in which the mothership fishery operates.

(ii) *Land-Based Fishery.* All parties agree that the data with respect to the kill rate in the land-based salmon fishery is less reliable. The ALJ found that the testimony of one Japanese scientist supported a kill rate of 0.25 to 0.33. This is considerably higher than the 0.13 rate reported by the Japanese fishermen and supported by the Federation. However, it is less than suggested by NMFS and the Marine Mammal Commission at the hearing. Both NMFS and the Marine Mammal Commission agreed that the kill rate for the land-based fishery should be less than in the mothership fishery because the southerly location of the land-based fishery encompasses large areas that are not inhabited by Dall's porpoise. However, the Marine Mammal Commission believed 0.47 should be used until better data was available. The ALJ found that the kill rate for the land-based salmon fishery is 0.33, the highest figure supported by scientific data. [19] In its final comments on the ALJ's recommended decision, the Marine Mammal Commission agreed that the 0.33 rate could be used if the same rate was applied to the squid fisheries. [20] Accordingly, I adopt the ALJ's finding.

(iii) *Squid Fishery.* The kill rate in the high seas squid fishery is most difficult to determine. The only observer data, compiled during 1986, suggests a kill rate of only 0.04 to 0.06. The ALJ, supported by all parties except the Federation, rejected this estimate as based on an inadequate sample size. Instead, the ALJ determined that the kill rate for the land-based salmon fishery, which operates in similar latitudes to the south of the preferred range of Dall's porpoise should be used. [21] That kill rate is 0.33. I adopt this finding for the squid fishery with considerable reservation, noting that the scientific uncertainty operates to the disadvantage of the permit applicant in this instance.

Quite clearly the disparity between the observed rate and the 0.33 rate adopted for this proceeding must be resolved as soon as possible. Due to the rapid growth of the squid fishery beyond the exclusive economic zones of the North Pacific nations, the prospect exists that a large overestimate of the kill rate of Dall's porpoise in the much larger squid fishery could well result in closure of the salmon gillnet fishery within the U.S. EEZ. It is in the federation's immediate interest to press for increased observer coverage of the squid gillnet fleets of all nations participating in that fishery.

(d) *Constancy of Kill Rate.* Through the back-calculation methodology, agreed to by all parties, the population estimate for the pre-exploitation year is estimated by subtracting an estimate of kill and adding an estimate of net reproduction in the intervening years. For the years from 1952 to 1981, the ALJ adopted the estimated kill rate, 0.94, that was used by his predecessor and adopted by the agency in the 1981 permit decision. [22] The federation, NMFS, and the Marine Mammal Commission all object to the use of that figure as the kill rate for this proceeding. They point out that 0.94, although based on the best available data at that time, was derived from only 18 observations, whereas there are now some 2,377 observations available for estimating the kill of Dall's porpoise in the Japanese salmon fishery. [23] Although there is uncertainty as to whether the kill rate fluctuates from year to year, quite clearly the current data, drawn from much more extensive scientific sampling conducted since 1981, are better evidence than was available in the 1981 hearings and must be used in this decision. I therefore find that for the purpose of estimating the preexploitation population, the current kill rates found by the ALJ, and approved by me, above, should be employed throughout the period from 1952 to the present. I note that both NMFS and the Marine Mammal Commission agree with this approach.

(e) *Fishing Effort.* The ALJ calculated the fishing effort in the salmon and squid fisheries from a variety of official Japanese and U.S. data. [24] I adopt the ALJ's findings in this respect.

(f) *Calculated Initial Population.* All parties agreed with the formula used by the ALJ to determine the preexploitation population of Dall's porpoise. [25] That formula was developed by NMFS scientists and has been used in other MMPA proceedings and is accepted here as the appropriate methodology. However, since I have rejected the 0.94 kill rate used by the ALJ for the 1952 to 1981 period, and start from the 1980 estimated populations, the back-calculation must be performed again. That has been done, and the new estimate of the pre-exploitation population of each stock of Dall's porpoise is determined to be: 226,865 for the Bering Sea stock and 860,360 for the western North Pacific stock. As a result, the current populations 216,118, represent 953 and 80.5 per cent, respectively, of the maximum populations that can be supported by the present ecosystem.

(g) *Optimum Sustainable Population.* All parties agreed and the ALJ determined that the maximum net productivity level (MNPL) for Dall's porpoise is 60 per cent of the maximum sustainable population. [26] I adopt that finding. MNPL has been defined by regulation as the lower bound of OSP. [27] Accordingly, I find that both the Bering Sea and the western North Pacific Ocean stocks of Dall's porpoise are well within the range of their optimum sustainable populations. I note that although the ALJ found the status of

each stock closer to the MNPL than I have, he also found that both were within their respective OSP ranges. [28]

(4) Disadvantage

The ALJ interpreted the MMPA's protective mandate that any permitted taking incidental to commercial fishing operations not to the disadvantage of the stocks as meaning that the permitted taking should not allow the stock to decline. [29] both NMFS and the Marine Mammal Commission reject that interpretation. I, also, do not agree with the ALJ's conclusion of law. In any event, it is of little consequence to this proceeding is that a second test must be met—the immediate goal test discussed below.

(5) Quotas, Duration of Permit.

The MMPA affirmatively requires additional efforts to reduce incidental kill and serious injury to insignificant levels, approaching zero. This test has been previously interpreted as limiting the number of animals that can be taken to the lowest level that will permit economical fishing operations using existing technology. [30]

The ALJ determined that an annual quota of 1750 Dall's porpoise was achievable by applying the current kill rate in the U.S. EEZ, 0.47, to the expected fishing effort. [31] The Federation notes that the kill rates used are averages which should not be applied to *each* future year. By definition, an average would be exceeded in some years and not attained in others. The Federation suggested that the highest kill rates in the 1981 to 1986 period be used to establish annual quotas that would comply with the immediate goal test. NMFS agrees with the Federation on this point.

The ALJ determined that there would be a 25 per cent reduction in fishing effort within the U.S. EEZ as a result of the reduction in the mothership fleet from 172 catcherboats to 129. [32] The Federation notes that there is no reduction in treaty-authorized vessel-days and that the remaining 129 catcherboats are capable of maintaining the same overall fishing effort as 172 catcherboats by fishing a longer period of time. The objection misses the point. The fishing effort is limited by the salmon quota set by the Soviet Union as well as by the treaty requirements. The record states that the Soviet Union has reduced this quota by 35 per cent. [33] Accordingly, the reduction in fleet size is not likely to lead to increased effort by the remaining boats.

In establishing the quota, the ALJ started with 4,963 sets as the projected fishing effort, reduced that figure by 25 per cent, and multiplied by the 0.47 kill rate, to determine the recommended quota of 1750. The Marine Mammal Commission and NMFS note that the ALJ used projected fishing effort for the western North Pacific portion of the U.S. EEZ, apparently neglecting that portion of the fishery that operates in the Bering Sea portion of the U.S. EEZ. The Marine Mammal Commission recommends that a separate quota be established for the Bering Sea portion of the U.S. EEZ in view of the separate stock of Dall's porpoise that would be affected by the fishery north of the Aleutian Islands. Using the projected fishing effort contained in Appendix C to the ALJ's decision, and the ALJ's methodology, the 1987 annual quota for the Bering Sea stock would be 891 sets, reduced by 25 per cent, multiplied by the 0.47 kill rate within the U.S. EEZ, for a total of 314. In 1988, the effort projected declines to 803; the resultant quota for that year, according to the ALJ's formula, would be 283. In 1989, the effort projected declines to 545; the resultant quota for that year, according to the ALJ's formula, would be 192.

The ALJ determined that a 5-year permit duration was appropriate, but that the quotas beyond 1987 should be reduced 5 per cent each year. [34] However, the ALJ made no finding that improvements in fishing technology would be possible. The Marine Mammal Commission supported the 5 per cent quota reduction, but recommended that only a three-year permit be issued in light of data deficiencies that need to be addressed.

As noted above, annual quotas based on average kill rates would unnecessarily restrict the Federation's operations in the years the actual rate would exceed the average. However, there has been no showing by the Federation that a 3-year block quota would put them at a disadvantage. Accordingly, the quotas that I now establish for each stock are: (1) Maximum annual quotas based on the highest kill rate attained during any one year from 1981 to 1986, and, (2) 3-year block quotas based on 1981–1986 average take. The kill rate used in setting the maximum annual quota is 0.67, the highest observed rate within the U.S. EEZ during 1981–1985. Within the respective portions of the U.S. EEZ, the quotas on kill or serious injury of Dall's porpoise are:

Bering Sea—448 in any one year, 789 for 1987–1989.

North Pacific—2494 in any one year, 5250 for 1987–1989.

Given the estimates of current population for each stock and the estimated recruitment and kill rates, the Bering Sea stock will continue to grow at the level of permitted take to approximately 217,417 animals or 95.9 percent of its estimated preexploitation population by 1989. The western North Pacific Ocean stock will decline slightly to approximately 681,074 animals or 79.1% of the estimated exploitation population by 1989. [35] As a result, I find that neither stock would be disadvantaged by the level of permitted taking.

I have declined to impose a 5 percent reduction in light of my decision to accept the recommendation of the Marine Mammal Commission on duration of the permit. A 3-year permit was considered appropriate in 1981 and Congress granted only a 3-year extension in 1984. Although much more is now known about Dall's porpoise, considerable uncertainty remains as to the effects the Japanese land-based fishery and the much larger multi-national squid fishery are having on the Dall's porpoise stocks in the North Pacific Ocean. The level of uncertainty must be reduced during the next three years.

*b. Population Estimates—Fur Seals*

The Federation also asked that its members be allowed to take up to 450 northern fur seals annually from the Commander Islands stock. Current population estimates for these fur seals are not in question due to the ease by which they may be enumerated on their island rookeries. In addition, birth rates, or pup production, is also well documented due to its relevance for commercial harvests in ensuing years. The Commander Islands stock is managed by the Soviet Union and the ALJ accepted the Soviet data as the best scientific information available. [36] The stock is estimated at 210,000, with pup production approximately 50,000 to 55,000 per year. Recent commercial harvests of bachelor male seals are between 4,000 and 5,500 per year. According to the ALJ, even under commercial exploitation, the population is stable or increasing. [37] Reviewing records of actual seal captures, and the timing of the salmon fishery relative to the seals' breeding time, the ALJ determined that a permitted taking of 45 Commander Islands fur seals annually would involve sub-adult males, would be *de minimus*, and thus, would not be to the disadvantage of that stock. [38] NMFS scientists supported this conclusion.

The Marine Mammal Commission, the Alaskan native fishing associations and the environmental/animal protection

groups all oppose this conclusion. Historic data indicate that only 4 of 21 rookeries on the Commander Islands are now occupied and that the pre-exploitation population may have exceeded 1 to 1.7 million fur seals. [39] If so, and if, as the parties have agreed, 60 per cent of the pre-exploitation population represents the lower bound of OSP, the current population is most certainly well below OSP even if it is stable or increasing. The NMFS pup trajectory analysis, however, supports a finding that the current population is being managed for its maximum sustainable yield and thus is within its OSP. Obviously, this is a signifcant dispute.

As a matter of law, as noted by the Marine Mammal Commission, the MMPA requires an affirmative finding by the agency that a stock is within its OSP before a permit may be issued. [40] The permit applicant has the burden of proof. In this proceeding, the ALJ did not make such a finding. Instead, he said the evidence "suggests" that the stock is within its OSP. [41] The statutory requirement for a finding has not been met. Based on the record before me, I find that I am unable to determine if the Commander Islands stock is within its optimum sustainable population. In recognition of the depleted status of the Pribilof Islands stock, the permit will not include any northern fur seals. The incidental taking of northern fur seals, like the taking of northern (Steller) sea lions, harbor porpoise, Pacific white-sided dolphin, northern right whale dolphin, and killer whales is prohibited by the Marine Mammal Protection Act. [42]

The MMPA's prohibitions will be enforced notwithstanding my confidence in Judge Dolan's conclusion that an annual take of 45 sub-adult male Commander Islands fur seals will not adversely affect a population that is subject to a managed commercial harvest of 4,000 to 5,500 animals per year. Under these circumstances, where a negligible number of nonpermitted takings will occur, and where the stock does not require the absolute protection provided by the MMPA, it is unfortunate that those who must pay the penalties will be determined largely by chance. I intend to seek amendment of the MMPA to permit incidental, but not intentional, takings of small numbers of marine mammals, by vessels engaged in commercial fishing, if such takings will have a negligible impact on the species and stocks. Such an exemption would be similar to the existing exemption for activities other than commercial fishing except that it would not be limited to citizens of the United States in light of our international fisheries obligations.

*c. Observers*

Data on the incidental take of marine mammals have been collected each year since 1981 by 2 U.S. observers onboard catcherboats from each of the 4 motherships. Between 6 and 6.4 per cent of the fishing operations within the EEZ have been monitored by these observers. The ALJ determined that this level of statistical sampling is adequate and gave a statistical reliability of 95 per cent ±4 per cent. [43] The statement of statistical reliability is incorrect. The 6 per cent level of observer coverage is statistically reliable to 90 per cent ±10 per cent. [44] I adopt the ALJ's decision that a level of observer coverage that is no less than 6 per cent is adequate, provided that the statistical reliability is no less than 90 per cent ±10 per cent.

3. Other Matters

a. *Seabirds.* The ALJ determined that the Department of Commerce and its subordinate agencies did not have jurisdiction under the MMPA to regulate the taking of seabirds. He declined to accept the argument that the birds undoubted contributions to the food web in the North Pacific Ocean and Bering Sea constitute a basis for turning the MMPA into a "utilitarian environmental protection statute" by which the agency could "regulate everything that impacts negatively on marine mammals." [45]. I agree and adopt the ALJ's rationale.

The ALJ determined, however, that such jurisdiction did reside in the Department of the Interior under the Migratory Bird Treaty Act (MBTA) as extended by the President's 1983 proclamation of the Exclusive Economic Zone. [44]. I am not aware of any instance where the Department of the Interior has curtailed a commercial fishery to protect seabirds under the MBTA. I am aware that the official position of the Department of the Interior is that the MBTA jurisdiction is coextensive with the geographic limits of the Untied States, extending seaward only to the 3-mile limit of the territorial sea. [47] I am also aware that Congress has explicitly extended the MMPA to the EEZ, but has not similarly extended the MBTA. Accordingly, I do not adopt the ALJ's conclusion of law that the Department of the Interior has regulatory authority to limit the Japanese salmon fishery under the MBTA. Were it to exercise such authority, the Department of the Interior might also be required to regulate domestic fisheries, including perhaps those of the Alaskan fishermen who participated in these proceedings. [48]

b. *Ecosystem Protection Zone.* The Marine Mammal Commission and the environmental/animal protection groups recommended adoption of an ecosystem protection zone extending 60 miles seaward from the Aleutian Islands. Although offering some potential for benefit to harbor porpoise and northern sea lions, the ALJ determined that the primary motivation for such a zone would be to reduce the incidental take of seabirds. The ALJ declined to recommend that such a zone be established under the MMPA. [49] I approve of that decision, noting that several bills that would impose a seabird protection zone of identical proportions are presently pending before Congress. At that time the effects of fishing practices on seabird populations can be more fully debated. The effects of fishing practices on marine mammals, which is the purpose of this proceeding, have been fully addressed herein.

4. Permit Conditions

The ALJ made extensive recommendations for conditions that NMFS should impose on the recommended permit. These are set out in section XI of the recommended decision appended hereto and are adopted by me with the following modifications:

a. The costs of U.S. observer coverage of the motherships fleet must be borne by the applicant or by the Government of Japan.

b. To the extent that NMFS is capable of providing U.S. marine mammal observers on the Japanese landbased salmon and high seas squid gillnet fleets, they must be readily accommodated.

c. A report must be furnished prior to June 9, 1988, as to the extent of Japanese high seas salmon gillnet fishing in the Bering Sea and North Pacific Ocean prior to 1952.

d. The quotas stated above must be reduced proportionately in the event that the Soviet Union decreases Japan's salmon quota for 1988 or 1989 in either area by more than 10 per cent from the 1987 salmon quota.

e. To insure randomness of observer placement and unbiased sampling, the permit must incorporate the requirements of 50 CFR 611.8(c).

5. Required Statements

Section 103(d) of the MMPA requries the publication of the following statements: (a) Estimated existing levels of the species and population stocks concerned; (b) a statement of the expected impact on the optimum sustainable population (OSP) of such

species or population stocks; (c) a statement describing the evidence before the agency; and (d) any studies made by or for the agency and any recommendations made by or for the agency or the Marine Mammal Commission. The following table satisfies the first two requirements.

| Stock | Present population | Present OSP status | OSP status at end of 1969 |
|---|---|---|---|
| Dall's porpoise (Bering Sea) | 216,118 | Within | Within. |
| Dall's porpoise (Western North Pacific Ocean) | 592,854 | Within | Within. |

The references noted in the August 20, 1986, and January 23, 1987, **Federal Register** notices and the record compiled in this proceeding satisfy the final two requirements.

### 6. Regulation

I have considered the alternatives contained in the FEIS and the DEIS and have concluded that amending the current regulations as set out below is the environmentally preferred alternative and represents the best approach for permitting the incidental take of Dall's porpoise under the MMPA. Accordingly, and based on a full consideration of the record, the recommended decision of the ALJ and my foregoing final decision, that portion of the regulation now appearing at 50 CFR 216.24(d)(5)(vii) is amended to read as follows:

(vii) The number of Dall's porpoise (*Phocoenoides dalli*) killed or injured by Japanese vessels operating in the U.S. EEZ is limited to an aggregate of 789 in the Bering Sea and 5,250 in the North Pacific Ocean over the period 1987–1989, of which no more than 448 may be taken from the Bering Sea and no more than 2,494 may be taken from the North Pacific Ocean in any single calendar year. The incidental take levels authorized by this subpart are reduced proportionately in the event that the Soviet Union reduces salmon quotas for 1988 or 1989 by more than 10 percent from the 1987 quota. Any permit issued under this part must indicate the measures by which the permit holder must comply with the conditions attached to the permit, and the reporting requirements of paragraph (d)(5)(v) of this section. Any permit issued under this part may allow retention of marine mammals for scientific purposes and will not require a separate permit under paragraph (d)(5)(v).

### 7. Consultation

The MMPA requires that I consult with the Marine Mammal Commission in promulgating regulations. The Commission was consulted prior to the publication of proposed regulations, was a party to the proceedings, appeared before the ALJ, and filed briefs with ALJ. For the most part, I have been guided by the recommendations of the Commission. Where I have not adopted a recommendation of the Commission, I have provided my reasons for doing so. Additionally, I have consulted with the Secretary of Commerce on this decision.

### 8. Attachments

The permit to be issued to the Federation of Japan Salmon Fisheries Cooperative Association and the recommended decision of Administrative Law Judge Hugh J. Dolan are attached.

### 9. Effective Date

The permit issued today becomes effective June 10, 1987.

Dated: May 14, 1987.

### Classification

The NMFS has determined that this action is a major Federal action under the National Environmental Policy Act of 1969 due to the overall public interest associated with the Japanese salmon fishery and its interaction with Dall's porpoise and other marine organisms. A Final Environmental Impact Statement (FEIS) has been prepared and distributed for public review and comment.

This rulemaking is an administrative action being developed on the record under the Administrative Procedure Act (5 U.S.C. 556 and 557) and, as such, is exempt from Executive Order 12291.

This rule relieves a restriction that would otherwise apply to the Japanese salmon fishery. As authorized by 5 U.S.C. 553, a full 30 day delayed effectiveness period is not required.

This rule mentions collection of information requirements subject to the Paperwork Reduction Act. The collection of information for general permits, certificates of inclusion and reporting takes has been approved by the Office of Management and Budget under Control Nos. 0648–0083 and –0099.

The General Counsel of the Department of Commerce certified to the Small Business Administration that this final rule will not have a significant economic impact on a substantial number of small entities. While the action will result in a continuation of the loss of salmon to Alaskan commercial fishermen of approximately $8.02 million, the identified alternatives to the

action would result in a loss of from $87.4 million to $133.7 million.

The Assistant Administrator has determined that the action does not directly affect the coastal zone of a State with an approved Coastal Zone Management Act program.

Administrative practice and procedure, Imports, Marine Mammals, Penalties, Reporting and recordkeeping requirements, Transportation.

Dated: May 22, 1987.

James E. Douglas, Jr.,

*Acting Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.*

**PART 216—[AMENDED]**

For the reasons set out in the Preamble and Final Decision, 50 CFR Part 216 is amended as follows:

1. The authority citation for Part 216 continues to read as follows:

Authority: 16 U.S.C. 1361 *et seq.*, unless otherwise stated.

2. In § 216.24, paragraph (d)(5)(vii) is revised to read as follows:

**§ 216.24 Taking and related acts incidental to commercial fishing operations.**

(d) * * *

(5) * * *

(vii) The number of Dall's porpoise (*Phocoenoides dalli*) killed or injured by Japanese vessels operating in the U.S. EEZ is limited to an aggregate of 789 in the Bering Sea and 5250 in the North Pacific Ocean over the period 1987 to 1989, of which no more than 448 may be taken from the Bering Sea and no more than 2494 may be taken from the North Pacific Ocean in any single calendar year. The incidental take levels authorized by this subpart are reduced proportionately in the event that the Soviet Union reduces salmon quotas for 1988 or 1989 by more than 10 percent from the 1987 quota. Any permit issued under this part must indicate the measures by which the permit holder must comply with the conditions attached to the permit, and the reporting requirements of paragraph (d)(5)(v) of this section. Any permit issued under this part may allow retention of marine mammals for scientific purposes and will not require a separate permit under paragraph (d)(5)(iv).

# Proposed Rules

Federal Register
Vol. 52, No. 102
Thursday, May 28, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF TRANSPORTATION

### Office of the Secretary

### 14 CFR Part 382

[Docket No. 44935; Notice No. 87-9]

### Nondiscrimination on the Basis of Handicap in Air Travel

**AGENCY:** Department of Transportation (DOT), Office of the Secretary (OST)

**ACTION:** Notice of establishment of advisory committee for regulatory negotiation and notice of first meeting.

**SUMMARY:** The Department of Transportation is announcing the establishment of an advisory committee to develop a report including a recommended rulemaking proposal concerning nondiscrimination on the basis of handicap in air travel. The rulemaking would implement the Air Carrier Access Act of 1986. The committee will adopt its recommendation through a negotiation process. The committee is composed of persons who represent the interests affected by the rules. This notice also announces the time and place of the first advisory committee meeting, which will be open to the public.

**DATE:** The first meeting of the advisory committee will begin at 9:30 a.m. on June 3–4, 1987.

**ADDRESS:** The first meeting of the advisory committee will be held in the 10th Floor Conference Room of the Paralyzed Veterans of America offices, 801 18th st., NW., Washington DC 20006. Subsequent meetings will be held at locations to be announced.

**FOR FURTHER INFORMATION CONTACT:** *DOT Contact*: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, Department of Transportation, 400 7th Street, SW., Room 10424, Washington DC 20590., Telephone 202–366–9306 (voice); 202–755–7687 (TDD). *Convenor/Mediator*: Eileen Hoffman, District Director, Federal Mediation and Conciliation Service, 2100 K. St., NW., Room 213, Washington DC 20427. Telephone (202) 653–5390.

**SUPPLEMENTARY INFORMATION:**

### Background

On February 23, 1987, the Department of Transportation published a notice of intent to establish an advisory committee for regulatory negotiation to develop a report including a recommended rulemaking proposal concerning nondiscrimination on the basis of handicap in air travel (52 FR 5467). The resulting rule would implement the Air Carrier Access Act of 1986. The notice requested comment concerning the membership of the committee, the issues it should consider, the interests affected by the rulemaking, and the procedures that should be followed by the committee.

The Department received over 60 comments on the notice of intent. None of the comments opposed using regulatory negotiation for this rulemaking, most explicitly endorsed regulatory negotiation, and many were requests to serve on the advisory committee. There were also a number of form letters from individuals requsting that public hearings be held. Based on this response, and for the reasons stated in the notice of intent, the Department has determined that establishing an advisory committee for regulatory negotiation on this subject is necessary and in the public interest. Accordingly, the Department has established an advisory committee for regulatory negotiation on nondiscrimination on the basis of handicap in air travel.

### Mediators

In the notice of intent, the Department said that it was seeking an impartial mediator to conduct the negotiations. The Department is pleased that the Federal Mediation and Conciliation Service (FMCS) has agreed to provide mediators for this purpose. Additional mediation personnel may be furnished through the FMCS during the course of the regulatory negotiation.

### Membership and Interests to be Represented

The members of the advisory committee are the following:

Air Transport Association (ATA)
Airport Operators Council International/American Association of Airport Executives (AOCI/AAAE)
American Council of the Blind (ACB)
Architectural and Transportation Barriers Compliance Board (ATBCB)
Association of Flight Attendants (AFA)
Department of Transportation (DOT)
Paralyzed Veterans of America (PVA)
National Air Carrier Association (NACA)
National Air Taxi Association (NATA)
National Association of Protection and Advisory Systems (NAPAS)
National Association of the Deaf/National Center for Law and the Deaf (NAD/NCLD)
National Council of Independent Living (NCIL)
National Federal of the Blind (NFB)
Regional Airline Association (RAA)
Society fo the Advancement of Ttravel for the Handicapped (SATH)

The Department regrets being unable to accommodate all requests for membership on the advisory committee. Several factors, which were mentioned in the Department's notice of intent, have impelled the Department's decision not to add more members.

In order to keep the committee to a size that can negotiate effectively, it is necessary to limit membership. It is also desirable to have balance among the members of the committee representing different clusters of interests, such as disabled persons and the air travel industry. In addition, it is not essential that every concerned organization is represented, so long as every interest involved is represented by an appropriate organization. The committee membership identified above provides representation for each interest affected by issues to be discussed.

The following is a summary of the Department's disposition of suggestions for additional membership on the committee:

One commenter suggested that Americans Disabled for Accessible Public Transportation (ADAPT), an advocacy group of persons with mobility disabilities, should be a member of the committee. (The ADAPT organization itself, however, did not request membership). We believe that the interests of persons with mobility disabilities are represented adequately on the committee by PVA and NCIL.

BEST COPY AVAILABLE

Consequently, another organization representing this interest is not required.

Self-Help for Hard of Hearing People, Inc. (SHHH) suggested that hard of hearing persons, as distinct from deaf individuals, were a separate interest that should be represented. While there are undoubted differences between the situations of hard of hearing and deaf individuals, the Department believes that there are substantial enough similarities between the two populations that identifying hard of hearing persons as a separate interest is unnecessary for purposes of this negotiation. The Department believes that NAD can adequately represent the interests of persons in both categories. SHHH or other persons or organizations can work through NAD to present the point of view of hard of hearing persons.

The Port Authority of New York and New Jersey and the Los Angeles Department of Airports indicated their interest in membership. The interests of airport operators are being represented through the AOCI/AAAE representative, and we do not believe that separate representation from individual airports is needed. The Department believes that individual airports can present their views through the AOCI/AAAE representative on the committee.

Clayton Travel, a travel agency working with disabled travelers, volunteered to participate. So did Donald Davidson, a Seattle attorney who does not belong to disability organizations and is a frequent traveler. However, the interest that would be represented by these parties is adequately represented on the committee by SATH.

The Florida Coordinating Council on the Transportation Disadvantaged asked to be a member of the committee. From its comment, this group appeared to be particularly interested in the situation of blind air travelers. The Department believes that this interest, however, is represented by ACB and NFB, and another representative is not required.

The Coalition of Texans with Disabilities asked to be a member of the committee, saying that it represented the interests of disabled persons living outside the Washington, DC area. The Coalition appears to represent persons with types of disabilities represented by various groups which are members of the committee. These groups are national in scope; while the headquarters offices of some of them may be located in Washington DC, they represent persons living in all parts of the country.

ATA and Southwest Airlines (SWA) recommended that representatives of organizations concerned with flight safety, such as the Flight Safety Foundation, the Federal Aviation Administration's (FAA) Office of Flight Safety, or individual experts in this field, be made members of the committee. While safety issues are involved in this rulemaking, the air travel industry representatives on the committee, with their obvious strong interest in flight safety, are fully capable of addressing these issues. In doing do, they or other members are free to draw on the expertise of organizations like the Flight Safety Foundation or individual experts to assist them. In addition, FAA is part of DOT, and DOT will make use of FAA's expertise in safety matters during the course of the negotiations.

SWA also asked to be a member of the committee, as a representative of airlines not belonging to ATA. The Department's notice of intent had mentioned airlines not represented by ATA as a potential interest to be represented on the committee. In a previous regulatory negotiation, concerning FAA's flight and duty time rulemaking, ATA and non-ATA carriers had distinguishable interests which warranted separate representation. In this case, however, the Department has concluded that the interests of ATA and non-ATA airlines are not likely to have enough substantive differences concerning treatment of disabled passengers to make separate representation necessary. The comments of ATA and SWA to the docket for the notice of intent made very similar substantive points, strengthening the Department's view that the interests of ATA and non-ATA airlines are not so distinct as to require a non-ATA carrier as a member of the committee.

We are aware that, in some respects, SWA's passenger-handling policies may differ from those of other airlines. We do not believe that these differences, however, make SWA's interest sufficiently distinguishable from those of carriers belonging to the ATA. There are differences between groups representing persons with different kinds of disabilities; it has not been possible to have all of them as members of the committee (see discussion, below, of the representation of persons with "hidden disabilities"). These consideration apply to air travel industry organizations as well. While, for these reasons, SWA is not being made a member of the committee, we encourage SWA to make its concerns known to the committee. We encourage SWA and ATA to work together to this end. Like other non-members of the committee, SWA will have the opportunity to participate in the regulatory negotiations in a variety of other ways.

The National Council on the Handicapped (NCH), an independent Federal agency dealing with laws, policies, and programs affecting persons with disabilities, also sought membership. We believe that the Federal government's interest in the rulemaking is adequately represented by DOT and the ATBCB. NCH may provide information and its views to the committee through DOT and the ATBCB.

A number of comments from organizations representing disabled persons suggested that persons with so-called "hidden disabilities" (e.g., epilepsy, heart disease, learning disabilities) should be regarded as a separate interest meriting separate representation in the committee.

From the point of view of constituting an advisory committee, this suggestion poses a number of problems. The specific interests of persons with a wide variety of different kinds of disabilities could not easily be represented by a single organization. The problems faced, or accommodations needed, by persons who must use breathing equipment, persons with learning disabilities, persons with epilepsy, etc. are likely to be too diverse to give rise to what can fairly be thought of as a single interest. Without enlarging the committee to a size that would make effective negotiations difficult, the Department could not include as members organizations concerned about each of the "hidden disabilities."

In its comment, the Epilepsy Foundation asked that when issues arose that are specific to epilepsy, the Foundation be given the opportunity to provide information and assistance to the committee. The Department believes that participation of this kind by organizations concerned about a particular "hidden disability" could be helpful. If questions about how to accommodate persons with "hidden disabilities" come up during the negotiations, members of the committee will be free to call on experts or representatives of organizations to provide information and views to the committee. Interested persons and organizations will also have the opportunity to provide input to the committee on their own initiative. Cross-disability groups represented on the committee (e.g., NCIL, SATH, NAPAS) would be appropriate parties through whom information and views concerning persons with "hidden

BEST COPY AVAILABLE

disabilities" could be communicated to the committee.

The National Association of the Deaf suggested that individuals who are both blind and deaf are a separate interest that should be represented. Communication with deaf/blind individuals is likely to present problems not involved with respect to sighted deaf individuals or blind individuals who can hear. Nevertheless, the numbers of deaf/blind individuals traveling unaccompanied by air appears to be relatively small and the interests of deaf/blind individuals can be represented adequately by the combined efforts of representatives of organizations of blind and deaf individuals, respectively. While the Department does not believe that deaf/blind individuals should be regarded as a separate interest for purposes of the negotiation, persons with specific expertise concerning deaf/blind individuals will have the opportunity to provide information and views to the committee. The Helen Keller National Center has offered its assistance in this regard.

One commenter suggested that aircraft manufacturers might have an interest in the proceeding (i.e., concerning the physical accessibility of aircraft). No manufacturers or organizations representing them asked to be part of the committee. Moreover, to the extent that the airlines are not able to provide necessary information about such issues as physical accessibility of aircraft, the committee can contact manufacturers during the negotiations. In general, it is the Department's understanding that manufacturers can design any reasonable feature to better accommodate persons with disabilities in aircraft which an air carrier orders.

The Department points out that the committee may, by consensus decision, recommend that the Secretary appoint additional members to the committee if the committee believes that representation of additional interests is warranted.

**Participation by Non-Members**

It is important to keep in mind that participation in the rulemaking process is not limited to members of the advisory committee. Negotiation sessions of the committee are open to the public, and interested persons can observe the negotiations and communicate their views, in an appropriate time and manner, to members of the committee. Members of the public will have an opportunity to address the committee on issues of interest to them and the committee. Members of groups or individuals who are not members of the committee itself may have the opportunity to participate with working groups of the committee. The Department believes that participation of this kind can be very valuable for the rulemaking process. Of course, all interested persons will have the opportunity to comment on the proposed rule resulting from the committee's deliberations.

In addition to comments from parties wanting to participate as members of the committee, the Department received offers of assistance from various individuals and groups (e.g., the International Air Transport Association). We thank these commenters for their efforts, and the committee will call on them for assistance as needed. We also encourage organizations that have offered to participate or assist to have representatives attend the committee meetings to that they can make their information or views available to those representing their interests or to address the entire committee when the opportunity is provided.

**Major Issues**

Most commenters who mentioned the list of potential issues in the Department's notice of intent appeared to think that it was a reasonable starting point for the committee's discussions. Several commenters stressed that this list of issues should not be viewed as exhaustive or exclusive, and that the committee needed the discretion to consider other issues as they arose. The Department fully agrees with these comments. Commenters also suggested various specific subjects (e.g., treatment of blind/deaf passengers, how to respond to requests for assistance by disabled passengers, training and intra-carrier consistency of administration) that they thought should be discussed. The Department believes that the negotiation process should be open to discussion about these or any other relevant matters the committee may want to discuss.

ATA and SWA expressed concern about the propriety of discussing issues concerning carrier practices (e.g., refusal of service, requirements for attendants, provision of wheelchairs or other equipment) and charges for assistance to disabled passengers. For carriers to agree on such price and service matters, they said, could cause problems under the antitrust laws. Consequently, they asserted that the Department should exclude these issues from consideration, agree that it was appropriate for carrier representatives to abstain from discussions on these subjects, or cast the discussions on these subjects as leading only to voluntary options from which carriers could choose.

Carrier practices are at the heart of this rulemaking. A rule on this subject that failed to address carrier practices would not, in our view, adequately implement the Air Carrier Access Act of 1986. The Department is not asking carriers to agree upon common practices that they would implement, but rather to a recommendation to the Department concerning a regulation with which all carriers would have to comply. The actual imposition of regulatory requirements by the Department, after notice and public comment, would be the Department's action, not that of the carriers.

We emphasize that the Department does not intend for carriers to agree on common practices concerning the carriage of disabled passengers. Rather, we are seeking a consensus recommendation concerning a regulation with which, if adopted, all carriers would have to comply. Uniform compliance with a regulation issued in conformance with the Administrative Procedure Act is not a violation of the antitrust laws.

SWA also said that the negotiation should not address a matter which is currently the subject of a DOT administrative enforcement proceeding; i.e., SWA's policy of prohibiting deaf/blind individuals from traveling without an attendant. The Department's independent enforcement office challenged this practice as inconsistent with the existing 14 CFR Part 382, and a hearing before a DOT administrative law judge on the matter was held last year. The judge's initial decision, which found in favor of SWA, was rendered April 21, and is currently under review in the Department.

The regulatory negotiation will not address the merits of the administrative enforcement case in any way. That case deals solely with the issue of whether SWA's practice violates the existing 14 CFR Part 382. The regulatory negotiation, by contrast, concerns what regulatory provisions the Department should promulgate to implement the Air Carrier Access Act of 1986. To ensure that the enforcement case and the regulatory negotiation are kept separate, the individuals who act as the Department's representatives on the advisory committee will play no role in any further proceedings in the enforcement case.

Whether there should be a regulatory provision that directs airlines to treat blind/deaf passengers in a certain way in the future could be an appropriate

subject for the committee to discuss. This discussion about future regulatory requirements would have nothing to do, however, with the Department's ultimate determination of whether Southwest's current practice is consistent with 14 CFR Part 382 as it now exists.

Several comments from groups representing disabled persons mentioned that the Air Carrier Access Act of 1986 contained a definition of "handicapped individual," which could not be altered by regulation and consequently was not an appropriate subject for the committee to discuss. It is true, of course, that regulations cannot amend statutes. Nevertheless, while the Department cannot change this definition, the committee may wish to discuss matters related to this definition (e.g., elaborations of the definition of "handicapped individual" or a definition of "qualified handicapped individual," such as are found in many rules implementing section 504 of the Rehabilitation Act of 1973 [see, for example, 49 CFR 27.5]). With this qualification, the Department agrees with this comment.

**Procedures**

A number of commenters discussed procedural aspects of the regulatory negotiation. PVA and other groups representing disabled persons said that the sessions should be held in accessible facilities, with sign language interpreters and braille transcriptions of documents provided. The Department agrees with these comments and will take appropriate steps to ensure that the negotiations are held in a way that enables all members, including those with disabilities, to participate.

The Department requests that any persons needing a sign language interpreter to participate in the first negotiating session (or in the orientation session to be held on the day before the first negotiating session) please contact Robert Ashby (see "For Further Information Contact" for address and phone numbers) no later than June 1, 1987.

Many of these same commenters also suggested that the Department should provide sufficient financial support to permit participation in meetings held outside of Washington, DC. The Department contemplates that all negotiation sessions will be held in Washington, DC. The Department does not expect to be able to provide funds for travel outside of Washington, DC, given the limited funds available to the Department.

PVA, NFB, NCIL, NCH and several other organizations and individuals requested that public hearings be held in conjunction with this rulemaking. NFB suggested the hearings should be held early in the process, before negotiations on substantive issues. PVA, NFB, and NCIL suggested that the hearings should take place during the comment period on the NPRM resulting from the committee's recommendations.

The Department does not believe it appropriate to make any determination, at this time, concerning whether or when to hold public hearings. The Secretary can consider recommendations made by the Committee concerning this matter. The Department's ability to conduct hearings is, of course, subject to the availability of funds for this purpose.

ATA suggested that a good record should be kept of the committee's deliberations. We agree, and we will make a DOT staff member available to take notes and circulate minutes of the sessions, consistent with requirements under the Federal Advisory Committee Act. In addition, ATA suggested that the committee should not draft an NPRM, but rather make suggestions from which DOT drafters would write the NPRM. DOT will provide drafting assistance to the committee, and the committee may also choose to designate other individuals to perform drafting tasks.

The objective of the negotiation, in the Department's view, is to produce a report recommending to the Department a course of regulatory action, including a draft NPRM on which the committee has achieved consensus. This approach is consistent with the recommendation of the Administrative Conference of the United States (ACUS) on regulatory negotiation, paragraph 11 of which suggests that the committee's report to the agency include its proposed rule.

PVA, NCIL and NAD commented on the question of how the Department should deal with an impasse in the negotiations, should one occur. The notice of intent said that, in the event of an impasse, the Department could dissolve the committee and issue an NPRM on its own. The commenters suggested that, even if the Department had to publish an NPRM on its own because of an impasse in the committee, the Department should not dissolve the committee. Rather, the Department's NPRM should make use of whatever the committee had agreed on before the impasse and the Department should reconvene the committee in order to evaluate comments to the NPRM.

The Department finds merit in the suggestion that agreed-upon items should be placed in the NPRM, and we will do so if necessary. The Department's schedule, set forth below, provides time for the reconvening of the committee to consider comments to the NPRM. We emphasize, however, that we believe that the committee should concentrate its efforts on the goal of writing a new regulation on the basis of consensus, with the primary focus on the effort to mutually and cooperatively fashion the proposed regulation. If that goal is accomplished, then the task of responding to comments may be made substantially easier.

**Schedule**

In view of the Congressional time frame for implementation of the Air Carrier Access Act of 1986 and the importance of not letting the negotiation process take an unreasonably long time, the Department proposed, in the notice of intent, a schedule calling for the production of an NPRM by August 1987 and of a final rule by January 1988. Commenters from both disability community and airline industry organizations expressed concern that this schedule was too tight.

ATA said that the proposed schedule was too ambitious and that the Department should allow six to nine months to produce an NPRM. SWA thought that 9–12 months was needed for the entire process. NCH thought there was more time needed at the beginning and end of the process, and NCIL said that it thought the schedule was too tight. NFB commented that the idea of a cutoff date for negotiations was counterproductive, saying that the process should be left open-ended.

The Department concedes that its proposed schedule is an ambitious one. We continue to believe, however, that a schedule is an important tool for encouraging serious and expeditious negotiations by all parties. In addition, the Congressional and Departmental interest in expediting implementation of the Air Carrier Access Act of 1986 provides a strong reason to avoid setting too slack a schedule for the process.

Just as a strike deadline can be an important incentive to agreement in a labor-management negotiation, so we believe that a cutoff date for agreement can be an important incentive for agreement in a regulatory negotiation. A party is less likely to prolong the negotiations unnecessarily, especially if it perceives an advantage to delaying the Department's implementation of the Air Carrier Access Act of 1986, if it knows that, absent agreement by a certain date, the Department will publish its own NPRM or final rule. (See paragraph 4(a) of the ACUS recommendation.)

At the same time, the Department is aware that some scheduling flexibility

may be needed in view of the complexity and difficulty of the issues involved in the rulemaking. Consequently, if agreement has not been reached by the cutoff date, and the committee agrees that good progress is being made toward agreement, the committee could make a consensus recommendation to the Secretary that the deadline be extended for a specific, reasonable period. The schedule is deliberately "front-loaded," emphasizing the Department's view of the importance of the committee's achieving consensus before the publication of an NPRM.

The following schedule is established for the regulatory negotiation process:

Completion of negotiations for NPRM: November 6, 1987
Publication of the NPRM: December 7, 1987
End of comment period and beginning of negotiations on final rule: February 5, 1988
Conclusion of negotiations on final rule: March 31, 1988
Publication of final rule: April 30, 1988

The negotiation and rulemaking process would otherwise proceed as described in the notice of intent, subject to modification by committee consensus (e.g., the notice of intent suggested a two days every two weeks schedule for meetings, which the comittee could modify as a consensus of members thought appropriate).

On the day before the first day of negotiations, the Department is sponsoring an orientation session for committee members. The session, which is not mandatory but which the Department urges all members to attend, will focus on successful approaches to negotiation. Chris Kirtz of the Environmental Protection Agency (EPA), which has had a number of successful regulatory negotiations, will lead the session.

Communications to committee members concerning advisory committee matters should be addressed to:

(Name of Member), Regulation Negotiation Advisory Committee, Department of Transportation, Office of General Counsel (C–50), 400 7th Street, SW., Room 10424, Washington DC., 20590.

The first meeting of the advisory committee is scheduled for 9:30 a.m. on June 3, 1987, at PVA's headquarters. The meeting will be open to the public; however, only the listed parties may participate as members. Decisions with respect to future meetings will be made at the first meeting and from time to time thereafter. Notices of future meetings will be published in the Federal Register if time permits; however, published notice may not be possible in all cases. For example, the first meeting may continue for several days, break for a few days, and then resume.

Issued this 13th day of May, 1987, at Washington, DC.

Elizabeth Hanford Dole,
*Secretary of Transportation.*

## SECURITIES AND EXCHANGE COMMISSION

### 17 CFR Part 240

[Release No. 33–6713; 34–24485; File No. S7–18–87]

### Short Sales in Connection With a Public Offering

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Proposed rulemaking.

**SUMMARY:** Pursuant to a petition for rulemaking filed by the National Association of Securities Dealers, Inc. ("NASD"), the Commission is proposing for public comment Rule 10b–21 under the Securities Exchange Act of 1934 proscribing certain short sales in connection with a public offering of securities. Generally, proposed Rule 10b–21 would prohibit a person who effects short sales of an equity security during the period between the filing of a registration statement relating to the same class of equity securities and the commencement of the distribution of such equity securities, from covering such short sales with securities purchased from an underwriter or other broker or dealer participating in the offering of such securities.

**DATE:** Comments should be submitted on or before July 27, 1987.

**ADDRESS:** Interested persons should submit six copies of their written data, views, and opinions to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549, and should refer to File No. S7–1887. All submissions will be made available for public inspection at the Commission's Public Reference Room, Room 1024, 450 Fifth Street NW., Washington, DC 20549.

**FOR FURTHER INFORMATION CONTACT:** Nancy J. Burke or Invette Lopez, Office of Legal Policy and Trading Practices, Division of Market Regulation, Securities and Exchange Commission, Washington, DC 20549. (202) 272–2848.

**SUPPLEMENTARY INFORMATION:**

### I. Summary

In response to a petition for rulemaking filed by the NASD ("Petition"),[1] the Commission is publishing for public comment a proposal to adopt Rule 10b–21 ("Rule") under the Securities Exchange Act of 1934 ("Exchange Act").[2] The proposed Rule is intended to prevent manipulative short selling of securities in anticipation of a public offering [3] of the same securities.

The NASD's concern relates to the practice of short selling prior to a public offering which results in a decrease in the price of the security prior to the offering date and consequently a lower offering price. The sellers are then able to cover their short sales and realize a profit purchasing securities in the offering at the reduced price. Because of the availability of securities at a fixed price from the offering, the risks entailed in covering those short sales are reduced substantially. The NASD believes that this result adversely affects issuers in that the decrease in price deprives the issuer of offering proceeds that would have been realized had the market not been subject to such short selling.[4]

---

[1] The Petition was filed with the Commission on June 12, 1986 pursuant to section 553(e) of the Administrative Procedure Act, 5 U.S.C. 553(e), and Rule 4(a) of the Commission's rules of practice, 17 CFR 201.4(a), and is publicly available in File No. S7–1887 in the Commission's Public Reference Room.

[2] 15 U.S.C. 78a *et seq.*

[3] The Petition uses the terms "secondary public offering" and "secondary distribution," to indicate that the proposed rule is directed at a public offering of securities by an issuer when such issuer already has outstanding securities of the same class as those being distributed. The Commission notes that the proposed rule does not contain the term "secondary," and believes that the term "public offering" may be more appropriate since "secondary" offerings usually connote offerings by shareholders of previously issued securities, and "distribution" has a specific definition in Rule 10b–6 under the Exchange Act. Accordingly, the term "public offering" is used in this release and in the alternative formulation of the proposed rule included in this release.

[4] In 1972, the Commission published a staff opinion that addressed short selling activities prior to a public offering. Securities Exchange Act Release No 9624 (October 18, 1972). The release observed that such short selling may be "disruptive of fair and orderly markets in the securities" and, where the short sales are intended to depress the market price of the security so that the short position can be covered at a lower price, the activity would violate the anti-manipulation provisions of the Exchange Act.

Short selling schemes of the type sought to be addressed by Rule 10b–21 have been the subject of enforcement action by the Commission as violations of the antimanipulation provisions of the Securities Act of 1933, 15 U.S.C. 77a *et seq.* ("Securities Act"), and the Exchange Act. *E.g.*, J.A.B. Securities Co., Inc. Securities Exchange Act Release No 15948 (June

Continued

As described below, the Commission in the past has proposed three different versions of Rule 10b–21.[6] None of these proposals has been adopted. The Petition and the 1974, 1975, and 1976 Proposals are described below. Interested persons are directed to the relevant proposing releases for a detailed discussion of the Proposals.[6]

**II. Prior Proposals Relating to Rule 10b–21**

*A. The 1974 Proposal*

The 1974 Proposal would have prohibited any person who had outstanding an indication of interest to purchase or proposed to purchase securities in a secondary offering[7] of securities from selling short securities of the same class of the same issuer until after the registration statement had been declared effective or until the initial offering of securities under Regulation A had been made. This proposal also would have prohibited any person (other than specialists, odd-lot dealers, market makers, and *bona fide* or risk arbitrageurs) who effected a short sale within five days of the effective date of the registration statement relating to a secondary offering of the same class of security (or within five business days prior to the date of the initial offering of securities in a Regulation A offering) from covering such short sale until the earlier of five business days following the effective date of the registration statement (or the initial sale in the Regulation A offering), or the completion of the offering, whichever occurred first.

*B. The 1975 Proposal*

In response to the comments on the 1974 Proposal, that proposal was effectively withdrawn and, in addition to clarifying changes, the 1975 Proposal eliminated the first prohibition of the 1974 Proposal (short sales by persons with outstanding indications of interest) and restricted the proposed rule to offerings of equity securities for cash. The 1975 Proposal would have prohibited a person who had effected a short sale within 10 business days prior to the commencement of an offering covered by a registration statement or a notification on Form 1–A from making covering purchases from any underwriter or broker participating in the offering. In addition, if the short sale was effected within five business days of the commencement of the offering, the proposed rule would have prohibited covering purchases prior to the earlier of five business days after the commencement of the offering or the completion of the offering. Both prohibitions governing covering purchases would have extended to a short sale of a security of the same class as the offered security, and to the purchase, within the specified period, of a security convertible into or exchangeable for, a security of the same class as the security being offered.

The 1975 Proposal would have exempted from the rule's prohibitions *bona fide* arbitrage transactions (as defined in paragraph (c) of the proposed rule), and transactions by specialists, odd-lot dealers, and market makers who had submitted bid and ask quotations on a specified number of days preceding the commencement of the offering.

*C. The 1976 Proposal*

The 1976 Proposal represented a different regulatory approach. Rather than prohibit purchases to cover short sales made within a certain period, the 1976 Proposal would have imposed a "tick test" on short sales of securities of the same class as those being offered. The "tick test" would have applied during a pre-offering period specified by the rule, and continued until the termination of post-offering stabilization arrangements. In summary, the 1976 Proposal would have regulated short sales effected within 10 business days before the commencement of and during the offering, while the 1975 Proposal would have regulated covering purchases for short sales effected within 10 business days before the commencement, and for a maximum of five business days after commencement of the offering.

In the 1976 Proposal, the Commission proposed that, for exchange traded securities, the "tick" provisions of Rule 10a–1 under the Exchange Act[8] be the regulatory control of short selling, reasoning that Rule 10a–1 prevented persons from selling short at successively lower prices (or from exhausting bids at a particular price unless effected on a "plus" or "zero plus" tick), thus providing sufficient protection for exchange-traded securities from short selling activities prior to the commencement of an offering.[9]

The 1976 Proposal also established a "tick test" for over-the-counter ("OTC") securities where the problem of pre-offering short selling was claimed to have been most prevalent. The new "tick test" would have prohibited short sales prior to and during offerings covered by the rule at a price below a price ⅛ point above the highest independent bid reflected in Level 2 of the National Association of Securities Dealers Automated Quotation System ("NASDAQ") at the time the short sale was made.

The restrictions on short selling would have extended from the tenth business day preceding the expected offering date (required to be established and publicly announced by the managing underwriter or issuer) until the close of business on the day trading restrictions and stabilization arrangements among underwriters had terminated. The 1976 Proposal also contained exemptions similar to those contained in the 1975 Proposal for *bona fide* arbitrage transactions, and for transactions by specialists, odd-lot dealers, and certain qualified market makers.

**III. The NASD Petition**

In its Petition, the NASD urges the Commission to utilize its authority under sections 10 and 23 of the Exchange

---

28, 1979); A.P. Montgomery & Co., Inc., Securities Exchange Act Release No 10859 (July 9, 1974).

The Commission has also cautioned that "any person intending to purchase securities in any registered secondary offering should be on notice that his selling short the same securities prior to the offering may be subject to the registration requirements of section 5 of the Securities Act (15 U.S.C. 77e), as well as other applicable statutes and rules." Securities Exchange Act Release No 10631 (February 11, 1974). *Accord*, Securities Exchange Act Release No 11327 n.1 (April 2, 1975) and 9624 (October 18, 1972).

[6] Securities Exchange Act Release No 10636 (February 11, 1974), 39 FR 7808 ("1974 Proposal"); Securities Exchange Act Release No 11328 (April 2, 1975), 40 FR 16080 ("1975 Proposal"); Securities Exchange Act Release No 12662 (December 21, 1976), 41 FR 56845 ("1976 Proposal").

[6] Summaries of the comment letters received in response to the 1975 and 1976 Proposals have been prepared by the Commission's staff and are available, together with the comment letters, for public inspection in File No. S7–1697 in the Commission's Public Reference Room.

[7] As used in the release relating to the 1974 Proposal, "Secondary offering" referred to "registered offerings of securities for which there already exist trading markets for the same class of securities as those being offered." Securities Exchange Act Release No 10636 n.1 (February 11, 1974). The proposed rule would have applied to securities offered pursuant to the registration statement filed pursuant to the Securities Act or pursuant to a notification filed on Form 1–A of Regulation A. 17 CFR 239.201 to 239.204.

[8] 17 CFR 240.10a–1.

[9] Rule 10a–1 applies to exchange traded securities whose last sale information is reported on a real-time basis pursuant to an "effective transaction reporting plan" as defined in Exchange Act Rule 11Aa3–1, 17 CFR 240.11Aa3–1. The 1976 Proposal was drafted in light of the Commission's investigation and proceeding to determine whether to suspend in part the operation of Rule 10a–1. See Securities Exchange Act Release No. 13091 (December 21, 1976), 41 FR 55808, publishing for public comment proposed temporary Rules 10a–3(T)[A], 10a–3(T)[B] and 10a–3(T)[C] under the Exchange Act. If Temporary Rule 10a–3(T) had been adopted, the 1976 Proposal would have retained the provisions of Rule 10a–1 during the pre-offering and offering periods of securities that were the subject of underwritten offerings for cash. Temporary Rule 10a–3(T) was never adopted.

Act [10] to adopt a rule that would prohibit any person from directly or indirectly purchasing out of a public offering to cover a short sale which was executed after the registration statement was filed. Specifically, the proposed rule would prohibit a person who effects one or more short sales of equity securities of the same class as securities distributed for cash pursuant to a registration statement filed under the Securities Act or pursuant to a notification on Form 1–A [11] under the Securities Act, from directly or indirectly covering such short sale or sales with securities purchased from an underwriter or broker or dealer participating in such public offering, if such short sale or sales took place between the filing date of the registration statement and the commencement of such public offering.

The NASD urges the Commission to regulate only those covering purchases made out of the public offering to avoid affecting the operation of the market for the securities already outstanding. Since covering short sales in the open market exposes the short seller to the risk that securities to cover the short sale will not be available in the amount required, or will be priced away from the public offering price, the NASD believes that such short sales and covering purchases should not be restricted by the Rule.

The NASD recently has addressed a number of matters relating to short selling activity. For example, in the Fall of 1985, the NASD retained former Commissioner Irving M. Pollack to conduct a comprehensive study of short selling practices in the OTC securities market. The report of the study was published in July 1986,[12] and endorsed the NASD's Petition regarding Rule 10b–21.[13]

In 1986, the Commission approved amendments to the NASD Board of Governors' Interpretation on Prompt Receipt and Delivery of Securities ("Interpretation") and Article III, section 21, of the NASD Rules of Fair Practice ("Rules of Fair Practice").[14] The amended Interpretation prohibits an NASD member from accepting a short sale order from a customer unless the member makes an affirmative determination that it will receive delivery of the security from the customer or that the member can borrow the security on behalf of the customer for delivery by settlement date. The amendment to the Rules of Fair Practice requires that each order ticket for sale by a customer be marked "long" or "short." An order may be marked "long" only if (1) the customer's account is "long" the security, or (2) the member is informed that the customer owns the security and will deliver it as soon as possible without undue inconvenience or expense. If neither condition is satisfied, the order must be marked as a "short" sale.[15] Commentators may wish to address the extent to which these amendments may facilitate the implementation of Rule 10b–21, if adopted.[16]

## IV. General Request for Comment

Any persons wishing to submit written comments on the proposed Rule, the Initial Regulatory Flexibility Analysis,[17] or the Cost-Benefit Analysis,[18] or wishing to suggest additional changes or submit comments on other matters that might have an impact on the proposal contained herein, are requested to do so.

In addressing the proposal, commentators are specifically requested to direct their attention to certain areas. The Commission believes that certain drafting changes may improve the NASD proposal. Accordingly, an alternative formulation of the proposed rule is presented which: (1) Reflects the scope of the Commission's authority to promulgate the rule by substituting the phrase "it shall be unlawful" for the proposed references to section 10(b) of the Exchange Act;[19] (2) deletes paragraph (b) of the proposed rule since it is virtually identical to the definition of "short sale" contained in Rule 3b–3 under the Exchange Act;[20] and (3) inserts the term "offered securities," since the Commission understands the NASD's Petition to be addressed only to covering purchases involving the securities that are offered pursuant to a registration statement or Form 1–A. Without this restriction, it is unclear how short sellers in exchange-traded securities could cover in the secondary market without risking inadvertently violating the Rule through effecting a transaction with an underwriter or member of the selling group. The addition of the term is also intended to indicate that the restrictions of the proposed rule would terminate when the offering is completed. Commentators are asked to address whether this alternative is preferable to the formulation proposed by the NASD.

Comment is also requested regarding the extent of the short selling activity which the Rule proposes to proscribe [21] and the impact of such selling on the costs to issuers of completing an offering. Where possible, the Commission would appreciate specific examples of offerings where manipulative short selling may have occurred. The Commission asks commentators to address whether or not any efficiency gain from the proposed rule will be offset by losses due to reduced ability of market participants to cover short sales made in advance of offerings of securities.

In particular, the Commission would be in terested in statistical studies demonstrating the extent to which short selling prior to public offerings creates the problems cited in this relese.[22] Appropriate studies could, for example, consider the extent to which net of market returns at the time of an offering are explained by factors such as the pressure of short selling and the informational content of the announcement of the offering. The Commission also is interested in whether there exists a systematic trend

[15] *See* NASD Notice to Members 86–69 (October 10, 1986).

[16] These provisions apply to NASD members only. Rule 10b–21, however, would apply to all persons engaging in short sales of securities subject to the Rule. The Commission notes in this regard that the Rule is proposed to be adopted pursuant to section 30(a) of the Exchange Act, 15 U.S.C. 78dd(a), in addition to other provisions, which makes it unlawful for any broker or dealer to directly or indirectly effect transactions on foreign securities exchanges in the securities of U.S. issuers in contravention of any rules that the Commission may adopt for the protection of investors or to prevent evasion of the Exchange Act. *See* Schoenbaum v. Firstbrook, 405 F.2d 200, 207 (2d Cir.), reversed on other grounds en banc, 405 F.2d 215 (2d Cir. 1968), cert. denied sub nom. Manley v. Schoenbaum, 395 U.S. 906 (1969).

[17] *See* section V *Infra*.

[18] *See* section VI *Infra*.

[19] As with virtually all of the rules under the Exchange Act, proposed Rule 10b–21 would be adopted pursuant to a number of Exchange Act statutory sections. The notational convention of using "10b–" to designate a rule is not a reflection of the scope of the Rule's statutory authority. *See* Securities Exchange Act Release No. 24003 (January 16, 1987), 52 FR 2994, 2998 (January 30, 1987).

[20] 17 CFR 240.3b–3.

[21] For example, the 1975 Proposal would have applied to covering purchases with respect to short sales of a security of the same class as the offered security, and to the purchase of a security convertible into or exchangeable for a security of the same class as the security being offered. Commentators may wish to address whether the Rule should apply to convertible and exchangeable securities.

[22] Several academic studies have examined generally stock price performance at the time of an offering. *See, e.g.*, Smith, *Investment Banking and the Capital Acquisition Process*, 15 J. Fin. Econ. 3 (1986) (citing earlier studies).

for price declines during the period between the filing and the effective time of offerings to be reversed promptly after the offering is made, as well as the significance of the presence or absence of such a trend.

Commentators also are asked to address: (i) Whether proposed Rule 10b–21 is likely to achieve its intended effect of reducing manipulative short selling in contemplation of a public offering, in light of the ability of short sellers to cover in the market and the opportunity for arbitrage by other market participants to provide a market supply of the offered security if the market price exceeds the offering price; (ii) whether it is appropriate to restrict short sellers' abilility to cover in the offering based on their having sold short at any time during the period (possibly several months) between filing of a registration statement and commencement of the distribution, or whether a shorter period would be appropriate; (iii) whether proposed Rule 10b–21 presents any unusual enforcement difficulties; and (iv) whether short sales in contemplation of a public offering are a valuable mechanism for market adjustment to potentially overpriced offerings. The Commission also requests comments on the appropriateness of applying Rule 10b–21 to exchange-traded securities. In particular, commentators may wish to address whether the "tick test" contained in Rule 10a–1 satisfactorily addresses any concerns regarding abusive short selling prior to public offerings of exchange-traded securities. Commentators may also wish to adress the application of the proposed Rule in the context of shelf offerings registered under the Securities Act.[23]

Finally, section 23(a) of the Exchange Act[24] requires the Commission to consider the impact any proposed rules would have on competition. While the Commission is not aware of any competitive impact likely to result from the proposal described in this release, commentators are invited to address that issue.

## V. Initial Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Analysis ("IRFA") in accordance with 5 U.S.C. 603 regarding proposed Rule 10b–21. The IRFA uses certain definitions of "small entities" adopted by the Commission for purposes of the Regulatory flexibility Act. The Analysis notes that the proposed rule is designed to prevent manipulative short-selling by market participants in anticipation of underwritten public offerings and that it may address the concerns created by the type of short selling activity described above without affecting open market activities. At this time, the Commission is unable to determine the costs to small entities of complying with the proposed rule. If there is a "significant economic impact on a substantial number of small entities," this impact would not appear to be adverse, since the primary objective of the proposed Rule is to prevent manipulative short selling activities in anticipation of a public offering. A copy of the Initial Regulatory Flexibility Analysis may be obtained by contacting Ivette Lopez, Division of Market Regulation, Securities and Exchange Commission, Washington, DC 20549, (202) 272–2848.

## VI. Cost-Benefit Analysis

The proposed rule could have the cost of reducing the ability of market participants to sell short in advance of offerings that they believe to be overpriced, resulting in an increased incidence of such offerings. Any significant economic impact may be balanced by the benefits derived from preventing manipulative short selling activities in anticipation of a public offering. Presumably, the proceeds from such offerings will not be diminished because of a decrease in price of the security resulting from a market subject to manipulative short selling.

In order to evaluate the costs and benefits associated with the Rule, as indicated in the general rquest for comment, the Commission wishes to obtain information on specific examples of offerings where short selling in advance of a public offering may have occurred, the results of such sales, the extent of the short selling activity that would be prohibited by the Rule, and the economic impact of such activities on the issuers and the investing public.

## List of Subjects in 17 CFR Part 240

Broker-dealers, Reporting and recordkeeping requirements, Securities, Issuers, Fraud.

## Statutory Basis and Text of Proposed Rule

The Commission proposes to amend Part 240 of Chapter II of Title 17 of the Code of Federal Regulations to read as follows:

## PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 is amended by adding the following citation.

**Authority:** Sec. 23, 48 Stat. 901, as amended, 15 U.S.C. 78w, * * * § 240.10b–21 also issued under Secs. 2, 3, 9(a)(6), 10(a), 10(b), 15(c), 23(a), and 30(a), 15 U.S.C. 78b, 78c, 78i(a)(6), 78j(a), 78j(b), 78o(c), 78w(a), and 78dd(a).

2. By adding new text of § 240.10b–21 to read either as in Alternative A or as in Alternative B as follows:

### Alternative A: NASD Proposal

**§ 240.10b–21 Short selling during public distributions.**

(a) It shall constitute a "manipulative or deceptive device or contrivance" as used in section 10(b) of the Act for any person who effects one or more short sales of equity securities of the same class as securities disstributed for cash pursuant to a registration statement filed under the Securities Act of 1933 or pursuant to notification on Form 1–A under such act, directly or indirectly, to cover such short sale or sales with securities purchased from an underwriter or broker or dealer participating in the distribution, if such short sale or sales took place between the filing date of the registration statement and the commencement of such distribution.

(b) The term "short sale" means any sale of a security that the selleer does not own or any sale that is consummated by the delivery of a security borrowed by, or for the account of, the seller. A person shall be deemed not to own a security unless: (1) The person has title to it; or (2) has purchased, or has entered into an unconditional contract, binding on both parties thereto, to purchase it but has not yet received it; or (3) owns a security convertible into or exchangeable for it and has tendered such security for conversion or exchange; or (4) has an option to purchase or acquire it and has exercised such option; or (5) has rights or warrants to subscribe to it and has exercised such rights or warrants; provided, however, that a person shall be deemed to own securities only to the extent that there is a net long position in such securities.

(c) This rule shall not prohibit any transaction or transactions if the Commission, upon written request or upon its own motion, exempts such transaction or transactions either unconditionally or on specified terms and conditions as not constituting a

[24] 15 U.S.C. 78w(a).

manipulative or deceptive device or contrivance comprehended within the purpose of this rule.

**Alternative B**

**§ 240.10b–21 Short selling in connection with a public offering.**

(a) It shall be unlawful for any person who effects one or more short sales of equity securities of the same class as securities offered for cash pursuant to a registration statement filed under the Securities Act of 1933 ("Securities Act") or pursuant to a notification on Form 1–A under the Securities Act ("offered securities"), directly or indirectly, to cover such short sale or sales with offered securities purchased from an underwriter or broker or dealer participating in the offering, if such short sale or sales took place between the filing date of the registration statement or Form 1–A and the date that sales may be made pursuant to the registration statement or Form 1–A.

(b) This rule shall not prohibit any transaction or transactions if the Commission, upon written request or upon its own motion, exempts such transaction or transactions either unconditionally or on specified terms and conditions.

Dated: May 20, 1987.

By the Commission.

**Jonathan G. Katz,**

*Secretary.*

BILLING CODE 8010–01–M

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

### 18 CFR Parts 4, 11 and 375

**[Docket No. RM87–6–000]**

### Feeds for Hydroelectric Project Applications To Reimburse Fish and Wildlife Agencies; Notice of Public Hearing

May 21, 1987.

**AGENCY:** Federal Energy Regulatory Commission, DOE.

**ACTION:** Notice of public hearing.

**SUMMARY:** On March 11, 1987, the Federal Energy Regulatory Commission (Commission) issued a Notice of Proposed Rulemaking, 52 FR 8463 (Mar. 18, 1987), proposing to establish fees to be paid by an applicant for a hydroelectric project that is required to meet terms and conditions set by the United States Fish and Wildlife Service (FWS), the National Marine Fisheries Service (NMFS), and State fish and wildlife agencies (State agencies). Under the proposal, applicants would reimburse the FWS, the NMFS, and State agencies for any reasonable costs incurred in setting mandatory terms and conditions. In response to requests from interested persons, the Commission will hold a public hearing.

**DATES:** The public hearing will be held on Monday, June 15, 1987, at 10:00 a.m. Requests to participate in the hearing and the length of time requested should be in writing and should be directed to the Secretary, no later than Thursday, June 11, 1987.

**ADDRESSES:** The hearing will be held at: The Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

The hearing room will be posted on June 15, 1987. Requests to participate and questions regarding participation should be directed to: The Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

**FOR FURTHER INFORMATION CONTACT:** Robert C. Fallon, Federal Energy Regulatory Commission, Office of the General Counsel, Rulemaking and Legislative Analysis, 825 North Capitol Street NE., Washington, DC 20426, (202) 357–8540.

**SUPPLEMENTARY INFORMATION:** On March 11, 1987, pursuant to section 7(c) of the Electric Consumers Protection Act of 1986 (ECPA),[1] the Commission issued a Notice of Proposed Rulemaking (NOPR)[2] for an informal rulemaking procedure in Docket No. RM87–6–000. The NOPR proposes to establish fees to be paid by an applicant for a hydroelectric project that is required to meet the terms and conditions set by the United States Fish and Wildlife Service (FWS), the National Marine Fisheries Service (NMFS), and State fish and wildlife agencies (State agencies).

Section 7(c) of ECPA amends section 30 of the Federal Power Act (FPA).[3] Section 30 of the FPA gives authority to the FWS, NMFS, and State agencies to set mandatory terms and conditions for certain types of projects. The NOPR proposes to have applicants, subject to section 30(c) of the FPA, reimburse the FWS, the NMFS, and the State agencies for any reasonable costs incurred in setting these mandatory terms and conditions.

The Commission has received requests for a public hearing from the FWS and the NMFS. These agencies suggest that interested persons should have the opportunity to make oral presentations of their views on the proposed rule. In response to these requests, the Commission is scheduling this public hearing.

The hearing will not be of a judicial or evidentiary type. There will be no cross-examination of persons presenting statements. However, the panel may question such persons and any interested person may submit questions to the presiding officers to be asked of persons making statements. The presiding officers will be K. Kristina Nygaard, Assistant General Counsel for Hydroelectric Licensing; Michael A. Stosser, Assistant General Counsel for Rulemaking and Legislative Analysis; and Fred Springer, the Acting Director of the Office of Hydropower Licensing. The presiding officers will determine whether the question is relevant and whether the time limitations permit it to be presented. Any further procedural rules will be announced by the presiding officers at the hearing. Transcripts of the hearing will be available in the public file for this proceeding, Docket No. RM87–6–000, in the Commission's Office of Public Information, and may be ordered from that office.

Persons participating at the hearing should, if possible, bring 10 copies of their testimony to the hearing. A list of the participants in the hearing will be available in the Commission's Office of Public Information and at the hearing room on the morning the hearing is convened.

**Kenneth F. Plumb,**

### National Park Service

### 36 CFR Part 9

### Minerals Management; Mining and Mining Claims; Extension of Comment Period

**AGENCY:** National Park Service.

**ACTION:** Proposed rule; extention of comment period.

**SUMMARY:** On Friday, April 3, 1987, the National Park Service (NPS) published a proposed rulemaking to clarify the scope of its regulations governing mineral development on mining claims within units of the National Park System and the relationship of these regulations to those governing access in Alaska at 43

CFR Part 36 (52 FR 10666). Although the NPS provided a 45-day period for public review and comment on the proposed rulemaking, several requests have been received for additional time to review the proposal. Therefore, the NPS is extending the comment period for an additional 30 days.

**DATE:** Written comments will be accepted through June 29, 1987.

**ADDRESS:** Comments should be addressed to: Land Resources Division (660), National Park Service, P.O. Box 37127, Washington, DC 20013–7127.

**FOR FURTHER INFORMATION CONTACT:** Ms. Carol McCoy, Land Resources Division (660), National Park Service, P.O. Box 37127, Washington, DC 20013–7127, 202–523–5120.

Dated: May 21, 1987.

BILLING CODE 4310-10-M

## VETERANS ADMINISTRATION

### 38 CFR Parts 2 and 21

### Veterans' Job Training; Administrative Review for Employers

**AGENCY:** Veterans Administration.

**ACTION:** Proposed regulations.

**SUMMARY:** The Veterans Administration (VA) has several regulations dealing with approval and withdrawal of approval of training programs under the Veterans' Job Training Act. These provide that only the Director of the Veterans Administration's (VA's) Education Service may review a decision concerning approval or withdrawal of approval made by the Director of a VA field station. The regulations also provide that such a decision made by the Director of the VA's Education Service may only be reviewed by the Deputy Chief Benefits Director.

Some employers have sought administrative review by the Board of Veterans Appeals. Some have also sought review of decisions concerning payments made to them under the Act. After careful consideration, the VA has decided that the formal administrative review process should be simplified by providing that the decision on any such questions shall be subject to one review, which shall be by appeal to the Board of Veterans Appeals. The Board's decisions shall be final.

Furthermore, due to an internal reorganization, the Education Service and the position of Deputy Chief Benefits Director no longer exists. This proposal reflects this reorganization.

**DATE:** Comments must be received on or before June 26, 1987.

**ADDRESSES:** Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 132 at the above address, between the hours of 8 a.m. to 4:30 p.m., Monday through Friday (except holidays) until July 10, 1987.

**FOR FURTHER INFORMATION CONTACT:** June C. Shaeffer, Assistant Director for Education Policy and Program Administration, Vocational Rehabilitation and Education Service, Department of Veterans Benefits, (202) 233–2092.

**SUPPLEMENTARY INFORMATION:** This proposal adds two new sections, 38 CFR 2.66a and 2.99, and amends 38 CFR 21.4622, 21.4624, 21.4632, 21.4634 and 21.4636 to clarify that employers may seek final agency review by direct appeal to the Board of Veterans Appeals of decisions concerning initial or continued approval of job training programs and payments made to employers under the Veterans' Job Training Act, Pub. L. 98–77. The VA is proposing this in order to eliminate unnecessary layers of administrative review and promote uniform decisionmaking. Veterans who are effected by the withdrawal of an approval have the right to appeal to the Board of Veterans Appeals. If the Board of Veterans Appeals is considering a veteran's appeal concerning his or her training program while administrative personnel within the VA's Department of Veterans Benefits, at the request of the veteran's employer, are reviewing a decision to withdraw approval of the training program, for example, the VA risks reaching decisions which may conflict with each other.

The VA has determined that this proposal does not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The proposal will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. It will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans Affairs has certified that these proposed regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the proposed amended regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of §§ 603 and 604. This certification can be made because these changes establish a single appellate review process for VA determinations under the Veterans' Job Training Act. Simplifying the Agency's internal administrative review process in this manner will not have a significant impact on any small entity.

The Catalog of Federal Domestic Assistance number for the program affected by these proposed regulations is 64.121.

Approved: May 6, 1987.

Thomas K. Turnage,

*Administrator.*

38 CFR Part 2, *Delegations of Authority* and Part 21, *Vocational Rehabilitation and Education*, are proposed to be amended as follows:

**PART 2—[AMENDED]**

1. Section 2.66a is added to read as follows:

**§ 2.66a. Delegation of authority to the Chairman and Vice Chairman, Board of Veterans Appeals, to assume appellate jurisdiction of decisions concerning approval, disapproval and withdrawal of approval of job training programs under the Veteran's Job Training Act and decisions concerning payments to employers under that Act.**

This delegation is described in § 21.4646(b) of this chapter.

(38 U.S.C. 210, 212(a))

2. Section 2.99 is added to read as follows:

**§ 2.99. Delegation of authority to the Chief Benefits Director and to supervisory or adjudicative personnel within the jurisdiction of the Vocational Rehabilitation and Education Service of the Department of Veterans Benefits designated by him or her, to make findings and decisions of the Veterans Administration under Pub. L. 98–77, as amended, and the applicable regulations, precedents and instructions, as to programs authorized by §§ 21.4600 through 21.4644.**

This delegation is described in § 21.4646(a) of this chapter.

(38 U.S.C. 212(a))

**PART 21—[AMENDED]**

3. In § 21.4622, paragraph (b)(5) is added and paragraph (c) is revised to read as follows:

**§ 21.4622 Employer applications for approval.**

* * * * *

(b) *Veterans Administration action upon receipt of the applications.*

* * * * *

(5) While a decision is being made on the employer's application, the employer has the same rights to a hearing as are provided VA claimants in § 3.103(b), (c) and (e). (38 U.S.C. 212(a))

(c) *Appeal of decision not to approve a program.* If an employer disagrees with a decision of a Director of a VA field station or the Director, Vocational Rehabilitation and Education Service not to approve the program, the employer may appeal that decision to the Board of Veterans Appeals. See § 21.4646(b). (38 U.S.C. 212(a))

4. Section 21.4624 is revised to read as follows:

**§ 21.4624 Withdrawal of approval.**

(a) *Approval may be withdrawn.* The Director of a Veterans Administration field station, or the Director, Vocational Rehabilitation and Education Service, as appropriate, may immediately disapprove the further participation in a job training program which has been previously approved when—

(1) The program ceases to meet the requirements of § 21.4620, or

(2) The Director finds that the employer's certification was false, or

(3) The employer refuses to make available to an authorized representative of the Federal Government those records which the employer is required to keep under § 21.4640.

(b) *Notification.* The Director of the Veterans Administration field station or the Director, Vocational Rehabilitation and Education Service, as appropriate, shall notify the employer and all veterans participating in the program that approval is being withdrawn. The notices shall be by certified or registered letter, return receipt requested, and shall include—

(1) A statement of the reasons for the withdrawal of approval, and

(2) Notice of the employer's or veteran's right to appeal to the Board of Veterans Appeals, and the right to a hearing. (Pub. L. 98–77, sec. 11, 38 U.S.C. 212(a))

5. In § 21.4632, paragraph (f) is added to read as follows:

**§ 21.4632 Payments.**

* * * * *

(f) *Disagreement concerning payment.* An employer who disagrees with a decision concerning the payments to that employer under the Veterans' Job Training Act may appeal to the Board of Veterans Appeals. See § 21.4646(b). (38 U.S.C. 212(a))

6. In § 21.4634, paragraph (g) is added to read as follows:

**§ 21.4634 Overpayments.**

* * * * *

(g) *Disagreements concerning overpayments.* An employer who disagrees with a decision concerning an overpayment made to the employer under the Veterans' Job Training Act, may appeal to the Board of Veterans Appeals. See § 21.4646(b). (38 U.S.C. 212(a))

7. Section 21.4646 is revised to read as follows:

**§ 21.4646 Delegations of authority.**

(a) *Delegation of authority to the Department of Veterans Benefits.* In § 2.99 of this chapter the Administrator has delegated authority to the Chief Benefits Director and to supervisory or adjudicative personnel within the jurisdiction of the Vocational Rehabilitation and Education Service of the Department of Veterans Benefits, designated by him or her to make findings and decisions under Pub. L. 98–77, as amended, and the applicable regulations, precedents and instructions, as to programs authorized by §§ 21.4600 through 21.4644. (38 U.S.C. 212(a))

(b) *Delegation of authority to the Board of Veterans Appeals.* (1) In § 2.66a of this chapter the Administrator has delegated to the Chairman and Vice Chairman of the Board of Veterans Appeals authority to review on appeal the findings and decisions made under paragraph (a) of this section including—

(i) Approval and disapproval of job training programs,

(ii) Withdrawal of approval of job training programs, and

(iii) Payments and overpayments made to employers.

(2) Sections 19.1 through 19.201 of this chapter apply to this appeal in the same manner as appeals involving benefits as provided in 38 U.S.C. 4004. (38 U.S.C. 212(a))

BILLING CODE 8320–01–M

---

**38 CFR Part 36**

## Loan Guaranty; Use of Credit Reports on Proposed Reamortizations, Claims Under Guaranty and Repurchased Vendee Loans

**AGENCY:** Veterans Administration.

**ACTION:** Proposed regulations.

**SUMMARY:** The VA (Veterans Administration) is proposing to amend its regulations to require the submission of credit reports on proposed loan reamortizations and in connection with the filing of claims under the guaranty and the filing of requests for repurchase of vendee loans.

**DATES:** Comments must be received on or before June 26, 1987. The VA proposes to make these regulations effective 30 days after publication as final regulations.

**ADDRESSES:** Interested persons are invited to submit written comments, suggestions or objections regarding this proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW, Washington, DC 20420. All written comments received will be available for public inspection only in room 132, Veterans Services Unit, at the above address between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until July 10, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mr. Raymond L. Brodie, Assistant Director for Loan Management (261), Loan Guaranty Service, Department of Veterans Benefits, (202) 233–3668.

**SUPPLEMENTARY INFORMATION:** Under the provisions of OMB Circular A–129, Managing Federal Credit Programs, agencies must obtain credit reports in connection with loan applications, loan reschedulings, when vendee loans are repurchased by the Government, and when claims are filed under the guaranty on loans made or guaranteed by the Government. Present regulations authorize VA to require credit reports in connection with loan applications, but not with vendee loan repurchases, claims or rescheduling. These proposed regulatory amendments will authorize VA to require credit reports in connection with vendee loan

repurchases, claims and rescheduling. A credit report would be obtained for each borrower liable on the loan. In cases involving only one borrower, only one report would be obtained.

A loan rescheduling, also referred to as a reamortization, occurs when the borrower(s) and lender agree to a change in the terms of an obligation in order to facilitate repayment. Reamortizations usually involve an increase in the period of time for repayment and a decrease in the monthly or other periodic payment. For example, a 9½ percent loan with a remaining term of 22 years and an outstanding principal balance of $50,000 would require monthly payments of $452.24 to amortize or pay off the loan at the end of the 22 year term. By reamortizing the loan to provide for a 30 year remaining term, the monthly payments would be reduced to $420.43. In some cases, the $31.81 monthly payment reduction can enable a borrower to make the monthly payments and thereby avoid loss of his or her home. When a foreclosure is averted in this manner the Government also benefits in that a claim under the guaranty is avoided. However, in cases where a reamortization would not be sufficient to enable the veteran to save his or her home, it should not be entered into. In these cases, the delay in foreclosure would increase the claim under guaranty and the veteran's resulting debt to the Government for the amount paid on his or her behalf.

The requirements for and limitations on reamortization of VA-guaranteed loans are set forth at 38 CFR 36.4279 and 36.4314. It is proposed to amend these sections to add a specific requirement that the borrower(s) be determined to be a reasonable credit risk at the time of reamortization, as determined by the holder of the loan, based upon a review of the borrower(s) creditworthiness, including a review of a credit report(s) on the borrower(s) by the holder. The holder would also be required to include the credit report(s) in its submission to the Administrator advising of the terms of the reamortization. This added requirement should serve as a further assurance that reamortization agreements will only be entered into when they are likely to be in the best financial interest of the borrower(s), the lender, and the Government as guarantor of the loan.

The costs and expenses which may be included in claims on VA-guaranteed loans are prescribed in regulations at 38 CFR 36.4276 and 36.4313. Amounts paid on claims under the guaranty in most cases constitute a debt owed to the Government by the veteran and/or other borrowers who defaulted on the loan. A credit report(s) obtained at the time of loan termination can assist VA in determining what steps would be appropriate in collecting the debt. It is proposed to amend §§ 36.4276 and 36.4313 to allow the cost of a credit report(s) to be included in the claim. New §§ 36.4316(c) and 36.4283(j) would be added to provide that claims must be submitted in such form and manner as may be prescribed by the Administrator, and must include a copy of a current credit report(s) on the debtor(s). The current § 36.4283(j) would be redesignated as § 36.4283(k). Except for the new requirement for a credit report(s), this change simply describes in regulatory form the current practice whereby lenders file claims in accordance with procedural guidance made available to all lenders.

A vendee loan is a loan made by the Administrator to finance the sale of a property acquired by the Administrator after foreclosure of a guaranteed loan. Under § 36.4600, vendee loans may be sold with a right of recourse. The terms and conditions under which VA will repurchase a vendee loan sold with recourse are specified in that section. A credit report(s) on the debtor(s) at the time repurchase is requested would assist VA in determining what steps would be appropriate in collecting the debt. It is proposed to add a new § 36.4600(c)(16) to require that holders of vendee loans obtain and forward to the VA a current credit report(s) on the debtor(s) when requesting VA to repurchase the loan. Section 36.4600(e)(3) would be revised to provide for reimbursement to the holder of the cost of obtaining the credit report(s).

The Administrator hereby certifies that these proposed regulations will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, title 5, United States Code, sections 601–612. The cost of the credit report(s) required to be submitted with claims and repurchase requests would be reimbursable. The cost of credit reports required for proposed reamortizations may be collected by the lender from the individual borrower(s) requesting the reamortization. Individuals are not included in the definition of small entities under the Regulatory Flexibility Act. Pursuant to 5 U.S.C. 605(b), these proposed regulations are therefore exempt from the initial and final regulatory analysis requirements of sections 603 and 604.

The proposed regulations have been reviewed under Executive Order 12291, entitled Federal Regulation, and are not considered major regulation changes as defined in the Executive Order. These regulations will not impact on the public or private sectors as major rules. They will not have an annual effect on the economy of $100 million or more and will not cause a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; nor will they have other significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The information collection requirements contained in §§ 36.44282, 36.4316 and 36.4600 of these proposed regulations have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act of 1980. Comments on the information collection requirements should be submitted to: Elaine Norden, Desk Officer for the Veterans Administration, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, NW, Washington, DC 20503, (202) 395–7316.

Catalog of Federal Domestic Assistance Program Numbers are 64.114 and 64.119.

These amendments are proposed under authority granted the Administrator by sections 210(c), 1803(c)(1), 1819(g) and 1820 of title 38, United States Code.

**Lists of Subjects in 38 CFR Part 36**

Condominiums, Handicapped, Housing loan programs—housing and community development, Manufactured homes, Veterans.

Approved: May 6, 1987.

Thomas K. Turnage,

*Administrator.*

**PART 36—[AMENDED]**

38 CFR Part 36, *Loan Guaranty,* is proposed to be amended to read as follows:

1. In § 36.4276 paragraph (b)(6) is revised and paragraph (b)(7) is added to read as follows:

**§ 36.4276 Advances and other charges.**

* * * * *

(b) * * *

(6) The cost of a credit report(s) on the debtor(s), which is (are) to be forwarded to the Administrator in connection with the claim.

(7) Any other expense or fee that is approved in advance by the Administrator.

* * * * *

(38 U.S.C. 1820(a)(3))

§ 36.4277 [Amended]

2. In § 36.4277(e)(3) remove the word "his" and add, in its place, the words "his or her".

3. In § 36.4279 paragraphs (a), (b) and (d) are revised to read as follows:

§ 36.4279 Extensions and reamortizations.

(a) Provided the debtor(s) is (are) a reasonable credit risk(s), as determined by the holder based upon review of the debtor'(s) creditworthiness, including a review of a current credit report(s) on the debtor(s), the terms of repayment of any loan may, by written agreement between the holder and debtor(s), be extended in the event of default, to avoid imminent default, or in any other case where the prior approval of the Administrator is obtained. Except with the prior approval of the Administrator, no such extension shall set a rate of amortization less than that sufficient to fully amortize at least 80 percent of the loan balance so extended within the maximum maturity prescribed for loans of its class.

(b) In the event of a partial repayment pursuant to § 36.4211, the balance of the indebtedness may, by written agreement between the holder and the debtor(s), be reamortized, provided the reamortization schedule will result in full repayment of the loan within the original maturity, and provided the debtor(s) is (are) a reasonable credit risk(s), as determined by the holder based upon review of the debtor'(s) creditworthiness, including a review of a current credit report(s) on the debtor(s).

* * * * *

(d) The holder shall promptly forward to the Administrator an advice of the terms of any agreement effecting a reamortization or extension of a guaranteed loan, together with cop(y)(ies) of the credit report(s) obtained on the debtor(s).

(38 U.S.C. 1819(g))

4. In § 36.4283, paragraph (j) is redesignated paragraph (k) and a new paragraph (j) is added to read as follows:

§ 36.4283 Foreclosure or repossession.

* * * * *

(j) A claim for the guaranty must be submitted in such form and manner as is prescribed by the Administrator, and must include a cop(y)(ies) of a current credit report(s) on the debtor(s).

(38 U.S.C. 1819(g))

* * * * *

5. In § 36.4313 paragraph (b)(6) is revised and paragraph (b)(7) is added to read as follows:

§ 36.4313 Advances and other charges.

* * * * *

(b) * * *

(6) The cost of a credit report(s) on the debtor(s), which is (are) to be forwarded to the Administrator in connection with the claim.

(7) Any other expense or fee that is approved in advance by the Administrator.

* * * * *

(38 U.S.C. 1820(a)(3))

6. In § 36.4314 paragraphs (a), (b) and (e) are revised to read as follows:

§ 36.4314 Extensions and reamortizations.

(a) Provided the debtor(s) is (are) a reasonable credit risk(s), as determined by the holder based upon review of the debtor'(s) creditworthiness, including a review of a current credit report(s) on the debtor(s), the terms of repayment of any loan may be written agreement between the holder and the debtor(s) be extended in the event of default, to avoid imminent default, or in any other case where the prior approval of the Administrator is obtained. Except with the prior approval of the Administrator, no such extension shall set a rate of amortization less than that sufficient to fully amortize at least 80 percent of the loan balance so extended within the maximum maturity prescribed for loans of its class.

(b) In the event of a partial prepayment pursuant to § 36.4310, the balance of the indebtedness may, by written agreement between the holder and the debtor(s), be reamortized, provided the reamortization schedule will result in full repayment of the loan within the original maturity, and provided the debtor(s) is (are) reasonable credit risk(s), as determined by the holder based upon review of the debtor'(s) creditworthiness, including a review of a current credit report(s) on the debtor(s).

* * * * *

(e) The holder shall promptly foward to the Administrator an advice of the terms of any agreement effecting a reamortization or extension of a guaranteed or insured loan, together with a copy(y) (ies) of the credit report(s) obtained on the debtor(s).

(38 U.S.C. 1803(c)(1))

7. In § 36.4316 paragraph (c) is added to read as follows:

§ 36.4316 Continued default.

* * * * *

(c) A claim for the guaranty must be submitted in such form and manner as is prescribed by the Administrator, and must include a cop(y)(ies) of a current credit report(s) on the debtor(s). (38 U.S.C. 1816(a)(1))

8. In § 36.4600 paragraph (c)(16) is added and paragraph (e)(3) is revised to read as follows:

§ 36.4600 Sale of loans, guarantee of payment.

* * * * *

(c) * * *

(16) To obtain forward a current credit report(s) on the debtor(s) to the Administrator when requesting that the Administrator repurchase the loan.

* * * * *

(e) * * *

(3) The holder may be reimbursed for the cost of a current credit report(s) on the debtor(s) which is (are) fowarded to the Administrator along with the request for repurchase and for any other costs or expenses incurred which are approved in advance by the Administrator as being necessary to protect the Government's interests.

* * * * *

(38 U.S.C. 210(c), 1803(c)(1), 1816(g), 1820)

BILLING CODE 8320-01-M

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 65

[A-5-FRL-3208-5]

### Proposed Delayed Compliance Order for Rexworks, Milwaukee, WI

**AGENCY:** United States Environmental Protection Agency (U.S. EPA).

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** U.S. EPA proposes to issue an Administrative Order to Rexworks. This Order requires the company to bring volatile organic compound emissions from its miscellaneous metal parts spray booths in Milwaukee, Wisconsin into compliance with the federally approved Wisconsin State Implementation Plan (SIP) NR 154.13(4). The company is unable to comply with these regulations at this time, and the proposed Order would establish an expeditious schedule which requires compliance by December 31, 1987. Source compliance with the Order would preclude suits under the Federal enforcement and citizen suit provision of the Clean Air Act for

violation of the SIP regulations covered by the Order. The purpose of this notice is to provide the public an opportunity to submit written comment and to offer an opportunity to request a public hearing on U.S. EPA's proposed Order prior to its issuance.

**DATES:** Written comments must be received on or before June 29, 1987 and requests for a public hearing must be received by June 12, 1987. All requests for public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offering at the hearing. If there is significant public interest in a hearing, it will be held twenty-one (21) days after notice of the date, time and place of the hearing which will be provided in a separate notice in the Federal Register.

**ADDRESSES:** Comments and request for a public hearing should be submitted to the Office of Regional Counsel, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Illinois, 60604. Material supporting the Order and public comment received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

**FOR FURTHER INFORMATION CONTACT:** Susan Perdomo, Assistant Regional Counsel, Office of Regional Counsel, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Illinois, 60604, at (312) 886-6730

**SUPPLEMENTARY INFORMATION:** Rexworks operates miscellaneous metal parts spray booths at its Milwaukee, Wisconsin plant. The proposed Order addresses volatile organic hydrocarbon emissions from the miscellaneous metal parts coatings at this facility which are subject to NR 154.13(4) part of the federally approved Wisconsin SIP. NR 154.13(4) limits the emissions of volatile organic hydrocarbons from these sources and NR 154.13(4)(m)(3)(c) specifies the date by which Rexworks must be in compliance with said rule. This Order requires final compliance with NR 154.13(4) by December 31, 1987, by coating reformulation or installation of control equipment.

The source has consented to the terms of the Order, and has agreed to meet the increment established in the Order during the period of this informal Rulemaking.

Dated: May 15, 1987.

Frank M. Covington,

*Acting Regional Administrator.*

BILLING CODE 6560-50-M

## 40 CFR Part 180

[PP 6E3389, 6E3439/P417; FRL-3209-3]

## Pesticide Tolerances for Chlorpyrifos

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** This document proposes that tolerances be established for the combined residues of the pesticide chlorpyrifos and its metabolite 3,5,6-trichloro-2-pyridinol in or on the raw agricultural commodities dates and leeks. The proposed regulation to establish maximum permissible levels for residues of the pesticide in or on the commodities was requested in two separate petitions submitted by the Interregional Research Project No. 4 (IR-4).

**DATE:** Comments, identified by the document control number [PP 6E3389,5E3439/P417], should be received on or before June 29, 1987.

**ADDRESS:** By mail, submit written comments to: Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Donald R. Stubbs, Emergency Response and Minor Use Section (TS-767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1806).

**SUPPLEMENTARY INFORMATION:** The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petitions to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project, and the named Agricultural Experiment Stations. These petitions requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for the combined residues of the pesticide Chlorpyrifos [O,O-diethyl O-(3,5,6-trichloro-2-pyridyl)-phosphorothioate] and its metabolite 3,5,6-trichloro-2-pyridinol (TCP) in or on certain raw agricultural commodities as follows:

1. PP 6E3389 on behalf of the Agricultural Experiment Station of New Jersey in or on leeks at 0.5 part per million (ppm) (of which no more than 0.2 ppm is chlorpyrifos).

2. PP 6E3439 on behalf of the Agricultural Experiment Station of California in or on dates at 0.5 ppm (of which no more than 0.3 ppm is chlorpyrifos).

The petitioner proposed that use of the pesticide on dates be limited to California, and the petition for leeks was later amended to propose that use of chlorpyrifos on leeks be limited to New Jersey based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the areas of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petitions and other relevant material have been evaluated. The pesticide is considered useful for the purposes for which the tolerances are sought. The toxicological data considered in support of the proposed tolerances include:

1. A 2-year dog feeding study with a plasma cholinesterase (ChE) no-observed-effect level (NOEL) of 0.01 milligram (mg) / kilogram (kg) / day and a NOEL 1.0 mg/kg/day (highest dose tested) for systemic effects.

2. A voluntary human study with a ChE NOEL of 0.03 mg/kg/day (based on 20 days of exposure at this level).

3. A 2-year mouse oncogenicity study which was negative for oncogenic effects under the conditions of the study at all levels tested (0.5, 5, and 15 ppm).

4. A 3-generation rat reproduction study with a NOEL for reproductive effects at 1.0 mg/kg/day (highest dose tested).

5. A rat teratology study that was negative for teratogenic effects at 15 mg/kg/day.

6. An acute delayed neurotoxicity study in the hen that was negative at 100 mg/kg.

7. A 2-year rat feeding/oncenenicity study with a RBC ChE NOEL of 0.1 mg/kg/day and negative for oncogenic effects at all levels tested (0.03, 0.1, 1.0 and 3.0 mg/kg/day). The existing rat feeding/oncogenicity study is not adequate for regulatory purposes (core supplementary data) and represents a data gap for the chemical.

The provisional acceptable daily intake (PADI), based on the human voluntary ChE study (ChE NOEL of 0.03 mg/kg/day) and using a 10-fold safety factor, is calculated to be 0.003 mg/kg of body weight/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.18 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.63048 mg/day; the current action will increase the TMRC by 0.00045 mg/day (0.07 percent increase). The increase in dietary exposure to residues of chlorpyrifos and its metabolite resulting from the proposed use of dates and leeks is considered to pose a negligible incremental risk in dietrary exposure (0.07 percent increase in the TMRC).

Although the TMRC based on all established tolerances for chlorpyrifos exceeds the MPI, the Agency believes tha the actual residues to which the public is likely to be exposed are considerably less than indicated by the TMRC for the following reasons:

1. Not all of the planted crop for which a tolerance is established in normally treated with the pesticide.

2. Not all crops contributing to the TMRC are likely to be consumed by an individual.

3. Most treated crops have residue levels which are below the established tolerance level.

4. Residues are frequently reduced when foods are processed or prepared for human consumption.

The basic manufacturer has been requested to submit additional studies to allow the Agency to reassess the existing tolerances for chlorpyrifos. Additional plant and animal metabolism studies are required to fully characterize and quantify the parent compound and its metabolites (including TCP) in plants and animals. Since there is insufficient information to adequately characterize TCP, the tolerance expression for chlorpyrifos currently includes this major metabolite. The requested data will allow the Agency to determine the necessity of establishing tolerances at levels sufficient to cover residues for both the parent compound and metabolite TCP. If the requested data inidcate that it is not necessary to include the metabolite in the tolerance expression, the TMRC for chlorpyrifos will be lower than the current calculaation based on tolerances for combined residues of chlorpyrifos and TCP. The U.S. tolerances for chlorpyrifos would also be compatable with the Codex Alimentarius and the tolerances of Canada and Mexico, which include only chlorpyrifos *per se*.

Although additionally plant and animal metabolism data are needed to fully characterize the residues, the available metabolism data are adequate to support the proposed uses of chlorpyrifos on dates and leeks. Chlorpyrifos and its major metabolite TCP are considered to be the residues of concern for these uses.

An adequate analytical method, gas-liquid chromatography, is available in the Pesticide Analytical Manual, Volume II (PAM–II), for enforcement purposes. There is no expectation of secondary residues in meat and milk since dates and leeks are not animal feed commodities. There are currently no actions pending against the continued registration of this chemcial.

Based on the above information considered by the Agency, the tolerances established by amending 40 CFR 180.342 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments should bear a notation indicating the document control number, [PP 6E3389, 6E3439/P417]. All written comments filed in response to this petition will be available in the Information Services Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

**List of Subjects in 40 CFR Part 180**

Administrative practice and procedure, Agriculture commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: May 15, 1987.

Edwin F. Tinsworth,

*Director, Registration Division, Office of Pesticide Programs.*

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

**PART 180—[Amended]**

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.342 is amended by designating the current paragraph and list of tolerances as paragraph (a) and adding new paragraph (b), to read as follows:

**§ 180.342 Chlorpyrifos; tolerances for residues.**

* * * * *

(b) Tolerances with regional registration, see § 180.1(n), are established for the combined residues of chlorpyrifos and its metabolite 3, 5, 6-trichloro-2-pyridinol in or on the following raw agricultural commodities:

| Commodities | Parts per million |
|---|---|
| Dates | 0.5 (of which no more than 0.3 ppm is chlorpyrifos). |
| Leeks | 0.5 (of which no more than 0.2 ppm is chlorpyrifos). |

## Underground Storage Tanks; Technical Requirements, Financial Responsibility Requirements, and State Program Approval; Extending Comment Period

**AGENCY:** U.S. Environmental Protection Agency (EPA).

**ACTION:** Proposed rule; extension of comment period.

**SUMMARY:** The purpose of this notice is to extend the public comment period on the proposed rules for underground storage tanks that appeared in the **Federal Register** on April 17, 1987 (52 FR 12662–12864). These include the Technical Standards beginning at page 12662, the Financial Responsibility Requirements beginning at page 12786, and the State Program Approval requirements beginning at page 12853.

The comment period is extended to July 16, 1987, to ensure that commenters have adequate time to prepare comments.

**DATES:** Written comments on the proposed rules may be submitted on or before July 16, 1987.

**ADDRESS:** Address written comments to Docket Clerk, Office of Underground Storage Tanks (WH–562A), Docket No. UST–2 (Technical Standards and Corrective Action Requirements for Owners and Operators of Underground Storage Tanks), UST–3 (Financial Responsibility Requirements), or UST–4 (State Program Approval), 401 M Street SW., Washington, DC 20460.

**FOR FURTHER INFORMATION CONTACT:** RCRA/SUPERFUND Hotline 1–(800)–424–9346 (toll free); or in Washington, DC, (202) 382–3000.

**SUPPLEMENTARY INFORMATION:** Prior to this extension notice, the Technical Standards and the State Program Approval Comment period deadline was June 16, 1987. Due to a typographical error in the original Federal Register Notice, the comment period deadline for the financial Responsibility Requirements read June 6, 1987 instead of June 16, 1987.

J.W. McGraw,

## DEPARTMENT OF THE INTERIOR

### Office of the Secretary

### 43 CFR Part 11

### Natural Resource Damage Assessments; Extension of Comment Period on Proposed Rule

**AGENCY:** Department of the Interior.

**ACTION:** Proposed rule; extension of comment period.

**SUMMARY:** On April 17, 1987, the Department of the Interior (Department) proposed a rule to provide amendments to the final natural resource damage assessment regulations required by section 301(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), and to be codified at 43 CFR Part 11. The natural resource damage assessment regulations establish procedures for assessing damages to natural resources resulting from a discharge of oil or a release of a hazardous substance, and compensable under either CERCLA, as amended, also known as Superfund, or under the Clean Water Act (CWA). The proposed rule published on April 17, 1987, at 52 FR 12886, is necessitated by the Superfund Amendments and Reauthorization Act (SARA). The proposed rule modifies the final regulations to conform with the changes enacted by SARA. The Department is extending the period for comment on the proposed rule to June 17, 1987.

**DATES:** Comments on the proposed rule (52 FR 12886) should be submitted by June 17, 1987.

**ADDRESS:** Comments should be sent to: David Rosenberger, CERCLA 301 Project, Room 4354, Department of the Interior, 1801 C Street NW., Washington, DC 20240. Comments will be available for review at the above address during regular business hours (7:45 a.m. to 4:15 p.m.) Monday through Friday.

**FOR FURTHER INFORMATION CONTACT:** David Rosenberger (202) 343–1301; Linda Burlington (202) 343–1301; Willie Taylor (202) 343–7531; or Alison Ling (415) 556–8607.

**SUPPLEMENTARY INFORMATION:** On April 17, 1987 (52 FR 12886), the Department proposed to amend the final rules to conform with the amendments to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9601 *et seq.*, enacted by the Superfund Amendments and Reauthorization Act of 1986 (SARA), Pub. L. 99–499, October 17, 1986. The proposed rule modified the final natural resource damage assessment rules to conform with changes enacted by SARA that, among others: Extend the rebuttable presumption to assessments performed by State trustees; provide for the recovery of prejudgment interest on damage awards; provide for a statute of limitations that revives certain past claims; require notification of trustees in cases of discharges or releases that might injure natural resources of concern to the trustee; create new responsibilities for Indian tribes; require Federal trustees to retain sums recovered, without further appropriations, for use only to restore, replace, or acquire the equivalent resources; and require State trustees to use sums recovered only to restore, replace, or acquire the equivalent resources.

The April 17, 1987, notice stated that comments on the proposed rule were to be submitted on or before May 18, 1987. The Department received requests for the public for additional time to comment on this proposed rule. As a result of these requests, the Department is extending the comment period to June 17, 1987. This extension is retroactive to May 18, 1987.

Dated: May 22, 1987.

Gale A. Norton,

*Associate Solicitor, Division of Conservation and Wildlife.*

## FEDERAL COMMUNICATIONS

### 47 CFR Parts 67 and 69

**[CC Docket Nos. 78–72 and 80–286; FCC 87J–1]**

### Common Carrier Services; MTS and WATS Market Structure and Amendment of Part 67 of the Commission's Rules and Establishment of a Joint Board

**AGENCY:** Federal Communications Commission (FCC).

**ACTION:** Recommended decision and order.

**SUMMARY:** This action of the Federal-State Joint Board recommends that the FCC adopt a comprehensive and integrated set of recommendations concerning (1) subscriber line charges, (2) the federal lifeline assistance program, (3) present measures to assist high cost telephone companies, and (4) the common line tariff and pooling system administered by the National Exchange Carrier Association (NECA). The Joint Board believes that the overall effect of the recommendations achieves a proper balance among the four goals of this proceeding: Preserving universal service, promoting economic efficiency, eliminating service pricing discrimination, and deterring uneconomic bypass.

**ADDRESS:** Federal Communications Commission, 1919 M Street NW, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Barbara Lynch or Cynthia Work, tele: (202) 632–6363.

**SUPPLEMENTARY INFORMATION:** This is a summary of the CC Docket No. 80–286 Federal-State Joint Board's *Recommended Decision and Order* in

CC Docket Nos. 78–72 and 80–286, FCC 87J–1, Adopted March 12, 1987, and Released March 31, 1987.

The full text of this decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW, Suite 140, Washington, DC 20037.

**Summary of Recommended Decision and Order**

1. In this *Recommended Decision and Order* the Joint Board recommends that the cap on subscriber line charges for subscriber line residential and single-line business customers be increased to $2.60 on June 1, 1987, $3.20 on September 1, 1988, and $3.50 on April 1, 1989. The Joint Board also recommends that subscriber line charges on embedded Centrex lines be increased to $4.00 on June 1, 1987, $5.00 on September 1, 1988, and $6.00 on April 1, 1989. The increase to a maximum of $3.50 for residential and single-line business subscribers represents the Joint Board's final recommendation for nationwide implementation of subscriber line charges. Additionally, each of these rate levels is a ceiling. Thus, a local exchange carrier (LEC) may assess the full level of the authorized subscriber line charge only to the extent that the company's study area interstate loop costs equal or exceed that level. The Joint Board recommends that the Commission require LECs to flow through the proposed subscriber line charge increases in the form of reductions in the carrier common line (CCL) charge. It specifically recommends that the first increase be applied to reduce the originating CCL charge, and thus limit the bypass threat on the originating end of the call; and that the further increases be applied to reduce both the originating and terminating CCL charges taking into account potential bypass threats. The Joint Board also recommends that AT&T Communications (AT&T) be directed to flow through to consumers, in the form of interstate rate reductions, the savings it will realize as a result of reductions in the CCL charge.

2. The Joint Board further recommends that the Commission and members of the Joint Board establish a comprehensive monitoring program to track and assess the impact of the Joint Board's recommendations, as adopted by the Commission. The Joint Board also recommends that a series of reports based on the data collected through the program be submitted to Congress and state regulators on a quarterly basis. In addition to these reports, the Joint Board also recommends that members of the Joint Board and the Commission review the impact of its recommendations 90 days prior to the scheduled increases in subscriber line charges in 1988 and 1989. Reports on these assessments would be submitted by the Commission to Congress and state regulators. The Joint Board recommends that it be directed by the Commission to issue an order in the near future containing recommendations concerning the framework of, and schedule for, this monitoring program.

Moreover, in order to ensure that the monitoring program takes into account all relevant factors, the Joint Board recommends that the record in this proceeding remain open to allow for the filing of comments at any time regarding the structure and effectiveness of the monitoring program.

3. Regarding lifeline, the Joint Board recommends first, a program of federal assistance to qualified low income households that would help defray the one time charges for commencement of service. This program, which has been described as a program to "Link Up America," would be available for a single telephone line at a subscriber's principal place of residence and would offset one half of the charges for commencing telephone service, up to $30, for qualifying households. The program would also encourage LECs to offer deferred payment schedules for these charges by paying a LEC's interest costs, on an amount up to $200, when it provides for a deferred payment schedule and does not charge interest to qualified subscribers. The Joint Board recommends that this interest payment be set at the rate paid on ten year Treasury bills. The Joint Board also recommends that the current federal lifeline assistance program be increased to correspond with the proposed subscriber line charge increases. Federal assistance would be available to match state contributions on any amount up to the full subscriber line charges of $3.50. Thus, with full state matching assistance, a total of $7.00 in benefits would be available per month to qualifying subscribers under this program upon full implementation of the federal subscriber line charge.

4. The Joint Board recommends that the subscriber line charge waiver and Link Up America programs be funded by charges assessed on interexchange carriers (IXCs), initially through the CCL charge and, upon implementation of proposed revisions to the present pooling mechanism in 1989, through flat-rate, per-line charges assessed on IXCs based on the number of "1+" or "presubscribed" common lines (including feature group C and D lines) presubscribed to each such carrier. The flat, per-line charge would be assessed on all such lines of each IXC that has either (1) one percent of such lines nationwide or (2) five percent of such lines in any study area and a minimum of one thousand lines in that study area. The Joint Board recommends that the Commission certify both lifeline programs prior to the provision of federal benefits upon application by a state or LEC (for the subscriber line charge waiver) or a state or its delegates (for Link Up America). The Joint Board further recommends the following criteria for Link Up America beneficiaries: (1) Applicant must have lived at an address where there has been no telephone service for at least three months prior to the date that assistance is requested; (2) applicant must not have received this assistance within the last two years; (3) applicant must not be a dependent (as defined by the federal income tax code), unless he or she is more than 60 years of age; and (4) applicant must meet the requirements of a state established income test. The Joint Board recommends that the first two criteria be verified, for example, through telephone records and that the last two criteria may be self-certified.

5. The Joint Board recommends retargeting the high cost assistance measures provided to high cost telephone companies. This recommended retargeting would provide an additional interstate expense allocation to small and medium size LECs and less assistance to larger LECs, specifically, LECs with over 200,000 access lines. The Joint Board recommends that the targeted assistance be recovered from IXCs through flat-rate charges calculated according to the same methodology as lifeline assistance.

6. The Joint Board recommends that the existing common line tariff and pooling system be modified to permit LECs to withdraw from the NECA tariff and pool and file common line tariffs based on their own costs. LECs that withdraw from the pool would be required to contribute long-term support (LTS) to LECs that remain in the pool, thus enabling pooling companies, which generally will be small, high cost companies, to tariff a CCL charge equal to the charge that would result if all LECs remained in the pool. The Joint Board also recommends that four years

of transitional support payments (TRS) be provided to qualifying LECs that withdraw from the pool. Such LECs must be net recipients from the pool and must withdraw from the tariff and pool in accordance with a schedule that provides the largest companies one opportunity and smaller companies two opportunities to leave the pool and qualify to receive TRS. TRS would be paid by those nonpooling companies that were net contributors to the pool. TRS recipients would not pay LTS to pooling companies during the transition period. The Joint Board also recommends that a LEC withdrawing one of its study areas be required to withdraw them all, and that a holding company withdrawing one of its LECs be required to withdraw them all. Under this proposal the Commission also would prescribe the continuation of AT&T's current practice of maintaining a nationwide averaged rate schedule for its Message Telecommunications Service.

7. Finally, the Joint Board recommends that the Commission initiate proceedings in order to: (1) Consider what, if any, adjustment should be made to its recommended pooling modifications to ensure that they do not inadvertently and unreasonably affect the marketability of small LECs; and (2) conform existing Part 69 rules governing the administration of NECA and the operations of the NECA common line pool.

8. The recommendations contained herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose a new or modified information collection requirement on the public. Implementation of any new or modified requirement will be subject to approval by the Office of Management and Budget as prescribed by the Act.

**Ordering Clauses**

9. Accordingly, the Joint Board recommends that the Commission adopt the proposals discussed above and the proposed revisions to Parts 67 and 69 of the Commission's rules.

10. This recommendation is adopted pursuant to sections 4(i), 4(j), 201, 202, 203, 205, 221, 403, and 410 of the Communications Act of 1934, as amended, 47 U.S.C. 154 (i) and (j), 201, 202, 203, 205, 221, 403, and 410 (1986).

**List of Subjects**

*47 CFR Part 67*

Calculation of expense adjustment—Additional interstate expense allocation, Lifeline connection assistance expense allocation, Telephone company eligibility, Data collection, Calculation of lifelife connection assistance expense adjustment.

*47 CFR Part 69*

Computation of charges, Computation of transition charges, Apportionment of expenses, Segregation of common line element revenue requirement, Exchange carrier association.

Federal Communications Commission.

## INTERSTATE COMMERCE COMMISSION

**49 CFR Ch. X**

**[Ex Parte No. 347 (Sub-No. 2)]**

## Rate Guidelines; Non-Coal Proceedings; Comment Filing; Extension of Time

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Extension of time to file comments to notice of proposed policy.

**SUMMARY:** By a decision served April 8, 1987, the Commission proposed guidelines for evaluating rate reasonableness in non-coal proceedings. Notice was published on April 8, 1987 in the **Federal Register** at 52 FR 11295 requesting additional comments. May 26, 1987, was specified as the due date for comments. Time for filing has been extended to June 25, 1987.

**DATES:** Comments are due June 25, 1987.

**ADDRESSES:** Send an original and 15 copies of comments to: Office of Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

**FOR FURTHER INFORMATION CONTACT:** Ronald S. Young or Richard H. Klem at (202) 275-7565.

Dated: May 20, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons. Commissioner Sterrett did not participate.

Noreta R. McGee,

*Secretary.*

BILLING CODE 7035-01-M

## DEPARTMENT OF TRANSPORTATION

**National Highway Traffic Safety Administration**

**49 CFR Part 544**

**[Docket No. T86-01; Notice 3]**

## Insurer Reporting Requirements; List of Insurers Required To File Reports in October 1987

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** Title VI of the Motor Vehicle Information and Cost Savings Act requires insurers to file annual reports with this agency, unless NHTSA exempts an insurer from filing such reports. This law also specifies that NHTSA can exempt only those insurance companies whose market share is below certain percentages for the nation as a whole and in each individual State. To carry out these statutory provisions, NHTSA has exempted all those insurance companies that are statutorily eligible to be exempted and published a listing of those insurance companies that are required to file annual reports..

However, an insurance company's eligibility for exemption from the reporting requirements may vary annually, as its natinal and State-by-State market shares change. To address this situation, NHTSA has stated that it will publish annual updates of the list of insurance companies that are required to file annual reports. The listing of insurance companies in this notice is derived from more current market share information than was previously available to the agency. If these listings are adopted as a final rule, those insurance companies included on the list would be required to file reports for the 1986 calendar year not later than October 25, 1987. Any insurance company not on the final list is *not* required to file a report for the 1986 calendar year.

**DATES:** Comments on this notice must be received by this agency not later than July 13, 1987.

The final rule on this subject will be effective 30 days after the rule is published in the **Federal Register.**

**ADDRESS:** Comments on this notice should refer to Docket No. T86-01; Notice 3, and be submitted to: Docket Section, NHTSA, Room 5109, 400 Seventh Street SW., Washington, DC 20590. Docket hours are 8:00 am to 4:00 pm Monday through Friday.

**FOR FURTHER INFORMATION CONTACT:** Barbara A. Kurtz, Office of Market Incentives, NHTSA, 400 Seventh Street SW., Washington, DC 20590 (202–366–4807).

**SUPPLEMENTARY INFORMATION:** Section 612 of the Motor Vehicle Information and Cost Savings Act (the Act; 15 U.S.C. 2032) requires each insurer to file an annual report with NHTSA unless the agency exempts the insurer from filing such reports. The term "insurer" is defined very broadly for the purposes of section 612, consisting of two broad groups of entities. One of these broad groups is included in the definition of "insurer" by virtue of section 612(a)(3). That section specifies that for the purposes of section 612, the term "insurer" includes any person, other than a governmental entity, who has a fleet of 20 or more motor vehicles used primarily for rental or lease and not covered by theft insurance policies issued by insurers of passenger motor vehicles. The requirements for this group of insurers are not addressed in or affected by this proposal.

The other broad group is included within the term "insurer" by virtue of section 2(12) of the Act (15 U.S.C. 1901(12)). That section provides that every person engaged in the business of issuing passenger motor vehicle insurance policies is an insurer, regardless of the size of the business. Section 612(a)(5) provides that the agency shall exempt small insurers included in this second broad group from the reporting requirements if NHTSA finds that such exemptions will not significantly affect the validity or usefulness of the information collected and compiled in the reports, either nationally or on a State-by-State basis. The term "small insurer" is defined in section 612(a)(5)(C) as one whose premiums account for less than one percent of the total premiums for all forms of motor vehicle insurance issued by insurers within the United States. However, that section also provides that if an insurance company satisfies this definition of a "small insurer", but accounts for 10 percent or more of the total premiums for all forms of motor vehicle insurance issued by insurers within a particular State, such insurer must report the required information about its operations in that State.

To implement these statutory criteria for exempting small insurers, NHTSA has used the data voluntarily supplied by insurance companies to A.M. Best to determine the insurers' market shares nationally and in each State. The A.M. Best data were chosen because they are both accurate and timely, and its use imposes no additional burdens on any party.

After examining the A.M. Best data, NHTSA determined that it should exempt all those insurance companies that were statutorily eligible for exemption from these reporting requirements. This determination was based on the fact that the reports from only those insurance companies that were statutorily required to file reports would provide the agency with representative data, both nationally and on a State-by-State basis, and that the data in the insurer reports provided by the insurance companies that were ineligible for an exemption would be sufficient for NHTSA to carry out its activities and responsibilities under Title VI of the Act.

Accordingly, the agency included an Appendix A and Appendix B in the final rule for insurer reports published January 2, 1987 (52 FR 59). The 20 insurance companies listed in Appendix A had premiums that accounted for one percent or more of all motor vehicle insurance premiums paid nationally. Hence, those companies were required to report on their operations for every State in which they did business. The 11 insurance companies listed in Appendix B had premiums that accounted for ten percent or more of the total motor vehicle insurance premiums within a particular State or States. Such companies were required to report on their operations only for those States in which their premiums accounted for ten percent or more of the total premiums.

The market shares for each of the insurance companies were derived for the A.M. Best for 1984, the most recent year for which the A.M. Best data were available as of the date the final rule was published. Since that time, A.M. Best data for 1985 have become available. In the final rule, NHTSA stated, "The agency will update these appendices annually, shortly after A.M. Best publishes its revised listings, to reflect changes in premium shares for the insurance companies." 52 FR 62. This rulemaking action implements that pledge. The agency would like to emphasize that this rulemaking does not affect its prior determination that those insurance companies that are statutorily eligible to be exempted from these reporting requirements should, in fact, be exempted therefrom. Instead, this rulemaking simply uses more current data to determine which insurance companies are eligible for such exemptions.

The most recent A.M. Best data on market shares shows that one insurance group (Lincoln National) that did not have at least one percent of the national market for motor vehicle insurance premiums now has one percent of that market. Accordingly, Lincoln National now appears in Appendix A. This addition means that group will be required to file a report not later than October 25, 1987 setting forth the information required by Part 544 for each State in which it did business in the 1986 calendar year. Conversely, one insurer that had a one percent national market share in the older A.M. Best data (American Financial Group) has fallen below the one percent threshhold in the newer data, so its name is deleted from Appendix A. This means that it would not be required to file a report in October 1987.

Two insurance groups (American Family Group and Commercial Union Assurance Group) have fallen below the one percent threshhold, so they are also deleted from Appendix A. However, each retained ten percent or more of the market in particular States, so their names have been added to Appendix B. This means these groups would be required to report only on their activities in those States in their October 1987 reports. In the case of American Family, it would be required to report for North Dakota, South Dakota, and Wisconsin. In the case of Commercial Union, it would be required to report for Maine.

Finally, four companies listed in Appendix B as having ten percent or more of the market in particular States have fallen below that level in the most current A.M. Best data. Three of these companies (Shelter Insurance Companies, United Farm Bureau Mutual, and Tennessee Farmers) would be deleted entirely from Appendix B. Accordingly, those companies would not be required to file any report in October 1987. Southern Farm Bureau Group, which was listed in Appendix B for both Arkansas and Mississippi, has fallen below a ten percent market share in Arkansas. Thus, Appendix B would be changed to specify that Southern Farm Bureau is only required to include information on Mississippi in its October 1987 report.

NHTSA has analyzed this proposal and determined that it is neither "major" within the meaning of Executive Order 12291 nor "significant" within the meaning of the Department of Transportation regulatory policies and procedures. If adopted as a final rule, this listing would ensure that all insurance companies that are statutorily eligible for exemption from the insurer reporting requirements are in fact exempted from those requirements. On the other hand, those companies that are

not statutorily eligible for an exemption would be expressly required to file reports.

NHTSA does not believe that this proposed rulemaking to reflect more current A.M. Best data would affect the impacts described in the final regulatory evaluation prepared for Part 544. Accordingly, a separate regulatory evaluation has not been prepared for this proposal. Using the cost estimates in the final regulatory evaluation for Part 544, the agency estimates that it will cost the one insurance company that would be added to Appendix A about $100,000 to file its initial report, while saving about $50,000 for the company that would be deleted from Appendix A. The two companies that would be deleted from Appendix A, but added to Appendix B, would save about $30,000 each as a result of this change. The three companies deleted from Appendix B would save about $20,000 each, while the company required to report on one State instead of two would save about $10,000. This, the net total impact of these changes is estimated to be a savings of about $80,000 for insurance companies. This is well below the threshold of $100 million for classifying a rulemaking action as "major" under the Executive Order.

As noted above, a full regulatory evaluation was prepared for the final rule establishing Part 544. Interested persons may wish to examine that evaluation in connection with this proposal. Copies of that evaluation have been placed in Docket No. T86-01; Notice 2. Any interested person may obtain a copy of this evaluation by writing to: NHTSA Docket Section, Room 5109, 400 Seventh Street SW., Washington, DC 20590, or by calling the Docket Section at (202) 366-4949.

The agency has also considered the effects of this proposed rulemaking under the Regulatory Flexibility Act. I certify that this proposed action would not have a significant economic impact on a substantial number of small entities. This proposed action simply applies more current information to determine which insurance companies are statutorily eligible to be exempted from these reporting requirements. NHTSA believes that any insurance company that does not qualify as a "small insurer" within the meaning of section 612 of the Act would also not qualify as a small entity within the meaning of the Regulatory Flexibility Act. Those insurance companies that did not qualify as small insurers under the older data, but do qualify under the newer data, would realize some savings, as discussed above. However, the economic impact would not be substantial, nor are there a substantial number of these companies.

In accordance with the National Environmental Policy Act, the agency has considered the environmental impacts of this proposed rule and determined that, if adopted as a final rule, it would not have a significant impact on the qualify of the human environment.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR Part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

**List of Subjects in 49 CFR Part 544**

Crime insurance, insurance, insurance companies, motor vehicles, reporting and recordkeeping requirements.

In consideration of the foregoing, it is proposed that 49 CFR Part 544 be amended as follows:

**PART 544—(AMENDED)**

1. The authority citation for Part 544 would continue to read as follows:

Authority: 15 U.S.C. 2002; delegation of authority at 49 CFR 1.50.

2. Appendix A to Part 544 would be revised to read as follows:

**Appendix A—Issuers of Motor Vehicle Insurance Policies Subject to the Reporting Requirements in Each State in Which They Do Business**

State Farm Group
Allstate Insurance Group
Farmers Insurance Group
Nationwide Group
Aetna Life & Casualty Group
Liberty Mutual Group
Travelers Insurance Group
USAA Group
Hartford Insurance Group
CIGNA Group
Geico Corporation Group
Continental Group
United States F&G Group
Fireman's Fund Group
California State Auto Association
Interinsurance Exchange Auto Club of Southern California
Sentry Insurance Group
Lincoln National Group.

3. Appendix B to Part 544 would be revised to read as follows:

**Appendix B—Issuers of Motor Vehicle Insurance Policies Subject to the Reporting Requirements Only in Designated States**

Alabama Farm Bureau Group (Alabama)
Island Insurance Group (Hawaii)
Kentucky Farm Bureau Group (Kentucky)
American General Group (Maine)
Commerical Union Assurance Group (Maine)
American Family Group (North Dakota, South Dakota, and Wisconsin)
Auto Club of Michigan Group (Michigan)
Southern Farm Bureau Group (Mississippi)
Amica Mutual Insurance Company (Rhode Island)
American International Group (Vermont).

Issued on May 21, 1987.

Barry Felrice,

*Associate Administrator for Rulemaking.*

Federal Register
Vol. 52, No. 102
Thursday, May 28, 1987

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Forms Under Review by Office of Management and Budget

May 22, 1987.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

## Food and Nutrition Service

### Food Stamp Program; Adjustment of Income Eligibility Standards

**AGENCY:** Food and Nutrition Service, USDA.

**ACTION:** General notice.

**SUMMARY:** The Department is adjusting the limits on gross and net income which certain households may have and still be eligible for food stamps. The Food Stamp Act of 1977, as amended, requires the Department to make this adjustment each year. By adjusting the income eligibility limits, the Program takes into account changes in the cost of living.

**EFFECTIVE DATE:** July 1, 1987.

**FOR FURTHER INFORMATION CONTACT:** Thomas O'Connor, Supervisor, State Management Section, Administration and Design Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302, (703) 756–3385.

**SUPPLEMENTARY INFORMATION:**

**Classification**

*Executive Order 12291.* The Department has reviewed this action under Executive Order 12291 and Secretary's Memorandum No. 1512–1. This action will affect the economy by less than $100 million a year. It will not significantly raise costs or prices for consumers, industries, government agencies or geographic regions. There will not be significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, the Department has classified this action as "not major".

*Executive Order 12372.* The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the Final Rule related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115), this program is excluded from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

*Publication.* State agencies must implement the new standards on July 1, 1987, and these offices need adequate advance notice of the new standards to carry out all steps necessary for them to meet the implementation deadline. Based on regulations published at 47 FR 46485–46487 (October 19, 1982), annual statutory adjustments to the gross and net monthly income eligibility standards are issued by General Notices published in the **Federal Register** and not through rulemaking procedures.

*Regulatory Flexibility Act.* The Acting Administrator of the Food and Nutrition Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The action will primarily affect State and local welfare agencies and future food stamp applicants. The effect upon the welfare agencies is not significant.

*Paperwork Reduction Act.* This action does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB).

**Background**

All households, except those in which all members are receiving public assistance or supplemental security income benefits, must meet the Food Stamp Program's income eligibility standards. Households which contain an elderly or disabled member must meet the net income eligibility standards—

equal to the poverty line. Households which do not contain an elderly or disabled member must meet both the net income eligibility standards and the gross income eligibility standards—equal to 130 percent of the poverty line. In addition, elderly individuals (and their spouses) who are unable to prepare meals because of certain disabilities may be considered separate households even if they are living and eating with another household. The Act limits this exception to those persons who meet both of the following requirements: (1) Their own income may not exceed the net income eligibility standards, and (2) The income of those with whom they reside does not exceed 165 percent of the poverty line. The Food Stamp Act requires that the gross and net income eligibility standards take into account the annual adjustments of the poverty guidelines issued by the Department of Health and Human Services. The elderly/disabled standards must also be adjusted. These adjustments are set forth in the following tables.

NET MONTHLY INCOME ELIGIBILITY STANDARDS

[100% of Poverty Level]

| Household size | 48 States [1] | Alaska | Hawaii |
|---|---|---|---|
| 1 | 459 | 572 | 526 |

## Forest Service

### Comprehensive Plan for the Florida National Scenic Trail; Florida

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of availability of the Comprehensive Plan.

**SUMMARY:** The Florida National Scenic Trail was designated a component of the National Trails System by Pub. L. 96–11, March 26, 1983.

The Forest Service hereby gives notice of the availability for public inspection of the final Florida National Scenic Trail Comprehensive Plan. The plan gives the route selection for the trail corridor and prescribed future management and development.

**EFFECTIVE DATE:** The Comprehensive Plan for the Florida National Scenic Trail became effective December 4, 1986.

**ADDRESSES:** The Comprehensive Plan is available for public inspection and review at the following offices:

Director, Recreation Staff, Forest Service, USDA, Room 4231, South Agriculture Building, 12th and Independence Avenue, SW, Washington, DC 20013

Regional Forester, Southern Region, 1720 Peachtree Rd., NW, Atlanta, Georgia 30367

Forest Supervisor, National Forest in Florida, 227 N Bronough Street, Tallahassee, Florida 32301, Phone: 904–681–7265

District Ranger, Lake George District, U.S. Forest Service, Route 2, Box 701, Silver Springs, Florida 32688

**FOR FURTHER INFORMATION CONTACT:** Thomas P. Lennon, Recreation Staff, Forest Service, P.O. Box 2417, Washington, DC 20013, Phone: 202–447–2311.

Dated: May 13, 1987.

Charles D. Hoppuch,

*Trails Specialist.*

BILLING CODE 3410-11-M

## DEPARTMENT OF COMMERCE

[Docket No. 5062-01, 5062-02, and 5062-03]

### Goris Christiaan Grandia et al.; Order Vacating Temporary Denial of Export Privileges

Appearance for Respondents: M. V. van der Woude, Esq., Hacquartstraat 10, 1071 SH Amsterdam, The Netherlands.

Appearance for Agency: Margo E. Jackson, Esq., Attorney-Advisor, Office of the Deputy Chief Counsel for Export Administration, U.S. Department of Commerce, Room H–3329, 14th & Constitution Ave., NW., Washington, DC. 20230.

By Order of February 21, 1985, 50 FR 7945 (February 27, 1985), Respondent Goris Christiaan Grandia, individually and doing business as both R. Grandia Project Service B.V. and Grandia Project Services GmbH, was temporarily denied all privileges of participating in any manner or capacity in the export or reexport of U.S.-origin commodities or technical data. This Order of February 21, 1985 was issued under the authority of § 388.19 of the Export Administration Regulations, 15 CFR Parts 368–399 (1984).

The Order of February 21, 1985 continues to be governed by the Regulations, cited above, which were in

BEST COPY AVAILABLE

effect when it was issued. This governing force is accorded these Regulations by § 388.19 of the most recently codified Export Administration Regulations, 15 CFR Parts 368–399 (1986).

Respondent Goris Christiaan Grandia filed a motion, March 23, 1987, to vacate the Order of February 21, 1985. The Office of Deputy Chief Counsel for Export Administration U.S. Department of Commerce ("Agency Counsel"), opposed this motion April 10, 1987. An April 16, 1987 Order, based on a review of both parties' submissions, concluded that the record lacked grounds for retaining in force the Order of February 21, 1985. The April 16, 1987 Order stayed implementation of this conclusion, however, for the period during which agency Counsel could appeal it to the Assistant Secretary for Trade Administration. That period has now expired and, at the close of business yesterday, the Office of the Assistant Secretary advised this Office that no appeal had been filed.

Accordingly, it is hereby *Ordered* that, effective immediately, the Order of February 21, 1985, issued against

Goris Christiaan Grandia,

individually and doing business as both

R. Grandia Project Service B.V., Laurier Strant 59, 1016 PH Amsterdam, The Netherlands

and

Grandia Project services GmbH, Gudrunstrasse 121, A1100 Vienna, Austria

is hereby *vacated*.

A copy of this Order vacating the Order of February 21, 1985 shall be delivered to Respondents and shall be published in the **Federal Register**.

Dated: May 21, 1987.

**Thomas W. Hoya,**

*Administative Law Judge.*

## International Trade Administration

**[A–351–606]**

## Amendment to Final Determination of Sales at Less than Fair Value; Tubeless Steel Disc Wheels From Brazil, and Antidumping Duty Order

**AGENCY:** International Trade Administration, Import Administration, Department of Commerce.

**ACTION:** Notice.

**SUMMARY:** As a result of correction of a clerical error which occurred in calculating an adjustment for commissions in the U.S. market and other selling expenses in the home market, the Department of Commerce (the Department) is amending its final determination in this investigation, and is directing the U.S. Customs Service to adjust the cash deposit as follows:

| Manufacturer/producer/exporter | From | To (per cent) |
|---|---|---|
| FNV-Veículos E. Equipamentos SA | 16.73 | 11.71 |
| All Others | 17.70 | 13.16 |

**EFFECTIVE DATE:** May 28, 1987.

**FOR FURTHER INFORMATION CONTACT:** Charles E. Wilson (202–377–5288), Office of Investigations, Import Administration, International Trade Administration, Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

**SUPPLEMENTARY INFORMATION:** The merchandise covered by this order is tubeless steel disc wheels designed to be mounted with pneumatic tires having a rim diameter of 22.5 inches or greater, suitable for use on class 6, 7 and 8 trucks, including tractors, and for use on semi-trailers and buses, as currently provided for under item number 692.3230 of the *Tariff Schedules of the United States Annotated*.

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b), on December 19, 1986, the Department made its preliminary determination that there was reason to believe or suspect that tubeless steel disc wheels from Brazil were being sold at less than fair value (51 FR 46804, December 29, 1986). On March 13, 1987, the Department made its final determination that these imports were being sold at less than fair value (52 FR 8947, March 20, 1987).

On April 27, 1987, in accordance with section 735(d) of the Act (19 U.S.C. 1673d(d)), the ITC notified the Department of its determination that an industry in the United States is threatened with material injury by imports of tubeless steel disc wheels from Brazil. The ITC also determined, pursuant to section 735(b)(4)(B) of the Act (19 U.S.C. 1673d(d)(4)(B)) that material injury would not have been found but for the suspension of liquidation of entries of tubeless steel disc wheels from Brazil.

### Suspension of Liquidation

In accordance with sections 736 and 751 of the Act (19 U.S.C. 1673e and 1675), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of tubeless steel disc wheels from Brazil. These antidumping duties will be assessed on all unliquidated entries of tubeless steel disc wheels subject to this order entered, or withdrawn from warehouse, for consumption on or after April 29, 1987, the date on which the ITC published notice of its final affirmative injury determination. Pursuant to section 736(b)(2) of the Act (19 U.S.C. 1673e(b)(2)), the Department also directs that suspension of liquidation be lifted for all entries of tubeless steel disc wheels from Brazil entered, or withdrawn from warehouse, for consumption, before April 29, 1987, and that all estimated antidumping duties deposited on such entries be refunded and the appropriate bonds or other security be released.

On and after April 29, 1987, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins listed below:

| Manufacturer/producer/exporter | Margin percentage |
|---|---|
| Borlem S.A.—Imprendimentos Industriais | 15.25 |
| FNV—Veículos E. Equipamentos SA | 11.71 |
| All others | 13.16 |

This determination constitutes an antidumping duty order with respect to tubeless steel disc wheels from Brazil, pursuant to section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48). We have deleted from the Commerce Regulations, Annex I of 19 CFR Part 353, which listed antidumping duty findings and orders currently in effect. Instead, interested parties may contact the Central Records Unit, Room B–099, Import Administration, for copies of the updated list of orders currently in effect.

This notice is published in accordance with section 735(d) and 736(a) of the Act (19 U.S.C. 1673d(d) and 19 U.S.C. 1673e(a)) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

**Paul Freedenberg,**

*Assistant Secretary for Trade Administration.*

BILLING CODE 3510-DS-M

**Applications for Duty-Free Entry of Scientific Instruments; University of Alabama et al.**

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 87-177. Applicant: University of Alabama, Birmingham, Department of Biochemistry, University Station, CHSB 520, Birmingham, AL 35294. Instrument: Photon Counting Fluorescence Lifetime System. Manufacturer: Photochemical Research Associates, Inc., Canada. Intended Use: The instrument is intended to be used to investigate fast macromolecular motions in proteins, nucleic acids, membranes, and cells, and the excited state chemistry of molecules of biological and medical interest. The biological materials cited above will be studied in terms of their fluorescence lifetimes, quantum yields, spectral distribution, and anisotropy decays. Application Received by Commissioner of Customs: May 1, 1987.

Docket Number: 87-179. Applicant: U.S. DOE, Argonne National Laboratory, 9700 South Cass Avenue, Argonne, IL 60439. Instrument: Electron Energy Analyzer, Model HA50/4L and Accessories. Manufacturer: VSW, United Kingdom. Intended Use: The instrument is intended to be used in conjunction with photoemission measurements on the U2 beamline at the National Synchrotron Light Source. Experiments will focus on the electronic structure of the bulk and surface of materials, primarily actinide-based. The electron structure research will emphasize the properties of 5f electron systems which are unique among all materials, especially with the discovery of the heavy fermion systems. A second experimental emphasis will be the study of photoelectron diffraction. This experiment will involve the study of adsorbed layers on surfaces. Application Received by Commissioner of Customs: May 1, 1987.

Docket Number: 87-180. Applicant: Barnes Hospital, 4949 Barnes Hospital Plaza, St. Louis, MO 63110. Instrument: Electron Microscope, Model CM10. Manufacturer: N. V. Philips, The Netherlands. Intended Use: Study ultrastructural features of cells and tissues for both diagnostic and developmental purposes. Application Received by Commissioner of Customs: May 5, 1987.

Docket Numbers: 87-181, 87-182 and 87-183. Applicant: University of Wisconsin—Madison, Department of Biochemistry, 420 Henry Mall, Madison, WI 53706. Instruments: NMR Spectrometers, Model AM 400 WB and 500 and NRM Specrometer Data Station. Manufacturer: Bruker Instruments, Switzerland. Intended Use: The instrument or accessory will be used to provide high-field wide-bore NMR spectroscopy when conducting the following research projects:

1. Surface Coil Studies of *In Vivo* Muscle Metabolism by Proton Nuclear Magnetic Resonance.
2. Enzyme Mechanisms and Stereochemistry of MgATP as a Substate.
3. Metabolism and Function of Vitamins D and A.
4. Enzyme Catalysis of Electron and Group Transfer, Nucleotidyl and Phosphotransferase Stereochemistry and Mechanisms of Nucleotide Sugar Interconversions.
4. Applications of NMR to Studies of Nitrogen Fixation and Metabolism.
5. NMR Spectroscopy of Biopolymers.
6. Characterization of the Mechanism of Aspartic Proteinases by $^{13}C$ NMR of Ketone pseudosubstrates.
7. Interaction of Metal Ions with Transfer RNA and Troponin C.

Applications Received by Commissioner of Customs: May 6 and May 8, 1987.

**Frank W. Creel,**

*Director, Statutory Import Programs Staff.*

**National Bureau of Standards**

**[Docket No. 60626-7048]**

**Approval of Federal Information Processing Standard 5-3, Codes for the Identification of the States, the District of Columbia and the Outlying Areas of the United States, and Associated Areas**

**AGENCY:** National Bureau of Standards, Commerce.

**ACTION:** The purpose of this notice is to announce that the Secretary of Commerce (Secretary) has approved a new standard, which will be published as FIPS Publication 5-2 (a revision to FIPS 5-1).

**SUMMARY:** On August 7, 1986, notice was published in the **Federal Register** (51 FR 28406) that a Federal Information Processing Standard (FIPS) 5-2 entitled "Codes for the Identification of the States, the District of Columbia, and the Outlying Areas of the United States" was being proposed for Federal use.

The written comments submitted by interested parties and other material available to the Department relevant to this standard were reviewed by NBS. On the basis of this review, NBS recommended that the Secretary approve the standard as a Federal Information Processing Standard (FIPS) and prepared a detailed justification document for the Secretary's review in support of that recommendation.

The detailed justification document which was presented to the Secretary, and which includes an analysis of the written comments received, is part of the public record and is available for inspection and copying in the Department's Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues NW., Washington, DC 20230.

This approved standard contains two sections: (1) An announcement section which provides information concerning the applicability, implementation, and maintenance of the standard, and (2) a specifications section which deals with the technical requirements of the standard. Both sections of the standard are provided in this notice.

**DATE:** The specifications may be used upon publication. Use by Federal agencies is encouraged when such use contributes to operational benefits, efficiency or economy.

**ADDRESS:** Interested parties may purchase copies of this new standard, including the technical specifications section, from the National Technical Information Service (NTIS). Specific ordering information from NTIS for this standard is set out in the Where to Obtain Copies Section of the announcement section of the standard.

**FOR FURTHER INFORMATION CONTACT:** Mr. Roy G. Saltman, Institute for

Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, MD 20899, (301) 975-3570.

Dated: May 20, 1987.

Ernest Ambler,

*Director.*

**Federal Information Processing Standards Publication 5-2**

*1987 Month Day*

***Announcing the Standard for Codes for the Identification of the States, the District Columbia and the Outlying Areas of the United States, and Associated Areas***

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Bureau of Standards in Accordance with section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended, Pub. L. 89-306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315, dated May 11, 1973), and Part 6 of Title 15 Code of Federal Regulations.

1. *Name of Standard.* Codes for the Identification of the States, the District of Columbia and the Outlying Areas of the United States, and Associated Areas.

2. *Category of Standard.* Data Standards and Guidelines; Representations and Codes.

3. *Explanation.* This standard provides a set of two-digit numeric codes and a set of two-letter alphabetic codes for representing the 50 states, the District of Columbia and the outlying areas of the United States, and associated areas. The standard covers all land areas under the sovereignty of the United States, the freely associated states of Federated States of Micronesia and Marshall Islands, and the trust territory of Palau. This revision supersedes FIPS PUB 5-1 in its entirety.

4. *Approving Authority.* The Secretary of Commerce.

5. *Maintenance Agency.* U.S. Department of Commerce, Bureau of the Census (Geography Division). Inquiries concerning the technical content of this standard should be addressed to: Office of the Chief, Geography Division, Bureau of the Census, Washington, DC 20233.

Change notices to this FIPS PUB will be issued by the National Bureau of Standards. Users who wish to receive such notices should complete the Change Request Form included in this FIPS PUB and return it to the address shown.

6. *Cross Index.* a. American National Standard ANSI X3.38-1972, Identification of States of the United States (including the District of Columbia) for Information Interchange.

b. American National Standard ANSI Z39.27-1984, Structure for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange.

c. International Standard ISO 3166-1981, Codes for the Representation of Names of Countries, a standard of the International Organization for Standardization.

d. Federal Information Processing Standard (FIPS PUB) 104/1, American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty.

e. U.S. Postal Service Publication 65, National Five-Digit ZIP Code and Post Office Directory, 1987 Edition.

7. *Objectives.* The objectives of this standard are to improve the utilization of data resources of the Federal Government and avoid unnecessary duplications and incompatibilities in the collection, processing, and dissemination of data.

8. *Applicability.* This Federal general data element and representation standard is made available for data interchange among departments and independent agencies, and for Federal data interchange with the non-Federal sector, including industry, State, local and other governments, and the public at large.

9. *Implementation Schedule.* The specifications herein may be used upon publication. Use by Federal agencies is encouraged when such use contributes to operational benefits, efficiency or economy.

10. *Specifications.* Federal Information Processing Standard 5-2 (FIPS PUB 5-2), Codes for the Identification of the States, the District of Columbia and the Outlying Areas of the United States, and Associated Areas (affixed).

11. *Where To Obtain Copies.* Copies of this publication are available for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA 22161. When ordering, please refer to Federal Information Processing Standards Publication 5-2 (FIPSPUB5-2) and title. When microfiche is desired, this should be specified. Copies of ANSI X3.38-1972, ANSI Z39.27-1984, and ISO 3166-1981 may be obtained from American National Standards Institute, 1430 Broadway, New York, NY 10018.

**Federal Information Processing Standards Publication 5-2**

*1987 Month Day*

***Specifications for Codes for the Identification of the States, the District of Columbia and the Outlying Areas of the United States, and Associated Areas***

Table 1: FIPS State Codes for the States and the District of Columbia. This table provides that the two-digit FIPS State Numeric Code and the two-letter FIPS State Alpha Code for each State and the District of Columbia. Both code sets are unchanged from the representations of Table 1 of FIPS PUB 5-1. The FIPS State Code is identical to the two-letter U.S. Postal Service (USPS) abbreviation for each entity listed in this table.

Table 2: FIPS State Codes for the Outlying Areas of the United States, the Freely Associated States, and Trust Territory. This table provides the two-digit FIPS State Numeric Code and the two-letter FIPS State Alpha Code for each outlying area, for the freely associated states of Federated States of Micronesia and Marshall Islands, and for the trust territory of Palau. The latter three entities replace the Trust Territory of the Pacific Islands. Northern Mariana Islands is now a U.S. territory.

FIPS State Numeric Codes for American Samoa, Guam, Northern Mariana Islands, Puerto Rico, and Virgin Islands of the United States are identical to those shown in FIPS PUB 5-1 for those areas. New FIPS State Numeric Codes have been assigned to Federated States of Micronesia, Marshall Islands, Palau, and U.S. Minor Outlying Islands.

The areas listed in Table 2 and their assigned FIPS State Alpha Codes are identical to the U.S. outlying and associated areas and corresponding two-letter codes specified in ISO 3166-1981, as updated. This international standard has been adopted as a national voluntary standard in the United States under ANSI Z39.27-1984, and has been implemented through FIPS PUB 104-1.

FIPS State Alpha Codes for the outlying and associates areas are *not* identical in every case to the two-letter USPS abbreviations for the same entities. USPS abbreviations are recommended for use only in connection with addresses for mail to be delivered by the USPS, and may be found in the most recent edition of USPS Publication 65, National Five-Digit ZIP Code and Post Office Directory.

Table 3: FIPS State Numeric Codes for the Individual Minor Outlying Island Territories. This table provides the two-digit FIPS State Numeric Codes of FIPS

PUB 5–1 for the individual island territories which form the aggregate entity U.S. Minor Outlying Islands. A FIPS State Numeric Code in this table should be used only when an individual territory must be uniquely identified, and a field for the FIPS County Code is not available to be used in combination with the FIPS State Code for U.S. Minor Outlying Islands (74 or UM). A FIPS County Code for each territory is specified in FIPS PUB 6–3.

TABLE 1.—FIPS STATE CODES FOR THE STATES AND THE DISTRICT OF COLUMBIA

| Name | FIPS state numeric code | FIPS state alpha code |
|---|---|---|

|---|---|---|---|
| Northern Mariana Islands | 69 | MP | 1 |
| Palau | 70 | PW | 4 |
| Puerto Rico | 72 | PR | 1 |
| U.S. Minor Outlying Islands | 74 | UM | 2 |
| Virgin Islands of the U.S. | 78 | VI | 1 |

Status:
1. A U.S. territory.
2. An aggregation of nine U.S. territories: Baker Island, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Islands, Navassa Island, Palmyra Atoll, and Wake Island. Each territory is assigned a FIPS County Code in FIPS PUB 6–3, and may be individually identified through a combination of the FIPS State Code (74 or UM) and the appropriate FIPS County Code.
3. A Compact of Free Association with the United States of America was placed in full force by Presidential proclamation on November 3, 1986.
4. Remains a trust territory.

TABLE 3.—FIPS STATE NUMERIC CODES FOR THE INDIVIDUAL MINOR OUTLYING ISLAND TERRITORIES

| Area name | FIPS state numeric code |
|---|---|
| Baker Island | 81 |
| Howland Island | 84 |
| Jarvis Island | 86 |
| Johnston Atoll | 67 |
| Kingman Reef | 89 |
| Midway Islands | 71 |
| Navassa Island | 76 |
| Palmyra Atoll | 95 |
| Wake Island | 79 |

BILLING CODE 3510–CN–M

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

### Adjustment of Import Limits for Certain Cotton Textile Products Produced or Manufactured in the People's Republic of China

May 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 29, 1987. For further information contact Diana Solkoff, International Trade Specialist (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 566–6828. For information on embargoes and quota reopenings, please call (202) 377–3715.

**Background**

A CITA directive dated December 23, 1986 (51 FR 47041) established import restraint limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

A further directive dated April 29, 1987 (52 FR 16299) adjusted the restraint limits for certain cotton and man-made fiber textile products, including Categories 336 and 359–V, produced or manufactured in the People's Republic of China and exported during this same twelve-month period.

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to cancel the adjustment made to the previously established limit for Category 336. Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 19, 1983, as amended, and at the request of the Government of the People's Republic of China, the limit for Category 336 is being increased by application of swing. The limit for Category 359–V is being reduced to account for the swing applied to Category 336 and for the swing applied to specific categories in the directive of April 29, 1987.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 20768) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

**Arthur Gerel,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 21, 1987

**Committee for the Implementation of Textile Agreements**

**Commissioner of Customs,**
*Department of the Treasury, Washington, DC 20229.*

Dear Mr. Commissioner: This directive cancels only that portion of the directive issued to you on April 29, 1987 by the Chairman, Committee for the Implementation of Textile Agreements, which reduced the restraint limit previously established for cotton textile products in Category 336, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

This directive amends, but does not cancel, the directive of December 23, 1986, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on May 29, 1987, the directive of December 23, 1986 is further amended to include the following adjustments to the previously established restraint limits for cotton textile products in Categories 336 and 359–V [1], as provided under the terms of the bilateral agreement of August 19, 1983, as amended:[2]

| Category | Adjusted 12-mo. limit [1] |
|---|---|
| 336 | 131,947 dozen. |
| 359–V | 1,025,577 pounds. |

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

The Committee for the Implementation of Textile agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

**Arthur Garel,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

BILLING CODE 3510–DR

## Adjusting Import Restraint Limits for Certain Man-Made Fiber Textile Products Produced or Manufactured in Romania May 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 29, 1987. For further information contact William Dawson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 682–3072. For information on embargoes and quota reopenings, please call (202) 377–3715.

### Background

On December 28, 1985 a notice was published in the **Federal Register** (50 FR 52829), which announced import limits for certain specified categories of wool and man-made fiber textile products, including Category of 604, produced or manufactured in Romania and exported during the twelve-month period which began on January 1, 1986 and extended through December 31, 1986.

On December 31, 1986 a notice was published in the **Federal Register** (51 FR 47280), which announced import limits for certain specified categories of wool and man-made fiber textile products, including man-made fiber textile products in Category 645/646, produced or manufactured in Romania and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Under the terms of the Bilateral Wool and Man-Made Fiber Textile Agreement of November 7 and 16, 1984, between the Governments of the United States and the Socialist Republic of Romania, the 1986 limit for Category 604 is being adjusted for carryforward granted but not used. The 1987 limit for merged Category 645/646 is being reduced to account for carryforward used in 1986.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 18, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

**Arthur Garel,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 21, 1987

**Committee for the Implementation of Textile Agreements**

Commissioner of Customs,
*Department of the Treasury, Washington, DC 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directives of December 20, 1985 and December 23, 1986, which directed you to prohibit entry of certain wool and man-made fiber textile products, produced or manufactured in Romania and exported during the twelve-month periods which began on January 1, 1986 and extended through December 31, 1986 and January 1, 1987 and extends through December 31, 1987, respectively.

Effective on May 29, 1987, the directives of December 20, 1985 and December 23, 1986 are hereby amended to include the following adjusted restraint limits under the terms of the bilateral agreement of November 7 and 16, 1984 [1]:

| Category | Adjusted 12-mo restraint limit |
|---|---|
| 604 | January 1, 1986–December 31, 1986: [2] 3,215,524 pounds. |
| 645/646 | January 1, 1987–December 31, 1987: [3] 212,899 dozen. |

[1] The limit has not been adjusted to reflect any imports exported after December 31, 1985.

[2] The limit has not been adjusted to reflect any imports exported after December 31, 1986.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

[1] In Category 359, only TSUSA numbers 361.0258, 361.0554, 361.3849, 361.3900, 361.5920, 384.0451, 384.0548, 384.0850, 384.0851, 384.3448, 384.3450, 384.4300, 384.4421 and 384.4422.

[2] The agreement provides, in part, that (1) with the exception of Category 315, any specific limit may be exceeded by not more than 5 percent of its square yards equivalent total, provided that the amount of the increase is compensated for by an equivalent square yard decrease in one or more other specific limits in that agreement year; (2) the specific limits for certain categories may be increased for carryforward; (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

[1] The bilateral agreement provides, in part, that: (1) Specific limits may be increased for carryover and carryforward; (2) consultations may be held to adjust levels for categories not subject to specific limits; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Sincerely,

Arthur Garel,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Sri Lanka

May 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commission of Customs to be effective on May 22, 1987. For further information contact Kim Pham, International Trade Specialist (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 682-3075. For information on embargos and quota re-openings, please call (202) 377-3715.

### Background

CITA directives dated May 22, 1986 and August 22, 1986 (51 FR 19249 and 51 FR 30526) established import limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in Sri Lanka and exported during the periods which began, in the case of Category 339, on June 1, 1986 and extends through May 31, 1987; and, in the case of Category 644, on April 29, 1986 and extends through May 31, 1987.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 16, 1983, as amended, and at the request of the Government of Sri Lanka, the restraint limit for Category 339 is being increased by application of swing and carryover. The limit for Category 644 is being reduced to account for the swing applied to Category 339.

Accordingly, in the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to adjust the previously established restraint limits for the foregoing categories.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1986 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 26708) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

This letter and the actions taken pursuant to it are not designated to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Arthur Garel,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 21, 1987

**Committee for the Implementation of Textile Agreements**

Commissioner of Customs

*Department of the Treasury, Washington, DC 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directives of May 22, 1986 and August 22, 1986 concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Sri Lanka and exported during the periods which began, in the case of Category 339, on June 1, 1986; and, in the case of Category 644, on April 29, 1986; and extend through May 31, 1987.

Effective on May 22, 1987, the directives of May 22, 1986 and August 29, 1986 are hereby further amended to include the following adjustments to the previously established restraint limits for cotton and man-made fiber textile products in Categories 339 and 644, as provided under the terms of the bilateral agreement of May 10, 1983, as amended: [1]

| Category | Adjusted Restraint Limit [1] |
|---|---|
| 339 | 404,507 dozen. |
| 644 | 20,597 dozen. |

[1] The limit for Category 644 has not been adjusted to account for any imports exported after April 28, 1986.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

[1] The provisions of the bilateral agreement provide, in part, that: (1) Specific limits may be exceeded by designated percentages, provided an equal amount in equivalent square yards is deducted from another specific limit; (2) specific limits may be increased by carryover and carryforward up to 11 percent of the applicable limit; and (3) administrative arrangements and adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Sincerely,

Arthur Garel,

*Acting, Chairman, Committee for the Implementation of Textile Agreements.*

## Increasing the Import Limit for Certain Man-Made Fiber Textile Produced or Manufactured in Yugoslavia

May 21, 1987

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 29, 1987. For further information contact William Dawson, International Trade Specialist (202) 377-4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

### Background

A CITA directive dated December 23, 1986 (51 FR 47052) established, among other things, an import restraint limit for certain man-made fiber textile products in Category 604-A, produced or manufactured in Yugoslavia and exported during the fourteen-month period which began on November 1, 1986 and extends through December 31, 1987.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 26 and 27, 1978, as amended and extended, between the Governments of the United States and the Socialist Federal Republic of Yugoslavia, and at the request of the Socialist Federal Republic of Yugoslavia, the limit established for acrylic spun yarn in Category 604-A is being increased for carryforward. The limit for Category 604-A has been filled.

Accordingly, in the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to adjust the import limit for Category 604-A at the designated level.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983

(48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

**Arthur Garel,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 21, 1987.

**Committee for the Implemenation of Textile Agreements**

Commissioner of Customs,
*Department of the Treasury, Washington, DC 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 23, 1986, concerning, among other things, imports into the United States of man-made fiber textile products in Category 604–A[1] produced or manufactured in the Socialist Federal Republic of Yugoslavia and exported during the fourteen-month priod which began on November 1, 1986 and extends through December 31, 1987.

Effective on May 29, 1987, the directive of December 23, 1986 is amended to adjust the previously established restraint limit for acrylic spun yarn in Category 604–A to 713,650 pounds, as provided under the terms of the bilateral agreement of October 26 and 27, 1978, as amended and extended.[2]

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

**Arthur Garel,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## Amending the Export Visa and Exempt Certification Requirements for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Mexico

May 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 29, 1987. For further information contact Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

### Background

On May 20, 1981 a notice was published in the **Federal Register** (46 FR 27516) announcing the establishment of export visa and exempt certification requirements for certain cotton, wool and man-made fiber textile and apparel products, produced or manufactured in Mexico and exported on and after July 1, 1981. Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1969, as amended and extended, between the Governments of the United States and United Mexican States, agreement has been reached to further amend the existing export visa and exmept certification requirements to include the following part-category designations:

| Category | Description |
|---|---|
| 369–D | Dishtowels. |
| 369–B | Handbags and luggage. |
| 369–U | Shoe uppers. |
| 369–O | Other. |
| 665–C | Cordage. |
| 669–P | Man-made fiber bags. |
| 665–O | Other. |

The two governments further agreed to amend the export visa and exempt certification requirements to exempt cotton webs, wadding and batting in TSUSA number 355.0200.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584, April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

**Arthur Garel,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 21, 1987.

**Committee for the Implementation of Textile Agreements**

Commissioner of Customs,
*Department of the Treasury, Washington; DC 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of May 15, 1981 which directed you to prohibit, effective on July 1, 1981 and until further notice, entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton, wool and man-made fiber textile products in certain specified categories, produced or manufactured in Mexico and exported on and after July 1, 1981, which were not visaed or certified for exemption by the Government of Mexico.

Effective on May 29, 1987, the directive of May 15, 1981 is hereby further amended to include the following part-category designations:

| Category | TSUSA No. |
|---|---|
| 369–D (Dishtowels) | 365.6615, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, 366.2440, and 366.2600 |
| 369–B (Handbags and luggage). | 706.3210, 706.3280, 706.3640, 706.3650, 706.4106, and 706.4111 |
| 369–U (Shoe uppers) | 366.0410, 366.5210 |
| 369–O (Other) | All other TSUSAs excluding 355.0200, 365.6615, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, 366.2440, 366.2600, 366.0410, 366.5210, 706.3210, 706.3280, 706.3640, 706.3650, 706.4106, and 706.4111 |
| 665–C (Cordage) | 348.0065, 348.0075, 348.0585, and 348.0575 |
| 669–P (Man-made fiber bags). | 366.5300 |
| 665–O (Other) | All other TSUSAs excluding 348.0065, 348.0075, 348.0585, 348.0575, and 366.5300 |

Also effective on May 29, 1987, exports from Mexico of cotton webs, wadding and batting in TSUSA number 355.0200 are exempt from visa and exempt certification requirements.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

**Arthur Garel,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## DEPARTMENT OF DEFENSE

### Office of the Secretary

### Defense Advisory Committee on Women in the Services (DACOWITS)

**AGENCY:** Defense Advisory Committee on Women in the Services (DACOWITS)

**ACTION:** Notice of meeting.

**SUMMARY:** Pursuant to Pub. L. 92–463, notice is hereby given of a forthcoming meeting of the Executive Committee of the Defense Advisory Committee on Women in the Services (DACOWITS).

[1] In Category 604, only TSUSA numbers 310.5049 and 310.5045 (formerly 310.5042).

[2] The terms of the agreement provide, in part, that: (1) Carryforward and carryover may not exceed 11 percent and swing may not exceed 6 percent of cotton and man-made fiber and 5 percent of wool; (2) special shift up to 10 percent may be available in Categories 340/640 and 341/641.

The purpose of the meeting is to review the Recommendations, Requests for Information, and Continuing Concerns made by the Committee at the 1987 Spring Meeting; review the Subcommittee Issue Agendas; discuss current issues relevant to women in the Services; and plan the program for the next semiannual meeting scheduled for October 25–29, 1987, in Killeen Texas. All meeting sessions will be open to the public.

**DATE:** June 29, 1987, 9:30 a.m.–5:00 p.m.

**ADDRESS:** SecDef Conference Room 3E869, The Pentagon, Washington DC.

**FOR FURTHER INFORMATION CONTACT:** Major Ilona E. Prewitt, Director, DACOWITS and Military Women Matters, OASD (Force Management and Personnel), The Pentagon, Room 3D769, Washington, DC 20301–4000; telephone (202) 697–2122.

Linda M. Lawson,

*Alternate OSD Federal Register Liaison Officer, Department of Defense.*

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. ER87–427–000 et al.]

### Electric Rate and Corporate Regulation Filings; Tampa Electric Co. et al.

Take notice that the following filings have been made with the Commission:

**1. Tampa Electric Company**

[Docket No. ER87–427–000]

May 13, 1987.

Take notice that on May 8, 1987, Tampa Electric Company (Tampa Electric) tendered for filing a Letter of Commitment providing for the firm interchange of 250 megawatts of capacity and energy between Tampa Electric and Florida Power Corporation (Florida Power). Tampa Electric states that the Letter of Commitment is submitted as a supplement to Service Schedule J (negotiated interchange service) under the existing contract for interchange service between Tampa Electric and Florida Power, designated as Tampa Electric's Rate Schedule FPC No. 6 and Florida Power's Rate Schedule FPC No. 80. Tampa Electric's filing includes a certificate of concurrence submitted by Florida Power in lieu of an independent filing.

Tampa Electric proposes an effective date of May 8, 1987 for the Letter of Commitment, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served on Florida Power and the Florida Public Service Commission.

Comment date: June 1, 1987, in accordance with Standard Paragraph E at the end of this notice.

**2. Tampa Electric Company**

[Docket No. ER87–425–000]

May 13, 1987.

Take notice that on May 8, 1987, Tampa Electric Company (Tampa Electric) tendered for filing revised cost support schedules showing a change in the daily capacity charge for its scheduled interchange in the daily capacity charge for its scheduled interchange service provided under interchange agreements with Florida Power Corporation, Florida Power & Light Company, Florida Municipal Power Agency, Fort Pierce Utilities Authority, Jacksonville Electric Authority, Orlando Utilities Commission, Sebring Utilities Commission, Seminole Electric Cooperative, Utility Board of the City of Key West, and the Cities of Gainesville, Kissimmee, Lake Worth, Lakeland, St. Cloud, Starke, Tallahassee, and Vero Beach, Florida. Tampa Electric states that the revised daily capacity charge is based on 1986 Form No. 1 data, and is derived by the same method that was utilized in the cost support schedules submitted with the interchange agreements and in all previous annual revisions.

Tampa Electric requests that the revised daily capacity charge be made effective as of May 1, 1987, and therefore requests waiver of the Commission's notice requirements.

Tampa Electric states that a copy of the filing has been served upon each of the above-named parties to interchange agreements with Tampa Electric, as well as the Florida Public Service Commission.

Comment date: June 1, 1987, in accordance with Standard Paragraph E at the end of this notice.

**3. New England Power Company**

[Docket No. ER87–428–000]

May 13, 1987.

Take notice that on May 11, 1987, New England Power Company (NEP) submitted for filing an executed Tap Transmission Agreement with the Town of Hudson, Massachusetts, a Massachusetts municipal corporation acting by and through its Light and Power Department (Hudson).

NEP requests waiver of the commission's notice requirements so that the Agreement may become effective June 22, 1986, in accordance with its terms and the intent of the parties. As good cause for this request, NEP states that one of the purposes of the Agreement was to substitute the proposed support arrangement for Hudson's payments under NEP's non-PTF Rate T–1 under Tariff No. 3. Those rates were increased effective June 22, 1986. NEP requests that the effective date of the Agreement coincide with the rate increase effective date.

Comment date: June 1, 1987, in accordance with Standard Paragraph E at the end of this notice.

**4. Puget Sound Power & Light Company**

[Docket No. ER87–339–000]

May 18, 1987.

Take notice that on May 11, 1987, Puget Sound Power & Light Company submitted for filing an amendment consisting of supplementary information on the changes made to FPC electric Tariff Original Volume No. 3 to reflect current actual costs of the company's thermal generating resources which was noticed by the Commission on March 27, 1987.

Comment date: June 1, 1987, in accordance with Standard Paragraph E at the end of this notice.

**5. The Algoma Group v. Wisconsin Public Service Corporation**

[Docket No. ER87–36–000]

May 19, 1987.

Take notice that on May 6, 1987 the cities and villages of Manitowac, Marshfield, Stratford and Wisconsin Rapids, Wisconsin, The city of Stephenson, Michigan, the Alger Delta Cooperative Electric Association, the Washington Island Electric Cooperative and the Wisconsin Public Power, Inc., SYSTEM (collectively known as the Algoma Group), tendered for filing a Complaint against Wisconsin Public Service Corporation, (WPS) an electric utility, pursuant to Rule 206 of the Commission's Rules of Practice and Procedure. The Algoma Group requests the Commission to initiate an investigation and hold a hearing to determine whether WPS was imprudent in failing to obtain a substantial state tax refund in 1986 by contesting certain past state property assessments and a state law change which affect those assessments.

Comment date: June 18, 1987, in accordance with Standard Paragraph E at the end of this notice. WPS shall also answer the complaint on or before June 18, 1987.

**6. Consolidated Edison Company of New York, Inc.**

[Docket No. ER87-430-000]

May 19, 1987.

Take notice that on May 12, 1987, Consolidated Edison Company of New York, Inc. ("Con Edison") tendered for filing, as an initial rate schedule, an agreement to provide interruptible transmission service to Connecticut Municipal Electric Energy Cooperative ("CMEEC"). The agreement provides for a charge of 2.6 mills per kilowatthour for transmission of power purchased by CMEEC from Pennsylvania Power and Light Company.

Con Edison requests waiver of the notice requirements of § 35.3 of the Commission's regulations so that the Rate Schedule can be made effective as of January 24, 1986.

Con Edison states that a copy of this filing has been served by mail upon CMEEC.

Comment date: June 3, 1987, in accordance with Standard Paragraph E at the end of this notice.

**7. Idaho Power Company**

[Docket No. EL87-39-000]

May 19, 1987.

Take notice that on May 13, 1987, Idaho Power Co. tendered for filing a Petition for Declaratory Order re accounting treatment of certain deferred costs.

Comment date: June 3, 1987, in accordance with Standard Paragraph E at the end of this notice.

**8. New England Power Company**

[Docket Nos. ER86-687-002 and ER86-688-002]

May 19, 1987.

Take notice that on May 11, 1987, New England Power Company (NEP) submitted for filing additional compliance rates reflecting its W-8 cost-of-service adjusted to reflect a 34% tax rate for implementation on January 1, 1988, subject to refund. NEP states that this filing is in compliance with an April 10, 1987 letter issued in this proceeding by the Director of the Division of Electric Power Application Review.

Comment date: June 3, 1987, in accordance with Standard Paragraph E at the end of this notice.

**9. San Diego Gas & Electric Company**

[Docket Nos. ER87-363-000 and ER87-364-000]

May 19, 1987.

Take notice that on May 13, 1987 San Diego Gas & Electric Company (SDG&E) tendered for filing the following additional information to the firm (FTS), Short-Term Firm (STF), and Interruptible (ITS) Transmission Service Agreements between SDG&E and Southern California Edison Company (Edison):

1. Attachment A: Use Factor Summary.

2. Table 3: San Diego Gas & Electric Company Level Annual Capital Cost.

In addition, SD&E submitted three corrected pages that were in error in the filing of Docket No. ER87-364-000.

SD&E requests renewal of the Commission's waiver of prior notice requirements and the following effective dates:

(2) February 1, 1986 for changes relating to SD&E's revenue requirements in the STF and ITS agreements.

(b) January 1, 1987 for changes relating to SD&E's authorized rate of return in the FTS, STF and ITS agreements.

(c) April 1, 1987 for changes relating to SD&E's revenue requirements in the FTS agreement.

Copies of this filing were served upon the Public Utilities Commission of the State of California and Edison.

Comment date: June 3, 1987, in accordance with Standard Paragraph E at the end of this notice.

**10. Tampa Electric Company**

[Docket No. ER87-431-000]

May 19, 1987.

Take notice that on May 12, 1987, Tampa Electric Company (Tampa Electric) tendered for filing a Letter of Commitment providing for the firm interchange of 50 megawatts of capacity and energy between Tampa Electric and the City of Lakeland, Florida. Tampa Electric states that the Letter of Commitment is submitted as an additional supplement to Service Schedule J (negotiated interchange service) under the existing agreement for interchange service between Tampa Electric and Lakeland, designated as Tampa Electric's Rate Schedule FERC No. 21.

Tampa Electric proposes an effective date of May 18, 1987 for the Letter of Commitment, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served on Lakeland and the Florida Public Service Commission.

Comment date: June 3, 1987, in accordance with Standard Paragraph E at the end of this notice.

**Standard Paragraphs**

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Cogeneration Partners of America; Application for Commission Certification of Qualifying Status of a Cogeneration Facility**

May 19, 1987.

On May 7, 1987, Cogeneration Partners of America (Applicant), of 333 Thornall Street, Edison, New Jersey 08837, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Pedricktown, New Jersey. The facility will consist of a combustion turbine generating unit, a heat recovery stem generator and an extraction/condensing steam turbine generating unit. The thermal energy recovered from the facility will be utilized for process. The electric power production capacity of the facility will be 110.5 MW. The primary energy source will be natural gas. Installation of the facility will begin on or about October 1, 1987.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will

not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF87-403-000]

## SJE Cogeneration, Inc.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

May 19, 1987.

On May 7, 1987, SJE Cogeneration Inc., (Applicant), c/o SJE Investments, 1960 Lincoln Park West, Suite 2702, Chicago, Illinois 60614 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located between the towns of Woodstock and Edinburg, in Shenandoah County, Virginia. The facility will consist of two combustion turbines and two heat recovery steam generators. The thermal energy recovered from the facility will be used by the Manville Corporation for product drying purposes. The primary energy source for the facility will be natural gas mixed with a synthetic gas manufactured from coal gasification and refuse-derived fuel. The net electric power production capacity of the facility will be approximately 170 MW. Installation of the facility will begin approximately in July 1987.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CI87-403-000 et al.]

## Chandler & Associates, Inc.; Applications for Limited-Term Abandonment With Pregranted Abandonment for Sales Under Small Producer Certificate

May 22, 1987

Applicant herein has filed applications pursuant to section 7(b) of the Natural Gas Act and § 2.77 of the Commission's Regulations for limited-term abandonment through November 1, 1987, with pregranted abandonment to make sales for resale in interstate commerce of the released gas under its small producer certificate. Details are shown in the applications and in the attached tabulation.

The circulation presented in the applications meet the criteria for consideration on an expedited basis, pursuant to § 2.77 of the Commission's rules as promulgated by Order Nos. 436 and 436-A, issued October 9, and December 12, 1985, respectively, in Docket No. RM85-1-000, all as more fully described in the applications which are on file with the Commission and open to public inspection.

Accordingly, any person desiring to be heard or to make any protest with reference to said applications should on or before 15 days after the date of publication of this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

*Secretary.*

## Continental Natural Gas, Inc.; Application of Continental Natural Gas, Inc. for Blanket Certificate of Public Convenience and Necessity and for an Order Permitting and Approving Pregranted Abandonment

May 22, 1987.

Take notice that on May 8, 1987, Continental Natural Gas, Inc. ("Continental"), pursuant to sections 4 and 7 of the Natural Gas Act, and Parts 154 and 157 of the Regulations of the Federal Energy Regulatory Commission, 18 CFR Parts 154 and 157, applied for a blanket certificate of public convenience and necessity (1) authorizing sales for resale of natural gas in interstate commerce by Continental; (2) authorizing sales for resale of natural gas in interstate commerce by the certain producers from whom Continental purchases natural gas; (3) authorizing sales for resale of natural gas in interstate commerce by certain producers through Continental acting as their agent; and (4) authorizing pregranted abandonment of such sales.

Continental states that such authorizations, if granted, will enable it to sell natural gas which it purchases from certain producers in the spot market, as described more fully in its application. Such authority will also enable Continental to act as agent for certain producers in the sale for resale of their gas in the spot market.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 8, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Under the procedures herein provided for, unless otherwise advised, it will be unnecessary for Continental to appear to be represented at the hearing.

Kenneth F. Plumb,
*Secretary.*

[Docket No. CI87-585-000]

## Diamond Shamrock Offshore Partners Limited Partnership; Application for Limited-Term Certificate With Pre-Granted Abandonment

May 22, 1987.

Take notice that on May 15, 1987, Diamond Shamrock Offshore Partners Limited Partnership ("Diamond Shamrock") filed an Application pursuant to sections 4 and 7 of the Natural Gas Act (NGA), the provisions of 18 CFR Parts 154 and 157, and 18 CFR 2.77(a)(1), seeking a limited-term

certificate of public convenience and necessity authorizing the sale for resale in interstate commerce of uncommitted natural gas produced by Diamond Shamrock from Block 700, Matagorda Island Area, Offshore Texas with pre-granted abandonment. This authorization would enable Diamond Shamrock to make sales of that gas on a short-term basis, or a best effort basis, and on the sport market, as more fully described in the Application which is on file with the Commission and open for public inspection. The term of the authorization requested by Diamond Shamrock is two years.

Diamond Shamrock states that the authority as requested is consistent with the Commission's rules and regulations and is necessary for Diamond Shamrock to make short-term, best efforts and spot gas sales. Further, Diamond Shamrock states that, absent said authorization, the flexibility and efficiency necessary for successful operation in the spot market would be hindered.

Sales proposed to be made by Diamond Shamrock will not involve a dedication of reserves but will be based on periodic nominations, either by purchasers or by Diamond Shamrock. The sales volumes, prices, purchasers, delivery points, and transportation will vary. Diamond Shamrock proposes to sell and deliver to various short-term and spot gas purchasers all or a portion of the gas Diamond Shamrock determines is available for sale at terms acceptable to Diamond Shamrock for a particular time frame. Diamond Shamrock will not be obligated to sell gas pursuant to any nomination or proposed nomination until the exact volumes, terms and conditions, and prices are agreed to by Diamond Shamrock and a purchaser. The actual contract between Diamond Shamrock and the short-term and spot gas purchaser may be for all or any portion of the quantity which was set out in the nomination or proposed nomination. Further, Diamond Shamrock proposes to make sales on a best efforts basis where the price and term are agreed upon but there is no requirement on the purchaser to purchase or Diamond Shamrock to sell a specific volume.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 8, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (17 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

## John G. Haehl, Jr., Filing

May 22, 1987.

Take notice that on May 1, 1987, John G. Haehl, Jr., filed an application pursuant to section 305(b) of the Federal Power Act for Commission authorization to hold concurrently the following positions:

| Position | Name of corporation | Classification |
|---|---|---|
| Chairman and Chief Executive Officer | Niagara Mohawk Power Corporation | Public Utility. |
| Director | Utica Mutual Insurance Company | Corporation (and wholly-owned subsidiary) authorized by Insurance Law of the State of New York to act as a broker/dealer. |

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 or 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

## The Inland Gas Company, Inc., Proposed Change in FERC Gas Tariff

May 22, 1987.

Take notice that The Inland Gas Company, Inc. ("Inland") on May 15, 1987 tendered for filing proposed Second Revised Sheet No. 10 to its FERC Gas Tariff, First Revised Volume No. 1. Said tariff sheet bears an issue date of May 15, 1987 and an effective date of July 1, 1987.

Inland states that the foregoing tariff sheet is being filed pursuant to the Commission's Order issued August 21, 1984 approving a Stipulation and Agreement in the above-captioned docket. Inland further states that in accordance with said Stipulation and Agreement, the subject tariff sheet sets forth a proposed transportation rate, plus retainage, to be effective July 1, 1987, for transporation service rendered pursuant to certificate authorization in Docket No. CP83-498-000.

A copy of Inland's tariff filing was served upon its affected transportation customer. Also, a copy of Inland's tariff filing is available for public inspection during regular business hours in its offices at 336-338 Fourteenth Street, Ashland, Kentucky 41101.

Any person desiring to be heard or to protest should file a motion to intervene or protest with Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and procedure. All such motions or protests should be filed on or before June 1, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Inland's tariff and the proposed revision are on file with the Commission and are available for public inspection.

**[Docket No. RP87-86-000]**

## Northwest Alaskan Pipeline Company; Tariff Changes

May 22, 1987.

Take notice that on May 15, 1987, Northwest Alaskan Pipeline Company ("Northwest Alaskan") 295 Chipeta

Way, Salt Lake City, Utah 84108–0900, tendered for filing in Docket No. RP87–66, Twentieth Revised Sheet No. 5 to its FERC Gas Tariff Original Volume No. 2.

Northwest Alaskan states that it is submitting Twentieth Revised Sheet No. 5, reflecting a decrease in current demand charges for Canadian gas purchased by Northwest Alaskan from Pan-Alberta Gas Ltd. ("Pan–Alberta") and resold to three of Northwest Alaskan's U.S. purchasers, Northern Natural Gas Company, Division of Enron Corp. ("Northern") Panhandle Eastern Pipe Line Company ("Panhandle") and Pacific Interstate Transmission Company ("PIT") under Rate Schedules X–1, X–2 and X–4 respectively, and a small increase in current and total demand charges for gas resold to Northwest Alaskan's fourth U.S. purchaser, United Gas Pipe Line Company ("United") under Rate Schedule X–3. Total demand charges for Northern increase due to a larger demand charge adjustment than in the January-June 1987 period, while total demand charges for Panhandle and PIT are less.

Northwest Alaskan states that it is submitting Twentieth Revised Sheet No. 5 pursuant to the provisions of the amended purchase agreements between Northwest Alaskan and Northern, Panhandle, United and PIT, and pursuant to Rate Schedules X–1, X–2, X–3 and X–4, which provide for Northwest Alaskan to file 45 days prior to the commencement of the next demand charge period (July 1, 1987 through December 31, 1987) the demand charges and demand charge adjustments which Northwest Alaskan will charge during that period.

Northwest Alaskan requests that Twentieth Revised Sheet No. 5 become effective July 1, 1987.

Northwest Alaskan states that a copy of this filing has been served on Northwest Alaskan's customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 3, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

*Secretary.*

BILLING CODE 6717–01–M

---

[Docket No. CP87–326–000]

## Northwest Pipeline Corp.; Application

May 20, 1987.

Take notice that on April 30, 1987, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP87–326–000 an application pursuant to section 7(c) of the Natural Gas Act for a limited-term certificate of public convenience and necessity authorizing the transportation of natural gas in interstate commerce for the account of Northwest Natural Gas Company (Northwest Natural), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest proposes to transport, on an interruptible basis, up to 100,000 MMBtu of natural gas per day in interstate commerce for use by Northwest Natural and by CP National Corporation for system supply and up to 80,000 MMBtu of natural gas per day in interstate commerce for specific end-users served by Northwest Natural and CP National, for a term commencing with the issuance and acceptance of regulatory authorization and expiring on October 31, 1989, pursuant to two transportation agreements, one designated for system supply and one designated for end-users, both dated April 28, 1987, which provide for transportation service under Rate Schedules T–4 and T–5 of Northwest's FERC Gas Tariff Volume No. 1–A.

Northwest proposes to receive up to 180,000 MMBtu per day for the account of Northwest Natural at certain mainline receipt points identified on Exhibit A in the transportation agreements. Pursuant to the transportation agreements, Northwest would transport this gas, on an interruptible basis, for Northwest Natural's account to the delivery points described in Exhibit B of the transportation agreements, it is stated.

Northwest proposes to transport Northwest Natural's volumes through its transmission system and redeliver up to 100,000 MMBtu per day of Northwest Natural at existing motor stations where Northwest presently is authorized to make deliveries to Northwest Natural and CP National under Northwest's ODL–1 Sales Rate Schedule. It is stated that actual availability of transportation service under the system supply transportation agreement is proposed to be limited to 10 percent of the respective annual system supply requirements of Northwest Natural and CP National. Pursuant to the end-user transportation agreement, Northwest proposes to transport up to 80,000 MMBtu of natural gas, on an interruptible basis, of which 70,000 MMBtu is designated for delivery to points on Northwest Natural's system and 10,000 MMBtu designated for delivery to points on CP National's system.

It is asserted that the proposed transportation service would enable Northwest Natural and CP National to provide their customers with low-cost gas supplies that might not be available otherwise. These transportation services are proposed to be provided for a limited term expiring October 31, 1989, coincident with the expiration of Northwest's ODL–1 sales service agreements, to Northwest Natural and CP National.

Northwest proposes to charge Northwest Natural for all volumes of gas transported and delivered under the end-user transportation agreement at either the interruptible, replacement on-system transportation rate or the interruptible, incremental on-system transportation rate as set forth respectively, in Northwest's Rate Schedules T–4 and T–5, FERC Gas Tariff, Volume No. 1–A. The T–4 transportation rate would apply to volumes transported during any months which are incremental to the corresponding 1984 monthly volumes for the end-users as indicated on Exhibit C of the transportation agreement. The T–5 transportation rate would apply to all volumes transported which are not incremental to the corresponding 1984 monthly volumes. Northwest proposes to charge Northwest Natural for all volumes transported and delivered under the system supply transportation agreement at the interruptible replacement on-system, Rate Schedule T–5 transportation rate in its Volume No. 1–A tariff.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 1, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be

taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Northwest to appear or be represented at the hearing.

Kenneth F. Plumb,

*Secretary.*

[FR Doc. 87-12099 Filed 5-27-87; 8:45 am]

BILLING CODE 6717-01-M

---

[Docket No. CP87-328-000]

## Northwest Pipeline Corp. Application

May 20, 1987.

Take notice that on April 30, 1987, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City Utah 84108, filed in Docket No. CP87-328-000 an application pursuant to section 7(c) of the Natural Gas Act for a limited-term certificate of public convenience and necessity authorizing the transportion of natural gas in interstate commerce for the account of Crown Zellerbach Corporation (Crown Zellerbach), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest proposes to transport up to 62,250 MMBtu of natural gas per day on an interruptible basis for the account of Crown Zellerbach for a term of two years, commencing with the issuance and acceptance of regulatory authorization, pursuant to a gas transportation agreement (transportation agreement) dated March 13, 1987, which provides for transportation service under Rate Schedules T-4 and T-5 of Northwest's FERC Gas Tariff Volume 1-A. Northwest proposes to receive these volumes for the account of Crown Zellerbach at the mainline receipt points indentified on Exhibit A of the transportation agreement.

It is said that Crown Zellerbach owns or controls natural gas supplies which it would cause to be delivered to Northwest at various existing receipt points on Northwest's transmission system.

Northwest proposes to transport Crown Zellerbach's volumes on an interruptible basis through its transmission system and redeliver thermally equivalent volumes less transmission fuel, to Crown Zellerbach at six existing meter stations indentified on Exhibit B of the transportation agreement, where Northwest presently is authorized to make deliveries to Northwest Natural Gas Company (Northwest Natural) under Northwest's ODL-1 Sales Rate Schedule. Northwest Natural would then deliver the subject gas to the various plants owned by Crown Zellerbach or its corporate parent, James River Corporation. Northwest proposes to provide this transportation service for a limited-term of two years as set forth in the transportation agreement.

It is asserted that the proposed transportation service would provide Crown Zellerbach with access to low-cost gas supplies that might not otherwise be available.

Northwest proposes to change Crown Zellerbach for all volumes of gas transported and delivered under the transportation agreement at either the interruptible, incremental on-system transportation rate or the interruptible, replacement on-system transportation rate as set forth, respectively, in Northwest's Rate Schedules T-4 and T-5, FERC Gas Tariff, Volume No. 1-A. The T-4 transportation rate would apply to volumes transported during any months which are incremental to the corresponding 1984 month volumes for Crown Zellerbach's Camas, Flexible Packaging Division, West Linn, Wauna Plants and James River's Halsey Plant as indicated on Exhibit C of the transportation agreement. The T-5 transportation rate would apply to all volumes transported which are not incremental to the corresponding 1984 monthly volumes, it is stated.

Any person desiring to be heard or to make any protect with reference to said application should on or before June 1, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject of jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, it the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Northwest to appear or be represented at the hearing.

Kenneth F. Plumb,

*Secretary.*

BILLING CODE 6717-01-M

---

[Docket No. CI87-581-000]

## Prior Energy Corp.; Application

May 22, 1987.

Take notice that on May 11, 1987, Prior Energy Corporation, 420 Lexington Avenue, New York, N.Y. 10170, applied pursuant to section 7 of the Natural Gas Act for a blanket certificate of public convenience and necessity authorizing the sale for resale of natural gas that is subject to the Commission's jurisdiction under the Natural Gas Act. Pregranted abandonment authorization for such sales is also requested.

Prior states that the authorization sought will serve the public interest by finding markets for shut-in supplies, enhancing the throughput of interstate pipelines, increasing the cash flow of producers, and stimulating competition within natural gas markets, as has been recognized by recent Commission orders.

Prior further requests expedited consideration of its application and, accordingly, requests omission of any intermediate decision procedure. Prior waives its right to an oral hearing and its opportunity to file exceptions to the Commission's decision, if the Commission utilizes the expedited procedures under 18 CFR 385.802.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 8, 1987, file with the Federal Energy Regualtory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requiremetns of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

*Secretary.*

[Docket No. C187-559-000]

## The Resource Group; Application of the Resource Group for Blanket Certificate of Public Convenience and Necessity and for an Order Approving Pre-Granted Abandonment

May 22, 1987.

Take notice that on May 4, 1987, the Resource Group (TRG), pursuant to sections 4 and 7 of the Natural Gas Act, 15 U.S.C 717(c) and (f), and the provisions of 18 CFR Part 157, applied for a blanket certificate of public convenience and necessity and for pre-granted abandonment to permit the sale, and pre-granted abandonment of the sale, of natural gas which remains subject to the Commission's Natural Gas Act (Gas Act) jurisdiction for which producers have already received separate abandonment authority under section 7(b) of the Gas Act.

TRG states that it is seeking resale and pre-granted abandonment authority for all Natural Gas Policy Act (NGPA) categories of natural gas subject to the Commission's jurisdiction under the Gas Act. The producer-suppliers of TRG will have already received abandonment authority under separate authority for all natural gas purchased and resold by TRG. TRG is not seeking transportation authority for such gas nor is it seeking any authority, sales or abandonment, for any of its producer-suppliers. The transportation authority necessary to implement the requested authorization will be implemented pursuant to Orders 436 and 451, and NGPA Section 311. TRG's potential resale customers under the requested blanket certificate include interstate, intrastate and hinshaw pipelines, local distribution companies, and industrial and other end-users, including firm sales customers of releasing pipelines.

TRG states that natural gas supplies sold under the authority requested will be sold by TRG at market-clearing prices, but not in excess of the applicable NGRA maximum lawful price, or the applicable contract price, whichever is lower. TRG further states that its request is consistent with the Commission's recently issued order in *EnTrade Corporation,* Docket Nos. CI87-89-000, *et al.* (issued March 31, 1987), wherein the Commission amended and extended blanket sales certificates with pre-granted abandonment authorizing several marketing companies to make sales for resale, and granting pre-granted abandonment authorization for such sales. TRG has expressed its willingness to comply with the terms and conditions set forth in the Commission's *EnTrade* order, except as to the expiration of such authority. TRG requests that the term of the sales and abandonment requested extend for at least three years from the date of approval of such authority by the Commission.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 8, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to becoms a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's rules.

Under the procedures herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearings.

Kenneth F. Plumb,

*Secretary.*

BILLING CODE 6717-01-M

---

[Docket No. RP87-52-001]

## United Gas Pipe Line Co.; Compliance Filing

May 22, 1987.

Take notice that on May 19, 1987, United Gas Pipe Line Company (United) tendered for filing Revised Sixth Revised Sheet No. 4-E and Revised Second Revised Sheet No. 74-F4 to its FERC Gas Tariff, First Revised Volume No. 1 to comply with Ordering Paragraphs (B)(1) and (B)(3) of the Commission's April 30, 1987, Order Accepting for Filing and Suspending Tariff Sheets Subject to Refund and Conditions and Establishing Hearing Procedure (April 30, 1987, Suspension Order). Revised Sixth Revised Sheet No. 4-E reflects the storage cost component of the firm transportation rate as required by § 284.7 (d)(1) of the Commission's Regulations. Revised Second Revised Sheet No. 74-F4 reflects additional language explaining how amounts for unrecovered purchased gas costs are to be determined.

United States that in a separate pleading also filed on May 15, 1987, it has filed a Motion for Stay of Ordering Paragraph B(2) of the Commission's April 30, 1987, Suspension Order. United, therefore, has not included in this compliance filing revised tariff sheets and supporting schedules to reflect the reclassification of take-or-pay settlement costs to the commodity component.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211. All such motions or protests must be filed on or before June 1, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

*Secretary.*

[FR Doc. 87-12165 Filed 5-27-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA87-3-43-002]

**Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff**

May 22, 1987.

Take notice that Williams Natural Gas Company (WNG) on May 19, 1987, tendered for filing Revised First Revised Sheet No. 6 to its FERC Gas Tariff, Original Volume No. 1.

This tariff sheet is being filed in accordance with Ordering Paragraphs (A)(5) and (A)(6) of the Commission's order issued April 22, 1987 in this docket. In the April 22, 1987 order, the Commission directed WNG to refile its rates to reflect the removal of the cost of any supplies not attached to its system as of the effective date of the PGA and to reflect removal of the ratable take payment to Mobil from its Account No. 191.

The rates reflect:

(1) A 36.79¢ per Mcf increase in the Cumulative Adjustment as measured against WNG's last regular PGA filing in Docket No. TA87-1-43-000 which became effective October 23, 1986 and a 40.99¢ per Mcf increase as measured against WNG's "flex PGA" filing in Docket No. TF87-1-43-000 which became effective December 23, 1986, due to an increase in WNG's projected gas purchase costs. This increase is unchanged from the increase originally filed in this docket because a further review of the PGA filing indicated there was no effect on WNG's projected cost of purchased gas due to infill drilling. The filing projected purchases from the Kansas Hugoton field which included purchases anticipated to come from infill wells. However, because the allocation of projected purchases to the well level is based on the previous 12 months of actual purchases, no allocation was made to new infill wells.

(2) A 4.02¢ per Mcf increase in the Surcharge Adjustment (to a positive .94¢ per Mcf from a negative 3.08¢ per Mcf) to amortize the Deferred Purchased Gas Cost Subaccount Balance. This Surcharge Adjustment is 1.20¢ per Mcf less than the 2.14¢ per Mcf Surcharge Adjustment reflected on First Revised Sheet No. 6 filed March 23, 1987 in this docket. This revised Surcharge Adjustment reflects the removal of the ratable take payment to Mobil from WNG's Account No. 191.

WNG states that copies of this filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 1, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

## ENVIRONMENTAL PROTECTION AGENCY

[AMS-FRL-32084]

**Control of Air Pollution From New Motor Vehicle Engines; Federal Certification Test Results for 1987 Model Year**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice.

**SUMMARY:** Section 206(e) of the Clean Air Act, as amended August 1977, directs the Administrator of the Environmental Protection Agency to announce in the **Federal Register** the availability of the results of certification tests. These tests are conducted on new motor vehicles and new motor vehicle engines to determine vehicles'/engines' conformity with Federal standards for the control of air pollution caused by motor vehicles. The Federal Certification Test Results for the 1987 model year are now available and may be obtained by writing: U.S. Environmental Protection Agency, Office of Mobile Sources, Certification Division, 2565 Plymouth Road, Ann Arbor, Michigan 48105.

**FOR FURTHER INFORMATION CONTACT:** Judy F. Carmickle, Certification Division, U.S. Environmental Protection Agency, Office of Mobile Sources, Certification Division, 2565 Plymouth Road, Ann Arbor, Michigan 48105, (313) 668-4206.

Dated: May 19, 1987.

BILLING CODE 6560-50-M

[Docket No. HA-84-1; FRL-3206-6]

**Health Assessment Document for Acetaldehyde; Availability of First External Review Draft**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of availability of first external review draft.

**SUMMARY:** This notice announces the availability of the first external review draft of a Health Assessment Document for Acetaldehyde.

**DATES:** The Agency will make the document available for public review and comment on or about Monday, June 15, 1987. Comments must be postmarked by Thursday, August 13, 1987.

**ADDRESSES:** To obtain a copy of the document, interested parties should contact the ORD Publications Center, CERI-FRN, U.S. Environmental Protection Agency, 26 West St. Clair Street, Cincinnati, OH 45268, (513) 569-7562 or FTS 684-7562, and request the first external review draft of the Health Assessment Document for Acetaldehyde. Please provide your name, mailing address, and the EPA document number, EPA/600/8-86/015A.

The draft document will also be available for public inspection and copying at the EPA library, EPA headquarters, Waterside Mall, 401 M Street SW, Washington, DC.

Comments on the draft should be sent to the Project Manager for Acetaldehyde, U.S. Environmental Protection Agency, Environmental Criteria and Assessment Office, MD-52, Research Triangle Park, NC 27711.

**FOR FURTHER INFORMATION CONTACT:** Ms. Diane Ray, U.S. Environmental Protection Agency, Environmental Criteria and Assessment Office, MD-52, Research Triangle Park, NC 27711, (919) 541-3637 or FTS 629-3637.

**SUPPLEMENTARY INFORMATION:** In May 1985, EPA's Office of Air Quality Planning and Standards (OAQPS) requested that the Environmental Criteria and Assessment Office (ECAO), Office of Health and Environmental Assessment (OHEA), prepare a health assessment document for acetaldehyde. The document will be used by EPA in the decisionmaking process regarding possible regulation of acetaldehyde under the Clean Air Act as amended, 42 U.S.C., 7401 et seq.

Dated: May 20, 1987.

## Superfund Program; Non-Binding Preliminary Allocations of Responsibility (NBAR)

**AGENCY:** Environmental Protection Agency.

**ACTION:** Request for public comment.

**SUMMARY:** Section 122(e)(3) of the Superfund Amendments and Reauthorization Act of 1986 (SARA), which amended the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), requires the Environmental Protection Agency (EPA) to develop guidelines for preparing nonbinding preliminary allocations of responsibility (NBARs). EPA is publishing today the Interim Guidelines for Preparing Nonbinding Preliminary Allocations of Responsibility to announce that the guidelines are in effect and to solicit public comment on them.

**DATE:** Comments must be provided on or before July 27, 1987.

**ADDRESS:** Comments should be addressed to Debbie Wood, U.S. Environmental Protection Agency, Office of Waste Programs Enforcement, WH-527, 401 M St. SW., Washington, DC 20460.

**FOR FURTHER INFORMATION CONTACT:** Debbie Wood, U.S. Environmental Protection Agency, Office of Waste Programs Enforcement, WH-527, 401 M St. SW., Washington, DC 20460, (202) 382-3002.

**SUPPLEMENTARY INFORMATION:** As defined in section 122(e)(3)(A) of SARA, an NBAR is an allocation by EPA among potentially responsible parties (PRPs) of percentage of total response costs at a facility. The purpose of NBARs is to promote expedited settlement. NBARs are not binding on the government or PRPs; they cannot be admitted as evidence or reviewed in any judicial proceeding, including citizen suits. Whether to prepare an NBAR at any particular CERCLA site is a decision within EPA's discretion.

EPA will consider preparing an NBAR at a site if it appears that an NBAR may help to promote settlement. Still, NBARs will not be routine. In general, EPA's policy is that PRPs should work out among themselves questions of how much each will pay toward settlement at a site.

Comments may address the overall approach taken in the interim guidelines or focus on any aspect of it. EPA particularly solicits comment on appropriate factors to consider in determining percentage allocations for owners, operators, and transporters.

The policies and procedures set forth in the interim guidelines are guidance to EPA employees. The interim guidelines include enforcement policies and internal procedures that are not appropriate or necessary subjects for rulemaking. Thus, the guidelines do not constitute rulemaking by EPA and may not be relied on to create a substantive or procedural right or benefit enforceable by any other person. EPA may, therefore, take action that is at variance with policies and procedures contained in this document.

EPA is publishing the interim guidelines to provide wide public distribution of information on this aspect of SARA implementation, and to gain the benefit of public comment. The interim guidelines follow:

Dated: May 18, 1987.

Lee M. Thomas,

*Administrator.*

## INTERIM GUIDELINES FOR PREPARING NONBINDING PRELIMINARY ALLOCATIONS OF RESPONSIBILITY

### I. Introduction

Section 122(e)(3) of the Superfund Amendments and Reauthorization Act of 1986 (SARA), Pub. L. No. 99-499, which amended the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9601 *et seq.*, requires the Environmental Protection Agency (EPA) to develop guidelines for preparing nonbinding preliminary allocations of responsibility (NBARs). As defined in section 122(e)(3)(A), an NBAR is an allocation by EPA among potentially responsible parties (PRPs) of percentages of total response costs at a facility. SARA authorizes EPA to provide NBARs at its discretion. NBARs are a tool EPA may use in appropriate cases to promote remedial settlements.

NBARs will allocate 100 percent of response costs among PRPs. The discretion to prepare an NBAR does not change the goal of the interim CERCLA settlement policy, published at 50 FR 5034 (February 5, 1985), to achieve 100 percent of cleanup or costs in settlement.

In preparing an NBAR, EPA may consider such factors as volume, toxicity, and mobility of hazardous substances contributed to the site by PRPs, and other settlement criteria included in the interim settlement policy (50 FR 5034, 5037-5038). The settlement criteria include strength of evidence tracing the wastes at a site to PRPs, ability of PRPs to pay, litigative risks in proceeding to trial, public interest considerations, precedential value, value of obtaining a present sum certain, inequities and aggravating factors, and nature of the case that remains after settlement.

An NBAR is not binding on the government or PRPs; it cannot be admitted as evidence or reviewed in any judicial proceeding, including citizen suits. An NBAR is preliminary in the sense that PRPs are free to adjust the percentages allocated by EPA among themselves.

Should EPA decide to prepare an NBAR, it will normally be prepared during the remedial investigation and feasibility study (RI/FS), and provided to PRPs as soon as practicable, but not later than completion of the RI/FS for the site. The NBAR process will normally be used only in cases where the discretionary special notice procedures of section 122(e) are invoked.

Following presentation of an NBAR to PRPs, PRPs have an opportunity to offer to undertake or finance cleanup. EPA need consider only substantial offers. A substantial offer is defined in part IV of these guidelines. EPA must provide a written explanation to PRPs if it rejects a substantial offer based on an NBAR. Under section 122(e)(3)(E), the decision to reject a substantial offer based on an NBAR is not subject to judicial review.

Section 122(e)(3)(D) states that the costs incurred by EPA in preparing an NBAR shall be reimbursed by PRPs whose offer is accepted. If a settlement offer is not accepted, NBAR preparation costs are considered response costs under SARA.

### II. When To Use the NBAR

The NBAR is meant to promote settlement and, thus, reduce transaction costs. Generally, EPA will consider NBAR preparation when it appears that an NBAR may help to promote settlement. EPA will give particular consideration to preparing an NBAR whenever a significant percentage of PRPs at a site request one. What constitutes a significant percentage is a case-specific determination. Regions should note the existence of the NBAR process in all pre-RI/FS notice letters, and indicate its potential availability if requested by a significant percentage of

PRPs within 30 days of receipt of the notice.

There are certain situations where an NBAR may be particularly appropriate. For example, in a case that involves federal agencies as PRPs, preparing an NBAR in order to ascertain the percentage of federal agency responsibility is likely to promote settlement even though a significant percentage of PRPs did not request it. Similarly, if a state or municipality is involved at a site as a PRP, NBAR preparation may be deemed likely to promote settlement. Or, it might be appropriate to prepare an NBAR in a case with a large number of PRPs including, perhaps, a sizeable *de minimis* contingent. An NBAR may help coalesce a previously unorganized PRP group into a steering committee, and thus promote settlement.

There are also situations where an NBAR should probably not be prepared. For example, it may be clear very early in the process that there is insufficient information available on which to base an NBAR, or that the number of PRPs not *de minimis* is so small that an NBAR would not expedite settlement. In some cases it may seem that an equitable settlement can be more expeditiously or effectively achieved without use of NBAR procedures. There may also be cases where NBAR preparation is ruled out because an allocation for the site is already being prepared by or for PRPs.

Again, whether to prepare an NBAR at any particular site, including any state enforcement lead site, is a decision within EPA's discretion and will depend on the particular circumstances of each case. The decision whether to prepare an NBAR at any particular site rests with the Regional Administrator.

IF EPA decides to prepare an NBAR, it will notify PRPs of that fact in writing as early as is feasible. An NBAR notification should specify that the decision to prepare an NBAR is discretionary and is contingent, at a minimum, upon the availability of sufficient data.

## III. How To Prepare an NBAR

The purpose of the NBAR is to promote expedited settlement, thus minimizing transaction costs; an NBAR must be conducted in a fair, efficient, and pragmatic manner. For simplicity and other practical reasons, the allocation process presented here is based primarily upon volume and the settlement criteria.

EPA considered and rejected models based on toxicity because of the complexity of their application and the lack of agreement among the scientific community about degrees of toxicity of specific hazardous substances and synergistic effects. Also, toxicity is usually causally related to the cost of cleanup for only a few substances (e.g., PCBs, dioxin).

Still, the allocation process presented here is not intended to be exclusive. There will, of course, be cases where other factors, such as toxicity or mobility, must take priority in the interests of fairness to the parties. If a Region prefers to use another allocation process, it should confer with the Director of the Office of Waste Programs Enforcement prior to such use.

Activities involved in conducting an NBAR fall into two major categories: Information collection and assessment, and allocation.

### *Information Collection and Assessment*

While aggressive information collection efforts occur in every case, additional information may be necessary for NBAR purposes. Additional information on actual volume and specific wastes with respect to each PRP at an NBAR site may be required.

Section 12(e)(3)(B) of SARA authorizes EPA to subpoena witnesses and documents. Section 104(e) of CERCLA, as amended by SARA, authorizes EPA to obtain access to information about a person's ability to pay and about the nature and quantity of hazardous substances generated, treated, stored, or disposed of by that person. These authorities may be used to gather data for an NBAR.

Subpoena of witnesses, authorized by section 122 (e)(3)(B), may be used in some cases as part of the information collection process. Considerable case-specific judgment must be exercised about the extent to which the subpoena authority will be used due to its resource-intensive nature.

Information being collected must be reviewed by technical and legal staff as it is received so that pertinent information may be culled and gaps and inconsistencies identified. Collection and assessment efforts should be completed by the end of the RI, so that the allocation can be completed by the end of the FS.

On the basis of information collection and assessment efforts, EPA will determine the waste types and volumes for each PRP. This volumetric ranking is part of the information that must be provided with a pre-cleanup negotiation special notice letter.

The legislative history of section 122 states that the allocation itself should be made by federal employees. Consultants or states with cooperative agreements may assist in the information gathering and assessment phase of the allocation process. The allocation phase of an NBAR can be most effectively undertaken by the same technical and legal personnel who directed the information collection and assessment efforts.

### *Allocation*

In most cases, waste at a site is commingled and therefore indivisible. In commingled waste cases, the first step in the allocation phase of an NBAR is to allocate 100 percent of responsibility among generators, based on the volume each contributed. The product of this step will often differ from the volumetric ranking provided with special notice letters because any waste that is attributable to unknown parties is allocated to known parties in proportion to their volume.

In a limited number of cases, it is possible to link particular remedial activities with specific waste types and volumes. For example, in the easy but rare case of divisible waste, the cost of removing barrels from a warehouse on a larger site can be separately attributed to the contributors of the barrels. Or, the cost of incinerating soil contaminated solely by PCBs can be attributed to PCB contributors. Where it is possible to do so, waste types and volumes that necessitate particular remedial activities will be fully attributed to the appropriate contributors.

The second step in the allocation phase of the NBAR process involves adjustments based on consideration of the settlement criteria. Any percentage allocated to a defunct or impecunious party should be reallocated. Where appropriate, credit may be given for any PRP contributions to RI/FS and/or removal activities at the site.

In addition, percentages of responsibility should be allocated to financially viable owners, operators and transporters. How much to allocate to such parties is a case-specific decision based upon consideration of the settlement criteria.

In general, owner/operator culpability is a significant factor in determining the percentage of responsibility to be allocated. For example, a commercial owner and/or operator that managed waste badly should receive a higher allocation than a passive, noncommercial landowner that doesn't qualify as innocent under section 122(g)(1)(B) of SARA. The relative allocation among successive owners and/or operators may be determined, where all other circumstances are equal, by the relative length of time each owned and/or operated the site. Transporter allocations may be based

on volume, taking into account appropriate considerations such as packaging and placement of waste at a site. Detailed guidance on allocations for transporters, owners, and operators may be prepared at a later date on the basis of experience under these interim guidelines.

Again, an NBAR will allocate 100 percent of response costs, because the goal is to achieve 100 percent of cleanup or costs in settlement.

## IV. Offers Based on NBARS

Once the technical and legal personnel complete the NBAR, the numerical results will be transmitted in writing to PRPs. EPA will not provide a detailed explanation for the results, due to the enforcement-sensitive nature of the decisions involved. EPA will provide a general explanation of the rationale used in preparing the NBAR. Data gathered in the information collection phase may be made available to PRPs.

EPA will provide the NBAR results to PRPs as early as possible. The sooner PRPs receive the results, the more time they have to organize among themselves and negotiate with EPA on remedy. A limited period should be provided for PRPs to digest the NBAR results before notice for cleanup negotiations is sent.

EPA will attempt to complete the NBAR before selection of a preferred remedy and public comment, or at least prior to the Record of Decision (ROD).

Special notice under section 122(e)(2)(A) of SARA will generally be provided prior to cleanup negotiations in cases where an NBAR is used. If within 60 days of special notice for cleanup negotiations, EPA receives no offer for settlement, it may proceed as usual with action under section 104 or 106 of CERCLA. If EPA receives an offer that is not a substantial/good faith proposal, it should so notify the PRPs before proceeding with action under section 104 or 106.

A good faith offer is an offer in writing in which PRPs make a showing of their qualifications and willingness to conduct or finance the major elements of the remedy. A substantial offer must meet three criteria. First, it must equal or exceed the cumulative allocated shares of those making the offer. Second, it must amount to a predominant portion of cleanup costs. Third, it must be acceptable to EPA in regard to all other terms and conditions, such as release provisions or dispute resolution mechanisms.

If EPA receives a substantial/good faith offer within 60 days of special notice for cleanup, EPA will provide an additional 60 days for negotiation. If an agreement for remedial action is reached, it must be embodied in a consent decree. The State should be kept apprised of negotiations if it chooses not to participate. Should negotiations for settlement based on an NBAR fail, a section 106 unilateral order or civil action may be used to initiate remedial action. Should EPA proceed with cleanup under section 104, the NBAR may still be useful in developing demand letters for a section 107 cost recovery action.

*De minimis* and mixed funding settlements, also authorized by section 122, may occur in combination with an NBAR. Whether EPA will accept a mixed funding or *de minimis* proposal at an NBAR site will depend on the results of additional analyses specifically designed to evaluate such proposals.

If EPA rejects a substantial/good faith offer, it must provide a written explanation to the PRPs, after consultation with DOJ and review at EPA Headquarters. In general, rejection of a substantial offer that is sufficient in amount is likely to be based on failure to reach agreement on terms and conditions. After a written explanation for rejection of a substantial/good faith offer is sent, EPA may proceed under section 104 or 106.

[OPTS-140074A; FRL-3209-1]

## Toxic and Hazardous Substances Control; Contractor and Subcontractor Access to Confidential Business Information

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has authorized several contractors and subcontractors for access to information submitted to EPA under various sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

**FOR FURTHER INFORMATION CONTACT:** Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Room E-543, 401 M Street SW., Washington, DC 20460 (202-554-1404).

**SUPPLEMENTARY INFORMATION:** Under TSCA, EPA must determine whether the manufacture, processing, distribution in commerce, use, or disposal of certain chemical substances or mixtures may present an unreasonable risk of injury to human health or the environment. New chemical substances, i.e., those not listed on the TSCA Inventory of Chemical Substances, are evaluated by EPA under section 5 of TSCA. Existing chemical substances, listed on the TSCA Inventory, are evaluated by the Agency under sections 4, 6, 7, and 8 of TSCA. Section 12 requires a person to report his or her intent to export certain chemical substances to foreign countries.

In accordance with 40 CFR 2.306(j), EPA has determined that the following contractors and subcontractors will require access to CBI submitted to EPA under TSCA to successfully perform work under the contracts described in the following units of this notice.

### I. Previously Announced Contract

As was announced in the Federal Register of May 1, 1986 (FR 16205), the Dynamac Corporation, 11140 Rockville Pike, Rockville, Maryland, is authorized for access to CBI submitted to EPA under sections 4 and 8 of TSCA. EPA is issuing this notice to extend Dynamac's access to TSCA CBI under EPA Contract No. 68-02-4251 to February 28, 1989.

### II. New Contractors and Subcontractors

Access to CBI by the contractors and subcontractors described in this section is being announced for the first time. EPA is issuing this notice to affected businesses informing them that EPA may provide access to TSCA CBI to these contractors and subcontractors under the indicated contracts on a need-to-know basis.

Under EPA Contract No. 68-01-7282, subcontractor CRC Systems, Incorporated, 4020 Williamsburg Court, Fairfax, Virginia, will assist the Office of Toxic Substances' Information Management Division in performing work under delivery order MCCS 17—PENTA Analysis and Design Evaluation. CRC, as a subcontractor, will be working for the prime contractor, Booz Allen and Hamilton. Booz, Allen and Hamilton will not require access to TSCA CBI under this contract. CRC will not conduct substantive review of any TSCA CBI; however, CRC personnel will require access to CBI on computer screens in order to evaluate technical aspects of computer programs to perform contract tasks. In addition, personnel will occasionally be required to review CBI documents to compare hardcopy data for those data elements contained in the systems. The systems to be accessed are PENTA, Molecular Access System (MACCS), and the Document and Personnel Security System (DAPSS). Under this contract, CRC personnel will be authorized for

access to information submitted under all sections of TSCA. Access to TSCA CBI under this contract will take place only at EPA Headquarters. Clearance for access to TSCA CBI under this contract is scheduled to expire on September 30, 1987.

Under contract No. 68-01-7252, Policy Planning & Evaluation, Incorporated (PPEI), 8521 Leesburg Pike, Suite 310, Vienna, Virginia, will assist EPA's Office of Compliance Monitoring's Legal Enforcement Policy Division in completing a study of the efficacy of environmental auditing settlements achieved by EPA to date. The study will include a review of the literature on environmental auditing and interviews with EPA and corporate personnel who have been involved in Agency enforcement actions, the settlements of which have included the provision to conduct environmental audits of regulatory facilities. Further to evaluate the effects of auditing, PPEI will need to examine CBI inspection reports, NEIC reports, summaries of third-party audits, and other documentation that is considered CBI. Under this contract, PPEI personnel will be authorized for access to information submitted under all sections of TSCA. Access to TSCA CBI under this contract will take place only at EPA Headquarters. Clearance for access to TSCA CBI under this contract is scheduled to expire on September 30, 1987.

Contractor and subcontractor personnel will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Dated: May 15, 1987.

## FEDERAL COMMUNICATIONS COMMISSION

### Public Information Collection Requirement Submitted to Office of Management and Budget for Review

May 19, 1987.

The Federal Communications Commission has submitted the following information collection requirement to the Office of Management and Budget for review and clearance under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Copies of the submission may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on this submission contact Jerry Cowden, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on this information collection should contact J. Timothy Sprehe, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

*OMB number:* 3060-0161
*Title:* Section 73.61, AM Directional Antenna Field Strength Measurements
*Action:* Revision
*Respondents:* AM radio stations with directional antennas
*Frequency of response:* Recordkeeping requirement (on occasion)
*Estimated annual burden:* 1,700 Recordkeepers; 28,152 Hours
*Needs and uses:* AM radio stations with directional antennas must make field strength and partial proof of performance measurements and record them in the station log. The information is used by station licensees to ensure that the antenna is operating properly and by Commission staff in field inspections or investigations.

Federal Communications Commission.

**William J. Tricarico,**

*Secretary.*

[Report No. 1660]

### Petitions for Reconsideration of Actions in Rulemaking Proceedings

May 19, 1987.

Petitions for reconsideration have been filed in the Commission rule making proceeding listed in this Public Notice and published pursuant to 47 CFR 1.429(e). The full text of these documents are available for viewing and copying in Room 239, 1919 M Street, NW., Washington DC, or may be purchased from the Commission's copy contractor, International Transcription Service (202-857-3800). Oppositions to these petitions must be filed June 12, 1987. See § 1.4(b)(1) of the Commission's rules (47 CFR 1.4(b)(1)). Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

**Subject:**

Amendment of Part 15, Subpart F, to permit operation so field disturbance sensors in the band 54 to 72 and 76 to 88 MHz. (Gen. Docket No. 85-231, RM-4824) Number of petitions received: 1.

FM Allocation Rules of Part 73, Subpart B, FM Broadcast Stations. (MM Docket No. 86-144) Number of petitions received: 1.

Federal Communications Commission.

### Applications for Consolidated Hearing; Lillian (Blackwood) Fowler et al.

1. The Commission has before it the following mutually exclusive applications for a new FM station:

| Applicant and city/state | File No. | MM Docket No. |
|---|---|---|
| A. Lillian (Blackwood) Fowler & Charles R. Jones, a general partnership; Lindsay, OK. | BPH-860311ME | 87-151 |
| B. John W. Fox and Kenneth G. Eldunn, d/b/a Fox Communications; Lindsay, OK. | BPH-860317MJ | ..... |
| C. Helen E. Wellford; Lindsay, OK. | BPH-860317MK | ..... |

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

*Issue Heading and Applicant(s)*

1. Air Hazard, A
2. Comparative, A,B,C
3. Ultimate, A,B,C

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc., 2100 M Street, NW.,

## FEDERAL MARITIME COMMISSION

**Agreement(s) Filed**

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200001.
Title: Port of Portland Terminal Use Agreement.
Parties:
Port of Portland
Matson Navigation Company, Inc.
Synopsis: The proposed agreement provides that Matson will utilize 8 acres of container yard at the Port's terminal 6 as its published scheduled direct port of call in the Pacific Northwest, and for the guarantee of a minimum of 13,000 containers annually for five years. The Port shall share the revenues from dockage and wharfage charges applicable to Matson's vessels and cargo as provided in the Agreement.

Agreement No.: 224-009055-A-006.
Title: State of Hawaii Terminal Agreement.
Parties:
Matson Navigation Company, Inc. (Matson)
HT&T Company, Inc. (Hilo)
Filing Parties: Edward Y. Hirata, Director of Transportation, State of Hawaii Department of Transportation, 869 Punchbowl Street, Honolulu, Hawaii 96813.
Synopsis: The agreement modifies the parties' basic agreement covering the use of certain real property, buildings, improvements, machinery and equipment in Hilo Harbor, for the operation of a bulk sugar plant, by adding holdover provisions. The amendment also provides that any such holdover shall not exceed three months.

Agreement No.: 224-009055-004.
Title: State of Hawaii Terminal Agreement.
Parties:
Department of Transportation State of Hawaii (Licensor)
Matson Navigation Company, Inc. (Licensee)
Filing Parties: Edward Y. Hirata, Director of Transportation, State of Hawaii Department of Transportation, 869 Punchbowl Street, Honolulu, Hawaii 96813.
Synopsis: The proposed agreement modifies the parties' basic agreement which provides a license to the licensee for certain real property, in Hilo Harbor, for the operation of a bulk sugar plant. The amendment adds holdover provisions to the licensee (new paragraph 14) and; provides that any such holdover shall not exceed three months.

Agreement No.: 224-000021-011.
Title: Sacramento-Yolo Port District Terminal Lease Amendment.
Parties: Sacramento-Yolo Port District and Cargill, Inc.
Synopsis: The proposed agreement would revise the minimum tonnage requirement following June 30, 1986, through June 30, 1990.

Dated: May 22, 1987.

By Order of the Federal Maritime Commission.

Tony P. Kominoth,

*Assistant Secretary.*

[FR Doc. 87-12134 Filed 5-27-87; 8:45am]

BILLING CODE 6730-01-M

## FEDERAL RESERVE SYSTEM

### Canvest, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 19, 1987.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Canvest, Inc.*, Meriden, Connecticut; to become a bank holding company by acquiring 100 percent of the voting shares of the Central Bank for Savings, Meriden Connecticut, which currently engages in Connecticut Savings Bank Life Insurance Activities.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Union Planters Corporation*, Memphis, Tennessee; to acquire 90 percent of the voting shares of Bank of Trenton & Trust Company, Trenton, Tennessee. In addition to credit related insurance, the target bank, through its wholly-owned subsidiary, Fairless, Hinton, and Harbert Inc., Trenton, Tennessee, acts as agent in the sale of the following general types of insurance: automobile, homeowner, fire, health, and life insurance policies and in the sale of business insurance and bonds.

C. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Park Falls Agency, Inc.*, Park Falls, Wisconsin; to acquire at least 87.58 percent of the voting shares of Bradley Bank, Tomahawk, Wisconsin.

Board of Governors of the Federal Reserve System, May 21, 1987.

James McAfee,

*Associate Secretary of the Board.*

[FR Doc. 87-12058 Filed 5-27-87; 8:45 am]

BILLING CODE 6210-01-M

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control

### Recommendations for Protecting the Health of the Public During the Disposal of Agent VX; Request for Public Comment

**AGENCY:** Centers for Disease Control (CDC), Public Health Service, HHS.

**ACTION:** Request for public comment.

**SUMMARY:** Agent VX is now stored by the Department of Defense (DOD). Public Law 99-145 (50 USC 1421) mandates that all unitary (self-contained) lethal chemical munitions be destroyed by 1994. Public Law 91-121/441 (50 USC 1512) mandates that the Department of Health and Human Services must review DOD plans for disposing of these munitions and make recommendations to protect human health. Public comment is requested on these recommendations.

**DATE:** Comments must be received on or before June 29, 1987.

**ADDRESS:** Comments may be mailed to Director, Center for Environmental Health, Centers for Disease Control, 1600 Clifton Road NE., Atlanta, Georgia 30333.

**FOR FURTHER INFORMATION CONTACT:** Linda W. Anderson, Chief, Special Programs Group, Center for Environmental Health, Centers for Disease Control, 1600 Clifton Road NE., Atlanta, Georgia 30333.

**SUPPLEMENTARY INFORMATION:**

### Recommendations for Protecting the Health of the Public During the Disposal of Agent VX

Agent VX (O-ethyl-S-(2-diisopropylaminoethyl)-methyl phosphonothiolate, CAS 50782-69-9) is a chemical agent which acts on nerves, muscules, and glans by inhibiting acetyl cholinesterase, an enzyme required for proper function of these tissues. VX is an oily, colorless or straw-colored viscous liquid with vapor pressure of .00068 mm Hg at 25 degrees C. At present, the Department of Defense (DOD) stores agent VX in bulk containers and in land mines, rockets, cartridges, projectiles, and aerial spray tanks. Section 1412 of Pub. L. 99-145 (50 U.S.C. 1521) mandates that all unitary lethal chemical agents must be destroyed by September 30, 1994. Pub. L. 91-121/441 (50 U.S.C. 1512) mandates that the Department of Health and Human Services (HHS) review DOD plans for disposing of lethal chemical agents, such as agent VX. DOD has developed safety and health standards for handling agent VX. Federal agencies have not developed regulatory standards for agent VX. Therefore, the Centers for Disease Control (CDC), HHS, has sought advice on developing guidelines to use in reviewing DOD plans for disposing of and transporting agent VX.

CDC gathered data on the toxicity of agent VX and an open meeting was announced in the Federal Register on March 11, 1987 (52 FR 7489) and held in Atlanta, Georgia, April 2-3, 1987, to discuss issues related to safe exposure levels to agent VX.

Discussions were held on whether the available information was adequate to support establishment of acceptable maximum limits for exposure to vapors of agent VX and specifically whether the absence of any experimental studies or data was sufficient reason for withholding a recommendation at this time.

On the basis of the evidence reviewed, HHS concludes that human health will be adequately protected from the effects of VX vapor at the levels[1] shown below. Based on available human data showing cholinesterase inhibition produced by agent VX, these proposed exposure levels contain a safety factor of about 500 for workers and 1000 for the general population.

[1] Protection against exposure to agent VX in aerosol and liquid form must be sufficient to prevent direct contact with the skin and eyes.

| Population at Risk (Monitoring location) | Level | Averaging time |
|---|---|---|
| General population (monitoring perimeter). | 0.000003 mg/m³ ($3 \times 10^{-6}$ mg/m³). | 72 hours.[1] |
| Workers (workplace). | 0.00001 mg/m³ ($1 \times 10^{-5}$) mg/m³. | 8 hours. |

[1] The long averaging time is necessary for analytic reasons; however, if the entire dose were received in 1 hour, this would still be less than the level of concern.

Certain monitoring criteria area esssential to this recommended exposure limit is only as good as the capability to verify, with confidence, the exposure levels as they may occur. To this end, certain conditions must be satisfied. Specifically, the Army will provide data obtained empirically, that document, in HHS's opinion, accurate and reproducible monitoring for VX at the recommended exposure limits. The monitoring must be done under the customary and usual ambient conditions at each location.

We have not recommended a stack limit[2] based on human health considerations because we consider this an engineering matter. The stack limit level that is set should be (a) attainable by a well designed, constructed, and operated incineration facility; (b) an early indication of upset conditions; and (c) able to be accurately measured in a timely manner. The stack level of $3 \times 10^{-4}$ mg/m³ proposed by the Department of the Army meets these criteria. To assure that levels at the monitoring stations are at or below the exposure levels at worst-case conditions, stacks must be appropriately designed, with the proper operational controls. Monitoring stations must be positioned so that any level above the general population level will be detected. Dispersion models for worst-case conditions should be used to determine where the monitoring stations should be located.

Dated: May 21, 1987.

Robert L. Foster,

*Acting Director, Office of Program Support, Centers for Disease Control.*

[FR Doc. 87-12133 Filed 5-27-87; 8:45 am]

BILLING CODE 4160-18-M

[2] A "stack limit" is the allowable level of an air pollutant that may be discharged into the atmosphere from a point source called a "stack." Normally, stacks are vertical flues, pipes, or chimneys that elevate the discharge point, thereby facilitating dispersion.

## Food and Drug Administration

### Request for Nominations for a Representative of Industry Interests on the Ophthalmic Devices Panel in the Center for Devices and Radiological Health

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is requesting nominations for an industry representative to serve on the Ophthalmic Devices Panel in the Center for Devices and Radiological Health.

FDA has a special interest in ensuring that women, minority groups, the physically handicapped, and small businesses are adequately represented on advisory committees and, therefore, extends particular encouragement to nominations for appropriately qualified female, minority, and physically handicapped candidates, and nominations from small businesses that manufacture medical devices subject to the regulations.

**DATE:** Nominations should be received by July 13, 1987, for the vacancy listed in this notice.

**ADDRESS:** Written nominations and curricular vitae (which include nominee's office address and telephone number) must be submitted in writing to Kay Levin, Center for Devices and Radiological Health (HFZ-20), Food and Drug Administration, 12720 Twinbrook Parkway, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Kay Levin (address above), 301-443-3516.

**SUPPLEMENTARY INFORMATION:** FDA is requesting nominations for a member representing industry interests for the Ophthalmic Devices Panel.

#### Functions

The functions of the Ophthalmic Devices Panel are to (1) review and evaluate available data concerning the safety and effectiveness of devices currently in use, (2) advise the Commissioner of Food and Drugs regarding recommended classification of these devices into one of three regulatory categories, (3) recommend the assignment of a priority for the application of regulatory requirements for devices classified in the standards or premarket approval category, (4) advise on any possible risks to health associated with the use of devices, (5) advise on the formulation of product development protocols and review premarket approval applications for those devices classified in the premarket approval category, (6) review classification of devices to recommend changes in classification as appropriate, (7) recommend exemption to certain devices from the application of portions of the act, (8) advise on the necessity to ban a device, and (9) respond to requests from the agency to review and make recommendations on specific issues or problems concerning the safety and effectiveness of devices.

#### Industry Representation

Section 513 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360c) provides that each medical device panel include as a member one nonvoting representative of interests of the device manufacturing industry.

#### Nomination Procedure

Any organization in the medical device manufacturing industry ("industry interests") wishing to participate in the selection of a member of this panel may nominate one or more qualified persons to represent industry interests. Persons who nominate themselves as industrial representatives will not participate in the selection process. It is, therefore, recommended that all nominations be made by someone with an organization or firm which is willing to participate in the selection process. Nominations shall include a complete curriculum vitae of each nominee and shall state that the nominee is aware of the nomination and is willing to serve as a member.

#### Selection Procedure

A letter will be sent to each organization that has made a nomination, and to those organizations indicating an interest in participating in the selection process, together with a complete list of all such organizations and the nominees. This letter will state that it is the responsibility of each organization to consult with the others in selecting a single member representing industry interests for that particular committee within 60 days after receipt of the letter.

This notice is issued under the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)) and 21 CFR 14, relating to advisory committees.

Dated: May 20, 1987.

John M. Taylor,

*Associate Commissioner for Regulatory Affairs.*

[FR Doc. 87-12061 Filed 5-27-87; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 87N-0185]

## Drug Export; Antibody to Hepatitis B Surface Antigen (Mouse Monoclonal): Peroxidase (Horseradish) Conjugate and Human HBsAg Confirmatory Assay

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that Genetic Systems Corporation has filed an application requesting approval for the export of the Antibody to Hepatitis B Surface Antigen (Mouse Monoclonal): Peroxidase (Horseradish) Conjugate and Human HBsAg Confirmatory Assay to Australia.

**ADDRESS:** Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

**FOR FURTHER INFORMATION CONTACT:** Rudolf Apodaca, Center for Drugs and Biologics (HFN-310), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8063.

**SUPPLEMENTARY INFORMATION:** The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (Section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the Federal Register with 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Genetic Systems Corp., 3005 First Ave., Seattle, WA 98121, has filed an application requesting approval for the export of the drug Antibody to Hepatitis B Surface Antigen (Mouse Monoclonal): Peroxidase (Horseradish) Conjugate and Human HBsAg Confirmatory Assay, to Australia. The drug is indicated for use as an enzyme immunoassay for the detection of Hepatitis B Surface Antigen. The application was received and filed in the Center for Drugs and Biologics on May 13, 1987, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by June 8, 1987, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drugs and Biologics (21 CFR 5.44).

Dated: May 18, 1987.

**Daniel L. Michels,**

*Director, Office of Compliance, Center for Drug and Biologics.*

[FR Doc. 87-12062 Filed 5-27-87; 8:45 am]

BILLING CODE 4160-01-M

## Health Care Financing Administration

[IOA-010-N]

## Task Force on Technology-Dependent Children; Meeting

**AGENCY:** Health Care Financing Administration (HCFA), HHS.

**ACTION:** Notice of public meeting.

**SUMMARY:** In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), this notice announces a meeting of the Task Force on Technology-Dependent Children.

**DATES:** The meeting will be held on July 9, 1987 from 8:30 a.m. to 5:00 p.m., E.D.T., and on July 10, 1987 from 8:30 a.m. to 2:30 p.m., E.D.T. The meeting will be open to the public.

**ADDRESS:** The meeting will be held in the Shoreham Hotel, 2500 Calvert Street NW., Washington, DC 20008.

**FOR FURTHER INFORMATION CONTACT:** Bill Pickens, Executive Director, Department of Health and Human Service, Room 4414, HHS North Building, 330 Independence Avenue SW., Washington, DC 20201, (202) 245-0070.

**SUPPLEMENTARY INFORMATION:**

### Purpose

The Task Force on Technology-Dependent Children, established under section 9520 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (Pub. L. 99-272), investigates alternatives to institutional care for technology-dependent children. Technology-dependent children are those with chronic conditions requiring continuing use of medical technology.

The Task Force must report to the Secretary of Health and Human Services, the Administrator of the Health Care Financing Administration (HCFA), and to the Congress concerning alternatives to institutional care for technology-dependent children. The Task Force must develop recommendations designed to—

(1) Identify barriers that prevent the provision of appropriate care in a home or community setting to meet the special needs of technology-dependent children; and

(2) Recommend changes in the provision and financing of health care in private and public health care programs (including appropriate joint public-private initiatives) so as to provide home and community-based alternatives to the institutionalization of technology-dependent children.

The Task Force will address fully the two specified goals before it takes up any other questions. To the extend that time and resources permit, the Task Force may develop recommendations that would address additional concerns regarding technology-dependent children. The Task Force recommendations are intended to be used only at the option of the Department of Health and Human Services and the Congress.

### Agenda

The Task Force will conduct a business meeting to evaluate and review testimony, data, and information that has been received to date. It will consider barriers, recommendations and possible solutions for technology-dependent children.

The public is invited to present testimony to the Task Force. We request those wishing to testify to contact the Task Force by June 29, 1987.

Agenda items are subject to change as priorities dictate.

(Sec. 10(a)(2) of Pub. L. 92-463, as amended (5 U.S.C. App. I, Secs. 1-15) and Sec. 9520 of

Pub. L. 98-272 (42 U.S.C. 1395a note); 45 CFR Part 11)

Dated: May 11, 1987.

William L. Roper,

*Administrator, Health Care Financing Administration.*

[FR Doc. 87-12167 Filed 5-27-87; 8:45 am]

BILLING CODE 4120-01-M

## Public Health Service

### Office of the Assistant Secretary for Health; Privacy Act of 1974; System of Records

**AGENCY:** Public Health Service, DHHS.

**ACTION:** Notification of altered Privacy Act system of records.

**SUMMARY:** In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing notice of a proposal to alter system of records 09-25-0151, "Administration: ALERT Records Concerning Investigations or Determinations of Misconduct by Current or Potential Recipients of Funds for Biomedical Research, HHS/NIH/OD." We also propose to add a new routine use to this system of records.

The purpose of altering this system of records is to expand the system from one which is used solely by the National Institutes of Health (NIH) to one serving all PHS agencies and staff offices which award contracts, grants or cooperative agreements for research, research training and related activities.

**DATES:** PHS invites interested persons to submit comments on the proposed alterations or the proposed routine use on or before (*30 days after publication*). PHS has sent a Report of Altered System to the Congress and to the Office of Management and Budget on May 13, 1987. The alteration of this system of records will be effective 60 days from the date submitted to OMB, and the proposed routine use will be effective thirty days from this publication, unless PHS receives comments which result in a contrary determination.

**ADDRESS:** Comments should be addressed to the NIH Privacy Act Coordinator at the address listed below. Comments received will be available for inspection from 9 a.m. to 3 p.m. in Room 3B11, Building 31, at that address.

**FOR FURTHER INFORMATION CONTACT:** Ms. Barbara Bullman, J.D., NIH Privacy Act Coordinator, Building 31, Room 3B03D, 9000 Rockville Pike, Bethesda, MD 20892 or call 301-496-2832 (this is not a toll free number).

**SUPPLEMENTARY INFORMATION:**

1. PHS proposes to alter this system of records, 09-25-0151, "Administration: ALERT Records Concerning Investigations or Determinations of Misconduct by Current or Potential Recipients of Funds for Biomedical Research, HHS/NIH/OD," principally in order to expand the system of records from an NIH system to a system serving all of PHS. The character, scope and operation of the system will remain essentially the same. The NIH Division of Management Survey and Review (DMSR) will continue to maintain this system of records, and will make controlled disclosures, as appropriate, to other PHS components.

This expansion will provide for a more comprehensive execution of the basic purpose of the system, which is prudent stewardship of public funds and effective discharge of related responsibilities in the award of funds for scientific research and development. Expansion of the system will enable PHS agencies and staff offices to inform other PHS components of investigations of possible misconduct in science or sanctions imposed for such misconduct. Such communication is necessary because the subjects of investigations or sanctions of one PHS component may receive or be candidates for research and development awards from other PHS agencies or offices.

2. The system is also being modified to specify that cooperative agreements, along with grants and contracts, are among the type of awards within the scope of the system. (A cooperative agreement is a form of assistance entailing substantial programmatic involvement by agency staff, while a contract is the instrument used for acquisition.) The "Categories of individuals" section has been altered to state that recipients of research training grants, fellowships and career awards may be include in this system of records.

3. In order to reflect the foregoing changes, we are changing the name of the system from 09-25-0151, "Administration: ALERT Records Concerning Investigations or Determination of Misconduct by Current or Potential Recipients of Funds for Biomedical Research, HHS/NIH/OD," to 09/25/0151, "Administration: Public Health Service ALERT Records Concerning Individuals Under Investigation for Possible Misconduct in Science or Subject to Sanctions for Such Misconduct, HHS/PHS/NIH."

4. PHS is proposing a new routine use (number 1) which will allow PHS to inform responsible officials of an institution or organization when PHS takes an administrative action or imposes a sanction affecting awards to that institution in connection with an investigation or finding of misconduct regarding an individual employed by or affiliated with it. This routine use is compatible with the basic purpose of the system because, in fact, PHS normally makes research and research training awards to organizations or institutions rather than individuals. Individuals are involved as employees or affiliates of recipient organizations or institutions. Information disclosed under this routine use will be limited to a description of the action affecting the organization or institution and the reason for it.

We have also deleted a routine use which had been published for this system of records. That routine use allowed disclosure to another Federal agency of information relevant and necessary to that agency's decision on award of a benefit to a subject individual. Although the routine use was compatible with the purpose of the ALERT system, in the four years since the system was established there has been no need to disclose information under that routine use, and PHS believes the routine use will never be needed. PHS may disclose information to another Federal agency concerning an individual who is the subject of a sanction recorded in the ALERT system; however, such disclosure would be from investigative records pertaining to institutions that are maintained outside of the ALERT system.

5. PHS is also extending the purposes of the system of records in ways that are compatible with previously published purposes. Specifically, under the proposed extensions, PHS Committee Management Officers may review ALERT system records on individuals who are candidates for appointment to a PHS advisory committee. The system manager may disclose an ALERT system record to a PHS official considering hiring the subject individual or to a PHS official responsible for a PHS research activity under investigation. These purposes are consonant with prudent discharge of the same public trust that is exercised in the award of grants, cooperative agreements and contracts for research and research training. We have also added a paragraph to the "Purpose" section to indicate the role which the PHS Committee on Misconduct in Science will have in the expanded system.

6. To ensure fairness to individuals in any decisions affecting them, PHS is following the current NIH practice of routinely informing an individual when a record on him or her is created in the ALERT system, unless instructed by a law enforcement agency not to disclose the information. At that time, PHS will inform the individual of the allegations

or indications of possible misconduct, and of how the record may be used with regard to award decisions or to post-investigational sanctions, and PHS will provide the individual with a copy of the notice of system of records. PHS will also inform individuals when their records are deleted from the ALERT system. PHS has altered the notification and access sections of the notice to reflect these procedures.

7. To clarify the types of records maintained in the system, misconduct is defined. In addition to records related to misconduct in science, the system will continue to include records relating to investigations or findings of serious misappropriation of Federal research funds.

8. The revised system notice includes a slight expansion in the category of records in the system to include past or pending research and research training awards to the subject individuals. Previously, information on pending awards was omitted by oversight from the notice, as the established purposes of the system include use of the records to make informed decisions on pending awards. Inclusion of information on past awards will show the extent of PHS support to the subject individual and which PHS agencies or offices have made awards to that subject individual. However, notification of ongoing investigations or sanctions imposed will be limited to PHS officials responsible for the administration of currently active awards or funding decisions affecting pending applications or proposals.

9. PHS has revised the "Safeguards" section of the notice to reflect expansion of the system of records and to describe additional safeguards which will be implemented to maintain a vey high level of security and protection of privacy in the expanded system.

10. The section on record sources has been expanded to include institutions and organizations which receive research and research training awards from PHS. As legal recipients of these awards, these institutions and organizations are obligated to submit relevant information to PHS.

11. Finally, PHS has made a number of editorial changes to clarify the notice. The principal editorial change is the addition of an introductory paragraph, in the "Purpose" section of the notice, to describe the basic overall purpose of the system. The numbered paragraphs which now follow this introduction describe the particular ways in which PHS carries out this basic purpose.

The proposed alteration of the system of records will not become effective until 60 days after the date it was reported to OMB, as discussed above. However, the following notice is written in the present, rather than future tense, in order to avoid the unnecessary expenditure of public funds to republish the notice after the alteration has become effective.

Dated: May 15, 1987.

Wilfred J. Feebank,

*Deputy Assistant Secretary for Health Operations, and Director, Office of Management.*

09-25-0161

SYSTEM NAME:

Administration: Public Health Service ALERT Records Concerning Individuals Under Investigation for Possible Misconduct in Science or Subject to Sanctions for Such Misconduct, HHS/PHS/NIH.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Division of Management Survey and Review, National Institutes of Health (NIH), Bldg. 31 Room 4C02, 9000 Rockville Pike, Bethesda, MD 20892.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Subjects may include (1) researchers currently or formerly employed by the Federal Government; (2) individuals being considered for appointment to Public Health Service (PHS) advisory committees: (3) investigators on research grants, fellowships, cooperative agreements, or contracts awarded by any PHS agency, ( "Investigators" may include principal investigators, co-investigators, program directors, trainees, recipients of career awards or fellowships, or other individuals who conduct or are responsible for research or research training funded by PHS.); (4) research investigators, such as guest workers, not employed by PHS but who conduct research in PHS facilities or are closely associated with research conducted by PHS; (5) other individuals, such as subgrantees, subcontractors or assistants on research or research training grants, contracts or cooperative agreements, who by training, experience, occupation or other qualifications are potential candidates for research or research training grants, contracts, cooperative agreements or other benefits. Such individuals would be subjects of records in this system if they fall within either of the following two categories:

(1) Subjects of formal investigations for scientific misconduct or serious misappropriation of Federal research funds, if the PHS Agency-level/Staff Office Misconduct Policy Officer has determined that the alleged misconduct is serious enough, or that the investigation has produced sufficient information, to warrant attention when a PHS agency considers awarding research or research training funds or other benefits to such individuals.

(2) Subjects of sanctions imposed as a result of determinations that scientific misconduct or serious misappropriation of Federal research funds has occurred. Such sanctions include (a) actions affecting eligibility for research and training awards, such as special conditions for receipt of an award, suspension or termination of an award, or debarment of an individual; (b) actions affecting eligibility for appointment to a committee which advises PHS; (c) special restrictions on regulated research, such as disqualification from eligibility to use investigational drugs or special conditions for protection of human research subjects; and (d) termination of employment or other disciplinary action against an employee of PHS.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains records relating to investigations or findings of misconduct in science and to actions that PHS has taken in connection with such investigations or findings. Misconduct in science is defined as (1) the serious deviation, such as fabrication, falsification, or plagiarism, from accepted practices in proposing, conducting and reporting the results of research; or (2) the material failure to comply with Federal requirements affecting specific aspects of the conduct of research, e.g., the protection of human subjects and the welfare of laboratory animals.

In addition to records relating to misconduct in science, the system includes records relating to investigations or findings of serious misappropriation of Federal research funds—e.g., diversion of such funds to personal use. It does not include records documenting normal business transactions between a PHS agency and an awardee institution, except to the extent that such records are directly relevant to consideration of the fitness of an individual to receive a PHS award or other benefit.

The system consists of two subsystems which contain the following types of records:

(1) Records on pending or ongoing investigations identifying the alleged misconduct; the individual and/or institution under investigation; any present, past or pending research, and/

or research training awards; PHS agencies or offices involved, and the organization responsible for the investigation.

(2) Records summarizing sanctions imposed because of a finding of misconduct, which adversely affect the individual's eligibility for research or research training awards or other benefits for a specified period of time.

Either subsystem may contain responses from subject individuals.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

Authority for this system comes from the legislation which authorizes PHS to make awards for biomedical research and research training, and from PHS's concomitant responsibility to assure both that funds disbursed under awards are spent for authorized purposes and that recipients of such funds conform to all appropriate laws and regulations. (Public Health Service Act: 42 U.S.C. 241, 242b, 242c, 242*l*, 242m, 247c, 281–289h, 290aa–9, 290bb, 290bb–1, 290cc, 300a–2, 300b–1—b–3, 300c–12, 300z–7, as these provisions relate to awards for biomedical research and research training; Occupational Safety and Health Act: 29 U.S.C. 669).

**PURPOSE OF THE SYSTEM:**

This system of records enables PHS agencies to discharge effectively their responsibilities in the award and administration of research and training grants, cooperative agreements and contracts, while protecting the privacy and other rights of individuals under investigation or sanction for scientific misconduct or misappropriation of funds. The ALERT system is used to collect, control and disseminate to PHS agency officials on a need-to-know basis information that an individual (1) is under investigation for possible misconduct in science or misappropriation of funds, or a decision has been made to undertake such an investigation; or (2) has been subjected to a sanction at the conclusion of an investigation for misconduct or misappropriation of funds.

Specifically,

(1) PHS records the existence of such sanctions in the system so that PHS agencies can track and implement the sanctions, for example by refusing to accept an application or proposal from a debarred person. In addition, PHS informs members of technical merit review groups of actions taken if the disclosure bears directly on the scientific merit of an application or proposal under consideration or the fiscal integrity of the investigator or applicant, or if necessary to ensure an unbiased review by providing an accurate account of the case, for example, when information concerning the conduct investigated has been disclosed by other sources, such as the press or other communications media. PHS does not use this system to make decisions on imposition of sanctions.

(2) When investigative findings fail to confirm an instance of misconduct or show that any misconduct was not of sufficient importance to warrant imposing sanctions, leading to a decision not to impose any sanctions,

(a) The individual's name is removed from the ALERT system of records and the individual is notified in writing;

(b) Responsible PHS agency officials are notified of the outcome;

(c) If any interim administrative sanctions had been imposed, they are lifted; and

(d) If a competing application or proposal from the individual is pending or anticipated in the near future, the Misconduct Policy Officer of the relevant agency consults with officials responsible for review of the application or proposal to identify and resolve any concerns that might affect the objectivity of the review. For example, technical merit review groups would be informed of the outcome of the investigation if there were reason to believe that reviewers had received incomplete or misleading information about the case.

(3) PHS agencies use ALERT system records on pending or ongoing investigations to make informed decisions on appropriate actions regarding awards of research, research training and related activities or other benefits to individuals under investigation as follows:

(a) PHS agency officials responsible for the award of research funds, in consultation with the PHS agency-level Misconduct Policy Officer, weigh information on investigations in deciding whether to take interim administrative action, such as delaying, restricting or denying award of research funds. Any interim action is taken with a view towards protecting the rights of all parties involved and minimizing disruption to an ongoing project, the awardee institution, and the activities of those involved in the project.

(b) To obtain independent advice on appropriate actions with respect to potential competing awards to individuals or organizations under investigations, these officials or their designees inform the members of the appropriate National Advisory Council or Board, advisory bodies legally established to advise PHS on funding of research projects, of the existence and status of an investigation. Such disclosure is made in closed session when the Council or Board is considering the funding of research by the individual or institution.

To avoid influencing Technical Reviews, PHS will not inform members of scientific review groups about instances of possible misconduct or ongoing investigations. However, if a given case has received such extensive publicity that review of an application or proposal may be comprised, the responsible PHS agency official may defer the review or inform the reviewers of the status of PHS's activities with respect to the possible misconduct.

(4) The PHS Committee on Misconduct in Science, and individual PHS Agency/Staff Office Misconduct Policy Officers, review ALERT records in order to inform appropriate officials within their organizations who are responsible for deciding on the actions described in other items of this section.

(5) PHS Committee Management Officers may review records in the system concerning candidates for appointment to advisory committees in order to make informed decisions about making, delaying or denying appointments.

(6) Upon request, the system manager may disclose information to PHS agency officials who are considering hiring a subject individual.

(7) When a research activity within PHS (i.e., intramural research activity) is the subject of an investigation by a PHS regulatory agency, information on that investigation in this system may be communicated to the PHS intramural officials responsible for the research activity.

**ROUTINE USES OR RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

(1) PHS may notify responsible officials of awardee institutions or organizations when, in connection with an investigation or finding of misconduct by an individual employed by or affiliated with the institution or organization, a PHS agency takes an action affecting research and research training awards to the institution or organization. Information disclosed will be limited to the name of the subject individual, description of the action and the reasons for it.

(2) Information may be disclosed to qualified experts not within the definition of Department employees as prescribed in Department Regulations to the extent the information is pertinent to the review of applications by those experts.

(3) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

(4) Disclosure may be made from this system of records to the Department of Justice, or to a court or other tribunal, when (a) HHS, or any component thereof; or (b) HHS employee in his or her individual capacity or (c) any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or (d) the United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, court or other tribunal is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records are stored in file folders.

**RETRIEVABILITY:**

Records are retrieved by name of the individual under investigation or subject to sanction.

**SAFEGUARDS:**

(1) Authorized Users: Records are available only to the system manager, PHS Agency-level/Staff Office Misconduct Policy Officers, the Deputy Director for Extramural Research and Training, NIH, and other responsible PHS agency officials considering the award of funds for research, research training or related activities or other benefits to a subject individual or institution, the appointment of a subject individual to an advisory committee, the hiring of a subject individual, or the management of a PHS agency research activity under investigation. Any disclosure to other individuals must be authorized by the system manager.

(2) Procedural Safeguards: Access to records is strictly controlled by the system manager and the officials specified under 'Authorized Users.' Individuals who receive disclosures from this system are informed that the information is confidential. They are instructed to address all questions and inquiries from any party either to the system manager or to the appropriate Misconduct Policy Officer for reply. Disclosures to Boards, Councils or review groups are made in sessions which are closed to the public. In addition, PHS staff and others not directly responsible for a potential award may be barred when a Board or Council considers an ALERT case, if they would not have been informed about the case otherwise. Only the PHS Committee on Misconduct in Science or individual PHS agency/level Misconduct Policy Officers, acting on the advice of the system manager, may authorize additions, alterations or deletion of records in this system.

(3) Physical Safeguards: Records are kept in locked file cabinets in offices which are locked when not attended. Special measures, commensurate with the sensitivity of the records, are taken to prevent unauthorized copying or disclosure of records.

These practices are in compliance with the standards of chapter 45–13 of the HHS General Administration Manual and supplementary chapter PHS hf: 45–13.

**RETENTION AND DISPOSAL:**

Records on an investigation in progress are retained until the investigation is completed. If the investigation results in a determination that no misconduct occurred, or that any misconduct was not significant enough to warrant official sanction, the record relating to the investigation is destroyed. If an investigation results in official sanction, a record of such sanction is maintained for the duration of the sanction and is they destroyed. Disposal is by burning or shredding.

**SYSTEM MANAGER AND ADDRESS:**

Director, Division of Management Survey and Review, National Institutes of Health, Building 31, Room 4C02, 9000 Rockville Pike, Bethesda, MD 20892.

**NOTIFICATION PROCEDURE:**

Individuals are routinely notified in writing when they become the subject of a record in this system, unless a law enforcement agency has instructed PHS not to do so. Subject individuals are also informed routinely when their records are deleted from the system. Individuals may request notification by writing to the system manager at the address above; provide your full name and state that the inquiry concerns Privacy Act system of records number 09–25–0151.

The requester must also verify his or her identity by providing either a notarization of the request or a written certification that the requester is who he or she claims to be and understands that the knowing and willful request for acquisition of a record pertaining to an individual under false pretenses is a criminal offense under the Act, subject to a fine of not more than five thousand dollars.

**RECORD ACCESS PROCEDURE:**

Individuals may write to the system manager at the address above and provide the same information as required for notification. Requesters should also reasonably specify the record contents being sought. Individuals may also request listings of accountable disclosures that have been made of their records, if any.

**CONTESTING RECORD PROCEDURES:**

Write to the system manager and reasonably identify the record and the information being contested; and state your reasons for requesting the change, along with supporting information to show that the record is untimely, incomplete, irrelevant or inaccurate.

**RECORD SOURCE CATEGORIES:**

Information in these records is obtained from subject individuals, awardee institutions or organizations, PHS agencies and organizations responsible for investigations.

**SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:**

None.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[CO–942–08–4520–12]

### Colorado; Filing of Plats of Survey

May 18, 1987.

The plats of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10:00 A.M., May 18, 1987.

The plat representing the dependent resurvey of a portion of the subdivisional lines and the survey of the subdivision of section 29, T. 33 N., R. 8 E., New Mexico Principal Meridian, Colorado, Group No. 784, was accepted May 8, 1987.

The plat representing the dependent resurvey of a portion of the subdivisional lines and the survey of the subdivision of certain sections, T. 47 N., R. 7 W., New Mexico Principal

Meridian, Colorado, Group No. 786, was accepted May 7, 1987.

The plat representing the dependent resurvey of portions of the subdivisional lines, line 3–4, C.E. 402, line 4–1, C.E. 1179 and the subdivision of section 6, and the survey of lots 33 and 35 in section 6, T. 1 N., R. 101 W., Sixth Principal Meridian, Colorado, Group No. 790, was accepted May 7, 1987.

These surveys were executed to meet certain administrative needs of this Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado 80215.

Gary T. Oviatt,

*Acting Chief, Cadastral Surveyor for Colorado.*

## Grazing Advisory Board; Meeting for the Worland District, WY

**AGENCY:** Bureau of Land Management, Department of the Interior.

**ACTION:** Notice of meeting.

**SUMMARY:** Pursuant to the Taylor Grazing Act of 1934, the Public Rangelands Improvement Act of 1978, the Federal Land Policy and Management Act of 1976, and the Executive Order 12548 of February 14, 1986, notice is hereby given of a meeting of the Worland District Grazing Advisory Board to be held at 10:00 a.m., June 18, 1987, in the conference room at the BLM District Office, 101 South 23 Street, Worland, Wyoming.

The Agenda for the meeting includes:

1. Review of FY 1987 range improvement projects.
2. Discussion and Recommendations for proposed FY 1988 range improvement projects.
3. Review of current Allotment Management Plan Development.
4. Range Program Update: Grazing Agreements, Grazing Decisions, and Rangeland Monitoring.
5. Discussion of Washakie and Cody R.A. RMPs
6. Opportunity for the public to present information or make comments.

The meeting will be open to the public. Interested persons may make oral statements to the Board during the public comment period, or file written statements for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager in writing by June 11, 1987.

**DATE:** June 18, 1987, 10:00 a.m.

**ADDRESSES:** Bureau of Land Management, 101 South 23rd Street, Worland, Wyoming.

**FOR FURTHER INFORMATION CONTACT:** Chester E. Conard, District Manager, Bureau of Land Management, P.O. Box 119, Worland, Wyoming 82401, (307) 347–9871.

**SUPPLEMENTARY INFORMATION:** Summary minutes of this meeting will be on file in the District Office and available for a public inspection (during regular business hours) within 30 days of the meeting.

Chester E. Conard,

*District Manager.*

## Bureau of Reclamation

### Information Collection Submitted to OMB for Review

**AGENCY:** Bureau of Reclamation, Department of the Interior.

**SUBJECT:** Information Collection Submitted to OMB for Review.

**SUMMARY:** The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contacting the Bureau Clearance Officer at the telephone number listed below. Comments and suggestions on the requirement should be made directly to the Bureau Clearance Officer and the Office of Management and Budget Interior Desk Officer at (a.c. 202) 395–7340.

Title: 43 CFR Part 428, Acreage Limitation—Bureau of Reclamation Rules and Regulations

Bureau Form Numbers: 7–1781A and 7–1781B

Frequency: Annual

Description of respondents: Water user organizations subject to the acreage limitation provisions of Federal Reclamation law

Annual Response: 386

Annual Burden Hours: 23,760

Bureau Clearance Officer: Alma Gonzales, (a.c. 202) 343–4249.

Dated: May 19, 1987.

Wayne Merchant,

*Principal Deputy Assistant Secretary—Water and Science.*

## INTERNATIONAL TRADE COMMISSION

### Certain Circular Welded Carbon Steel Pipes and Tubes From Turkey; Request for Comments Concerning the Institution of a Section 751(b) Review Investigation

**AGENCY:** United States International Trade Commission.

**ACTION:** Request for comments regarding the institution of a section 751(b) review investigation concerning the Commission's affirmative determinations in investigation No. 701–TA–253, Certain Circular Welded Carbon Steel Pipes and Tubes from Turkey.

**SUMMARY:** The Commission invites comments from the public on whether changed circumstances exist sufficient to warrant the institution of an investigation pursuant to section 751(b) of the Tariff Act of 1930 (19 U.S.C. 1675(b)) to review the Commission's affirmative determinations in investigation No. 701–TA–253 (Final), regarding certain circular welded carbon steel standard and line pipes and tubes from Turkey. The purpose of the proposed 751(b) review investigation, if instituted, would be to determine whether an industry in the United States would be materially injured, or would be threatened with material injury, or the establishment of an industry in the United States would be materially retarded, by reason of imports of certain circular welded carbon steel standard and line pipes and tubes from Turkey if the countervailing duty order regarding such merchandise were to be modified or revoked.[1]

**FOR FURTHER INFORMATION CONTACT:** Daniel Leahy (202–523–1376), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002. Persons with mobility impairments

[1] The term "welded carbon steel standard pipes and tubes" covers welded carbon steel pipes and tubes of circular cross section, 0.375 inch or more but not over 16 inches in outside diameter, provided for in items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256A, 610.3256, and 610.4925 of the Tariff Schedules of the United States Annotated (TSUSA). The term "welded carbon steel line pipes and tubes" covers welded carbon steel pipes and tubes of circular cross section, with walls not thinner than 0.065 inch, 0.375 inch or more but not over 16 inches in outside diameter, conforming to American Petroleum Institute specifications for line pipe, provided for in TSUSA items 610.3208 and 610.3209.

who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–523–0161.

**SUPPLEMENTARY INFORMATION:** On February 23, 1988, the Commission issued its determinations in investigation No. 701–TA–253 (Final), Certain Welded Carbon Steel Pipes and Tubes from Turkey (51 FR 7342). The Commission determined that an industry in the United States was materially injured, or threatened with material injury, by reason of imports from Turkey of welded carbon steel standard pipes and tubes which had been found by the Department of Commerce to be subsidized by the Government of Turkey. The Commission also determined that an industry in the United States was threatened with material injury by reason of imports from Turkey of welded carbon steel line pipes and tubes which had been found by the Department of Commerce to be subsidized by the Government of Turkey. On March 7, 1986, the Department of Commerce issued a countervailing duty order, notice of which was published in the Federal Register (51, FR 7934).

On April 24, 1987, the Commission received a request filed by the Government of Turkey, pursuant to section 751(b) of the Act, to review its affirmative determinations in investigation No. 701–TA–253 (Final). Under § 207.45 (a) of the Commission's rules of practice and procedure, "In the absence of good cause shown, no investigation under this section shall be instituted within 24 months of the date of publication of the notice of suspension or determination." Notice of the Commission's determinations was published in the Federal Register of March 3, 1986. The Government of Turkey contends that the circumstances of this case constitute "good cause" for conducting an immediate review.

**Written Comments Requested**

Pursuant to § 207.45(b)(2) of the Commission's Rules of Practice and Procedure (19 CFR 207.45(b)(2)), the Commission requests comments concerning whether the following alleged changed circumstances are sufficient to warrant institution of a review investigation: The domestic industry has experienced dramatic recovery in the last twelve months. Also, as a consequence of the imposition of the countervailing duty order, shipments of the subject pipe and tube from Turkey have been replaced by other imports, not by domestic pipes and tubes. Thus the domestic industry is not vulnerable to injury and would not suffer material injury if the countervailing duty order with respect to Turkey were revoked.

The Commission also invites comment on the meaning of "good cause". In particular, comments on the differences between "changed circumstances" and "good cause" are sought. The Government of Turkey has cited the following items as support for a finding of "good cause": The subject countervailing duty order has become unnecessary and unwarranted as a result of the Commission's negative determinations in investigations Nos. 731–TA–293 and 294, Certain Welded Carbon Steel Pipes and Tubes from the Philippines and Singapore (November 1986). In reaching its determinations in those cases, the Commission cumulated imports from Turkey with those from the Philippines and Singapore, as well as with those from India and Thailand. Thus the Commission again assessed the effect of imports from Turkey on the domestic industry and concluded that they were not the cause of material injury to the domestic industry. Secondly continued payment of duty deposits constitutes an extreme burden for Turkish exporters.

Finally, in view of the fact that the investigation concerning Turkey involved both standard and line pipe, whereas the investigations concerning the Philippines and Singapore involved standard pipe but not line pipe, parties are requested to provide comments on "changed circumstances" and "good cause" separately with respect to standard pipe and line pipe. A majority of the Commission has consistently found standard and line pipe to be separate like products, and has found separate industries producing those products.

**Written submissions**

In accordance with § 201.8 of the Commission's rules (19 CFR 201.8), the signed original and 14 copies of all written submissions must be filed with the Secretary to the Commission, 701 E Street NW., Washington, DC 20436. All comments must be filed no later than 30 days after the date of publication of this notice in the Federal Register. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request business confidential treatment under § 201.6 of the Commission's rules (19 CFR 201.6). Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Each sheet must be clearly marked at the top "Confidential Business Data." The Commission will either accept the submission in confidence or return it. All nonconfidential written submissions will be available for public inspection in the Office of the Secretary.

Copies of the request for review of the injury determination and any other documents in this matter are available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission, telephone 202–523–0161.

Issued: May 22, 1987.

By order of the Commission.

Kenneth R. Mason,

*Secretary.*

[FR Doc. 87–12122 Filed 5–27–87; 8:45 am]

BILLING CODE 7020-02-M

---

**[Investigation No. 337–TA–251]**

## Certain Electronic Chromatogram Analyzers; Commission Decision To Extend the Deadline for Determining Whether To Review Final Initial Determination

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Extension of deadline for deciding whether to review final initial determination.

**SUMMARY:** Notice is hereby given that the Commission has determined to extend until June 2, 1987, the deadline by which it must decide whether to review the final initial determination (ID) issued by the presiding administrative law judge (ALJ) in the above-captioned investigation.

**FOR FURTHER INFORMATION CONTACT:** Jean H. Jackson, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–1693.

**SUPPLEMENTARY INFORMATION:** On April 9, 1987, the presiding ALJ issued his final ID finding that there is no violation of section 337 in the unauthorized importation and sale of certain electronic chromatogram analyzers. The previous deadline for deciding whether to review the ALJ's final ID was May 28, 1987.

This action is taken under authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and § 201.14(b) and 210.53(h) of the Commission's rules of practice and procedure (19 CFR 201.14(b), 210.53(h)).

Copies of the nonconfidential version of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours

(8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

By order of the Commission.

Issued: May 18, 1987.

Kenneth R. Mason,

*Secretary.*

[Investigation No. 731–TA–337 (Final)]

## Certain Paint Filters and Strainers from Brazil

**AGENCY:** United States International Trade Commission.

**ACTION:** Termination of investigation.

**SUMMARY:** On May 18, 1987, the Commission received notice from the U.S. Department of Commerce of a negative final determination of sales at less than fair value in connection with the subject investigation. Accordingly, pursuant to § 207.20(b) of the Commission's rules of practice and procedure (19 CFR 207.20(b)), the antidumping investigation concerning certain paint filters and strainers from Brazil (investigation No. 731–TA–337 (Final)) is terminated.

**EFFECTIVE DATE:** May 18, 1987.

**FOR FURTHER INFORMATION CONTACT:** Brian Walters (202–523–0104), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002. Information may also be obtained via electronic mail by calling the Office of Investigations' remote bulletin board system for personal computers at 202–523–0103. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–523–0161.

*Authority:* This investigation is being terminated under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 201.10 of the Commission's rules (19 CFR 201.10).

By order of the Commission.

Issued: May 21, 1987.

Kenneth R. Mason,

*Secretary.*

[Investigation No. 337–TA–190]

## Certain Softballs and Polyurethane Cores Therefore; Remand of Investigation to Administrative Law Judge and Denial of Motions to Strike

**AGENCY:** U.S. International Trade Commission.

**ACTION:** The U.S. International Trade Commission has determined to remand the above-captioned investigation to the presiding administrative law judge (ALJ) for further proceedings and for issuance of an initial determination. The Commission has also determined to deny two motions to strike.

**FOR FURTHER INFORMATION CONTACT:** Jack Simmons, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E. Street, NW., Washington, DC 20436, telephone 202–523–0493. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal at 202–724–0002.

**SUPPLEMENTARY INFORMATION:** At the conclusion of the above-captioned investigation, the Commission determined that there was no violation of section 337 of the Tariff Act of 1930. 19 U.S.C. 1337. The case was appealed to the U.S. Court of Appeals for the Federal Circuit Court (CAFC) and on September 17, 1986, the CAFC vacated the Commission's determinations of patent invalidity and absence of tendency to injure, and remanded the investigation for a determination of the question of infringement (on which the Commission has taken no position) and for redetermination of the question of injury. *Lannom Manufacturing Co., Inc. v. U.S. International Trade Commission,* 799 F.2d 1572 (Fed. Cir. 1986).

Subsequently, Success Chemical, Co., Ltd., Taipei, Taiwan (Success), which was a respondent in the Commission's investigation but did not participate in it, failed a notice of appearance and an agreement to be bound by the terms of the protective order. Complainant Lannom Manufacturing Co. moved (Motions Nos. 190–27–C and 190–28–C) to strike both the entry of appearance and the agreement to be bound by the protective order.

The Commission has determined to remand the investigation to the ALJ for further proceedings and issuance of an initial determination on the questions of infringement of U.S. Letters Patent 3,978,225, the definition of the domestic industry, efficient and economic operation, and injury. The Commission has further determined to deny complainant Lannom's motions to strike.

Copies of the Commission's Action and Order and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161.

By order of the Commission.

Issued: May 21, 1987.

[Investigation No. TA–203–16]

## Report to the President Regarding Stainless Steel and Alloy Tool Steel

May 15, 1987.

To the President: In accordance with section 203(i)(3) of the Trade Act of 1974 (19 U.S.C. 2253(i)(3)), the United States International Trade Commission herein reports the results of an investigation concerning stainless steel and alloy tool steel.

Chairman Liebeler and Vice Chairman Brunsdale provide advice on the probable economic effect of terminating import relief provided to domestic producers of certain stainless steel and alloy tool steel products. They also provide advice on the considerations set forth in section 202(c) of the Trade Act of 1974.

Commissioner Eckes advises the President that termination of the import relief program with respect to stainless steel sheet and strip, and stainless steel plates, would not have an adverse effect on the domestic industries producing those products, assuming the continued administration of voluntary restraint agreements at present levels. He also advises that termination of the import relief program would have an adverse effect on the industries producing stainless steel bars, stainless steel wire rod, and alloy tool steel.

Commissioner Lodwick advises the President that termination of the relief program with respect to stainless steel sheets and strip, and stainless steel plates would not have an adverse effect, assuming the continued administration of the voluntary restraint agreements at present levels. He also advises that

termination of the 201 relief would have an adverse effect on the industries producing stainless steel bars, stainless steel wire rod, and alloy tool steel.

Commissioner Rohr advises the President that with respect to stainless steel sheets and strip, and stainless steel plates, termination of the import relief program would not have a significant adverse economic effect on the industries producing these products, assuming the continued administration of the voluntary restraint agreements at present levels. With respect to stainless steel bars and stainless steel wire rod, termination of the import relief program would have a significant adverse economic impact on the industries producing these products. With respect to alloy tool steel, Commissioner Rohr advises that while termination of the import relief program would have some adverse economic effects on the operation of the industry, he finds little indication that firms in this industry have any significant plans to use any further period of relief to further adjust to import competition.

The Commission instituted this investigation on January 27, 1987, following receipt of a petition filed by the Specialty Steel Industry of the United States (SSIUS) and the United Steelworkers of America (AFL–CIO), requesting that the Commission institute an investigation in order that it might advise the President of its judgment as to the probable economic effect on the domestic specialty steel industries of the termination of the import relief provided to the specialty steel industries by Presidential Proclamation 5074. Public notice of the investigation and hearing was given by posting copies of the notice at the office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of February 4, 1987 (52 FR 3501). A public hearing was held in connection with this investigation on April 2, 1987, in Washington, DC. All interested persons were afforded an opportunity to be present, to present evidence, and to be heard.

The information in this report was obtained from field work, questionnaires sent to domestic producers and importers, the Commission's files, other government agencies, briefs filed by interested parties, and other sources.

The Commission transmitted its determination in this investigation to the President on May 15, 1987. The views of the Commission are contained in USITC Publication 1975 (May 1987), entitled "Stainless Steel and Alloy Tool Steel: Report to the President On Investigation No. TA–203–16 Under Section 203 of the Trade Act of 1974."

By order of the Commission.

Issued: May 15, 1987.

Kenneth R. Mason,

*Secretary.*

**[Investigation No. 731–TA–376 (Preliminary)]**

## Certain Stainless Butt-Weld Pipe Fittings From Japan

### Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Japan of stainless steel butt-weld pipe and tube fittings, under 14 inches in inside diameter, provided for in item 610.89 of the Tariff Schedules of the United States, that are alleged to be sold in the United States at less than fair value (LTFV).

### Background

On April 2, 1987, a petition was filed with the U.S. International Trade Commission and the U.S. Department of Commerce by counsel for Flowline Corp., New Castle, PA, alleging that an industry in the United States is materially injured and threatened with material injury by reason of LTFV imports from Japan of stainless steel butt-weld pipe and tube fittings, under 14 inches in inside diameter. Accordingly, effective April 2, 1987, the Commission instituted preliminary investigation No. 731–TA–376 (Preliminary).

Notice of the institution of the Commission's investigation was given by posting copies of the notice in the office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of April 10, 1987 (52 FR 11759). The conference was held in Washington, DC, on April 27, 1987, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on May 18, 1987. The views of the Commission are contained in USITC Publication 1978 (May 1987), entitled "Certain Stainless Steel Butt-Weld Pipe Fittings From Japan. Determination of the Commission in Investigation No. 731–TA–376 (Preliminary) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

By order of the Commission.

Issued: May 18, 1987.

Kenneth R. Mason,

*Secretary.*

## DEPARTMENT OF JUSTICE

### Information Collection(s) Under Review

May 22, 1987.

The Office of Management and Budget (OMB) has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. Entries are grouped into submission categories. Each entry contains the following information: (1) The name and telephone number of the Agency Clearance Officer (from whom a copy of the form/supporting documents is available); (2) the office of the agency issuing the form; (3) the title of the form; (4) the agency form number, if applicable; (5) how often the form must be filled out; (6) who will be required or asked to report; an estimate of the number of responses; (7) an estimate of the total number of respondents; (8) an estimate of the total number of hours needed to fill out the form; (9) an indication of whether section 3504(h) of Pub. L. 96–511 applies; and, (10) the name and the telephone number of the person or office responsible for the OMB review. Copies of the proposed form(s) and the supporting documentation may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions regarding the item(s) contained in this list should be directed to the reviewer listed at the end of each entry *AND* to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer *AND* the

**Lodging of Consent Decree Pursuant to Clean Water Act; Birdsell**

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on May 12, 1987, a proposed consent decree in *United States* v. *Birdsell,* Civil Action No. A86–147, was lodged with the United States District Court for the District of Alaska. The complaint filed by the United States alleged violations of the Clean Water Act by defendant due to discharges of pollutants from defendant's placer gold mine. The consent decree provides for payment of a civil penalty and for injunctive relief to restrain further violations of the Act.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Birdsell,* D.J. Ref. No. 90–5–1–1–2594. The proposed consent decree may be examined at the office of the United States Attorney, Federal Building and U.S. Courthouse, 701 C Street, Room C–252, Anchorage, Alaska 99513, and at the Region 10 Office of the Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101. A copy of the consent decrees may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.70 payable to the Treasurer of the United States.

**Roger J. Marzulla,**

*Deputy Assistant Attorney General, Land and Natural Resources Division.*

## Drug Enforcement Administration

### Manufacturer of Controlled Substances; Registration; Penick Corporation

By Notice dated March 26, 1987, and published in the **Federal Register** on April 4, 1987 (52 FR 10826), Penick Corporation, 158 Mount Olivet Avenue, Newark, New Jersey 07114, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

| Drug | Schedule |
|---|---|
| Pholcodine (9314) | I |
| Alphacetylmethadol (9603) | I |
| Codeine (9050) | II |
| Dihydrocodeine (9120) | II |
| Oxycodone (9143) | II |
| Diphenoxylate (9170) | II |
| Ethylmorphine (9190) | II |
| Hydrocodone (9193) | II |
| Pethidine (meperidine) (9230) | II |
| Methadone (9250) | II |
| Methadone-Intermediate, 4-cyano-2-dimethylamino-4,4-diphenyl butane (9254). | II |
| Morphine (9300) | II |
| Thebaine (9333) | II |
| Opium extracts (9610) | II |
| Opium fluid (9620) | II |
| Tincture of opium (9630) | II |

## DEPARTMENT OF LABOR

### Pension and Welfare Benefits Administration

### Advisory Council on Employee Welfare and Pension Benefits Plans; Work Group Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Work Group on Retiree Health of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9:30 a.m., Monday, June 29, 1987, at the American Association of Retired Persons, 1909 K Street, NW., Room 830, Washington, DC 20049.

This eight-member work group was formed by the Advisory Council to study issues relating to retiree health benefit programs for employee welfare plans covered by ERISA.

The purpose of the June 29 meeting is to determine what legal rights retirees have with regard to the post-retirement health benefit promise made by the employer. The work group will take testimony from employee representatives, employer representatives and other interested individuals and groups regarding subject matter.

Individuals, or representatives of organizations, wishing to address the work group should submit written requests on or before June 22, 1987 to Charles W. Lee, Jr., Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N–5677, 200 Constitution Avenue, NW., Washington, DC 20210. Oral presentations will be limited to ten minutes, but witnesses may submit an extended statement for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before June 22, 1987.

Signed at Washington, DC this *22nd* day of May, 1987.

**David M. Walker,**

*Deputy Assistant Secretary for Pension and Welfare Benefits Administration.*

BILLING CODE 4510-29-M

## NATIONAL CAPITAL PLANNING COMMISSION

### Delegations of Authority; Amendments

**AGENCY:** National Capital Planning Commission.

**ACTION:** Notice of amendments to Delegation of Authority.

**SUMMARY:** The amendments authorize the Executive Director, in cases pending before the DC Zoning Commission in which he concludes there is no Federal interest and so advises the National Capital Planning Commission, to report directly to the Zoning Commission.

DATE: May 28, 1987.

ADDRESS: National Capital Planning Commission, 10th Floor, 1325 G Street, NW., Washington, DC 20576.

FOR FURTHER INFORMATION CONTACT: Katherine Barns Soffer, General Counsel, National Capital Planning Commission, Phone: (202) 724-0170.

**Delegations of Authority**

The National Capital Planning Commission, at its August 28, 1986 meeting, agreed to amend its Delegations of Authority, previously published as amended at 43 FR 20679, as follows:

1. Add a new paragraph:

**III. Delegations to the Executive Director**

10. In Zoning Commission cases where the Executive Director determines that there is no Federal interest and so advises the Commission, reports directly to the Zoning Commission.

2. Conform the two preceding paragraphs:

Delete the word "and" after the semicolon in paragraph 8, Part III, Delegations to the Executive Director; and change the period at the end of paragraph 9, Part III, to a semicolon and add the word "and".

Reginald W. Griffith,
*Executive Director.*

## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

**Agency Information Collection Activities Under OMB Review**

AGENCY: National Endowment for the Arts.

ACTION: Notice.

SUMMARY: The National Endowment for the Arts (NEA) has sent to the Office of Management and Budget (OMB) the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATE: Comments on this information collection must be submitted by June 19, 1987.

ADDRESSES: Send comments to Mr. Joseph Lackey, Office of Management and Budget, New Executive Office Building, 726 Jackson Place NW., Room 3002, Washington, DC 20503; (202-392-7316). In addition, copies of such comments may be sent to Ms. Marianna Dunn, National Endowment for the Arts, Administrative Services Division, Room 203, 1100 Pennsylvania Avenue NW., Washington, DC 20506 (202-682-5484).

FOR FURTHER INFORMATION CONTACT: Ms. Marianna Dunn, National Endowment for the Arts, Administrative Services Division, Room 203, 1100 Pennsylvania Avenue NW., Washington, DC 20506; (202-682-5484) from whom copies of the documents are available.

SUPPLEMENTARY INFORMATION: The National Endowment for the Arts requests the reinstatement of a previously approved collection. The entry is issued by the Endowment and contains the following information: (1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) an estimate of the number of responses; (6) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. 3504(h).

*Title:* Dance Application Guidelines FY 1988.
*OMB number:* 3135-0047.
*Frequency of collection:* One-time.
*Respondents:* Individuals and non-profit institutions.
*Use:* Guideline instructions and applications elicit relevant information from individuals and nonprofit organizations that apply for funding under specific Program categories. This information is necessary for the accurate, fair and thorough consideration of competing proposals in the peer review process.
*Estimated number of respondents:* 1,080.
*Estimated hours for respondents to provide information:* 14,150.

Murray R. Welsh,
*Director, Administrative Services Division, National Endowment for the Arts.*

**Ad Hoc Advisory Committee on Arts Education Study; Meeting**

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Ad Hoc Advisory Committee on Arts Education Study (1987) to the National Council on the Arts will be held on June 13, 1987, from 9:00 a.m.-5:30 p.m. in room MO-9 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting will be open to the public on a space available basis. The topic of discussion will be a report on the state of arts education mandated by Congress which is due December 1987.

If you need special accommodations due to a disability, please contact the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW. Washington DC 20506, 202/682-5532, TTY 202/682-5496 at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

John H. Clark,
*Director, Council and Panel Operations, National Endowment for the Arts.*
May 22, 1987.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-261]

**Carolina Power and Light Co., H. B. Robinson Steam Electric Plant, Unit No. 2; Exemption**

I

Carolina Power & Light Company (the licensee) is the holder of Facility Operating License No. DPR-23, which authorizes operation of the H. B. Robinson Steam Electric Plant, Unit No. 2. The license provides, among other things, that the facility is subject to all rules, regulations and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility is a Westinghouse pressurized water reactor located at the licensee's site in Darlington County, South Carolina.

II

Paragraph III.A.3 of Appendix J to 10 CFR Part 50 requires that all Type A (Containment Integrated Leak Rate) tests be performed in accordance with ANSI N45.4-1972, "Leakage Rate Testing of Containment Structures for Nuclear Reactors." ANSI N45.4 requires that leakage calculations be performed using the Total Time method or the Point-to-Point method.

By letter dated April 17, 1987, the licensee requested an exemption from 10 CFR Part 50, Appendix J, Paragraph III.A.3, with regard to Type A, Containment Integrated Leak Rate Test calculations. Specifically, the licensee requested an exemption to permit the use of the Mass-Point method (as

provided in ANSI/ANS 56.8–1981, paragraph 5) rather than the Total Time method described in ANSI N45.4–1972, paragraph 7.9. In support of its request, the licensee notes that the Mass-Point method is a newer and more accurate method of calculating containment leakage. The licensee also notes that utilizing the Total-Time method produces results which are less reliable than the Mass-Point method. The licensee has, therefore, requested the exemption to enable use of the Mass-Point method.

The acceptability of the exemption request is addressed below. More details are contained in the Commission's related Safety Evaluation concurrently issued with this exemption.

III

The licensee's exemption request under consideration involves Type A testing requirements of Appendix J for containments. As indicated in the licensee's letter of April 17, 1987, until about 1976, containment leakage rate calculations were performed using only the Point-to-Point or the Total Time methods in accordance with ANSI N45.4–1972. In 1976, the NRC staff unofficially recognized the merits of a newer methods, the Mass-Point method. ANSI N45.4–1972 has since been revised to incorporate the Mass-Point method into ANSI/ANS 56.8–1981. A proposed revision to Appendix J, which would permit use of the the Mass-Point method, was published for public comment on October 29, 1986 (51 FR 39538); The licensee submits that the more accurate technique provides increase confidence in the integrity of the containment.

In addition, the licensee provided a determination that special circumstances exist under 10 CFR 50.12(a). The rule specifies particular methods for calculating leakage to assure that accurate and conservative methods are used to assess the results of containment leak rate tests. As discussed above, the license has determined that this underlying purpose is achieved with use of the more accurate Mass-Point method. Therefore, they concluded that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. The staff agrees with the licensee's conclusion and has determined that under 10 CFR 50.12(a)(2)(ii) special circumstances exist. Based on the above discussion, the licensee's request for exemption (allowing the Mass-Point technique for calculating containment leakage rate) from the requirements of Appendix J is granted for H. B. Robinson, Unit No. 2, with the condition that the test be conducted over a period of at least 24 hours.

IV

The Commission has determined that, pursuant to 10 CFR 50.12, this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission has further determined that special circumstances, as provided in 10 CFR 50.12(a)(2)(ii), are present justifying the exemption. Namely, application of the regulation in the particular circumstances is not necessary to achieve its underlying purpose, which is to ensure that accurate and conservative methods are used to assess the results of containment leak rate tests. The Mass-Point method, which provides accurate results, has been a widely used method of performing leak rate calculations and satisfies the underlying purpose of the rule.

Accordingly the Commission hereby grants an exemption from Paragraph III.A.3 of Appendix J to 10 CFR Part 50 to allow use of the Mass-Point method in performing leakage rate calculations associated with Containment Integrated Leakage Rate Tests, provided that the minimum test duration is 24 hours.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this Exemption will have no significant impact on the environment (51 FR 18296).

This Exemption is effective upon issuance.

Dated at Bethesda, Maryland this 22 day of May, 1987.

For the Nuclear Regulatory Commission.

**Steven A. Varga,**

*Director, Division of Reactor Projects I–II, Office of Nuclear Reactor Regulation.*

BILLING CODE 7590–01–M

---

[Docket No. 50–456]

## Commonwealth Edison Co., Braidwood Station, Unit No. 1; Issuance of Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission or NRC), has issued Facility Operating License No. NPF–70 to Commonwealth Edison Company (the licensee) which authorizes operation of Braidwood Station, Unit No. 1 (the facility) at reactor core power levels not in excess of 3411 megawatts thermal (100 percent rated power). This license is restricted to power levels not in excess of five percent of rated power (170 megawatts thermal).

Braidwood Station, Unit No. 1 is a pressurized water reactor located in Will County, Illinois, about 20 miles south-southwest of Joliet, Illinois, in Reed Township. The license is effective as of the date of issuance.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriation findings as required by the Act and the Commission's regulations in 10 CFR Chapter I which are set forth in the License. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the Federal Register in December 15, 1978 (43 FR 58659).

The Commission has determined that the issuance of this license will not result in any environmental impacts other than those evaluated in the Final Environmental Statement and the Assessment of the Effect of License Duration on Matters Discussed in the Final Environmental Statement for the Braidwood Station, Units 1 and 2 (dated June 1984) since the activity authorized by the license is encompassed by the overall action evaluated in the Final Environmental Statement.

For further details with respect to this action, see (1) Facility Operating License No. NPF–70, with Technical Specifications and the Environmental Protection Plan; (2) the report of the Advisory Committee on Reactor Safeguards, dated February 11, 1985; (3) the Commission's Safety Evaluation Report, dated November 1983 (NUREG–1002), and Supplements 1 through 3; (4) the Final Safety Analysis Report and Amendments thereto; (5) the Environmental Report and supplements thereto; (6) and the Final Environmental Statement, dated June 1984, (NUREG–1026).

These items are available for inspection at the Commission's Public Document Room located at 1717 H Street, NW. Washington, DC 20555 and in the Wilmington Township Public Library, 201 S. Kanakee Street, Wilmington, Illinois 60481. A copy of Facility Operating License NPF–59 may be obtained upon request addressed to

the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects III/IV/V. Copies of the Safety Evaluation Report and Supplements 1 through 3 (NUREG–1002) and The Final Environmental Statement (NUREG–1026) may be purchased at current rates from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, and through the NRC GPO sales program by writing to the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013–7082. Dated at Bethesda, Maryland this 21st day of May 1987.

For the Nuclear Regulatory Commission.

Janice A. Stevens,

*Project Manager, Project Directorate III–2, Division of Reactor Projects—III, IV, V, and Special Projects.*

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–24482; File No. SR–Amex–87–10]

## Self-Regulatory Organizations; Proposed Rule Change; American Stock Exchange, Inc. Relating to Surveillance Memorandum Regarding Major Market Index Options To Be Traded on European Options Exchange.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 6, 1987, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. ("AMEX" or "Exchange") proposes to enter into a Memorandum of Understanding with Optiebeurs N.V. (European Options Exchange or "EOE") providing for the exchange of surveillance information. The purpose of this mutual undertaking is to assure the adequacy of surveillance capability in connection with the trading on both exchanges of options based on the Major Market Index. The full text of the proposed Memorandum of Understanding ("Surveillance Memorandum") is attached hereto as an Exhibit.

The XMI options to be traded on EOE will be issued by, and cleared and settled through, the Options Clearing Corporation ("OCC"). Contemporaneously with the filing of this proposed rule change, it is anticipated that OCC will file rules changes enabling it to issue, clear and settle XMI options traded on EOE.

The text of the proposed rule change is available at the Office of the Secretary, American Stock Exchange, Inc. and at the Commission.

### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change*

(1) Purpose

AMEX has developed a broad market index, known as the Major Market Index, based on the values of twenty well known, highly capitalized U.S. stocks and it currently trades options based on such index ("XMI options"). Such options are issued by, and cleared and settled through OCC. These are cash settled options. AMEX proposes to enter into a licensing agreement with EOE authorizing EOE to use the names "Major Market Index" and "XMI" in connection with options traded on EOE and based on such index. Such options will have the same terms and conditions as XMI options traded on AMEX, will be issued by and subject to the rules of OCC, will be cleared and settled through the facilities of OCC and, thus, will be indentical to and fungible with the XMI options traded on AMEX. Positions in XMI options established in transactions effected on EOE may be liquidated in transactions effected on AMEX, and vice versa.

It is contemplated that EOE will commence trading XMI options on its trading floor each business day several hours prior to the opening of trading on AMEX, and that there will normally be an overlap of trading in XMI options on both exchanges of approximately one hour each day. All exercises of XMI options on a given day, whether purchased in transactions on EOE or on AMEX, will be settled on the basis of the closing value of the Major Market Index published by AMEX on such day. Although, at present, the Major Market Index is not calculated and published prior to the opening of the Securities markets in New York City (AMEX and New York Stock Exchange) each business day, all of the stocks comprising the Index are to varying extents traded in one or more European markets during the hours EOE is open for trading. AMEX and EOE have agreed to cooperate in efforts to collect and disseminate, or cause others to collect and disseminate, European pricing information with respect to such stocks and to display such information in a manner which will reflect the impact of

current European prices on the previous day's closing level of the index. As soon as the New York markets open each day and the AMEX commences to calculate the index, such values will be displayed on the EOE trading floor and will be available through vendors servicing European business centers.

EOE has agreed to introduce for trading only such series of XMI options as the AMEX shall have determined to introduce, and to the extent possible all new series will commence trading on both exchanges on the same day. EOE has further agreed to adopt rules and requirements in certain areas relating to XMI options which will be similar to the corresponding rules and requirements of the AMEX. These include position limits; exercise limits; exercise of options, including time for submission of exercise notices; procedures for allocation of exercise notices; margin requirements; and delivery of disclosure documents (limited to EOE's own disclosure documents).

In view of the fact that XMI options to be traded on EOE will be identical to and fungible with the options traded on AMEX, and it is anticipated that positions established in transactions on one exchange may be offset by transactions effected on the other exchange or exercised against positions resulting from transactions effected on the other exchange, it is essential that the two exchanges coordinate their surveillance activities regarding trading in XMI options. The purpose of the Surveillance Memorandum is to provide for the exchange of surveillance information as needed by the two exchanges to carry out their respective surveillance functions. Paragraph 1 of the Surveillance Memorandum provides for each exchange to conduct routine surveillance to trading in XMI options in its own marketplace and, to the best of its ability, to assure compliance by its members with all rules and requirements applicable to options trading in such marketplace. Paragraph 3 further calls for the delivery by OCC to each Exchange on a daily basis of the combined clearing information regarding the previous day's activity in XMI options on both exhanges. This constitutes the bulk of the information needed to carry out routine market surveillance.

In addition, paragraph 4 of the Surveillance Memorandum, provides that whenever either exchange in the performance of its surveillance functions needs the cooperation of the other exchange to investigate any question or complaint regarding the propriety of any transaction or series of transactions in XMI options, or regarding any other aspect of trading and/or transactions therein that might be significant for rule enforcement purposes, it may request the other exchange for relevant information and the other exchange will be obligated, using its best efforts and in accordance with its own rules, to obtain the information. Paragraph 5 of the Surveillance Memorandum states that the results of any such investigation shall be made available promptly to the exchange making the request, except that when the inquiry involves details concerning the identity and trading activity of specific customers of member firms, the exchange to whom the request is directed may decline to furnish the information in cases in which it determines disclosure of such customer information (i) would not necessarily serve the interests of maintaining fair and orderly securities markets and options markets and/or protecting the investing public, or (ii) would be inconsistent with the laws applicable to such exchange or with its rules and regulations. The AMEX staff has informed the Commission staff that, with respect to client information, it expects that the provisions of paragraph 5 will be used only in exceptional circumstances and only after senior officials from both exchanges have had an opportunity for consultation about the nature, scope, and intent of the request. Otherwise, customer information will be provided on a routine basis. Even in cases where one of the exchanges determines that in accordance with the above standards it is precluded from turning over specific customer information, it is nevertheless required to make full inquiry into the matter and furnish such of the information as it is not prohibited from disclosing. Finally, under paragraph 7, each exchanges agrees to notify the other of any disciplinary action taken against its members with respect to activites which could affect the markets on both exchanges.

(2) Statutory Basis

The mutual undertaking by EOE and AMEX to exchange surveillance information is constent with the purposes and requirements of section 6(b)(1), and (5) and (6) of the Securities Exchange Act of 1934 (the "Act") in that each exchange will be better able to carry out its responsibilities to regulate its marketplace and assure compliance by its members with applicable rules and requirements. Where a security is traded in more than one market, experiance has demonstrated that appropriate surveillance requires routine review of the total trading in all markets and, in case specific questions arise from such routine surveillance, the ability of each such market to obtain more detailed information not only from its own members but also from the other marketplace where the security is traded and from the members of such other marketplace, particularly where it can be anticipated that some investors in such security may effect transactions in more than one market. Therefore, the AMEX will need access to information concerning the trading of XMI options on EOE in order to assure that it has the capability to comply and to enforce compliance by its members with the provisions of the Act and the rules and regulations thereunder and with its own rules, to detect possible fraudulent or manipulative acts or practices and to promote just and equitable principles of trade. Similarly, EOE will benefit from access to information concerning trading of XMI options on Amex in carrying out it surveillance and compliance functions under Dutch law. The mutual access by AMEX and EOE to surveillance information pursuant to the Surveillance Memorandum and the ability of each to call upon the other to conduct specific inquiries will "foster cooperation and coordination with persons engaged in regulating, clearing, settling . . . and facilitating transactions in securities" and help to "perfect the mechanism of a free and open market . . . and, in general, to protect investors."

*B. Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange believes that the proposed rule change will not impose any burden on competition.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others*

No written comments were solicited or received with respect to the proposed rule change.

**III. Date of Effectiveness of the Proposed Rule Change and timing for Commission Action**

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invted to submit written data, views and arguments concerning the foregoing. The Commission is particularly interested in receiving comments concerning paragraph 5 of the AMEX–EOE Surveillance Memorandum and whether it provides the proper framework for disclosure of customer information. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and coping at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 18, 1987.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 15, 1987.

Jonathan G. Katz,

*Secretary.*

**Exhibit—Memorandum of Understanding Between Optiebeurs N.V. (European Options Exchange) and American Stock Exchange, Inc., Regarding the Exchange of Surveillance Information**

This Memorandum of Understanding between the European Options Exchange ("EOE") and the American Stock Exchange, Inc. ("Amex") sets forth the undertakings by the parties to conduct surveillance and to furnish each other with surveillance information pursuant to the provisions of Section 8 of the Agreement dated March , 1987 (the "Licensing Agreement") between EOE and Amex (the "exchanges").

1. EOE and Amex shall each be responsible for conducting routine surveillance relating to all transactions in option contracts based on the Major Market Index ("XMT options") effected in their respective markets and, to the best of their ability, for assuring compliance by their respective members with all rules and requirements applicable to options trading in their respective markets.

2. Each exchange shall cause all transactions in XMI options effected in their respective markets to be reported in accordance with the procedures applicable to reporting of options transactions generally in such market, and each exchange shall grant the other access to such information together with any summaries, or other reports of XMI options trading which either exchange routinely prepares and makes available to its members or releases publicly.

3. Each exchange shall be authorized to receive daily from the Options Clearing Corporation ("OCC") a computerized schedule (currently known as the "Data Service Tape") of the previous day's activity in XMI options on both exchanges, such schedule to consist of the following information:

(a) Clearing data with regard to all XMI options transactions, including identification of buyer and seller clearing members, number of contracts, price, type of account, whether an opening or closing transaction, and marketmaker identification and/or clearing member give-up information ("CMTA") if applicable.

(b) Information detailing all exercises and exercise assignments relating to XMI options.

(c) Information regarding all position adjustments among clearing members or among accounts effected by OCC.

(d) Information detailing the XMI option positions held by each clearing member subdivided by account type: C—customer, F—firm, M—marketmaker (currently known as the "Open Interest Distribution Report").

4. Whenever either Amex or EOE wants the cooperation of the other exchange to investigate any question and/or complaint regarding the propriety of any transaction or series of transactions in XMI options and/or the stocks comprising the Major Market Index, or regarding any other aspect of trading and/or transactions that might be significant for rule enforcement purposes, it shall apply to the other exchange, stating its reasons for the request. The other exchange shall then comply with such request, and shall use its best efforts, in accordance with its rules, to obtain relevant information from its membership.

5. The results of any investigation conducted by one exchange ("requested exchange") pursuant to such request of the other exchange ("requesting exchange") shall be made available promptly to the requesting exchange, unless the information requested involves details concerning the identity and trading activity of specific customers or clients ("client information") of members of the requested exchange and such exchange shall have made a good faith determination that the furnishing of such client information:

(i) Would not necessarily serve the interests of maintaining fair and orderly securities and options markets and/or protecting the investing public; or

(ii) Is inconsistent with applicable law, including Articles, Rules and Regulations of the requested exchange.

6. If the requested exchange which has obtained client information determines that, in accordance with the preceding paragraph, it may not disclose such information to the requesting exchange, it shall nevertheless ascertain what non-client information developed in the course of its inquiry can be disclosed and promptly furnish the same to the requesting exchange and shall cooperate as fully as possible with the latter to complete the investigation and enforce compliance by its members with all applicable rules and requirements.

7. Each exchange shall promptly notify the other of any action taken by it to sanction any of its members arising out of activities involving the trading of XMI options under circumstances which could affect the market therein on both exchanges, and, to the extent not inconsistent with paragraph 5 hereof, shall furnish the other exchange with the details of such compliance action. At the request of either exchange, a joint task force shall be established to promptly review unusual or disruptive market conditions in XMI options or in the markets for the stocks comprising the Major Market Index.

8. (a) All information furnished by one exchange to the other pursuant to paragraphs 3, 4, 5, 6, and 7 of this Memorandum of Understanding ("surveillance information") shall be treated as confidential and shall be used solely for the purpose of carrying out market surveillance activities relating to transactions in XMI options and/or in stocks comprising the Major Market Index, provided, however, that such information may be used in a formal regulatory or legal proceeding initiated by either exchange or as to which either exchange is a party. In the event that any surveillance information obtained by one exchange from the other is to be used in such a regulatory or legal proceeding, the exchange planning to use the information shall immediately

BEST COPY AVAILABLE

notify the exchange from whom the information was received of such prospective use, in writing.

(b) Each exchange agrees to take all reasonable measures to maintain the confidentiality of any surveillance information received from the other, except to the extent that disclosure is required in connection with a regulatory proceeding of such party or pursuant to any obligation of such party to disclose information for surveillance purposes, in the case of the Amex, to any other self-regulatory organization in the United States or to the Securities and Exchange Commission, or, in the case of the EOE, to the Commissie van Toezicht op de Optiebeurs or the public prosecutor (Officier van Justitie). Such surveillance information shall not be disclosed to any other person for any purpose, except where required by the order of a court or by other lawful process. In the event that either exchange is required to disclose to a third party surveillance information which it has obtained from the other exchange, it shall immediately notify the other exchange of such prospective disclosure.

9. The obligations of the parties hereunder shall commence upon the initiation of trading of XMI options on EOE and shall continue as long as the Licensing Agreement shall remain in effect and for such additional period as may be required to complete any inquiries which may be under way at the time of the termination of the Licensing Agreement.

10. Any request by either exchange for information pursuant to the terms of this Memorandum of Understanding may be either in writing or made orally, provided in the latter event that the request is made by a duly authorized representative of the requesting exchange who has been so designated from time to time to the other exchange in writing.

11. Nothing in this Memorandum of Understanding is intended to create any rights on behalf of any person not a party hereto to suppress the exchange of information, including client information, between AMEX and EOE.

Agreed to this ____ day of March 1987.

BILLING CODE 8010-01-M

[Release No. 34-24491; File No. SR-CBOE-87-16]

## Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

On April 30, 1987, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] a proposed rule change to extend for ninety days the Exchange's pilot program for market maker participation in the CBOE's Retail Automatic Execution System ("RAES" or "System") pilot in equity options. The RAES equity options pilot, and the eligibility criteria for market maker participation in RAES, have been in place since October 1986 pursuant to Commission approval.[3] Under this proposed rule change, the eligibility pilot program will continue to operate in the same manner as it has in the prior six months.

Pursuant to the terms of the pilot, all CBOE registered market makers are eligible to participate in the RAES equity options pilot under the following conditions. The market maker must use his own trading acronym and password to log into the System, and all trades in which he participates clear into his designated account. A market maker may designate either his individual or joint account for RAES trades. If he designates his joint account, however, only one joint account participant may use the account at one time in accordance with exchange rules and interpretations.[4]

A market maker must sign onto RAES in person, and may stay on the System only when present in the trading crowd. The market maker must sign off the System when leaving the trading crowd, except when absent for a "brief interval." Failure to comply with these requirements will result in disciplinary action,[5] and also possibly remedial action by the Exchange's Market Performance Committee, which may include a suspension of eligibility from RAES. The pilot further provides that in the case of unusual market conditions relief from these eligibility requirements may be granted.

The CBOE has requested a ninety day extension of the pilot to enable the Exchange to gather additional information before deciding whether to modify or extend the program. The CBOE believes that continuation of the pilot without interruption will assure the least disruption to member firms and public customers who enter orders through RAES, while the Exchange is evaluating RAES market maker eligibility criteria.

Interested persons are invited to submit written data, views and arguments concerning the proposed rule change within 21 days from the date of publication of the submission in the Federal Register. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Reference should be made to File No. SR-CBOE-87-16.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC. Copies of the filing and of any subsequent amendments also will be available at the principal office of the CBOE.

---

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1985).

[3] *See* Securities Exchange Act Release No. 23490 (August 1, 1986), 51 FR 28788, in which the Commission approved a CBOE proposal to operate RAES in six equity options classes on a six month pilot basis. RAES automatically executes public customer market and marketable limit orders against participating CBOE market makers at the best bid or offer displayed at the time the customer order enters RAES. The CBOE recently submitted a proposed rule change to the Commission to extend this pilot for a ninety day period. *See* File No. SR-CBOE-87-17. The Commission approved a six-month pilot for market maker participation in the RAES equities pilot in securities Exchange Act Release No. 23501 (September 4, 1986), 51 FR 32710.

[4] The CBOE prohibits two or more members of a joint account from trading in the same options class simultaneously in order to avoid competitively disadvantaging other trading crowd members. *See* CBOE Floor Procedure Committee Memorandum, dated November 3, 1982. Joint account members who participate in RAES in the Standard & Poor's 100 index option ("OEX") are exempted from this prohibition, however, because of OEX liquidity.

[5] The pilot specifies that a market maker may be disciplined under (1) CBOE Rule 6.20 which provides for a fine upon a finding by two Floor Officials that a member's conduct has impaired maintenance of a fair and orderly market or public confidence in the operations of the Exchange; and (2) Chapter XVII of the rules, the CBOE's general disciplinary jurisdiction.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a self-regulatory organization, and in particular, the requirements of section 6(b)(5) and 11A. The Commission believes that continuation of the eligibility criteria pilot for a ninety day period is appropriate given the CBOE's intention to further study the opration of the pilot.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the pilot was previously subject to public notice and comment, and the Commission has not received any adverse comments regarding the pilot's operation to date.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[6] that the proposed rule change referenced above be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Dated: May 19, 1987.

Jonathan G. Katz,

*Secretary*

[Release No. 34-24482; File No. SR-CBOE-87-17]

## Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

On April 30, 1987, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] a proposed rule change to extend the CBOE's Retail Automatic Execution System ("RAES" or "System") pilot program in equity options for ninety days.

In August, 1986, the Commission approved a CBOE rule proposal to permit RAES to be used for the execution of six selected individual equity options on a six month pilot basis.[3] RAES provides for the automatic execution of certain-sized public customer market and marketable limit orders; the System automatically executes orders entered into RAES against participating market makers in the CBOE trading crowd at the best bid or offer quoted on the CBOE floor. The RAES equities pilot also allows limit orders on the book in five of the six piloted equities options classes to trade with RAES orders. In one pilot class, International Business Machines ("IBM"), limit orders on the book do not interact with RAES orders.[4]

The CBOE has requested a ninety day extension of the equity option pilot so that it may gather additional data before deciding whether to modify or extend the program. The CBOE believes that continuation of the pilot without interruption will assure the least disruption to firms and customers using RAES while the System is evaluated by the Exchange.

Interested persons are invited to submit written data, views and arguments concerning the proposed rule change within 21 days from the date of publication of the submission in the Federal Register. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington DC 20549. Reference should be made to File No. SR-CBOE-87-17.

Copies of the submission, all subsequent amendments, all written statements with the respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC. Copies of the filing and of any subsequent amendments also will be available at the principal office of the CBOE.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to self-regulatory organizations, and in particular, the requirements of section 6. The Commission believes that continuation of the pilot for a ninety day period is appropriate in order to allow the CBOE to further study the operation of RAES in the piloted equity options classes.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the pilot already has been the subject of public notice and comment and the Commission has not received any adverse comment concerning its operation to date.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[5] that the proposed rule change referenced above be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Dated: May 19, 1987.

[Release No. 34-24466; File No. SR-NYSE-87-11]

## Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Granting Partial Approval to Proposed Rule Change

On April 6, 1987, the New York Stock Exchange, Inc. ("NYSE" or "Exchange"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] a proposed rule change to change permanently the setttlement pricing of expiring NYSE stock index options to the opening prices on expiration Fridays.

The proposed rule change was noticed in Securities Exchange Act Release No. 24341 (April 14, 1987). No comments were received on the proposed rule change.

On March 13, 1987, the Exchange filed a proposed rule change to change the settlement pricing of expiring stock index options to the opening prices on expiration Friday.[3] That rule filing only

[3] *See* Securities Exchange Act Release No. 23490 (August 1, 1986) 51 FR 28788, approving File Nos. SR-CBOE-85-32 and SR-CBOE 85-16.

[4] Customer limit order protection in five of the piloted classes is provided by means of manual comparison of the book's position with RAES executions. In the event a book order represents the best bid or offer and a RAES order has has been executed at that price against a CBOE market maker, the Exchange requires the market maker also to trade with the customer order on the book. Because of the manual nature of this procedure and the high trading volume in IBM, the CBOE believes that providing limit order protection for IBM options is not feasible.

[3] *See* SR-NYSE-87-06, and March 18, 1987 Letter to Sharon M. Lawson, Branch Chief, SEC. from

Continued

was effective with respect to index options contracts expiring in June.[4] In particular, the Exchange modified the definition of "Current Index Group Value" in Rule 700(b)(17) to permit the Exchange to specify that the value upon exercise of options on the NYSE Composite Index and the NYSE Beta Index on expiration Friday is to be calcuated from the opening prices for the constituent stocks on that day. The Exchange made conforming changes to the contract specifications for options on both indexes to make clear that trading ceases on the Thursday before expiration Friday. The Exchange now proposes to make permanent the rule changes proposed in that filing.

The purpose of the proposed rule change is to ameliorate the impact of the concurrent expiration of index options and futures on the markets for individual stocks and on the stock market as a whole. The Exchange believes that settling index futures and options based upon the opening prices of the constituent stocks, and thereby permitting use of the Exchange's opening procedures in handling the accompanying stock volume, is the best strategy for addressing widely-held concerns about the actual and potential impact of the derivative products on the pricing mechanism and integrity of the stock market.

The Commission has determined to grant partial approval to the proposed rule change and authorize the Exchange to base settlement of contracts expiring in August and September on opening prices. The Commission continues to believe that basing index settlement on opening prices on expiration Friday may best address the stock index-arbitrage related market volatility that has been associated with expirations. However, the various stock and options markets have not concurred in this assessment, and certain exchanges have elected to retain settlement of their index products based on closing prices on expiration Friday. The Commission believes that an evaluation of the impending disparate expirations in June is necessary before it can approve the NYSE proposal of a permanent basis. Based on the results of the June expiration, the Commission will examine whether disparate expiration, settlements adversely affect the underlying stock market on Expiration Friday, and whether index settlement based on opening prices may be appropriate for all options products. Accordingly, the Commission believes it is appropriate to extend the NYSE proposal on a temporary basis for another two months.

For the reasons detailed above, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6, and the rules and regulation thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[5] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Dated: May 15, 1987.

[Release No. 34-24485; File No. SR-NYSE-87-12]

## Self-Regulatory Organizations; New York Stock Exchange, Inc., and Extension of Pilot Program Relating to 2½ Point Strike Price Intervals in NYSE Composite Index Options

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 10, 1987, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Last August, the Exchange amended Rule 703.30 to provide for 2½ point strike price intervals for NYSE Composite Index Options. (See SR-NYSE-86-25, as amended by the August 27, 1986 letter to Jonathan G. Katz, Secretary, SEC, from James E. Buck, Secretary, NYSE and Release No. 34-23618 (September 12, 1986).) That rule change contained a "sunset" provision effective upon the March 1987 expiration. By a filing dated March 18, 1987, the Exchange extended the "sunset" to May 17 (i.e., the May expiration). (*See* SR-NYSE-87-07 and Release No. 34-24230 (March 20, 1987).) The Exchange now proposes to make the amendments to Rule 703.30 permanent and requests a 3 month extension of the pilot program, to August 17, 1987, in order that the pilot may remain in effect during the statutory notice and comment period.

### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections A, B, and C below.

### A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Exchange is proposing to make permanent an amendment to Rule 703.30, which permits the Exchange to list options on the NYSE Composite Index at 2½ point strike price intervals (e.g., at 167½ and 172½, as well as 165, 170 and 175). The Exchange's experience with 2½ point strike price intervals has been very positive. With respect to trading activity, the Exchange is unable to differentiate index options contracts with 2½ point strike prices from those with strike prices that are a multiple of five: The relative level of activity is, as expected, solely a function of the index value at any particular time. In addition, the Exchange is unable to discern any negative impact on liquidity. The Exchange also believes that the availability of series at 2½ point intervals eased the impact of the delisting of its options on the NYSE Double Index. In short, the Exchange is unaware of any problems created by its use of 2½ point strike prices. Please also see Exhibit I to SR-NYSE-86-25.

### *B. Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange believes that the proposed rule change imposes no burden on competition.

---

Daniel P. Odell, Assistant Secretary, NYSE. This rule filing was approved in Securities Exchange Act Release No. 24278.

[4] The Exchange subsequently was granted approval to base settlement of contracts expiring in July, 1987 on opening and not closing prices. *See* SR-NYSE-87-13, Securities Exchange Act Release No. 23469 (April 17, 1987).

[5] 15 U.S.C. 78 s(b)(2) (1982).

[6] 17 CFR 200.30-3(a)(12) (1985).

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others*

Written comments were neither solicited nor received.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The Commission has determined to grant a 3 month extension of the Exchange's pilot program in order for the pilot to remain effective while the proposal is subject to notice and comment. The NYSE has not experienced any problems during the pilot phase or received negative comment that would preclude continuance of the pilot. At the end of the three month extension, the Commission will determine whether to approve 2½ point strike prices in NYSE Composite Index Options on a permanent basis. Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 18, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 15, 1987.

Jonathan G. Katz.

*Secretary.*

**[Release No. 34-24484; File No. SR-OCC-87-10]**

**Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Options Clearing Corporation**

On May 13, 1987, the Options Clearing Corporation ("OCC") filed a proposed rule change with the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 ("the Act") to enable OCC clearing members of pledge long options positions to a commodity clearing organization. The Commission is publishing this notice to solicit comment on the proposal.

The proposal expands OCC's options pledge program [1] to authorize commodity clearing organizations ("CCO's") to act as pledgees and to enable OCC clearing members to pledge long options positions from a firm account to a CCO pledgee.[2] The proposal also enables to CCO generally to waive, by written agreement with OCC, its rights to overpledged value payments, [3] but enables to CCO to receive such payments on an exception basis. Finally, the proposal makes conforming amendments to OCC's pledge account agreement and certain technical changes to the options pledge program.

OCC states that the proposal is consistent with the purposes and requirements of section 17A of the Act because it would foster cooperation and coordination with other clearing organizations. OCC also believes that the proposal would further the public interest by enabling commodity clearing organizations to account for long options positions that hedge certain commodity product positions.

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submissions should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549.

Copies of the filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to file number SR-OCC-87-10 and should be submitted by June 18, 1987.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

Dated: May 19, 1987.

Jonathan G. Katz,

*Secretary.*

[FR Doc. 87-12175 Filed 5-27-87; 8:45 am]

BILLING CODE 8010-01-M

---

[1] See OCC Rule 615.

[2] Prior to the proposal, OCC rules authorized only banks and OCC clearing members to act as pledgees and enabled pledges only from market-maker or specialist accounts.

[3] Those payments represent, in effect, collateral substitution by the pledgor to the pledgee when a pledged options position is exercised. See Securities Exchange Act Release No. 24171 (March 4, 1987), 52 FR 7724.

---

**[Release No. 34-24469; File No. Phlx-87-19]**

**Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc., Order Granting Accelerated Approval to Proposed Rule Change**

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 7, 1987, the Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

The Philadelphia Stock Exchange ("PHLX" or the "Exchange") proposes to expand the stock options pilot program, which provides for four expiration months—including two near-term months—to the February and March cycle options and to extend the expanded pilot program for one year.

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for the Proposed Rule Change*

In June 1985, in conjunction with the other options exchanges, the PHLX implemented a one-year stock option pilot program (see SR-PHLX 85–12) for certain January cycle stock options. Under the terms of the pilot, the traditional January trading cycle was altered to ensure that (i) one-month and two-month options were made available for trading at all times and (ii) four expiration months were outstanding at all times.

In July 1986, the Exchange received approval to expand the pilot to all PHLX-traded January cycle stock options and to extend the pilot an additional six months (See SR-PHLX 86–22).

Approval is now pending to extend the pilot program for an additional period corresponding with extensions granted to other options exchanges (see SR-PHLX 87–12).

The purpose of the pilot program is to determine whether a near-term expiration cycle, featuring four expiration months, would improve investors' interest in such stock options. After monitoring the trading of the January cycle options and receiving highly favorable comments from both on-floor and off-floor market participants, the Exchange has found the pilot has improved investors' interest in trading such options.

Additionally, a consensus has developed both to continue the pilot and to expand it to stock options trading on February and March cycles. Even if the pending extension is approved it will be necessary to extend for an additional year the entire pilot program in order to have sufficient time to phase-in and assess the trading of the February and March cycle options.

Therefore, the Exchange proposes to extend the pilot program an additional one year beyond the presently proposed extension and expand the pilot program to include options on the February and March cycles. The implementation of the February and March cycles on the pilot program will follow the January cycle paradigm. In March and February cycle options, the Exchange proposes to phase-in such options after the May expiration and before the June expiration. Specifically each Friday between the May and June expirations, the Exchange will phase-in approximately one quarter of those options on the March and February cycles. In short, all cycles will maintain two near term expiration months plus their two normal expiration months.

The proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 ("the Act") and the rules and regulations thereunder applicable to the Exchange by continuing and expanding a pilot program tailored to meet investors preferences for stock options with near-term expiration cycles. Therefore, the proposed rule change is consistent with section 6(b)(5) of the 1934 Act, which provides in pertinent part that the rules of the Exchange be designed to promote just and equitable principles of trade and to protect the investing public.

*B. Self-Regulatory Organizations Statement on Burden on Competition*

The PHLX does not believe that the proposed rule change will impose any burden on competition.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others*

No written comments were either solicited or received.

*III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action*

The Exchange requests that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the Act because the rule change is substantively identical to a proposed rule change previously filed by the American Stock Exchange, Inc. ("Amex") and approved by the Commission.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, the requirements of section 6 and the rules and regulations thereunder, in that it continues and expands an expiration cycle pilot designed to appeal to investors' interests.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because the proposed rule change will allow the Phlx to incorporate February and March cycle options into the pilot and keep in place a program the Exchange has found to be successful. The proposal also is substantively identical to a proposal previously filed by the Amex and approved by the Commission.[1]

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW, Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 18, 1987.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[Release No. IC-15751; 812-6709]

## National Rural Utilities Cooperative Finance Corp.; Application

May 20, 1987.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of Application for Exemption under the Investment Company Act of 1940 ("the 1940 Act").

---

*Applicant:* National Rural Utilities Cooperative Finance Corporation ("Applicant").

*Relevant 1940 Act Sections:* Exemption requested under sections 6(c) and 6(e) from the provisions of the 1940 Act, with certain exceptions.

*Summary of Application:* Applicant seeks an order pursuant to sections 6(c) and 6(e) exempting each trust ("Trust") established and to be established by the Applicant, each Trust to hold a note guaranteed by the Rural Electrification Administration evidencing loans used to refinance borrowings from the Federal Financing Bank, from all provisions of the 1940 Act other than sections 26 (with certain exceptions), 36, 37 and (to the extent necessary to implement the foregoing sections) 38 through 53 thereof in connection with the issuance of certificates by the Trust to Applicant and their subsequent resale to the public by Applicant.

*Filing Date:* The application was filed on May 5, 1987 and amended on May 22, 1987.

*Hearing or Notification of Hearing:* If no hearing is ordered, the application will be granted. Any interested person may request a hearing on the application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on June 12, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

**ADDRESSES:** Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, c/o Mark Weissler, Milbank, Tweed, Hadley & McCloy, 1 Chase Manhattan Plaza, New York, NY 10005.

**FOR FURTHER INFORMATION CONTACT:** Fran Pollack, Staff Attorney (202) 272-3024 or Karen L. Skidmore, Special Counsel (202) 272-3023, Division of Investment Management.

**SUPPLEMENTARY INFORMATION:** Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier, (800) 231-3282 (in Maryland (301) 258-4300).

### Applicant's Representations

1. Applicant is a tax-exempt, not-for-profit cooperative association organized in 1969 under the laws of the District of Columbia. Applicant was established by its members to provide them with a source of financing to supplement the loan programs of the Rural Electrification Administration ("REA") of the United States Department of Agriculture. Applicant presently has loans outstanding to its member in the aggregate principal amount of approximately $2.9 billion, and has guaranteed on behalf of members an additional $3.0 billion in obligations. Applicant also provides financial advisory services to its members. Applicant's 964 members are themselves generally non-profit cooperative electric utilities and service organizations and represent approximately 95% of the total number of such entities in the United States. Applicant has approximately $790 million principal amount of bonds listed on the New York Stock Exchange and registered under section 12(b) of the Securities Exchange Act of 1934.

2. In order to ease financial burdens on certain cooperatives by permitting them to take advantage of lower interest rates, Congress in October 1986 passed legislation (the "New Bill") amending the Rural Electrification Act (the "RE Act") to permit these cooperatives to prepay existing borrowings (the "FFB Loans") from the Federal Financing Bank of the United States Treasury ("FFB") without prepayment penalty or fees, through the issuance of REA-guaranteed notes to private lenders. REA has promulgated regulations implementing this legislation (the "Regulations"), which directs REA to formulate eligibility criteria ensuring that at least $2.0175 billion of such refinancings occur by September 30, 1987. Because of concerns that issuance by the cooperatives of debt guaranteed by REA directly to the public would adversely affect the Treasury's own funding operations, the Regulations limit the number of separate notes that any cooperative may issue in a particular refinancing, restrict assignment of the REA guarantee, and require that each noteholder (i) be subject to credit examination and supervision by Federal or state authorities and satisfy applicable regulatory requirements for licensing, lending and loan requirements, (ii) have a minimum net worth or other credit support in the amount of $50 million, or (iii) be a trust administered by a person in either of the foregoing categories.

3. Applicant, in conjunction with Shearson Lehman Brothers, Goldman Sachs, Merrill Lynch and Salomon Brothers, has formulated a program consistent with the New Bill and the Regulations which it believes will permit its power supply members to refinance their FFB Loans in accordance with the New Bill and the Regulations at competitive rates reflecting the smallest possible spread over benchmark Treasury obligations. REA has approved this structure as complying with the Regulations. The first borrower which has had its application to prepay approved by REA, Soyland Power Cooperative, Inc. ("Soyland"), has refinanced its FFB Loans under this structure, borrowing on an interim basis from Applicant and issuing notes evidencing these borrowings to Trusts as described below, with Applicant holding the certificates representing the ownership interest in these trusts on an interim basis and intending to resell them publicly as described below as soon as applicable regulatory requirements have been satisfied. Two other cooperatives, Cajun Electric Power Cooperative, Inc. ("Cajun") and Deseret Generation & Transmission Cooperative ("Deseret"), have indicated their intention to do the same. All representations and conditions in the application will apply to transactions under this structure involving Soyland, Cajun, and Deseret. Moreover, there are up to 10 cooperatives eligible to prepay about $2 billion in FFB Loans under current standards and a substantial number of these cooperatives will participate in the program described below.

4. Under Applicant's program, one or more Trusts will be established for each cooperative intending to prepay FFB loans (a "Cooperative"). The trustee of each Trust (the "Trustee") will be a commercial bank having capital and surplus of at least $50,000,000. Applicant will make loans (the "Private Loans") to the Cooperative, the proceeds of which will immediately be used to prepay the Cooperative's FFB Loans being refinanced. Applicant will direct the

Cooperative to issue each note evidencing a Private Loan (a "Private Note") to a separate Trust, which will issue to Applicant certificates representing the entire beneficial interest in the Trust (the "Certificates"). The Trustee will be the "noteholder" for purposes of the Regulations. Applicant will qualify the Trust Agreements under the Trust Indenture Act of 1939.

5. While Applicant holds the Certificates, the Private Note will bear interest at a variable rate reflecting Applicant's cost of funding the loan unless Applicant and the Cooperative agree to a fixed rate for an interim period (e.g., in order to lock in a rate for a period before it is possible or desirable for CFC to resell the Certificates as indicated below). Applicant intends to resell these Certificates in public offerings or in private placements, at which time the rates on the associated Private Note will be reset to equal the fixed rate on the Certificates, increased by an amount equal to the servicing fee and expense reimbursement referred to below. The Certificate rate will be fixed as the lowest rate acceptable to the marketplace that would permit the Certificate to be resold by Applicant at par. Scheduled payments on the Private Notes will thus at all times be sufficient to satisfy the scheduled payments on the Certificates plus any amounts of servicing fees or other costs payable to the servicer. Applicant would expect to resell the Certificates promptly, unless they could not be sold bearing rates within the interest rate ceiling described below or if it believed that long-term rates would improve in the future and it desired to delay fixing the rate until that time.

6. In order to insure that the Cooperative (and REA as its creditor) will derive significant benefit from the refinancing of FFB Loans, the Regulations require that the interest rate on the Private Notes always be at least 50 basis points lower than the weighted average interest rate borne by the FFB Loans that were repaid at the time of repayment. Since there is no assurance that Applicant will be able to obtain funding enabling it to carry or to resell the Certificates within this cap, Applicant in acquiring the Certificates subject to this limitation is assuming an exposure to interest rate fluctuations which benefits the Cooperative and REA.

7. With the exception discussed below, each Trust's sole investment activity will consist of receiving the Private Note and issuing the Certificates on the day of its formation and thereafter collecting payments on the Note. The assets of each Trust will consist of a single Private Note evidencing one Private Loan. In order to obtain the best rates by matching maturities to particular market segments, separate Certificates having sequential maturities will be offered through separate Trusts (i.e., one Trust would receive a Private Note payable by the Cooperative in installments in years 6–10, a second would receive a Private Note payable by that Cooperative in years 11–16, etc). The Trustee will not be authorized to modify the right to receive payments on the Certificates or take any action that would reduce the principal amount or interest rate on the Private Note without consent of the Certificateholders. No Trust would ever issue any security other than a single class of Certificates or hold more than a single Private Note or, except for the incidental temporary investment pending distribution to Certificateholders of payments received on its Private Note described below, engage in any investment activity following its formation. Defaults with respect to one Private Note would not permit acceleration by the holder of any other Private Note. The Trust would not acquire any assets in substitution for the Private Note, or sell the Private Note except in connection with the repayment of the Certificates in full and the termination of the Trust (which will occur when the Private Note and thus the Certificates have been paid off).

8. REA will endorse on each Private Note a guarantee (the "REA Guarantee") of the timely payment of principal and interest on such Private Note. The RE Act provides that the REA Guarantee is full faith and credit obligation of the United States. REA will be required to pay the Trust the amount of any principal and interest not paid when due on a Private Note within five business days of notice from the servicer of such default. Although the Private Note will be secured by a mortgage on all the Cooperative's assets (the "REA Mortgage"), all rights under the mortgage with respect to the Private Note will be held by REA and will not inure to the benefit of Applicant, the Trust or any holder of Certificates.

9. Applicant will contract with REA and each Trust to service the Private Loan in a manner complying with the RE Act and the Regulation. Applicant, as servicer, will handle the billing of Private Loan payments from the Cooperative and will notify REA promptly of any default under the Private Loan and of adverse developments affecting the Cooperative, but payments on the Private Loan will be made directly to the Trustee and not to Applicant. The Applicant will prepare for distribution to Certificateholders regular semiannual reports concerning distributions on the Certificates and its fees, as well as tax information required by Certificateholders. No less often than annually, an independent public accountant will audit the books and records of each Trust. Upon completion, copies of the auditor's reports will be provided to the Trustee.

10. Applicant as servicer will be compensated out of payments on the Private Note in excess of the scheduled payments to be distributed to Certificateholders. It is presently estimated that the regular servicing fee (out of which Applicant will pay the Trustee's fees and expenses) will total not more than approximately 10 basis points annually with respect to the principal amount of the Private Note. Applicant as servicer may also receive from the Trust all or a portion of the earnings on funds invested pending distribution to Certificateholders as described below, as well as reimbursement for costs incurred by it in connection with the offering of the Certificates and enforcement of the Private Note and REA Guarantee. The Cooperative will be obligated to pay amounts equal to such costs as additional interest (guaranteed by REA) on the Private Note (subject to certain limitations), so that such reimbursement will not reduce distributions to Certificateholders. Applicant may not resign as servicer, but may be removed by the Trustee or the Certificateholders following certain defaults or events of bankruptcy relating to the servicer. The insolvency of the Trustee or Applicant will not affect the Certificateholders' rights, because Applicant will not hold any Trust assets and assets held in a fiduciary capacity by the Trustee should not be subject to claims of the Trustee's general creditors. Even if the Internal Revenue Service or a state tax authority were to claim successfully that a Trust is a taxable entity (and Applicant does not believe it is), the Certificateholders should receive their back-to-back government guaranteed payments because Applicant will indemnify the Trust for any resulting taxes under present law.

11. Applicant may resell the Certificates either in private placements pursuant to section 4(2) of, or in underwritten public offerings registered under, the Securities Act of 1933 ("Securities Act"), or possibly in distributions exempt from registration because they will come to rest outside

the United States (provided that the subject securities are offered and sold outside the United States and to non-U.S. persons without registration under the Securities Act in reliance upon an opinion of U.S. counsel that registration is not required and that no single offering of Certificates both within and outside the United States will be made without registration of all such Certificates under the Securities Act without obtaining a no-action letter permitting such offering or otherwise complying with applicable standards then governing such offerings). In all cases, Applicant will adopt agreements and procedures reasonably designed to prevent such debt securities from being offered or sold in the United States or to U.S. persons (except as U.S. counsel may then advise is permissable). Applicant anticipates that the Certificates will be marketed principally to financial institutions, and expects that the Certificates issued by each Trust will receive the highest investment grade rating ("AAA" or "Aaa"), from at least two nationally recognized statistiical rating organizations not affiliated with Applicant of the Trusts.

12. Each Certificate will represent a fractional undivided interest in a Trust. The Certificates will be issued in denominations of $1,000 or multiples thereof, and will not be divisible into Certificates with original principal amounts below that figure. The Certificates will be transferable, and may be listed on a national securities exchange. Payments on the Certificates will represent simply pass-throughs of payments received by the Trustee on the Private Note held by the Trust. Interest on both the Private Note and the Certificates will be payable semiannually and principal payments on both the Private Note and the Certificates will be payable annually (as is customary for sinking funds with respect to corporate debt securities) for the period during which the Private Note and the Certificates amortize.

13. The Certificates will be prepaid at any time the Private Note is prepaid. It is anticipated that the Private Notes will be prepayable at the Cooperative's option in whole (but not in part), generally after a non-call period, at premiums declining each year until such premiums equal zero. Although the payment of principal, interest and premium in the event a Cooperative elects to prepay the Private Note will not be covered by the REA Guarantee, the Cooperative will be required to accompany its notice of prepayment (to be given 30 days in advance in order to permit the Trustee in turn to notify Certificateholders of the impending retirement of the Certificates) with a cash deposit equal to the amounts that will be due on the Private Note at the time of prepayment, thus assuring that funds will be available at that time. Pending application, these funds will be invested in obligations issued by the United States or in repurchase agreements in the manner described below. In view of the safety of these investments, Applicant believes that the consequences of the fact that the REA Guarantees does not cover prepayments are not significant.

14. With the exception referred to in the preceding paragraph, all payments on the Certificates will have back-to-back Private Note obligations which are supported by the full faith and credit of the United States. If the Cooperative defaults in making its payments or in its other obligations to REA, REA has the option to either to pay under the REA Guarantee principal and interest as they fall due on the Private Note, to proceed against the Cooperative and to assume the Cooperative's obligations under the Private Note or, if the Cooperative could at that time make an optional prepayment of the Private Note, optionally to prepay or purchase the Private Note at the same premium as would then be applicable to a prepayment by the Cooperative. The Trustee (or Applicant as its agent), an not the individual Certificateholders, will enforce payments due on the Private Note and the REA Guarantee. However, a specified percentage of Certificateholders may direct the time, method and place of conducting any remedy available to the Trustee or Applicant, subject to customary indenture exceptions. The Trustee may not resign until the Trust is liquidated and the proceeds distributed to Certificateholders unless a successor Trustee has been designated and has accepted such trusteeship.

15. Scheduled distributions on the Certificates will be made several days (currently anticipated to be 11 calendar days in the case of regular payments of principal and interest) following the corresponding payment on the Private Note. This interval will allow time for Applicant to notify REA if there is a default by the Cooperative in making a payment on the Private Note and to permit the five business days before REA is obligated to make a payment under the guarantee to elapse before the payment date on the Certificates. As a consequence, if the Cooperative defaults, the full faith and credit guarantee payment will fall due before the schedule payment on the Certificates. As indicated above, if a Cooperative elects to prepay a Private Loan, distributions on the Certificates will be made 30 days after advance receipt of the amounts to be prepaid, thus permitting notice of the resulting distribution to be given to Certificateholders.

16. During these periods pending distribution (twice annually for 11 days and not more than one additional period of 30 days for any Trust in connection with a prepayment), payments on the Private Note received by the Trust will be invested by it at the direction of Applicant in (i) obligations issued by the United States (and supported by its full faith and credit) or (ii) repurchase agreements with respect to such obligations, overcollateralized on a basis so that there will not be a reduction in the ratings of the Certificates. All such investments must mature before the next scheduled distribution date on the Certificates. The obligations collateralizing the repurchase agreements in question would be marked to market on a daily basis and kept in the possession of the Trustee or in its control through book-entry, unless the rating agencies indicate that this is not necessary to maintain the Certificates' rating and the Commission or its staff has indicated it will not object to other arrangements. The purchase agreements would satify the conditions set forth in the Staff's letters dated January 25, April 17 and June 19, 1985, to Matthew Fink, Esq., and Applicant believes on the advice of counsel that they would be considered "repurchase agreements" for purposes of section 559 of the Bankruptcy Code permitting liquidation of such agreements without regard to the stay or avoiding provisions of the Bankruptcy Code (except as set forth therein). Assuming all amounts then due on the Private Notes have been paid in full, any yield on these investment will be turned over to Applicant as additional compensation in its servicing capacity or returned to the Cooperative (or to REA to the extent of any unreimbursed payments on the REA Guarantee). Such yield will not flow through to Certificateholders or increase their return on their investment, and the disclosure document will make this clear to prospective Certificateholders.

**Applicant's Legal Conclusions**

17. The requested order is necessary to appropriate in the public interest because Congress has acted to encourage prepayment of the FFB Loans with private capital, the structure proposed has been approved by REA and accommodates the government's concerns about issuance of federally guaranteed debt directly to the public and the investment activity of the Trusts will be very limited.

18. The requested order is consistent with the protection of investors because the limited intended activity of the Trusts and the extreme safety of the assets they will hold obviate the need for the complex regulatory safeguards of the Act.

19. The requested order is consistent with the purposes fairly intended by the policy and provisions of the Act because the Trusts' operations will not lend themselves to the abuses against the Act is directed.

*Applicant's Conditions*

If the requested order is granted, the Applicant agrees that the Trusts will be subject to the following conditions:

1. To be subject pursuant to section 6(e) of the Act to sections 26 (with the following exception), 36, 37 and (to the extent necessary to implement the foregoing sections) 38 through 53 of the Act. They will not be subject to the provisions of section 26(a)(2) of the Act to the extent they are inconsistent with the servicer compensation arrangements (including the scheduled servicing fee, reimbursements for certain expenses and any receipt of income from the temporary investment of funds pending distribution) described in the application, which Applicant believes are fair and reasonable in light of the function the Applicant as servicer undertakes. Applicant asserts that Certificateholders will receive a fixed return which will not be affected by this compensation, since the Cooperative will be required to pay additional interest on the Private Note (covered by the REA Guarantee) to provide funds for this compensation, which in any event (except for the Schedule servicing fee) is subordinated to payment of all amounts than due on the Certificates.

For the Commission, by the Division of Investment Management, under delegated authority.

**Jonathan G. Katz,**

*Secretary.*

## SMALL BUSINESS ADMINISTRATION

[License No. 02/02-5497]

### Hanam Capital Corp.; Issuance of License to Operate as a Small Business Investment Company

On May 27, 1986, a notice was published in the Federal Register (51 FR 19098) stating that an application had been filed by Hanam Capital Corporation, Suite 3330, One Penn Plaza, New York, New York 10119, with the Small Business Administration (SBA), for a license to operate as a small business investment company (SBIC), pursuant to § 107.102 of the Regulations governing SBICs (13 CFR 107.102 (1987)).

Interested parties were given until the close of business June 26, 1986, to submit their comments on the application to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(d) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other information, SBA issued License No. 02/02-5497 to Hanam Capital Corporation on May 6, 1987, to operate as a section 301(d) SBIC.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: May 20, 1987.

[Public Notice CM–8/1083]

### Soviet and Eastern European Studies; Advisory Committee; Meeting

The Department of State announces that the Soviet and Eastern European Studies Advisory Committee will meet on July 14, 1987 starting at 9:00 a.m. in Room 1107, U.S. Department of State, 2201 C Street NW., Washington, DC.

The Advisory Committee will convene to hear a consolidated report on how FY 1985–1987 Title VIII grants have been allocated by the recipients to various functions related to the needs of the Soviet-Eastern European field. The afternoon session will incude comments from others and general discussion of the needs, programs and opportunities available in the areas of research support, training opportunities, language competence and on-site activities.

Public attendance is permitted but will be limited to the seating available. Entry into the Department of State building is controlled and must be arranged in advance of the meeting. It is required that persons planning to attend notify Susan H. Nelson, Soviet and Eastern European Studies Advisory Committee, INR/LAR, U.S. Department of State, Washington, DC 20520, (202) 632–5924. All attendees must use the C Street entrance to the building.

Dated: May 19, 1987.

E. Raymond Platig,

*Executive Director, Soviet and Eastern European Studies Advisory Committee.*

BILLING CODE 4710–32–M

## DEPARTMENT OF TRANSPORTATION

### Office of the Secretary

[Order 87–5–59, Docket 42139]

### Proposed Revocation of the Section 401 Certificate of Pride Air, Inc.; Order to Show Cause

**AGENCY:** Department of Transportation.

**ACTION:** Notice of order to show cause, (Order 87–5–59). Docket 42139.

**SUMMARY:** The Department of Transportation is directing all interested persons to show cause why it should not issue an order revoking the certificate of Pride Air, Inc., issued under section 401 of the Federal Aviation Act.

**DATES:** Persons wishing to file objections should do so not later than June 12, 1987.

**ADDRESSES:** Responses should be filed in Docket 42139 and addressed to the Documentary Services Division, Department of Transportation, 400 7th Street SW., Washington, DC 20590 and should be served on the parties listed in Attachment A to the order.

**FOR FURTHER INFORMATION CONTACT:** Carol A. Szekely, Air Carrier Fitness Division, P–56, U.S. Department of Transportation, 400 7th Street, SW., Washington, DC 20590, (202) 366–9721.

Dated: May 21, 1987.

Matthew V. Scocozza,

*Assistant Secretary for Policy and International Affairs.*

[FR Doc. 87–12178 Filed 5–27–87; 8:45 am]

BILLING CODE 4910–62–M

### Coast Guard

[CGD 87–037]

### Agency Information Collection Activities Under OMB Review; Radionavigation User Survey

**AGENCY:** Coast Guard, DOT.

**ACTION:** Notice.

**SUMMARY:** Notice is hereby given that Office of Management and Budget (OMB) approval, under the Paperwork Reduction Act, is being sought for the nationwide collection of information on radionavigation users.

**DATES:** The request for OMB approval will be submitted in May 1987 and project completion is tentatively scheduled for January 1988.

**ADDRESSES:** Copies of the Request for OMB Review (Standard Form 83) and supporting documentation are available for inspection and copying at Commandant (G–NRN–2), U.S. Coast Guard Headquarters, Room 1413, 2100 Second Street SW., Washington, DC 20593–0001.

**FOR FURTHER INFORMATION CONTACT:** Lieutenant Adeste Fuentes at the address given above; telephone (202) 267–0299), (FTS) 267–0299.

**SUPPLEMENTARY INFORMATION:** A final recommendation on the future mix of radionavigation systems is being jointly developed by the Departments of Defense and Transportation through recommendations from federal agencies. The current policy and plans for the future radionavigation systems mix is published in the "Federal Radionavigation Plan." The Coast Guard, a provider of three radionavigation systems, intends to support its recommendations with direct input from radionavigation system users in the marine and land environments.

The input will be obtained through a nationwide survey of marine and land users. In the marine community, owners of large commerical ships, small commercial craft (other than fishing), commerical fishing craft and recreational craft will be queried. The land users that will be surveyed include non-government concerns involved in surveying, mining, natural resources exploration, mapping and geodetic control.

The Coast Guard will use the results of this survey to assess the utility of the present radionavigation systems, the impact of turning off any of the systems and the impact, on current systems, of the future deployment of the satellite-based Global Positioning System or other similar systems. Based on this information, the Coast Guard will develop recommendations to the Department of Transportation on the future mix of systems. A secondary objective of the survey is to determine an estimate of the radionavigation user population.

Persons desiring to comment on this information collection should sent their comments to: Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503, Attn: Desk Officer, U.S. Coast Guard. Persons submitting comments to OMB are also requested to submit a copy of their comments to the Coast Guard at the address listed in the "ADDRESSES" section.

(14 U.S.C. 81)

Martin H. Daniell,

*Rear Admiral, USCG, Chief, Office of Navigation, U.S. Coast Guard Headquarters.*

[CGD 87-034]

## Great Lakes Pilotage Review; Open Meeting

**AGENCY:** Coast Guard, DOT.

**ACTION:** Notice of public meeting.

**SUMMARY:** A number of issues have been raised this past year concerning Great Lakes pilotage. Great Lakes pilotage was last studied indepth during 1972. In view of the concerns expressed and the fact that the current study is 15 years old, the Department of Transportation has initiated a review of Great Lakes pilotage. The review, to be conducted by a multi-agency working group, will take the form of an update of the 1972 study and the 1973 policy statement that resulted from that study's findings. The Coast Guard will take the lead on this review. A public meeting is planned for the purpose of announcing the initiation of a Great Lakes Pilotage Review, to request input, and to receive any comments and recommendations concerning Great Lakes pilotage that individuals may have at this time. Issues of particular interest include:

Trans-lake pilotage
Port pilotage
Pilotage costs
"B" Certificates
Salty-lakers
Target pilot compensation
Polot workload standards
The appropraite roles of the public and private sectors

**DATE AND TIME:** The public meeting will be held on June 24, 1987. It will begin at 10 a.m. and end at 4 p.m. or sooner if all speakers have been heard.

**ADDRESSES:** (1) The meeting will be held at The Hollenden House, 610 Superior Avenue, Cleveland, Ohio. (2) Comments should be mailed to Commandant (G-CMC/21) (CGD 87-034), U.S. Coast Guard, Washington, DC 20593-0001. Between 7:30 a.m. and 3:30 p.m., Monday through Friday, comments may be delivered to and will be available for inspection or copying at the Marine Safety Council (G-CMC/21), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, (202) 267-1477.

**FOR FURTHER INFORMATION CONTACT:** The Executive Secretary, Marine safety Council (G-CMC), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, (202) 267-1477.

**SUPPLEMENTARY INFORMATION:** All interested persons are invited to participate in this open meeting by presenting oral views or submitting written views. The following organizations are specifically invited to present their views and recommendations at the public meeting: The St. Lawrence Seaway Pilots Association; Lakes Pilot Association, Inc.; Upper Great Lakes Pilots, Inc.; the U.S. Great Lakes Shipping Association; and the International Association of Great Lakes Ports. Written comments should include the docket number (CGD 87-034) and the name and address of the person submitting the comment. Persons wishing to present oral statements at the public meeting should notify the Executive Secretary, Marine Safety Council (at the address given above), no later than two days prior to the meeting.

Written comments are also invited during the course of the study. An open docket will be maintained throughout the study.

Dated: May 21, 1987.

J.W. Kime,

*Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.*

## Federal Aviation Administration

### Airborne Area Navigation Equipment Using Loran-C Inputs

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of availability of technical standard order (TSO) and request for comments.

**SUMMARY:** The proposed TSO-C60b prescribes the minimum performance standards that Airborne Area Navigation Equipment Using Loran-C Inputs must meet to be identified with the marking "TSO-C60b."

**DATE:** Comments must identify the TSO file number and be received on or before September 11, 1987.

**ADDRESS:** Send all comments on the propcsed technical standard order to:

Technical Analysis Branch, AWS-120, Aircraft Engineering Division, Office of Airworthiness—File No. TSO-C60b, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591

Or Deliver Comments to: Federal Aviation Administration, Room 335, 800 Independence Avenue SW., Washington, DC 20591

**FOR FURTHER INFORMATION CONTACT:** Ms. Bobbie J. Smith, Technical Analysis Branch, AWS-120, Aircraft Engineering Division, Office of Airworthiness, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 267-9548.

Comments received on the proposed technical standard order may be examined, before and after the comment closing date, in Room 335, FAA Headquarters Building (FOB-10A), 800 Independence Avenue SW., Washington, DC 20591, weekdays except Federal holidays, between 8:30 a.m. and 4:30 p.m.

**SUPPLEMENTARY INFORMATION:**

### Comments Invited

Interested persons are invited to comment on the proposed TSO listed in this notice by submitting such written data, views, or arguments as they desire to the above specified address. All communications received on or before the closing date for comments specified above will be considered by the Director of Airworthiness before issuing the final TSO.

### Background

Proposed TSO-C60b will include revised Marking and Data Requirements for Airborne Area Navigation

Equipment Using Loran-C Inputs. Also, the proposed TSO incorporates Radio Technical Commission for Aeronautics (RTCA) Document Nos. DP-160B, "Environmental Conditions and Test Procedures for Airborne Equipment," dated July 1984, for the environmental standards, and DO-178, "Software Consideration in Airborne Systems and Equipment Certification," dated March 1985, for the computer software requirements.

**How to Obtain Copies**

A copy of the proposed TSO-C80b may be obtained by contacting the person under "For Further Information Contact." TSO-C80b references RTCA/DO-194, dated November 1986, for minimum performance standards, RTCA/DO-178A for the computer software requirements, and RTCA/DO-160B for the environmental standards. RTCA/DO-194, DO-178A, and DO-160B may be purchased from the Radio Technical Commission for Aeronautics Secretariat, One McPherson Square, Suite 500, 1425 K Street NW., Washington, DC 20005.

Issued in Washington, DC, on May 21, 1987.

**John K. McGrath,**

*Assistant Manager, Aircraft Engineering Division, Office of Airworthiness.*

[FR Doc. 87-12180 Filed 5-27-87; 8:45 am]

BILLING CODE 4910-13-M

## Airborne Area Navigation Equipment Using Omega/VIF Inputs

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of availability of technical standard order (TSO) and request for comments.

---

**SUMMARY:** The proposed TSO-C120 prescribes the minimum performance standards that Airborne Area Navigation Equipment Using Omega/VIF Inputs must meet to be identified with the marking "TSO-C120."

**DATE:** Comments must identify the TSO file number and be received on or before September 11, 1987.

**ADDRESS:** Send all comments on the proposed technical standard order to:

Technical Analysis Branch, AWS-120, Aircraft Engineering Division, Office of Airworthiness—File No. TSO-C120, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

or deliver comments to:

Federal Aviation Administration, Room 335, 800 Independence Avenue, SW., Washington, DC 20591.

**FOR FURTHER INFORMATION CONTACT:**

Ms. Bobbie J. Smith, Technical Analysis Branch, AWS-120, Aircraft Engineering Division, Office of Airworthiness, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 267-9546.

Comments received on the proposed technical standard order may be examined, before and after the comment closing date, in Room 335, FAA Headquarters Building (FOB-10A), 800 Independence Avenue, SW., Washington, DC 20591, weekdays except Federal holidays, between 8:30 a.m. and 4:30 p.m.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested persons are invited to comment on the proposed TSO listed in this notice by submitting such written data, views, or arguments as they desire to the above specified address. All communications received on or before the closing date for comments specified above will be considered by the Director of Airworthiness before issuing the final TSO.

**Background**

Proposed TSO-C120 will include revised Marking and Data Requirements for Airborne Area Navigation Equipment Using Omega/VLF Inputs. Also, the proposed TSO incorporates Radio Technical Commission for Aeronautics (RTCA) Document Nos. DO-160B, "Environmental Conditions and Test Procedures for Airborne Equipment," dated July 1984, for the environmental standards, and DO-178A, "Software Consideration in Airborne Systems and Equipment Certification," dated March 1985, for the computer software requirements.

**How to Obtain Copies**

A copy of the proposed TSO-C120 may be obtained by contacting the person under "For Further Information Contact." TSO-C120 references RTCA/DO-160, dated May 1986, for minimum performance standards, RTCA/DO-178A for the computer software requirements, and RTCA/DO-160B for the environmental standards. RTCA/DO-194, DO-178A, and DO-160B may be purchased from the Radio Technical Commission for Aeronautics Secretariat, One McPherson Square, Suite 500, 1425 K Street, NW., Washington, DC 20005.

Issued in Washington, DC, on May 21, 1987.

## Airborne ILS Localizer Receiving Equipment Operating Within the Radio Frequency Range of 108-112 Megahertz (MHz)

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of availability of technical standard order (TSO) and request for comments.

---

**SUMMARY:** The proposed TSO-C36e prescribes the minimum performance standards that Airborne ILS Localizer Receiving Equipment Operating Within the Radio Frequency Range of 108-112 Megahertz (MHz) must meet to be identified with the marking "TSO-C36e."

**DATE:** Comments must identify the TSO file number and be received on or before September 11, 1987.

**ADDRESS:** Send all comments on the proposed technical standard order to: Technical Analysis Branch, AWS-120, Aircraft Engineering Division, Office of Airworthiness—File No. TSO-C36e, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

Or Deliver Comments To: Federal Aviation Administration, Room 335, 800 Independence Avenue, SW., Washington, DC 20591.

**FOR FURTHER INFORMATION CONTACT:**

Ms. Bobbie J. Smith, Technical Analysis Branch, AWS-120, Aircraft Engineering Division, Office of Airworthiness, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 267-9540.

Comments received on the proposed technical standard order may be examined, before and after the comment closing date, in Room 335, FAA Headquarters Building (FOB-10A), 800 Independence Avenue, SW., Washington, DC 20591, weekdays except Federal holidays, between 8:30 a.m. and 4:30 p.m.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested persons are invited to comment on the proposed TSO listed in this notice by submitting such written data, views, or arguments as they desire to the above specified address. All communications received on or before the closing date for comments specified above will be considered by the Director of Airworthiness before issuing the final TSO.

**Background**

Proposed TSO-C36e will include revised Marking and Data Requirements

for Airborne ILS Localizer Receiving Equipment Operating Within the Radio Frequency Range of 108–112 Megahertz (MHz). Also, the proposed TSO incorporates Radio Technical Commission for Aeronautics (RTCA) Document Nos. DO–160B, "Environmental Conditions and Test Procedures for Airborne Equipment," dated July 1984, for the environmental standards, and DO–178, "Software Consideration in Airborne Systems and Equipment Certification," dated March 1985, for the computer software requirements.

**How to Obtain Copies**

A copy of the proposed TSO–C36e may be obtained by contacting the person under "FOR FURTHER INFORMATION CONTACT." TSO–C36e references RTCA/DO–195, dated November 1986, for minimum performance standards, RTCA/DO–178A for the computer software requirements, and RTCA/DO–160B for the environmental standards. RTCA/DO–195, DO–178A, and DO–160B may be purchased from the Radio Technical Commission for Aeronautics Secretariat, One McPherson Square, Suite 500, 1425 K Street, NW., Washington, DC 20005.

Issued in Washington, DC, on May 21, 1987.

## Radio Technical Commission for Aeronautics (RTCA); Special Committee 161; Minimum Aviation System Performance; Standard for Radio Determination Satellite System; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I), notice is hereby given of a meeting of RTCA Special Committee 161 on Minimum Aviation System Performance Standard for Radio Determination Satellite System to be held on June 16–17, 1987, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC, commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) approval of minutes of the second meeting; (3) report on Radio Technical Commission for Marine Services SC–108 Activities; (4) briefing and discussion of GEOSTAR RDSS Accuracy Analysis; (5) review of first draft material of committee report; (6) assignment of tasks; and (7) other business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682–0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on May 19, 1987.

Wendie F. Chapman,

*Designated Officer.*

## Urban Mass Transportation Administration

## UMTA Section 3 and 9 Grant Obligations

**AGENCY:** Urban Mass Transportation Administration (UMTA), DOT.

**ACTION:** Notice.

**SUMMARY:** Public Law 99–500 signed into law by President Reagan on October 18, 1986, contained a provision requiring the Urban Mass Transportation Administration to publish an announcement in the **Federal Register** each time a grant is obligated pursuant to sections 3 and 9 of the Urban Mass Transportation Act of 1964, as amended. The statute requires that the announcement include the grant number, the grant amount, and the transit property receiving each grant. This notice provides the information as required by statute.

**FOR FURTHER INFORMATION CONTACT:** Edward R. Fleischman, Chief, Resource Management Division, (202) 366–2053, 400 Seventh Street, SW., Washington, DC 20590.

**SUPPLEMENTARY INFORMATION:** The section 3 program was established by the Urban Mass Transportation Act of 1964 to provide capital assistance to eligible recipients in urban areas. Funding for this program is distributed on a discretionary basis. The section 9 formula program was established by the Surface Transportation Assistance Act of 1982. Funds appropriated to this program are allocated on a formula basis to provide capital and operating assistance in urbanized areas. Pursuant to Pub. L. 99–500, UMTA reports the following grant information:

SECTION 3 GRANTS

| Transit property | Grant number | Grant amount | Date obligated |
|---|---|---|---|
| Metropolitan Dade County (Miami, Florida) | FL–03–0098 | $7,500,000 | 4–29–87 |
| Commuter Rail Division of Regional Transportation Authority (Chicago, Illinois) | IL–03–0102–03 | 11,250,000 | 4–29–87 |
| Massachusetts Bay Transportation Authority (Boston, Massachusetts) | MA–03–0139 | 13,139,100 | 5–6–87 |

SECTION 9 GRANTS

| Transit property | Grant number | Grant amount | Date obligated |
|---|---|---|---|
| Regional Transportation Authority (Chicago, Illinois) | IL–90–X094 | $52,000,000 | 3–20–87 |
| Pioneer Valley Transit Authority (Springfield, Massachusetts) | MA–90–X065 | 3,899,811 | 4–30–87 |
| Alameda-Contra Costa Transit Authority (Oakland, California) | CA–90–X231 | 14,356,856 | 5–6–87 |

Issued on: May 21, 1987.

Ralph L. Stanley,

*Administrator.*

## DEPARTMENT OF THE TREASURY

### Public Information Collection Requirements Submitted to OMB for Review

Dated: May 21, 1987.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

### Internal Revenue Service

*OMB number:* 1545-0165
*Form number:* 4224
*Type of review:* Extension
*Title:* Exemption from Withholding of Tax on Income Effectively Connected with the Conduct of a Trade or Business in the United States
*Description:* Form 4224 is used by nonresident alien individuals or fiduciaries, foreign partnerships, or foreign corporations to obtain exemption from withholding of tax on certain types of income if that income is effectively connected with a U.S. trade or business. The IRS uses the information to determine if the exemption is proper
*Respondents:* Individuals or households, Businesses
*Estimated burden:* 5,250 hours

*OMB number:* 1545-0035
*Form number:* 943, 943PR, 943A, 943A-PR
*Type of review:* Extension
*Title:* Employer's Annual Tax Return for Agricultural Employees
*Description:* Agricultural employees must prepare and file Form 943 and Form 943PR (Puerto Rico only) to report and pay FICA taxes and (943 only) income tax voluntarily withheld. Agricultural employers may attach Form 943A and 943A-PR to Forms 943 and 943PR to show their tax liabilities for eighth-monthly periods. The information is used to verify that the correct tax has been paid
*Respondents:* Farms, Businesses
*Estimated burden:* 332,733 hours
*Clearance officer:* Garrick Shear (202) 566-6150, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224
*OMB reviewer:* Milo Sunderhauf (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

### U.S. Customs Service

*OMB number:* 1515-0130
*Form Number:* None
*Type of Review:* Extension
*Title:* Free Admittance Under Conditions of Emergency
*Description:* To balance import accounts for goods temporarily admitted under conditons of national emergency or catastrophe for purposes of rescue or relief. Expected affected public would consist of non-profit assistance organizations
*Respondents:* Businesses, Federal agencies of employees, Non-profit institutions
*Estimated Burden:* 1 hour
*Clearance officer:* B. J. Simpson (202) 566-7529, U.S. Customs Service, Room 6426, 1301 Constitution Avenue, NW., Washington, DC 20229
*OMB reviewer:* Milo Sunderhauf (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

**POSTAL SERVICE BOARD OF GOVERNORS**

**"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT:** 52 FR 19444, May 22, 1987.

**PREVIOUSLY ANNOUNCED DATE OF MEETING:** June 2, 1987.

**CHANGE:** Addition of the following:

There will be a meeting of the Board, closed to the public, at 1:00 p.m., Monday, June 1, 1987, to consider the following capital investment: a. Murray Hill Station, New York, NY.

**AUTHORITY:** By telephone vote on May, 21, 1987, a majority of the members contacted and voting, the Board determined that pursuant to section 552b(c)(9)(B) of Title 5, United States Code, and § 7.3(i) of Title 39, Code of Federal Regulations, discussion of this matter is exempt from the open meeting requirements of the Government in the Sunshine Act because it is likely to disclose information, the premature disclosure of which would likely significantly frustrate implementation of a proposed action of the Board.

In accordance with section 552(f)(1) of Title 5, United States Code, and § 7.6(a) of Title 39, Code of Federal Regulations, the General Counsel has certified that in his opinion the additional agenda item of the meeting may properly be closed to the public for the reason cited above.

**CONTACT PERSON FOR MORE INFORMATION:** David F. Harris, (202) 268–4600.

# Department of Commerce

**National Telecommunications and Information Administration**

## Grants for Planning and Construction of Public Telecommunications Facilities; Acceptance of Applications for Filing; Notice

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Grants for Planning and Construction of Public Telecommunications Facilities; Acceptance of Applications for Filing

I. New Applications and Major Amendments to Deferred Applications

Notice is hereby given that the following described applications for Federal financial assistance are accepted for filing under provisions of Title III, Part IV, of the Communications Act of 1934, as amended (47 U.S.C. 390–94) and in accordance with 15 CFR Part 2301. All of the applications listed in this section were received by March 17, 1987. The effective date of acceptance of these proposals, unless otherwise indicated herein, is "Date Received". Applications are listed by their State.

The acceptance of applications for filing is a procedure designed for making preliminary determinations of eligibility and for providing the opportunity for public comment on applications. Acceptance of an application does not preclude subsequent return or disapproval of an application if it is found to be not in accordance with the provisions of either the Act or 15 CFR Part 2301, or if the applicant fails to file any additional information requested by the Public Telecommunications Facilities Program (PTFP). Acceptance for filing does not assure an application of being funded; it merely qualifies it to compete for funding with other applications which have also been accepted for filing.

Pursuant to 15 CFR 2301.9, applicants were required to publish in a newspaper of general circulation, in a community to be served by the applicant, a notice that such applications has been tendered to the PTFP of the National Telecommunications and Information Administration. The notice shall have been published once a week for two consecutive weeks on or before March 17, 1987. The notice included (1) information as to where within the community to be served a copy of the applicant, and any amendments hereto, may be inspected by the public during normal business hours; and (2) an invitation for parties supporting or opposing the application to file comments with the Administrator, National Telecommunications and Information Administration, Public Telecommunications Facilities Program, Washington, DC 20230. All comments must be filed within fifteen (15) calendar days from the date of the public notice of acceptance of the applications and must be accompanied by written assurance that a copy of the comments has been mailed to the applicant.

Scott Mason,
*Chief, Management Branch.*

Alaska

File No. 7082 CRB Pickle Hill Public Brdcstg., Inc., P.O. Box 2111, Kenai, AK 99611. Signed By: Ms. Marion Nelson, President. Funds Requested: $75,712. Total Project Cost: $100,950. To activate a noncommercial radio station, operating on 91.9 MHz. with a 4.44kw. ERP, to serve the central Kenai Peninsula in South Central Alaska. The station will repeat the signal of public radio station KSKA–FM, Anchorage. By replacing the applicant's existing FM translator service, the project will allow a public radio signal to reach 17,000 presently unserved people.

File No. 7083 CRB Aurora Community Broadcasting, 4101 University Drive, Anchorage, AK 99508. Signed By: Mr. Vince Walker, President. Funds Requested: $90,111. Total Project Cost: $120,149. To improve the signal of public radio station KSKA–FM, operating on 91.1 MHz in Anchorage, AK, by replacing its 75' tower with a 200' tower and installing a six-bay antenna to replace its present three-bay antenna. The project would also replace worn-out studio equipment by purchasing two audio tape recorders, two audio consoles, five cart machines, and signal processing equipment. KSKA brings the only public radio signal to 310,000 residents of the Anchorage area.

File No. 7113 CRB Alaska Public Radio Network, 4640 Old Seward Hwy., Suite 202, Anchorage, AK 99503. Signed By: Ms. Diane Kaplan, Executive Director. Funds Requested: $34,031. Total Project Cost: $45,375. To replace obsolete studio equipment at the Alaska Public Radio Network (APRN), Anchorage. The project will purchase an audio production console, signal processing equipment, 2 turntables, 3 tape recorders, 2 cart machines, a cassette deck, and 2 studio monitors. APRN's production studios provide satellite-fed programming to 16 full-service and 3 repeater public radio stations throughout Alaska.

File No. 7235 CTB Alaska Public Television, Inc., 2677 Providence Drive, Anchorage, AK 99508. Signed By: Mr. Elmo Sackett, General Manager. Funds Requested: $61,012. Total Project Cost: $61,350. To purchase a studio-to-transmitter microwave link, a transmitter remote control, a number of black-and-white and color monitors, and waveform monitors for public TV station KAKM, ch. 7, Anchorage, AK. The requested items will replace worn-out and obsolete equipment.

Alabama

File No. 7037 CRB Alabama A&M University, P.O. Box 174, Normal, AL 35762. Signed By: Dr. Douglas Covington, President. Funds Requested: $73,538. Total Project Cost: $96,050. To activate a noncommercial public FM radio station, operating on 91.9 MHz, in Normal. Station will serve the Huntsville-Madison County area as well as portions of four surrounding counties.

File No. 7052 CRB University of AL, Birmingham, University Station, Birmingham, AL 35294. Signed By: Dr. Kenneth Pruitt, Associate Vice President. Funds Requested: $44,030. Total Project Cost: $58,708. To improve the signal of noncommercial educational radio station WBHM–FM, operating on 90.3 MHz, in Birmingham. Station must co-locate its antenna on the new Channel 6 tower scheduled to be constructed by WBRC–TV. The present Channel 6 tower, 15 to 20 feet from the proposed site, is scheduled to be dismantled and replaced by the taller tower. Station provides service to approximately 900,000 residents of Birmingham and surrounding areas.

File No. 7259 CTN Huntsville City Schools, 715 Bob Wallace Ave., Huntsville, AL 35801. Signed By: Ms. Mary Jane Caylor, Superintendent. Funds Requested: $83,335. Total Project Cost: $114,585. To expand existing ITFS reception area by replacing four 21-year old transmitters. In addition, seeks to improve facility by acquiring a one-inch videotape recorder. New transmitters will extend service area from a 15-mile radius to a 30-mile radius.

File No. 7270 CTB Alabama ETV Commission, 2101 Magnolia Avenue, Birmingham, AL 35256. Signed By: Mr. Wilbur Hinton, General Manager. Funds Requested: $428,400. Total Project Cost: $612,000. To improve the origination/production equipment located at the network's telecommunication center in Montgomery. Project will replace worn-out cameras, recorders, a switcher, a signal processor and other related production equipment. The state-wide public television network serves approximately 4 million residents of Alabama.

File No. 7272 PTBN AL ETV Comm & AL Comm Higher Ed., 2101 Magnolia Avenue, Birmingham, AL 35256. Signed By: Dr. Joseph Sutton, Executive Director. Funds Requested: $40,890. Total Project Cost: $47,066. To plan and develop an integrated model for the more effective/efficient use of existing

BEST COPY AVAILABLE

and future telecommunications facilities. Model would emphasize the advantages of shared resources through possible networking between colleges/universities and AL ETV Commission.

File No. 7273 CRB Alabama ETV Commission, 2101 Magnolia Avenue, Birmingham, AL 35256. Signed By: Mr. Wilbur Hinton, General Manager. Funds Requested: $74,018. Total Project Cost: $86,690. To improve public radio station WLRH–FM, operating on 89.3 MHz. in Huntsville. Project will replace station's worn-out antenna, transmitter and related dissemination equipment. Station covers approximately 540,000 person in Huntsville and the surrounding areas.

File No. 7274 CTB Alabama ETV Commission, 2101 Magnolia Avenue, Birmingham, AL 35256. Signed By: Mr. Wilbur Hinton, General Manager. Funds Requested: $521,500. Total project Cost: $745,000. To replace the antenna systems of public television stations WBIQ–TV, Ch. 10, in Birmingham and WHIQ–TV, Ch. 25, in Huntsville. WBIQ–TV must re-locate its antenna onto the new Channel 6 tower scheduled to be constructed by WBRC–TV. WBIQ–TV is presently located on the WBRC–TV tower that is scheduled to be dismantled upon completion of the new, taller tower. WHIQ–TV will improve its signal by replacing obsolete, worn-out antenna and transmission line. In addition, network seeks funding to replace routing switcher at the network's tape delay center. Network serves approximately 4 million residents of Alabama.

**Arkansas**

File No. 7144 CRB Arkansas Broadcasting Foundation, 1501 Arch Street, Little Rock, AR 72202. Signed By: Mr. Scott Holladay, General Manager. Funds Requested: $84,093. Total Project Cost: $112,125. To improve public radio station KABF–FM, operating on 88.3 MHz, in Little Rock. Project will replace worn-out, obsolete antenna, transmitter and related dissemination equipment. In addition, will acquire an aural microwave for the studio-to-transmitter link to replace expensive telephone lines. Station serves 638,000 residents of Little Rock and surrounding areas.

File No. 7172 CTB Arkansas ETV Commission, 350 S. Donaghey, Conway, AR 72032. Signed By: Mr. Mike Mottler, Associate Director. Funds Requested: $391,437. Total Project Cost: $521,917. To improve public television station KETS, channel 2, in Little Rock. Project will replace worn out, obsolete transmitter and will provide for necessary test equipment for use with new transmitter. Station serves more than 1 million residents of Central and South Central Arkansas.

**American Samoa**

File No. 7313 CTB American Samoa Government, Pago Pago, AS 96799. Signed By: Mr. Leo'o Va'a Ma'o, Director. Funds Requested: $616,770. Total Project Cost: $616,770. To improve the facilities of public television station KVZK, operating on Ch. 2 in Pago Pago by providing studio lighting, switching and other production equipment. The project will also provide for a portable microwave system to enable the station to provide live programming from throughout the island of American Samoa. In addition, the project will add transmitter remote control equipment. KVZK serves 33,000 residents of American Samoa.

**Arizona**

File No. 7157 PRB Tuba City High School Brd., Inc., Box 160, Warrior Drive, Tuba City, AZ 86045. Signed By: Mr. Lee Johnson, President. Funds Requested: $94,665. Total Project Cost: $94,665. To plan for a noncommercial FM radio station, operated by the Tuba City High School Board Inc., to bring specialized programming to 15,000 residents of the Western Navajo Agency.

File No. 7241 CTN University of Arizona, Tuscon, AZ 85721. Signed By: Mr. William Noyes, Associate Vice President. Funds Requested: $276,174. Total Project Cost: $368,232. To establish an Arizona public telecommunications network by interconnecting via microwave KUAT–TV channel 6 Tucson with KAET–TV channel 8 Phoenix/Tempe to provide a system for state-wide educational and information programming.

File No. 7242 CTB Navajo Community College, Library Building, Tsaile, AZ 86556. Signed By: Mr. Dean Jackson, President. Funds Requested: $126,001. Total Project Cost: $168,002. To continue the development of the Navajo Nation Network based in Tsaile, Arizona to provide a first public television service to the Navajo reservation in Arizona, New Mexico and Utah.

**California**

File No. 7038 CRB KXOL–FM, 1252 E. 10th St., Chico, CA 95926. Signed By: Marcus Smith. Funds Requested: $78,881. Total Project Cost: $105,188. To activate a new noncommercial radio station broadcasting on 90.3 MHz in Chico, CA to serve black and minority audiences.

File No. 7059 CRB Pacifica Foundation, 3729 Cahuenga Blvd. West, No. Hollywood, CA 91604. Signed By: Mr. David Salniker, Executive Director. Funds Requested: $151,449. Total Project Cost: $201,963. To improve the production facilities of public radio station KPFK, operating on 90.7 MHz in Los Angeles, CA by replacing obsolete production equipment in the master control, production, news and mini-production rooms. KPFK serves eleven million people in greater Los Angeles metropolitan area.

File No. 7071 CTN Maga Link, Inc., 1272 South Bronson Ave., Los Angeles, CA 90019. Signed By: Mr. Brock Peters, President. Funds Requested: $1,816,676. Total Project Cost: $2,422,235. To establish a television & radio facility for the production of programs aimed at minority audiences. The applicant is the recipient of a CPB Minority Programming Consortium Grant for the production of programming for distribution to public stations throughout the United States.

File No. 7092 CTB Surprise Valley Community TV, Unified School District, Cedarville, CA 96104. Signed By: Ms. Linda Hussa, Board Chair. Funds Requested: $83,250. Total Project Cost: $111,300. To provide first public television service to the 1300 residents of the Surprise Valley area of northeast California. The applicant will construct a low power facility on Ch. 13 and is part of the Rural Television Service consortium of non-profit groups bringing public television to rural areas throughout the western United States.

File No. 7094 CTB Central California ETV, Inc., 2480 Garden Highway, P.O. Box 6, Sacramento, CA 95801. Signed By: Mr. John Hershberger, President & General Manager. Funds Requested: $177,542. Total Project Cost: $273,141. To improve the facilities of public television station KVIE operating on Ch. 6, Sacramento CA, by replacing three obsolete quadruplex videotape recorders with three 1" C-Format videotape machines. KVIE serves four million persons in twenty one counties in California.

File No. 7166 CTN San Diego State University Fnd., San Diego State University, San Diego, CA 92182–1900. Signed By: Mr. Lawrence Feinberg, Associate Dean. Funds Requested: $183,103. Total Project Cost: $244,138. To extend an ITFS service operated by San Diego State University in Imperial County, CA, to Yuma and La Paz counties in Arizona. The project would also provide first local origination in Calexico, CA and Yuma, AZ. The Arizona portion of the project will be operated in conjunction with Arizona Western College, Yuma. The project will also improve the delivery of

programming from San Diego State University, San Diego, to Imperial County. The project will utilize cable distribution to serve some 220,000 people in three counties.

File No. 7173 CRB University of California, 2311 Bowditch, Berkeley, CA 94720. Signed By: Ms. Nancy Caputo, Contract & Grant Officer. Funds Requested: $20,851. Total Project Cost: $26,828. To improve the facilities of noncommercial radio station KALX, operating on 90.7 MHz in Berkeley, CA, by adding additional production capability. KALX serves 3 million people in the San Francisco Bay area.

File No. 7175 CRB KCBX, Inc., 4100 Vachell Lane, San Luis Obispo, CA 93401. Signed By: Mr. Frank Lanzone, Jr., President & General Manager. Funds Requested: $82,685. Total Project Cost: $110,250. To improve the facilities of public radio station KCBX–FM, operating on 90.1 MHz in San Luis Obispo, CA, by replacing its obsolete transmission system, including transmitter, antenna, STL and remote control. KXBX serves 300,000 people in the central coast of California.

File No. 7183 CRB Mendocino County Public Brdcstg., 17400 Fitch Lane, Boonville, CA 95415. Signed By: Mr. Sean Donovan, President. Funds Requested: $210,676. Total Project Cost: $280,902. To activate a new public radio station to operate on 90.7 MHz in Philo, to serve 85,000 people in Mendocino and Lake counties. The project would also construct a translator to rebroadcast the station's signal to 20,000 people in the Ft. Bragg and surrounding area of the Mendocino coast.

File No. 7190 PRB Watts Communication Network, 1715 Santa Ana Boulevard, Los Angeles, CA 90002. Signed By: Ms. Johanna Carrington, Executive Director. Funds Requested: $72,428. Total Project Cost: $88,794. To plan for the establishment of a low power public radio station to serve the 300,000 residents of the watts area of Los Angeles, CA.

File No. 7200 CTB Redwood Empire PTV, Inc., 7246 Humboldt Hill Road, Eureka, CA 95502–0013. Signed By: Mr. Darrell Shull, President. Funds Requested: $71,967. Total Project Cost: $95,956. To improve the facilities of public television station KEET–TV, operating on Ch. 13, Eureka, CA, by replacing an obsolete STL and adding test equipment. The project will augment the recently installed KEET transmitter in providing continued service to 165,000 people in northern California.

File No. 7264 CTB KQED, Inc., 500 Eighth Street, San Francisco, CA 94103. Signed By: Mr. Eugene Zastrow, Executive Vice President. Funds Requested: $91,072. Total Project Cost: $151,787. To improve the facilities of public television station KQEC, operating on Ch. 32, San Francisco, CA, by replacing an obsolete transmitter exciter and related equipment. KQEC serves four million people in the San Francisco bay area.

File No. 7291 CRB Great Silence Brdcstg. Fnd., Inc., 582 Lighthouse Avenue, Pacific Grove, CA 93950. Signed By: Mr. Richard Terry, Station Manager. Funds Requested: $21,989. Total Project Cost: $29,319. To improve the facilities of public radio station KAZU–FM, operating on 90.3 MHz, Pacific Grove, CA, by replacing obsolete production equipment, and by adding additional satellite receive channel capability. KAZU serves some 500,000 people in Monterey and Santa Cruz counties.

File No. 7293 CTB Rural CA Broadcasting Corp., 5850 LaBath, P.O. Box 2698, Rohnert Park, CA 94928. Signed By: Mr. John Kramer, Board Member. Funds Requested: $164,572. Total Project Cost: $219,430. To improve the facilities of public television station KRCB–TV, operating on Ch. 22 in Rohnert Park, CA, by replacing obsolete production equipment. The project will also provide auxiliary exciter and STL to insure continued service to some 800,000 people in the Napa and Sonoma Valley areas of California.

File No. 7303 CTB Black TV Workshop of Los Angeles, 4241 Redwood Avenue, Los Angeles, CA 90066. Signed By: Mr. Booker Wade, Vice President. Funds Requested: $1,028,615. Total Project Cost: $1,389,737. To establish a minority owned public television station, KDDE–TV, operating on Ch. 68, to serve the Los Angeles area. The station will direct programming at the estimated l million blacks and other minorities living in the ten million population Los Angeles metropolitan area.

File No. 7321 CTB Community TV of Southern CA, 4401 Sunset Blvd., Los Angeles, CA 90027. Signed By: Mr. Donald Youpa, Senior Vice President. Funds Requested: $193,137. Total Project Cost: $257,517. To improve the facilities of public television station KCET, operating on Ch. 28 in Los Angeles by replacing three obsolete 2" quadraplex videotape recorders with 1" VCR's. KCET provides service to eleven million people in southern California.

File No. 7328 CTB Off. Superintendent of Schools, 135 S. Jackson St., Independence, CA 39526. Signed By: Mr. Ken Baker, Superintendent. Funds Requested: $185,440. Total Project Cost: $247,255. To provide first public television to service 9,500 people in Inyo County Ca. Applicant will construct a lower power facility and two translators to serve the communities of Bishop, Independence and Big Pine. Applicant is part of the Rural Television Service Consortium of non-profit groups bringing public television to rural areas of the western United States.

**Colorado**

File No. 7036 CTB Baca County, 741 Main Street, Springfield, CO 81073. Signed By: Mr. Roy Brinkley, County Commissioner. Funds Requested: $44,292. Total Project Cost: $59,056. To extend the signal of KTSC–TV operating on Channel 8, Pueblo, Colorado with 4 translators located in Baca County, Colorado to provide first public television service to 5,500 persons.

File No. 7067 CTN National Technological Univ., 601 S. Howes Street, Ft. Collins, CO 80522. Signed By: Mr. Lionel Baldwin, President. Funds Requested: $1,094,362. Total Project Cost: $2,007,700. To expand a national satellite based network through National Technological University in Fort Collins, Colorado to provide a system for continuing graduate level engineering and technical education at worksites from 10 additional uplinks nationally and to better operate that projected 28-site network through the installation of a control center.

File No. 7088 CRB KUTE, Inc., 277 Ouray St., P.O. Box 737, Ignacio, CO 81137. Signed By: Mr. Jack McDonald, General Manager. Funds Requested: $12,102. Total Project Cost: $16,136. To extend the signal of public radio station KSUT–FM operating on 91.3 Mhz, Ignacio, Colorado with translators to provide the first public radio service to 90,000 residents of Farmington, New Mexico.

File No. 7145 CTB Board of County Commissioners, Box 248, Burlington, CO 80807. Signed By: Mr. William Hornung, Chairman. Funds Requested: $68,043. Total Project Cost: $90,724. To improve and extend the signal of KRMA–TV 6, Denver by replacing obsolete microwave and translator facilities presently serving 7,599 existing and adding 8,818 new viewers in Kit Carson, Cheyenne, Lincoln and Yuma Counties in southeastern Colorado.

File No. 7160 CTB Front Range Ed. Media Corp., 6801 West 117th Avenue, Broomfield, CO 80020. Signed By: Mr. Ted Krichels, General Manager. Funds Requested: $256,810. Total Project Cost: $342,413. To improve the production and transmission capabilities of public television station KBDI–TV, channel 12, Broomfield, Colorado by installing state of the art production equipment and replacing the existing studio to transmitter link.

File No. 7180 CRB San Miguel Educational Fund, P.O. Box 1069, Telluride, CO 81435. Signed By: Mr. Robert Allen, Station Manager. Funds Requested: $25,245. Total Project Cost: $37,660. To extend and improve the signal of public radio station KOTO–FM, Telluride, Colorado by placing three translators in the adjoining communities and installing additional production equipment to provide a first public radio service to 800 residents of Norwood, Pandora and Ophir, Colorado.

File No. 7193 CRB Crested Butte Mt. Ed. Radio, Inc, 29 Marcellina Lane, P.O. Box 308, Crested Butte, CO 81224. Signed By: Ms. Dana Dabagia, General Manager. Funds Requested: $16,147. Total Project Cost: $24,990. To upgrade the programming capabilities of public radio station KBUT–FM, Crested Butte, Colorado by installing a satellite receive dish and additional recording units to receive NPR programming.

File No. 7225 CTB University of Southern Colorado, 2200 Bonforte Boulevard, Pueblo, CO 81001–4901. Signed By: Mr. Robert Shirley, President. Funds Requested: $311,614. Total Project Cost: $467,421. To improve the production and transmission capability of public television station KTSC–TV, channel 8, Pueblo, Colorado by replacing obsolete production equipment and adding additional microwave interconnections to the Colorado Springs area in order to provide a first local origination capacity for the residents to that city.

File No. 7331 CRB Carbondale Cmty. Access Radio, 417 Main St., P.O. Box 1388, Carbondale, CO 81623. Signed By: Mr. Lee Swidler, Member of Board. Funds Requested: $17,670. Total Project Cost: $23,560. To improve the programming capabilities of public radio station KDNK–FM operating on 90.5 MHz, Carbondale, Colorado by installing a satellite dish to receive NPR programming.

File No. 7336 CRB Denver Educational Brdcstg., Inc., 4460 Morrison Rd, P.O. Box 11111, Denver, CO 80211. Signed By: Ms. Florence Ramos, President & General Manager. Funds Requested: $27,214. Total Project Cost: $36,286. To improve the programming capabilities of public radio station KUVO–FM operating on 89.3 MHz in Denver, Colorado by installing a satellite dish to receive NPR programming.

**Connecticut**

File No. 7228 CTB Connecticut Ed. Telecommunications Corp., 24 Summit Street, Hartford, CT 06106. Signed By: Mr. Jerry Franklin, President. Funds Requested: $455,000. Total Project Cost: $910,000. To improve the operation of the control center of the state network by replacing obsolete production equipment with state-of-the-art equipment. Network includes three transmitters. Request includes six cameras, audio consoles and other audio equipment which will be used in the main studio and the remote truck.

**District of Columbia**

File No. 7202 PRN National Federation of Community Brdcstg., 1314 14th Street NW., Washington, DC 20005. Signed By: Mr. William Thomas, Acting Executive Director. Funds Requested: $72,880. Total Project Cost: $120,880. The objectives of this planning project are to assess the station-based technical facilities available and improvement necessary to: 1. Significantly increase national production and distribution of programming for minority and other specialized audiences, 2. Strengthen programming, information and opportunities for growth of between 40 and 60 stations. Project is to plan to increase number of satellite interconnected stations and develop station-based minority production centers.

File No. 7212 CTN Network for Instructional TV, 1901 L Street NW., Washington, DC 20036. Signed By: Mr. Thomas Pyle, Executive Director. Funds Requested: $145,700. Total Project Cost: $195,700. To establish a national educational satellite network which will connect 19 planned or operating ITFS systems. Interconnection will allow exchange of instructional materials and expertise. Fourteen receive only earth stations are requested.

File No. 7312 CRB University of DC, 4200 Connecticut Ave., NW., Washington, DC 20008. Signed By: Dr. Anne Hughes, Director of Development. Funds Requested: $84,525. Total Project Cost: $112,700. To extend the coverage of noncommercial educational radio station WDCU–FM, operating on 90.1 MHz, in Washington, DC Station proposes to increase power from 6,800 watts to 50,000 watts.

**Florida**

File No. 7003 CTB The University of Florida, 219 Grinter Hall, Gainesville, FL 32611. Signed By: Mr. Dillard Marshall, Assistant Director of Research. Funds Requested: $89,805. Total Project Cost: $119,740. To improve public television station WUFT–TV, channel 5, in Gainesville by replacing obsolete studio switcher. The American Data studio switcher currently in use is no longer manufactured and replacement parts are impossible to obtain. WUFT–TV provides noncommercial educational television services to approximately 600,000 residents of North Central Florida.

File No. 7007 CRB The University of Florida, 219 Grinter Hall, Gainesville, FL 32611. Signed By: Mr. Dillard Marshall, Assistant Director of Research. Funds Requested: $17,521. Total Project Cost: $23,362. To improve noncommercial educational FM station WUFT–FM, operating on 89.1 MHz, in Gainesville. Station proposes to acquire a back-up studio-to-transmitter (STL) microwave link and a back-up transmitter exciter. Station serves approximately 763,150 residents of North Central Florida.

File No. 7016 CTB WJCT, Inc., 100 Festival Park Avenue, Jacksonville, FL 32202. Signed By: Mr. Fred Rebman, President. Funds Requested: $458,158. Total Project Cost: $610,878. To improve the facilities of public television station WJCT–TV, channel 7, in Jacksonville. Station seeks to acquire 7 gigahertz transmitter-to-studio link and remote TV pickup microwave units to replace 2 gigahertz units. Current microwave system is experiencing interference problems due to overcrowding and limited number of 2 gigahertz channels. Station also seeks to replace worn-out, obsolete production equipment to better serve the more than 1.2 million residents of area.

File No. 7021 CTB Community Communications, Inc., 11510 E. Colonial Drive, Orlando, FL 32817–4699. Signed By: Mr. Stephen Steck, President. Funds Requested: $44,250. Total Project Cost: $59,000. To improve the facilities of public television station WMFE–TV, channel 24, in Orlando. Station will acquire a new studio-to-transmitter (STL) microwave link to replace current worn-out, obsolete unit. WMFE–TV provides a noncommercial educational/public television service to approximately 1.8 million residents in central Florida.

File No. 7135 CRB University of Central Florida, 4000 Central Florida Blvd., Orlando, FL 32816. Signed By: Dr. Joan Burr, Director of sponsored Research. Funds Requested: $52,500. Total Project Cost: $70,000. To extend the coverage area of public radio station WUCF–FM, operating on 89.9 MHz, in Orlando. Station seeks funding to replace existing transmitter and antenna and thus increase power from 7.94 KW to 100 KW. Proposed modifications will more than double the effective coverage area of the station.

File No. 7136 CTB Pensacola Junior College, 1000 College Blvd., Pensacola, FL 32504. Signed By: Dr. Charles Atwell, Executive Vice President. Funds Requested: $195,491. Total Project Cost: $260,655. To improve the facilities of

public television station WSRE–TV, channel 23, in Pensacola. Proposal would acquire a back-up visual and aural exciter and a back-up studio-to-transmitter (STL) link. In addition, WSRE–TV seeks to replace several old, obsolete recorders with a new console model recorder and a consolette recorder. Station provides service to approximately 240,000 residents of northwest Florida.

File No. 7150 PRB University of South Florida, 4202 Fowler Avenue, Tampa, FL 33620. Signed By: Mr. Frank Lucarelli, Director Sponsored Research. Funds Requested: $92,571. Total Project Cost: $92,571. To plan for the activation of a Radio Reading Service for the blind and print handicapped in the Orlando/Daytona Beach area. The 24 hour daily service from Tampa will be used as the main radio reading service feed. Local inserts will be dovetailed with the main feed to create a customized program service for the local area.

File No. 7165 CTB The University of South Florida, 4202 Fowler Ave., SVC 116, Tampa, FL 33620. Signed By: Mr. Frank Lucarelli, Director of Sponsored Research. Funds Requested: $45,645. Total Project Cost: $60,860. To improve noncommercial educational TV station WUSF–TV, channel 16, in Tampa. Project will purchase equipment to change the transmitter to operate by remote control. Station serves approximately 2.4 million residents in the Tampa-St. Petersburg area.

File No. 7302 CRB South FL Public T/C, Inc., 505 South Congress Avenue, Boynton Beach, FL 33435. Signed By: Mr. Sam Barbaro, Vice President & General Mgr. Funds Requested: $114,180. Total Project Cost: $152,240. To improve the signal of noncommercial educational FM station WXEL–FM, operating on 90.7 MHz, in Boynton Beach. Project will acquire new antenna, transmitter, trans. line and related equipment to correct impairments in station's current signal. Station serves an estimated 2.4 million residents of Boynton Beach/Palm Beach and surrounding areas.

File No. 7323 CRB Florida State University, 2561 Pottsdamer Street, Tallahassee, FL 32304. Signed By: Mr. Robert Johnson, Vice President. Funds Requested: $171,225. Total Project Cost: $228,300. To increase the coverage of noncommercial educational radio station WFSU–FM, operating on 91.5 MHz, in Tallahassee. Project will relocate transmission facility to a new site approximately 25 miles N.E. of city, increase power and antenna height. Proposal will replace station's transmission, monitoring and control equipment. Project will provide a first public radio signal to approximately 173,286 residents not in current coverage area. 31,420 residents now covered will be outside the proposed coverage area due to relocation, for a net gain of 141,866 first service.

**Georgia**

File No. 7062 CRB Atlanta Bd. of Educ., 740 Bismark Road, NE., Atlanta, GA 30324. Signed By: Dr. Alonza Crim, Superintendent. Funds Requested: $79,124. Total Project Cost: $105,499. To improve noncommercial educational radio station WABE–FM, operating on 90.1 MHz, in Atlanta. In addition, WABE–FM seeks to replace worn out, obsolete control room and outmoded production equipment. Station serves an estimated audience of 2.5 million in the Atlanta metropolitan area.

File No. 7078 CTB Atlanta Board of Education, 740 Bismark Road, NE., Atlanta, GA 30324. Signed By: Dr. Alonza Crim, Superintendent. Funds Requested: $651,166. Total Project Cost: $868,221. To improve public television station WPBA–TV, Channel 30, in Atlanta. Project will acquire new dissemination, origination and test equipment to allow for increased production of local programming. Station provides educational and instructional program service to approximately 2.5 million residents of the Atlanta area.

File No. 7158 PTN Fort Valley State College, 805 State College Drive, Fort Valley, GA 31030. Signed By: Dr. Linda Hall. Funds Requested: $85,925. Total Project Cost: $85,925. To plan the feasibility of establishing a telecommunications network. Project would be used to evaluate the capabilities and limitations of the existing system and evaluate possible expansion. Programming would be developed and disseminated for purposes of academic instruction, community outreach and continuing education. FVSC has received limited funding through Title III to procure a down-link satellite dish, cabling and monitors.

File No. 7238 CTB GA Public T/C Commission, 1540 Stewart Ave., SW., Atlanta, GA 30310. Signed By: Mr. Richard Ottinger, Executive Director. Funds Requested: $1,228,400. Total Project Cost: $2,343,400. To expand the coverage of public television stations WABW, channel 14, in Pelham and WCLP, channel 18, in Chatsworth. Project will replace worn out, obsolete transmitters, antennas, transmission lines and related dissemination equipment. Replacement will provide stronger signal over existing coverage areas and will extend coverage to an additional 191,757 residents.

File No. 7244 CRB Radio Free GA Broadcasting Fnd., 1083 Austin Ave., N.E., Atlanta, GA 30307. Signed By: Ms. Melanie Collins, Executive Director. Funds Requested: $81,265. Total Project Cost: $106,354. To improve noncommercial educational radio station WRFG–FM, operating on 89.3 MHz, in Atlanta. Project will replace/upgrade production equipment. Station serves approximately 2.1 million residents of the metropolitan Atlanta area.

File No. 7318 CRB Georgia Public Radio, Inc., 409 E. Liberty Street, Savannah, GA 31401. Signed By: Mr. Lawrence Roberts, General Manager. Funds Requested: $24,553. Total Project Cost: $32,737. To improve public radio station WSVH–FM, operating on 91.1 MHz, in Savannah. Project will acquire 150 SCA receivers and origination equipment for the radio reading service for the print handicapped. In addition, will improve main station by acquiring additional origination and test equipment. Station serves approximately 500,000 residents of Savannah and surrounding areas.

**Hawaii**

File No. 7118 CTB Hawaii Public Brdcstg. Authority, 2350 Dole St., Honolulu, HI 96822. Signed By: Mr. James Young, Executive Director. Funds Requested: $255,579. Total Project Cost: $340,773. To improve the facilities of Hawaii Public Broadcasting, operating on Ch. 11 in Honolulu and Ch. 10 in Maui. The project would replace an obsolete film chain at KHET headquarters in Honolulu, and replace remote control/off air reception equipment used in Maui. The two stations, supplemented by a series of translators, serve one million people in the state.

**Iowa**

File No. 7109 CTB Iowa Public Broadcasting Board, 6450 Corporate Drive, Johnston, IA 50131. Signed By: Mr. George Carpenter, III, Executive Director. Funds Requested: $1,416,291. Total Project Cost: $1,886,664. To improve the facilities of Iowa Public Broadcasting's premier studio facility at public television station KDIN–TV, channel 11, Johnston, IA, by providing first local originating capability to that location and to the State network to serve communities throughout Iowa with quality educational and cultural programming.

File No. 7110 CTB Iowa Public Broadcasting Board, 6450 Corporate Drive, Johnston, IA 50131. Signed By: Mr. George Carpenter, III, Executive

Director. Funds Requested: $98,068. Total Project Cost: $130,784. To improve the telecommunications capability of public television station KDIN–TV, channel 11, Johnston, IA, and those of the Iowa Public Broadcasting System by providing stand-by satellite uplink and microwave links to assure continued distribution of needed program services to Iowa communities and to feed regional and national public telecommunications networks.

File No. 7114 CTN Iowa Public Broadcasting Board, 6450 Corporate Drive, Johnston, IA 50131. Signed By: Mr. George Carpenter, III, Executive Director. Funds Requested: $3,793,217. Total Project Cost: $5,057,623. To activate and extend an instructional television fixed service telecommunications system utilizing channels A, B, C, D, and G; 1 and 2, in a fifteen county area in southwest Iowa. The service would provide a variety of public telecommunications services to postsecondary, other education agencies, school districts community agencies and businesses in that area of the state. In addition, the proposed service would bring first service to approximately six thousand persons not currently receiving a public telecommunications signal.

**Idaho**

File No. 7004 CTB ID Ed. Public Brdcstg. System, 1910 University Drive, Boise, ID 83725. Signed By: Mr. Jerold Garber, General Manager. Funds Requested: $1,028,505. Total Project Cost: $1,371,341. To improve the facilities of the Idaho Educational Public Broadcasting System by replacing obsolete transmission and production facilities in Boise, (KAID–TV, Channel 4) Pocatallo (KISU–TV Channel 10) and Moscow (KUID–TV Channel 12) and to increase the power of transmitters in Boise, and Pocatello. File No. 7251 CRB Idaho Migrant Council, Inc., 317 Happy Day Blvd., Caldwell, ID 83606–0490. Signed By: Mr. Humberto Fuentes, Executive Director. Funds Requested: $128,499. Total Project Cost: $171,332. To establish a noncommercial FM radio station KIMC–FM operating on 91.5 MHz in Caldwell, Idaho to provide programming to the Hispanic population within the southwestern section of Idaho and east central section of Oregon.

**Illinois**

File No. 7018 CTB Black Hawk College, 6600 34th Avenue, Moline, IL 61265. Signed By: Dr. Charles E. Lawa, President. Funds Requested: $175,431. Total Project Cost: $233,908. To replace worn and obsolete studio origination apparatus of public television station WQPT–TV, channel 24, Moline, IL. The new cameras and switching equipment will increase both the reliability and flexibility of the station's origination capability.

File No. 7043 CRB University of Illinois, 354 Administration Building, Urbana, IL 61801. Signed By: Mr. H. J. Stapleton, Secretary Campus Research Brd. Funds Requested: $38,145. Total Project Cost: $76,285. To replace worn and obsolete origination equipment and improve studio production facilities at public radio station WILL–FM, 90.9 Mhz., Urbana, IL, in order to better serve the programming needs of the communities in east central Illinois and west central Indiana.

File No. 7063 CTB Chicago ETV Association, 5400 North St. Louis Avenue, Chicago, IL 60625. Signed By: Mr. John Rahmann, Executive Vice President. Funds Requested: $275,000. Total Project Cost: $550,000. To improve the origination and remote mobile studio capability of public television station WTTG–TV, channel 11, IL, by replacing worn and obsolete broadcasting equipment in order to provide better programming to the communities in the metropolitan Chicago area.

File No. 7100 CRB Prairie Air, Inc., 113 N. Market, Champaign, IL 61820. Signed By: Mr. Lee Ferraro, Business Manager. Funds Requested: $18,421. Total Project Cost: $24,563. To replace worn and obsolete origination and test equipment at public radio station WEFT–FM, 90.1 MHz., Champaign, IL. in order to assure continued local program services and upgrade the quality of signal to the communities in the Champaign and Urbana metropolitan areas.

File No. 7141 CRB Wabash Valley College, 233 East Chestnut Street, Olney, IL 62450. Signed By: Mr. Harry Smith, Chancellor. Funds Requested: $113,398. Total Project Cost: $155,340. To improve the signal quality and production capability of noncommercial radio station WVJC–FM, 89.1 MHz., Mt. Carmel, IL., in order to meet the public telecommunications needs in the eight county area comprising the eastern community college district.

File No. 7156 CTN Waubonsee Community College, Route 47 at Harter Road, Sugar Grove, IL 60554. Signed By: Dr. John Swalec, President. Funds Requested: $431,233. Total Project Cost: $586,477. To activate a four channel instructional television fixed service on channels A 1 thru 4, Sugar Grove, IL, and provide program origination equipment for local programming and reception at nine high school sites in the communities surrounding Aurora, Illinois.

File No. 7178 CTB Southern Illinois University, Communications Building, SIU–C, Carbondale, IL 62901. Signed By: Mr. John Guyon, Acting President. Funds Requested: $59,536. Total Project Cost: $89,304. To improve the reliability of microwave interconnection capabilities between public television stations WSIU–TV, channel 8, Carbondale, IL., and WUSI–TV, channel 16, Olney, IL, in order to provide back-up microwave channels to an aging studio to transmitter link so that communities in the southern part of ILlinois can be provided program service.

File No. 7334 CRB Southern Illinois University, Communications Building, SIU–C, Carbondale, IL 62901. Signed By: Mr. John Guyon, Acting President. Funds Requested: $92,500. Total Project Cost: $140,600. To replace worn and obsolete dissemination equipment for public radio station WSIU–FM, 91.9 MHz., Carbondale, IL, by providing a new transmitter, studio to transmitter microwave and a stand-by power generator to assure dissemination reliability in order to serve the counties in southern Illinois and in neighboring Missouri and Indiana.

**Indiana**

File No. 7005 CTB Michiana Public Brdcstg. Corp., 2300 Charger Blvd., Elkhart, IN 46514. Signed By: Mr. Don Checots, Executive Director. Funds Requested: $1,079,900. Total Project Cost: $1,504,900. To extend the signal of public television station WNIT–TV, channel 34, South Bend-Elkhart, IN., by providing new dissemination equipment to Michiana Public Broadcasting Corp. and replacing worn and obsolete production facilities in order to improve services to the South Bend-Elkhart metropolitan area.

File No. 7010 CRB Indiana University, Indiana University, Bryan 215E, Bloomington, IN 47405. Signed By: Mr. William E. Farquhar, Director, Contract Admin. Funds Requested: $41,610. Total Project Cost: $55,480. To replace worn and obsolete transmission equipment at public radio station WFIU–FM, 103.7 MHz., Bloomington, IN. The new transmitter will both increase the reliability of the broadcast signal and improve signal quality to the benefit of communities in the Bloomington metropolitan area.

File No. 7137 CRB Indiana State University, Terre Haute, IN 47809. Signed By: Mr. Richard Clokey, Vice President. Funds Requested: $37,713. Total Project Cost: $50,285. To aid in the relocation of dissemination facilities and

increase the area of signal coverage for noncommercial radio station WISU–FM, 89.7 MHz., Terre Haute, IN, in order to provide expanded coverage to the communities in the metropolitan Terre Haute area.

File No. 7213 CRB Metro. Indianapolis PB, Inc., 1401 N. Meridian Street, Indianapolis, IN 46202–2389. Signed By: Mr. Frank Meek, Executive Vice President. Funds Requested: $50,975. Total Project Cost: $85,975. To improve the dissemination and origination facilities of public radio station WIAN–FM, 90.1 MHz., Indianapolis, IN, by providing a new studio to transmitter microwave and program production equipment to meet the public radio needs of the metropolitan Indianapolis area.

File No. 7249 CTB Ball State University, 620 W. Minnetrista Blvd., Muncie, IN 47303. Signed By: Mr. Thomas Kinghorn, Vice President. Funds Requested: $808,425. Total Project Cost: $1,077,900. To improve, upgrade and expand the origination capacity of public television station WIPB–TV, channel 49, Muncie IN, in order to facilitate locally originated programming to meet the telecommunications needs of the Muncie metropolitan area.

File No. 7298 CTB SW Indiana Public Brdcstg., Inc., 405 Carpenter Street, Evansville, IN 47708. Signed By: Mr. David Dial, President & General Manager. Funds Requested: $103,035. Total Project Cost: $137,380. To replace worn and obsolete studio cameras and improve other origination equipment at public television station WNIN–TV, channel 9, Evansville, IN, to continue local program production services to the communities in southwest Indiana, southeast Illinois and northwest Kentucky.

File No. 7300 CTB Fort Wayne Public Television, 227 E. Washington Blvd., Fort Wayne, IN 6802. Signed By: Mr. John Rupright, President. Funds Requested: $372,267. Total Project Cost: $496,356. To provide first main studio local origination capability to public television repeater station WFWA–TV, channel 39, Fort Wayne, IN. in order to meet the local programming needs of Indiana's second largest city and neighboring communities.

**Kansas**

File No. 7006 CRB Pittsburg State University, 1701 South Broadway, Pittsburg, KS 66762–5880. Signed By: Mr. Donald Wilson, President. Funds Requested: $506,980. Total Project Cost: $675,974. To activate a noncommercial FM radio station, which will operate on 89.9 MHz at 100 kw, at Pittsburg State University, Pittsburg, KS. The station's signal will reach over 312,000 residents of SE Kansas, NE Oklahoma, NW Arkansas, and SW Missouri. For approximately 180,000 of these people, it will represent a first public radio signal.

File No. 7046 CTB Washburn University of Topeka, 301 N. Wanamaker, Topeka, KS 66606. Signed By: Dr. John Green, Jr., President. Funds Requested: $108,172. Total Project Cost: $144,230. To replace a worn-out transmission line and an obsolete audio console and to purchase spare visual and aural exciters for public television station KTWU, operating on Ch. 11 in Topeka, KS.

File No. 7072 CTB Kansas Public T/C Service, Inc., 320 West 21st St., P.O. Box 288, Wichita, KS 67201. Signed By: Mr. Zoel Parenteau, President & General Manager. Funds Requested: $44,867. Total Project Cost: $59,825. To replace two obsolete 2" video tape recorders with one 1" VTR at public TV station KPTS, Ch. 8, Wichita, KS.

File No. 7231 CTB Smoky Hills Public TV, Corp., 6th & Elm Streets, Bunker Hill, KS 67626. Signed By: Mr. Kenneth Gardner, Vice President & General Mgr. Funds Requested: $999,000. Total Project Cost: $1,317,000. To extend the signal of public TV station KOOD, Ch. 9, Bunker Hill, KS, by constructing a repeater station at Lakin, KS. The new station will operate on Ch. 3 with an ERP of 100 kw. It will bring the first public TV signal to over 95,000 residents of the Lakin-Garden City-Dodge City area of southwestern Kansas.

File No. 7325 CRB Kanza Society Incorporated, #1 Broadcast Plaza, Box 57, Pierceville, KS 67868. Signed By: Mr. Bruce Glass, Treasurer. Funds Requested: $30,872. Total Project Cost: $41,163. To install a new antenna and tower at an existing FM translator in Tribune, KS, which retransmits the signal of public radio station KANZ–FM, 91.9 MHz, Pierceville, KS. The project will also replace worn-out studio equipment at KANZ–FM—turntables, recorders, a switcher, a mixing board, and a phone patch—and will purchase some test equipment. In addition, it will purchase 50 SCA receivers for the Kanza Society's radio reading service for the print-handicapped.

**Kentucky**

File No. 7218 CTB Fifteen Telecommunications, Inc., 4309 Bishop Lane, P.O. Box 37380, Louisville, KY 40218. Signed By: Mr. John-Robert Curtin, General Manager. Funds Requested: $180,075. Total Project Cost: $240,100. To improve noncommercial educational television station WKPC–TV, operating on channel 15, in Louisville. Project will replace worn-out studio-to-transmitter link, exciter and production equipment. Station serves an estimated 1,237,400 residents of Louisville and the surrounding areas.

File No. 7258 CTB Kentucky Auth. for ETV, 600 Cooper Drive, Lexington, KY 40502. Signed By: Ms. Sandra Welch, Deputy Executive Director. Funds Requested: $749,100. Total Project Cost: $998,800. To improve/upgrade the state public television network by replacing dissemination and production equipment. KET provides educational and instructional television services to approximately 3.7 million residents of the Commonwealth.

**Louisiana**

File No. 7023 CTB Louisiana Educational TV Auth., 7860 Anselmo Lane, Baton Rouge, LA 70810. Signed By: Ms. Beth Courtney, Executive Director. Funds Requested: $171,997. Total Project Cost: $229,330. To improve the production facilities of the Louisiana ETV Authority, serving the state of Louisiana through the operation of six public television stations, by replacing obsolete quadraplex videotape recorders with three 1" format machines.

File No. 7035 PRB Northeast Louisiana University, Monroe, LA 71209. Signed By: Mr. Dwight Vines, President. Funds Requested: $15,000. Total Project Cost: $29,000. To plan for the activation of a new public radio station to serve 391,835 people in northeast Louisiana and southeast Arkansas.

File No. 7039 CTB Louisiana ETV Authority, 7860 Anselmo Lane, Baton Rouge, LA 70810. Signed By: Ms. Beth Courtney, Executive Director. Funds Requested: $998,004. Total Project Cost: $1,330,673. To improve the transmission facilities of public television station WLPB, operating on Ch. 27 in Baton Rouge, by replacing an obsolete transmitter, antenna and related equipment. WLPB serves 500,000 people in the Baton Rouge area.

File No. 7042 CRB USL Communications Corp., Hebrard Blvd., P.O. Box 42171, Lafayette, LA 70504. Signed By: Dr. Ray Authement, President. Funds Requested: $62,491. Total Project Cost: $83,322. To improve the facilities of KRVS, operating on 88.7 MHz in Lafayette, and to extend service to Lake Charles, LA. Project will replace obsolete STL and remote control and production equipment to maintain service to 475,371 people served in the Lafayette area. A new FM translator will be constructed, rebroadcasting the KRVS signal on 90.5 MHz to serve 77,977 people in the Lake Charles area. KRVS is bilingual English/French station

serving the Arcadiana region of the state.

File No. 7191 PTN Northeast Louisiana University, 700 University Avenue, Monroe, LA 71209. Signed By: Mr. Dwight Vines, President. Funds Requested: $10,500. Total Project Cost: $15,500. To plan for the activation of a public access cable channel to provide first local origination to the Monroe, LA area.

**Massachusetts**

File No. 7147 CTB WGBH Educational Foundation, 44 Hampden Street, Springfield, MA 01103. Signed By: Mr. Richard Milstein, Chairman of the Board. Funds Requested: $464,846. Total Project Cost: $619,795. To improve production capability of WGBY–TV, channel 57, serving Springfield; request includes cameras, switcher, and other production equipment.

File No. 7161 PTN Inquilinos Boricuas en Accion, 405 Shawmut Avenue, Boston, MA 02118. Signed By: Ms. Clara Garcia, Executive Director. Funds Requested: $89,096. Total Project Cost: $89,096. To plan a statewide distribution system for dissemination of Hispanic programming to Hispanic populations. Technology to be explored will be ITFS, cable, satellite, and microwave.

File No. 7296 CRB University of Massachusetts, University Drive, Harbor Campus, Boston, MA 02125. Signed By: Mr. Carl Finn, Director, Grants & Contracts. Funds Requested: $77,424. Total Project Cost: $103,232. To improve WUMB–FM in Boston by replacing worn out antenna, transmitter and production equipment and to install an STL.

**Maryland**

File No. 7012 CRB Salisbury State College Fdn., Caruthers Hall, Salisbury, MD 21801. Signed By: Mr. Thomas Bellavance, President. Funds Requested: $21,705. Total Project Cost: $28,940. To improve public radio station WSCL–FM, operating on 89.5 MHz, in Salisbury. Project will equip a news and public affairs studio to better serve the needs of the residents of the Delmarva Peninsula. The station's service area covers approximately 280,000 residents.

File No. 7288 CTB Maryland Public Broadcasting Commission, 11767 Bonita Avenue, Owings Mills, MD 21117. Signed By: Mr. Raymond Ho, Executive Director. Funds Requested: $423,000. Total Project Cost: $846,000. To improve public television station WMPB–TV, channel 67, located in Owings Mills. Proposal will replace transmitter and related dissemination equipment. WMPB–TV is the flagship station of the state public television network. Station serves approximately 2 million residents of the greater Baltimore area.

File No. 7287 CTB Maryland Public Broadcasting Commission, 11767 Bonita Avenue, Owings Mills, MD 21117. Signed By: Mr. Raymond Ho, Executive Director. Funds Requested: $371,382. Total Project Cost: $742,765. To improve public television station WMPB–TV, operating on channel 67, in Owings Mills. Proposal seeks the replacement of three video switchers and related origination equipment in the three studios of WMPB–TV.

**Maine**

File No. 7011 CTB University of Maine, 65 Texas Avenue, Bangor, ME 04401. Signed By: Mr. William Sullivan, Treasurer. Funds Requested: $375,738. Total Project Cost: $536,768. To replace essential unreliable television production equipment for the statewide Maine network. Request includes replacement of 2 quad VTR's with 1 inch machines, 7¾" VTR's with ½ inch, switching equipment, character generator, signal processing equipment as well as test equipment.

File No. 7022 CTB Colby-Bates-Bowdoin ETV Corp., 1450 Lisbon Street, Lewiston, ME 04240. Signed By: Mr. Roland Desjardins, Vice President. Funds Requested: $218,421. Total Project Cost: $291,237. To replace three worn out and obsolete quad VTR's as well as a still store and to obtain a standby STL at WCBB, Channel 10.

File No. 7237 CRB Salt Pond Cmty. Broadcasting, 2 Neworld Plaza, South Blue Hill, ME 04605. Signed By: Mr. W. Lyman Phillips, President. Funds Requested: $151,839. Total Project Cost: $202,452. To activate WERU–FM, 89.9, at 50,000 ERP, a community radio station serving five east coast counties in Maine. Station will provide first service to two counties and parts of three others. It will provide first local service to the remainder of the area.

**Michigan**

File No. 7047 CTB University of Michigan—Flint, 1321 E. Court Street, Flint, MI 48502. Signed By: Mr. James Lesch, Director, Research Development. Funds Requested: $248,419. Total Project Cost: $331,225. To replace worn and obsolete dissemination and origination equipment at WFUM–TV, channel 28, Flint, MI., in order to improve program and signal reliability and quality to meet the telecommunications needs of the communities in the Flint metropolitan area.

File No. 7087 CRB Blue Lake Fine Arts Camp, Route 2, Twin Lake, MI 49457. Signed By: Mr. William Stansell, President. Funds Requested: $26,306. Total Project Cost: $36,308. To extend the signal of public radio station WBLV–FM, 90.3 MHz, Twin Lake, MI, by increasing its broadcast tower height in order to provide needed radio program services to 50,000 unserved persons and improve signal quality to 750,000 persons in the eight-county area of west central Michigan.

File No. 7097 CRTBN Northern Michigan University, Presque Isle Avenue, Marquette, MI 49855. Signed By: Mr. Lyle Shaw, Vice President for Admin., Funds Requested: $731,207. Total Project Cost: $1,462,414. To establish a microwave interconnection system to provide 54 school districts and six postsecondary institutions with interactive television and radio services in Michigan's Upper Peninsula. The system will be supervised by an organization of public agencies in order to bring educational and cultural radio and television for the first time in this remote part of the state.

File No. 7167 CTB Grand Valley State College, 201 Manitou Hall, Allendale, MI 49401. Signed By: Mr. James Starkweather, Director of Budgets and Acct. Funds Requested: $2,532,144. Total Project Cost: $3,376,192. To replace worn and obsolete microwave, signal monitoring and origination equipment for public television station WGVC–TV, Allendale, MI., and to improve the master control, studio and program editing capabilities of the station's production center in Grand Rapids, MI, in order to meet the needs of the Grand Rapids-Kalamazoo metropolitan areas.

File No. 7218 CRB Flint Board of Education, 605 Crapo Street, Flint, MI 48503. Signed By: Mr. Joseph Pollack, Superintendent. Funds Requested: $112,428. Total Project Cost: $149,905. To expand the signal coverage of public radio station WFBE–FM, 95.1 MHz., Flint, Mi., by obtaining new dissemination and sub-carrier channel equipment to better meet the needs of communities in the Flint metropolitan area.

File No. 7295 CRB Grand Valley State College, 97 Fieldhouse, Allendale, MI 49401. Signed By: Mr. James Starkweather, Director of Budgets. Funds Requested: $303,157. Total Project Cost: $404,209. To provide first local origination service for public radio station WGVC–FM, 88.5 MHz., Allendale, Mi., by providing increased transmission capability and local origination capacity in order to offer a significantly different public radio broadcasting service to the communities in the Grand Rapids, Mi. metropolitan area.

File No. 7319 CTB Northern Michigan University, Marquette, MI 49855. Signed By: Mr. Lyle Shaw, Vice President. Funds Requested: $423,500. Total Project Cost: $564,777. To replace worn and obsolete tranamission and microwave equipment for public television station WNMU–TV, channel 13, Marquette, MI., in order to assure continued reliability of program services to the communities in the central region of Michigan's upper peninsula.

**Minnesota**

File No. 7106 CTB West Central Minnesota ETV Co., 120 West Schlieman, Appleton, MN 56208. Signed By: Mr. James Hegland, Secretary KWCM Board of Dir. Funds Requested: $847,000. Total Project Cost: $1,129,335. To improve the broadcast television services of public television station KWCM–TV, channel 10, Appleton, MN by providing origination, dissemination, interconnection and remote studio equipment to meet the telecommunications needs of communities in the Appleton, Morris, and Marshall areas of the state.

File No. 7104 CRB Minnesota Public Radio, Inc., 45 E 8th Street, St. Paul, MN 55101. Signed By: Mr. Thomas Kigin, Vice President. Funds Requested: $159,716. Total Project Cost: $212,955. To provide first local origination public radio service to the city of Brainard, MN., and to the rural areas outside the city by activating a public radio station on 90.7 MHz., Brainerd, Minnesota.

File No. 7271 CTN Minnesota Tele-Media, Hwy. 23, P.O. Box 547, Marshall, MN 56258. Signed By: Mr. Norman Miller, Chairman. Funds Requested: $392,790. Total Project Cost: $523,720. To activate an ITFS system on channels A 1–4 and G 1–4 at Marshall, MN. to provide instructional television fixed services with satellite reception and microwave interconnection capabilities to schools and cable head-ends in the Montevideo, Marshall, Tracy, and Lake Benton areas of Minnesota.

File No. 7332 CTB Northern Minnesota Public TV, 14th & Birchmont Drive, Bemidji, MN 56601–2699. Signed By: Mr. Paul Stankavich, General Manager. Funds Requested: $71,675. Total Project Cost: $143,350. To improve the origination facilities of public television station KAWE–TV, channel 9, Bemidji, MN., by providing control room switching and studio production equipment in order to meet the needs of the rural and isolated communities in the Bemidji, Minnesota area.

**Missouri**

File No. 7101 CRB SW Missouri State University, 901 South National, Springfield, MO 65804–0089. Signed By: Mr. Marshall Gordon, President. Funds Requested: $29,475. Total Project Cost: $43,993. To improve the origination capacity of public radio station KSMU–FM, 91.1 MHz., Springfield, MO., by replacing worn and obsolete studio production equipment in order to provide needed programming services to the Springfield metropolitan area.

File No. 7177 CTB Ozark Public Telecommunications, Inc., 1101 N. Summit, MPO Box 21, Springfield, MO 65802. Signed By: Mr. William Carner, Chairman of the Board. Funds Requested: $270,956. Total Project Cost: $361,288. To replace worn and obsolete origination facilities at public television station KOZK–TV, channel 21, Springfield, MO., by providing studio and production cameras and switching equipment to enable local programming services to the Springfield and Joplin metropolitan areas.

File No. 7222 CRB University of Missouri, 210 H–SS Building, Rolla, MO 65401. Signed By: Mr. John Park, Vice Chancellor. Funds Requested: $34,567. Total Project Cost: $34,567. To extend the signal of public radio station KMNR–FM, 89.7 MHz., Rolla, MO. by providing dissemination equipment in order to serve the Rolla community with improved second service radio.

File No. 7279 CTN Missouri School Boards Assoc., 1809 Vandiver Drive, Columbia, MO 65202. Signed By: Dr. Carter Ward, Executive Director. Funds Requested: $1,194,150. Total Project Cost: $1,592,200. To activate a mobile satellite uplink facility and equip 200 satellite downlink sites throughout the state of Missouri in order to expand the public educational satellite television services of the University of Missouri, Rolla, and to include selected postsecondary, elementary-secondary school districts and industrial locations so that educational and other telecommunications services can be made available to the several communities of the state.

**Mississippi**

File No. 7112 CRB Mississippi Valley State Univ., Hwy. 82 West & Sunflower Road, Itta Bena, MS 38941. Signed By: Mr. Joe Boyer, President. Funds Requested: $160,942. Total Project Cost: $214,589. To activate a new noncommercial educational FM radio station on 89.1 MHz in Itta Bena. Station will provide first local origination in the proposed coverage area of approximately 95,223 residents.

File No. 7143 CRB Mississippi Auth. for ETV, 3825 Ridgewood Road, Jackson, MS 39215. Signed By: Mr. Forrest Morris, Executive Director. Funds Requested: $29,962. Total Project Cost: $39,951. To acquire 470 SCA receivers for the Radio Reading Service of Mississippi. The receivers will be distributed to blind and print handicapped individuals throughout the state. The receivers will be used in conjunction with the reading service carried on the subcarrier of the statewide public radio network.

**Montana**

File No. 7094 CTB Meagher County Public TV, Inc., P.O. Box 421, White Sulphur Springs, MT 59645. Signed By: Mr. R. E. Saunders, President. Funds Requested: $7,750. Total Project Cost: $10,500. To establish a local origination capacity for noncommercial lowpower TV station K57CX operating on channel 57, White Sulphur Springs, Montana by installing a video tape recorder and time base corrector in the automated station for playback of various prerecorded programming.

File No. 7074 CTB Thompson Falls TV District, Bennett Realty, Thompson Falls, MT 59873. Signed By: Mr. Dave Bennett, Chair. Funds Requested: $90,784. Total Project Cost: $120,295. To establish a noncommercial lowpower public TV station K27BD operating on channel 27, Thompson Falls Montana to provide a first public television service to 3,000 residents of western Sanders County Montana.

File No. 7102 CTB Choteau School District #1, 304 7th Avenue, Choteau, MT 59422. Signed By: Mr. Jerry Dunckel, Chairman of the Schoolboard. Funds Requested: $90,221. Total Project Cost: $120,295. To establish a remotely operated noncommercial lowpower TV station K31ED in Choteau, Montana to provide first local public broadcasting service to 2500 residents of Teton County.

File No. 7105 CTB Plains—Paradise TV District, Box 215, 417 Rittenour Street, Plains, MT 59859. Signed By: Mr. Leo Rambur, Chairman. Funds Requested: $90,296. Total Project Cost: $120,395. To establish a noncommercial lowpower TV station K07CH operating on channel 7, Plains, Montana to bring first public television service to 2000 residents of eastern Sanders County Montana.

File No. 7124 CTB Forsyth Community Public TV, Inc., 12th & Main Street, Forsyth, MT 59327. Signed By: Ms. Marilyn Taylor, President. Funds Requested: $73,080. Total Project Cost: $97,440. To establish a noncommercial lowpower TV station operating on channel 21 in Forsyth, Montana to provide a first public television service to 3,000 residents of Rosebud County Montana.

File No. 7128 CRB Miles Community College, 2715 Dickinson Street, Miles City, MT 59301. Signed By: Dr. Judson Flower, President. Funds Requested: $50,793. Total Project Cost: $70,583. To extend the signal of public radio station KEMC–FM, Billings, Montana by replacing the existing 10w translator in Miles City, Montana, with a 100w translator with local origination capacity operated by Miles City Community College to provide enhanced service to Miles City and first public radio service to 14,000 residents of Custer and Prairie Counties.

File No. 7131 CTB Bitterroot Valley Public TV, P.O. Box 588, Hamilton, MT 59840. Signed By: Ms. Bonnie Evans, President. Funds Requested: $20,175. Total Project Cost: $26,900. To extend the signal of noncommercial lowpower TV station K21AN operating on channel 21 in Darby, Montana with translators located in the northern section of Ravalli County bringing an over the air signal to more residents of the area.

File No. 7277 CTB Whitehall Low Power TV, Inc., 309 E. Legion, Whitehall, MT 59759. Signed By: Mr. Dale Davis, President. Funds Requested: $95,599. Total Project Cost: $127,465. To establish a noncommercial low power TV station in Whitehall, Montana to provide a first public television service to 4,000 residents of southern Jefferson county.

File No. 7324 CTN Miles Community College, 2715 Dickinson, Miles City, MT 59301. Signed By: Mr. Judson Flower, President. Funds Requested: $509,180. Total Project Cost: $678,910. To establish an interactive fiber optics network connecting 3 highschools in Rosebud, Forsyth, and Colstrip, Montana with Miles City Community College to provide secondary, postsecondary, continuing education and teleconferencing services to the 50,000 rural residents of Rosebud, Custer, Prairie, Powder River and Carter Counties.

File No. 7327 CTB Browning Public Schools, 129 1st Avenue, S.E., Browning, MT 59417. Signed By: Mr. Tom Thompson, Superintendent. Funds Requested: $48,262. Total Project Cost: $64,350. To establish a local production studio for noncommercial low-power TV station K56 operating on channel 56 in Browning, Montana by installing ¾" production and editing facilities to provide a first local origination capacity for 7,500 residents of the Blackfeet Reservation.

**North Carolina**

File No. 7196 CRB University of North Carolina, 205 Swain Hall, Chapel Hill, NC 27514–8044. Signed By: Mr. David Broome, Jr., Assoc. Director Research Ser. Funds Requested: $187,000. Total Project Cost: $223,600. To extend the coverage area of noncommercial educational station WUNC–FM, operating on 90.5 MHz, in Chapel Hill. By locating new antenna approximately 350 ft. higher on newly constructed tower, station will improve and extend signal coverage. Modifications will provide first public radio service to approximately 40,450 residents.

File No. 7205 CTN NC Agency for Public T/C, 116 West Jones Street, Raleigh, NC 27611. Signed By: Ms. Lee Wing, Executive Director. Funds Requested: $479,934. Total Project Cost: $639,912. To activate the State Services Network (SSN) to meet the educational/instructional needs of 6 million residents of North Carolina. Network will use a Ku-band satellite uplink to distribute programs produced by APT to schools, prisons, and public institutions. Receive sites will include telephone callback capabilities so that programs will be interactive.

File No. 7250 CRB Western NC Public Radio, Inc., 73 Broadway, Asheville, NC 28801. Signed By: Ms. Patricia McGuire, Chairman. Funds Requested: $250,667. Total Project Cost: $334,223. To activate a new noncommercial FM repeater station on 91.3 MHz in Franklin to provide first radio service to 47,046 residents. In addition will activate an FM translator in Brevard and establish a SCA radio reading service for print-handicapped persons. Stations will repeat the signal of WCQS–FM from Asheville. Franklin repeater station will have minimal local origination capacity.

File No. 7253 CRB Winston Salem State University, P.O. Box 13013, Winston Salem, NC 27110. Signed By: Dr. Cleon Thompson, Chancellor. Funds Requested: $143,722. Total Project Cost: $275,003. To improve and extend the facilities of noncommercial educational radio station WSNC–FM, operating on 90.5 MHz, in Winston-Salem. Project will increase the power of station from 125 watts to 3,000 watts. Project will also improve/upgrade the station's production and test equipment. Station serves an estimated 258,000 residents of the Winston-Salem area.

File No. 7275 PTN NC A&T State University, 1601 East Market Street, Greensboro, NC 27411. Signed By: Dr. Edward Fort, Chancellor. Funds Requested: $41,700. Total Project Cost: $41,700. To plan for the use of a new Instructional Television Fixed Service (ITFS) facility to operate in the Greensboro area. System will provide the capability for in-house training for professionals to allow them to update their professional credentials. A substantial portion of the population will also be served through the inclusion of ITFS on the public access cable channels. The university already has the authorization for the ITFS facility.

**North Dakota**

File No. 7009 CRB Dakota Radio Info. Service, Liberty Memorial Building, Bismarck, ND 58505. Signed By: Ms. Sally Oremland, Treasurer. Funds Requested: $7,987. Total Project Cost: $10,650. To purchase equipment necessary to allow the Dakota Radio Information Service (DRIS), Bismarck, ND, to extend its radio reading service for the blind and print-handicapped to the Dickenson area of southwestern North Dakota. DRIS will use the microwave and transmission facilities of Prairie Public Broadcasting, Inc. The project will also purchase 50 SCA receivers.

File No. 7243 CTB Prairie Public Broadcasting, Inc., 207 N. 5th Street, P.O. Box 3240, Fargo, ND 58108–3240. Signed By: Mr. Dennis Falk, President. Funds Requested: $82,394. Total Project Cost: $128,760. To improve the program production capabilities of public TV station KFME–TV, Ch. 13, Fargo, ND, by purchasing a production switcher, a character generator, and associated equipment. The requested items would replace equipment that is either obsolete or inadequate for KFME's production needs. KFME contains the main production studio for the Prairie Public Broadcasting network, which brings public TV to the entire state of North Dakota.

**Nebraska**

File No. 7109 CTB Nebraska Educational T/C Comm., 1800 N. 33rd St., P.O. Box 83111, Lincoln, NE 68501. Signed By: Mr. Jack McBride, Secretary & General Manager. Funds Requested: $456,568. Total Project Cost: $608,755. To purchase a production switcher, a post-production switcher, a routing switcher, an editing system, and an intercom/paging system for the Nebraska Educational Telecommunications Commission, Lincoln. The requested items will replace worn-out and obsolete equipment at the Nebraska Educational Telecommunications Center, which provides programming for the entire State television network.

File No. 7228 PRB Nebraska Educational T/C Commission, 1800 N. 33rd St., P.O. Box 83111, Lincoln, NE 68501. Signed By: Mr. Jack McBride, Secretary & General Manager. Funds Requested: $54,600. Total Project Cost: $69,340. To plan for the extension of public radio service to the approximately 751,000 residents of

central and western Nebraska who are presently unserved. The planning will be done for—and, in part, by—the Nebraska Educational Telecommunications Commission, Lincoln. The project will embrace technical, fiscal, management, programming, and community relations considerations.

**New Hampshire**

File No. 7015 CTB University of New Hampshire, Pettee Brook Lane/ P.O. Box 1100, Durham, NH 03824. Signed By: Mr. Lennard Fisk, Vice President. Funds Requested: $393,232. Total Project Cost: $524,310. To extend signal of WENH–TV, located in Durham, to the unserved community of Lincoln/Woodstock via a microwave hop to a cable headend and to improve production capacity by replacing obsolete production equipment. Production equipment requested includes VTR's, switchers, character generator and ENG packages.

**New Jersey**

File No. 7116 CTN Board of Ed., Township of Union, 2369 Morris Avenue, Union, NJ 07083. Signed By: Dr. James Caulfield, Superintendent. Funds Requested: $236,790. Total Project Cost: $315,720. To construct a production studio in Union School District which will have an ITFS transmitter on top of the Empire State Building in New York City which will supply educational programming to its own school district as well as to 10 school districts located in New Jersey and New York, that are within a 25 mile radius of the transmitter.

File No. 7163 CRB Newark Public Radio, Inc., 54 Park Place, Newark, NJ 07102. Signed By: Mr. Wylie Rollins, Acting General Manager. Funds Requested: $129,542. Total Project Cost: $172,723. To upgrade quality of WBGO–FM in Newark by improving the signal as well as the quality of production equipment. Equipment requested includes turntables, audio recorders, consoles and signal processors.

File No. 7189 CRB Seton Hall University, 400 South Orange Ave., South Orange, NJ 07079. Signed By: Dr. Bernhard Scholz, Provost. Funds Requested: $49,000. Total Project Cost: $76,501. To replace 17 year old transmitter of WSOU–FM, serving South Orange, and to improve production capability by replacing turntables, recorders and switching equipment. A satellite receive earth terminal is also requested.

File No. 7195 CTB NJ Public Brdcstg. Authority, 1573 Parkside Ave., CN 777, Trenton, NJ 08625. Signed By: Mr. Robert Ottenhoff, Executive Director. Funds Requested: $282,579. Total Project Cost: $382,579. To replace obsolete microwave interconnection equipment throughout the state TV network which includes four television transmitters, and to upgrade that equipment to state-of-the-art. Proposal requests eight STL's, six ICR's and one remote pickup.

**New Mexico**

File No. 7098 CTB The University of New Mexico, 1130 University Blvd., N.E., Albuquerque, NM 87102. Signed By: Ms. Ann Powell, Director, Research Admin. Funds Requested: $400,550. Total Project Cost: $534,067. To install a translator that will operate on Ch. 52 in Raton, NM, and that will bring a first public TV signal to 12,000 residents of North Central New Mexico. The translator will repeat the signal of public TV station KNME, Ch. 5, at the University of New Mexico, Albuquerque. The project will also replace three worn-out studio cameras for KNME.

File No. 7162 CTB New Mexico State University, Jordon St., Milton Hall 100, Las Cruces, NM 88003. Signed By: Ms. Mary Nunez, Actg. Dir., Grants & Contracts. Funds Requested: $528,300. Total Project Cost: $754,300. To purchase a transmitter, remote control, associated transmitter test equipment, and a character generator for public TV station KRWG, Ch. 22, licensed to New Mexico State University, Las Cruces. The requested items will replace obsolete equipment.

File No. 7206 CRB Northern NM Community College, 205 Montoya Admin. Bldg., Box 250, Espanola, NM 87532. Signed By: Dr. Sigfredo Maestas, President. Funds Requested: $75,000. Total Project Cost: $100,002. To activate an FM radio station at Northern New Mexico Community College, Espanola, on 91.1 MHz with an ERP of 105w. It will broadcast four hours of local programming daily, targeted to meet the needs of the Espanola Valley residents, 82 percent of whom are Hispanic-Americans and 12 percent of whom are Native Americans. For the remainder of the broadcast day, it will repeat the signals of public radio stations KUNM–FM and KANW–FM, both in Albuquerque.

File No. 7281 CRB San Juan College, 4601 College Blvd., Farmington, NM 87401. Signed By: Dr. James Henderson, President. Funds Requested: $156,427. Total Project Cost: $208,570. To establish a noncommercial FM radio station to bring the first public radio signal to over 65,000 residents of northwestern New Mexico. The new station will be licensed to San Juan Community College, Farmington, NM, and will operate on 90.9 MHz with an ERP of 15 kw. The station's programming will be designed to meet the needs of the area's minority population, especially Native Americans.

**Nevada**

File No. 7029 CRB Nevada Public Radio Corp., 5151 Boulder Highway, Las Vegas, NV 89122. Signed By: Mr. Lamar Marchese, General Manager. Funds Requested: $74,239. Total Project Cost: $98,986. To extend the signal of public radio station KNPR–FM, operating on 89.5 MHz Las Vegas, Nevada by replacing the transmitter and increasing their power from 20 Kw to 100 Kw thus providing a first public radio service to northeast San Bernardino County CA, and Mohave County AZ.

File No. 7032 CRB Nevada Public Radio Corporation, 5151 Boulder Highway, Las Vegas, NV 89122. Signed By: Mr. Lamar Marchese, General Manager. Funds Requested: $71,375. Total Project Cost: $95,167. To extend the signal of public radio station KNPR–FM operating on 89.5 MHz Las Vegas Nevada by constructing two new "associated stations" in Panaca and Tonopah Nevada to provide the first public radio service to 7,372 persons in Lincoln and Nye counties.

File No. 7061 CTB Channel 5 Public Brdcstg., Inc., Evans Ave., Reno, NV 89557. Signed By: Mr. James Pagliarini, General Manager. Funds Requested: $53,506. Total Project Cost: $111,345. To improve the local production capability of public television station KNPB–TV channel 5 Reno, Nevada by installing a backup studio to transmitter link (STL), additional studio and remote production equipment and acquiring engineering test equipment not presently available to the station.

File No. 7122 CTB Northern Nevada Cmty. College, 901 Elm Street, Elko, NV 89801. Signed By: Mr. William Berg, President. Funds Requested: $51,450. Total Project Cost: $68,600. To upgrade the facilities of noncommercial lowpower TV Station K14AO operating on channel 14 in Elko, Nevada by installing a ¾" production studio to provide a first local origination capacity to 18,400 residents of Elko and Eureka Counties in Nevada.

File No. 7276 PTB Rural Television System, Inc., 6205–A Franktown Road, Carson City, NV 89701. Signed By: Mr. Daniel Tone, RTS Administrator. Funds Requested: $100,000. Total Project Cost: $100,000. To continue to plan for the development of a series of low power remotely controlled mini-stations throughout the unserved areas of the western United States.

File No. 7282 CTB Clark County School District, 2832 E. Flamingo, Las Vegas, NV 89121. Signed By: Mr. John Hill, Director. Funds Requested: $95,396. Total Project Cost: $127,195. To extend the signal and improve the transmission capabilities of public television station KLVX–TV channel 10, Las Vegas by placing a translator in Laughlin Nevada, connecting the station and the University of Nevada, Las Vegas and adding additional production facilities to provide additional local educational programming.

New York

File No. 7013 CTB St. Lawrence Valley ETV Council, 1056 Arsenal Street, Watertown, NY 13601. Signed By: Mr. William Saiff, Jr., President/General Manager. Funds Requested: $90,221. Total Project Cost: $129,021. To replace wornout and faulty transmission line at WNPE–TV serving Watertown and WNPT–TV serving Norwood.

File No. 7060 CRB St. Lawrence University, Park Street, Payson Hall, Canton, NY 13617. Signed By: Ms. Ellen Rocco, General Manager. Funds Requested: $43,020. Total Project Cost: $58,020. WSLU–FM requests funds to extend its signal by installing a satellite radio station with 190 ERP to serve Plattsburgh and a seven watt translator to serve Alexandria Bay.

File No. 7085 CTB Public Brdcstg. Coun. of Ctr. NY, 506 Old Liverpool Road, Liverpool, NY 13088. Signed By: Mr. Richard Russell, President & General Manager. Funds Requested: $398,104. Total Project Cost: $568,720. To improve the functioning of WCNY–TV, serving the Syracuse area, by replacing obsolete and wornout production equipment; request includes replacement of five quad VTR's with one inch machines, and replacement of field production equipment.

File No. 7138 CRB WSKG Public T/C Council, 1168 Conklin Road, Conklin, NY 13748. Signed By: Mr. Michael Ziegler, President. Funds Requested: $112,826. Total Project Cost: $161,180. To extend the signal of WSKG–FM located in Binghamton to Ithaca and several surrounding counties which are unserved, by activating a 5 kw satellite radio station.

File No. 7139 CTB WSKG Public T/C Council, 1168 Conklin Road, Conklin, NY 13748. Signed By: Mr. Michael Ziegler, President. Funds Requested: $246,785. Total Project Cost: $352,550. To improve the operation of WSKG–TV, the only public signal in the Conklin/Binghamton area, by replacing the following worn out and obsolete equipment-transmitter exciter, a quad VTR with a one inch, and various test equipment.

File No. 7148 CTB Educational Broadcasting Corp., 356 West 58th Street, New York, NY 10019. Signed By: Mr. George Miles, Jr., Executive Vice President. Funds Requested: $325,000. Total Project Cost: $510,150. To replace worn out equipment at WNET, serving New York City and parts of NJ and CT. Replacement is requested of studio intercom system, transmitter control system, test equipment, and improvement of the audio/video routing system.

File No. 7168 CRB State University of New York, P.O. Box 9, Albany, NY 12201. Signed By: Ms. Karen Inman, Endorsing Designee. Funds Requested: $62,832. Total Project Cost: $83,777. To replace unreliable transmitter at WBFO–FM in Buffalo and to construct a news/control room.

File No. 7194 CRB State University of New York, Lanigan Hall, Oswego, NY 13126. Signed By: Mr. Bernie Henderson, Vice President. Funds Requested: $41,019. Total Project Cost: $55,192. To extend the coverage of WRVO–FM located in Oswego by constructing repeater radio stations in Utica and Watertown.

File No. 7227 CRTB Rochester Area Ed. TV Assoc, Inc., 280 State Street, Rochester, NY 14614. Signed By: Mr. William Pearce, President. Funds Requested: $107,250. Total Project Cost: $143,000. To improve the operation of WXXI–TV in Rochester, by replacing a worn out portable camera and portions of a studio camera, as well as test equipment; to improve the efficiency of WXXI–FM with an audio delay recorder.

File No. 7233 CTN Columbia Greene Cmty. College, Rt. 23, P.O. Box 1000, Hudson, NY 12534. Signed By: Mr. Robert Luther, President. Funds Requested: $206,668. Total Project Cost: $275,558. To establish a telecommunications facility which will interconnect by microwave to a cable headend; the request include funds for a production facility, which will be located at the college, as well as an STL.

File No. 7236 CRB Mohawk-Hudson Coun. on ETV, Inc., 17 Fern Avenue, Schenectady, NY 12301. Signed By: Mr. William Haley, Jr., Vice President & General Mgr. Funds Requested: $27,787. Total Project Cost: $42,750. To improve WMHT–FM in Schenectady by replacing four malfunctioning and wornout audio tape machines.

File No. 7240 CRB Ed. Radio of the Catskills, Inc., Rt. 52 East, Jeffersonville, NY 12748. Signed By: Ms. Anne Larsen, President. Funds Requested: $215,673. Total Project Cost: $287,564. To activate a .5 kw public radio station on 90.5 which will provide first service to the residents of Sullivan County.

File No. 7267 CRB Shawangunk Communications, P.O. Box 709, Otisville, NY 10763. Signed By: Mr. Thomas Mondell, President. Funds Requested: $136,814. Total Project Cost: $182,419. To activate a non-commercial public radio station on 90.1 to provide first service to the community of Mt. Hope.

File No. 7278 CTB NE NY Public T/C Council, Inc., Broad & Beekman St, Yokum Hall, Plattsburgh, NY 12901. Signed By: Mr. Gerald Bates, President & General Manager. Funds Requested: $83,625. Total Project Cost: $111,500. To improve the efficiency of WCFE–TV in Plattsburgh by replacing two editing units which will be lost when station relocates: to acquire a satellite down link.

File No. 7280 CRB Pacifica Foundation, Inc., 505 Eighth Avenue, New York, NY 10018. Signed By: Mr. John Simon, General Manager. Funds Requested: $174,144. Total Project Cost: $232,193. To improve the operation of WBAI–FM, located in New York City, by replacing obsolete consoles, tape recorders, turntables, remote equipment and other production equipment.

File No. 7290 CRB NE NY Public T/C Council, Inc., Broad & Beekman Sts, Yokum Hall, Plattsburgh, NY 12901. Signed By: Mr. Gerald Bates, President & General Manager. Funds Requested: $221,578. Total Project Cost: $366,237. To activate a public radio station on 91.9 which will provide first local origination to Plattsburgh.

File No. 7308 CRB Fordham University, Fordham Road, Bronx, NY 10458. Signed By: Mr. Joseph McGowan, Jr., Vice President. Funds Requested: $659,051. Total Project Cost: $878,735. To expand coverage of WFUV–FM located in New York City by increasing tower height from 200 ft to 600 ft and installing a directional antenna.

File No. 7315 CTN Onondaga Central School District, 201 Hudson Avenue, Nedrow, NY 13120. Signed By: Mr. Patrick Dolan, Superintendent. Funds Requested: $255,500. Total Project Cost: $375,000. To construct an interactive telecommunications system of fiber optics that will link two high school districts located in Onondaga County and allow them to share required educational courses.

File No. 7317 CTB Mohawk Valley Council on ETV, 17 Fern Avenue, P.O. Box 17, Schenectady, NY 12301. Signed By: Mr. William Haley, Jr., Vice President & General Mgr. Funds Requested: $700,188. Total Project Cost: $1,077,213. To improve signal of WMHT–TV serving the Schenectady area, by

replacing worn-out malfunctioning transmitter and STL.

**Ohio**

File No. 7040 CTB ETV Assoc. of Metro. Cleveland, 4300 Brookpark Road, Cleveland, OH 44134. Signed By: Ms. Betty Cope, President & General Manager. Funds Requested: $36,912. Total Project Cost: $49,217. To improve the dissemination capabilities of public television station WVIZ–TV, channel 25, Cleveland, OH, by replacing a worn and obsolete studio to transmitter microwave system.

File No. 7045 CTB Ohio University, 9 South College Street, Athens, OH 45701. Signed By: Mr. George Klare, Acting Associate Provost. Funds Requested: $74,985. Total Project Cost: $99,980. To replace obsolete and worn origination equipment and acquire test apparatus for public television stations WOUB–TV, channel 20, Athens, OH, and WOUC–TV, channel 44, Cambridge, OH, in order to improve the audio and video monitoring capability for originating local program services.

File No. 7065 CRB Dayton Public Radio, Inc., 1514 W. Dorothy Lane, Dayton, OH 45409–1311. Signed By: Mr. Clark Haines, President. Funds Requested: $181,710. Total Project Cost: $248,960. To expand the public radio signal of station WDPR, 89.5 MHz., Dayton, OH, to provide first service to 111800 persons in the western Dayton communities and to improve origination and satellite reception capabilities. These additions will improve the station's ability to offer locally originated programming services to the Dayton metropolitan area.

File No. 7140 CRB Xavier University, 3800 Victory Parkway, Cincinnati, OH 45207. Signed By: Fr. Albert DiUlio, President. Funds Requested: $114,965. Total Project Cost: $153,286. To establish a repeater public radio station on 89.3 MHz., New Paris, IN., to provide the signal of public radio station WVXU–FM, 91.7 MHz., Cincinnati, OH, in order to serve the city of Richmond, Indiana and surrounding communities.

File No. 7180 CTB Greater Cincinnati TV Ed. Fnd., 1223 Central Parkway, Cincinnati, OH 45214. Signed By: Mr. Charles Vaughan, President & General Manager. Funds Requested: $85,415. Total Project Cost: $142,359. To improve the production editing capabilities of public television station WCET–TV, channel 48, Cincinnati, OH, by providing additional origination equipment in order to meet the public telecommunications needs of the greater Cincinnati metropolitan area. The project will also provide replacement for worn and obsolete editing and related equipment.

File No. 7234 CTN Lorain County Community College, 1005 N. Abbe Road, Elyria, OH 44035. Signed By: Dr. Donald Arnold, Treasurer. Funds Requested: $443,201. Total Project Cost: $661,847. To activate a four channel instructional television fixed service system and cable access system including local origination capacity for WHR–777, channels A–5 and F–3, Elyria, OH, in order to provide significantly distinctive television programming to the thirteen communities and adjacent Lorain County, Ohio.

File No. 7248 CRB Public Brdcstg. Fdn. of NW Ohio, 136 North Huron Street, Box 30, Toledo, OH 43692. Signed By: Mr. Robert Smith, President & General Manager. Funds Requested: $57,487. Total Project Cost: $76,616. To activate a repeater radio station on 91.7 MHz., Mansfield, OH., as part of the network facilities of public radio station WGTE–FM, 91.3 Mhz., Toledo, OH, in order to provide first public radio service to 87912 residents in the six county area surrounding the city of Mansfield.

File No. 7286 CRB Public Brdcstg. Fdn. of NW Ohio, 136 North Huron Street, Box 30, Toledo, OH 43692. Signed By: Mr. Robert Smith, President & General Manager. Funds Requested: $85,750. Total Project Cost: $120,858. To increase and improve the signal coverage and quality of public radio station WGTE–FM, 91.3 Mhz., Toledo, OH., by providing new transmission and new intermediate inter-city microwave facilities in Bowling Green, OH, in order to better serve the public radio needs of communities in the Bowling Green and Lima, OH, area and to bring first service to some communities in northwest Ohio as well as in southeastern Michigan.

**Oklahoma**

File No. 7179 CTN Beaver Public Schools, 810 Avenue G, Box 580, Beaver, OK 73932. Signed By: Mr. Jim Bouse, Superintendent. Funds Requested: $368,848. Total Project Cost: $518,848. To establish an instructional TV system, featuring both two-way video and two-way audio, using fiber optic cables to link the four school districts—Beaver, Turpin, Forgan, and Balko—of Beaver Co., in the Oklahoma Panhandle. Each district will have a production studio/classroom. The districts will exchange course work to provide a cost/effective, comprehensive curriculum to the students of this rural, relatively isolated county.

File No. 7247 CRB The University of Oklahoma, 780 Van Vleet Oval, Room 339, Norman, OK 73019. Signed By: Ms. Karen Petry, Sponsored Programs Coordinator. Funds Requested: $111,765. Total Project Cost: $149,050. To establish a noncommercial FM station in Spanser, OK, that will operate on 105.7 MHz with an ERP of 3 kw. The station will repeat the signal of public FM station KGOU–FM, 106.3 MHz, Norman, OK, and will serve the population of Oklahoma City and its contiguous suburbs. The project will install microwave equipment that will permit KGOU–FM to transmit to the new station programming produced specifically for the Oklahoma City area.

**Oregon**

File No. 7073 CRB KBOO Foundation, 20 SE. 8th Street, Portland, OR 97214. Signed By: Mr. Jeff Anderson, President. Funds Requested: $40,601. Total Project Cost: $54,135. To extend and improve the facilities of public radio KBOO operating on 90.7 MHz in Portland, OR. Project will provide first service to an estimated 54,171 people via the construction of low power translator stations rebroadcasting KBOO on 92.7 MHz in Amity, OR and also on 92.7 MHz in White Salmon, WA. A remote broadcast capability will be added for live production through-out the Portland area. The project will also replace an obsolete transmitter exciter, thereby continuing service to some 1,300,000 people in the Portland area.

File No. 7075 CRB Southern Oregon State College, 1250 Siskiyou Blvd., Ashland, OR 97520. Signed By: Ms. Wilma Foster, Secretary. Funds Requested: $192,696. Total Project Cost: $256,928. To extend the service area of public radio station, KSOR–FM, operating at 90.1 MHz Ashland, OR, by constructing repeater stations to serve Coos Bay, OR, operating at 88.5 MHz, and Klamath Falls OR, operating at 90.9 MHz. Both stations would replace low power translators serving portions of those communities. The project would also construct three low power translators in the communities of Happy Camp, CA, operating on 91.9 MHz, Ft. Jones, CA, operating on 91.1 MHz, and Callahan, CA, operating on 89.1 MHz. The new satellite and translator radio stations would provide first public radio service to 100,099 people. In addition, the project would provide additional production and satellite receive capability.

File No. 7079 CRB Oregon Public Broadcasting, 2828 SW. Front Avenue, Portland, OR 97201. Signed By: Mr. Maynard Orme, Executive Director. Funds Requested: $62,817. Total Project Cost: $83,757. To improve the audio production and control facilities of the Golden Hours Radio Reading Service operated by Oregon Public

Broadcasting. The applicant will replace obsolete tape recorders, consoles and an automation system used in production of programs. Golden Hours serves some 358,000 people (an estimated 89,000 people who are visually impaired) via SCA receivers and cable systems.

File No. 7099 CRTB Oregon Public Broadcasting, 2828 SW. Front Avenue, Portland, OR 97201. Signed By: Mr. Maynard Orme, Executive Director. Funds Requested: $660,247. Total Project Cost: $880,330. To improve the production and control facilities of the Oregon Public Broadcasting radio and television networks. The project would replace obsolete television and radio switching and control equipment, and television lighting equipment for use in the applicant's new headquarters building. Oregon Public Broadcasting serves 2.5 million people in Oregon through a statewide network of television and radio stations and translators.

File No. 7224 CTB Southern Oregon Public TV, Inc., 34 South Fir Street, Medford, OR 97501. Signed By: Mr. Arthur Knoles, Vice President & General Mgr. Funds Requested: $52,425. Total Project Cost: $69,900. To improve the facilities of public television station KSYS, operating on Ch. 8 in Medford OR, by replacing an obsolete routing switcher. KSYS serves 340,000 people in southwest Oregon.

**Pennsylvania**

File: No. 7020 CTB Penn State University, Wagner Annex, University Park, PA 16802. Signed By: Mr. Robert Scannell, Vice President. Funds Requested: $269,370. Total Project Cost: $538,740. To replace obsolete quad VTR's with state-of the-art one inch VTR's at WPSX–TV, serving the area of University Park.

File No. 7028 CTB NE Pennsylvania ETV Association, Old Boston Road, Pittston, PA 18640. Signed By: Dr. John Walsh, President. Funds Requested: $384,987. Total Project Cost: $473,317. To improve the quality of programming aired on WVIA–TV in Pittston by upgrading and replacing quad VTR's with ¾ inch VTR's and a betacam component format cart machine.

File No. 7048 CRB NE Pennsylvania ETV Association, Old Boston Road, Pittston, PA 18640. Signed By: Dr. John Walsh, President & General Manager. Funds Requested: $53,536. Total Project Cost: $71,382. To extend the signal of WVIA–FM, located in Scranton, via translators to the unserved communities of Williamsport and Lewisburg; to replace current STL and worn out studio equipment.

File No. 7054 CTB Metro. Pittsburgh Public Brdcstg, 4802 Fifth Avenue, Pittsburgh, PA 15213. Signed By: Mr. Lloyd Kaiser, President. Funds Requested: $315,337. Total Project Cost: $420,450. To improve quality of programming of WQED–TV in Pittsburgh by replacing obsolete production equipment in the main control room in Pittsburgh as well as a remote unit in Harrisburg. Request includes cameras, VTR's, a switcher, console, editing system, and other production equipment.

File No. 7123 CRB Golden Triangle Radio Info. Ctr., 408 Communication Center, Pittsburgh, PA 15282. Signed By: Ms. Leslie Seright, President. Funds Requested: $18,500. Total Project Cost: $28,900. To establish a post production facility and to purchase 100 SCA receivers to serve the print handicapped in Pittsburgh.

File No. 7185 CRB Widener University, 14th & Chestnut Streets, Chester, PA 19013. Signed By: Ms. Lois Fuller, Associate Dean of Students. Funds Requested: $17,986. Total Project Cost: $23,982. To replace unsafe pole tower at WDNR–FM, a student station in Chester, and to replace obsolete antenna and transmitter exciter.

File No. 7203 CTN Clairton City School District, 535 Miller Avenue, Clairton, PA 15025. Signed By: Dr. Mary Ann Nobers, Superintendent. Funds Requested: $103,746. Total Project Cost: $130,257. To construct a production studio in Clairton's educational center that will produce, exchange, and distribute via cable, educational programming to educational institutions within the school district.

File No. 7245 CTB Public Brdcstg. of NW PA, Inc., 8425 Peach Street, Erie, PA 16509. Signed By: Mr. R. B. Clark, Vice President & General Mgr. Funds Requested: $439,004. Total Project Cost: $585,338. To replace worn out and obsolete production equipment at WQLN–TV providing the only public television signal to Erie. Request includes camera, VTR's and other production equipment.

File No. 7257 CRB Public Brdcstg. of NW PA, Inc., 8425 Peach St., Erie, PA 16509. Signed By: Mr. R. B. Clark, General Manager. Funds Requested: $74,474. Total Project Cost: $100,799. To extend service of WQLN–FM in Erie via translators to the unserved cities of Meadville and Warren in Pennsylvania and to Chautauqua Lake area in New York. Request also includes replacement of worn out transmitter and essential production equipment.

File No. 7262 CRB Muhlenberg College, 2400 Chew Street, Allentown, PA 18104. Signed By: Mr. Jonathan Messerli, President. Funds Requested: $18,338. Total Project Cost: $24,551. To improve the production capacity of student station WMUH–FM located in Allentown. Equipment requested includes turntables, audio recorders, and consoles.

File No. 7285 CRB Pennsylvania State University, Wagner Annex, University Park, PA 16802. Signed By: Mr. Robert Scannell, Vice President. Funds Requested: $33,936. Total Project Cost: $45,248. To replace obsolete FM transmitter, transmission line and remote control of WPSU–FM, a 1 kw student station serving the University Park area.

File No. 7294 CTB WHYY, Inc., 150 North 6th Street, Philadelphia, PA 19106. Signed By: Mr. Frederick Breitenfeld, Jr., President. Funds Requested: $282,300. Total Project Cost: $376,400. To replace outmoded and exhausted production equipment in the Wilmington, DE studios of WHYY–TV, which produces programming for the state of Delaware. Delaware is served by WHYY's repeater station, WDPB, which is located in Seaford. Request includes three studio cameras, audio equipment, monitors and various test equipment.

File No. 7307 CRB WITF, Inc., 1982 Locust Lane, Harrisburg, PA 17109. Signed By: Mr. John Blair, Vice President & General Mgr. Funds Requested: $40,200. Total Project Cost: $53,600. To replace worn out essential production equipment and to equip a news control room at WITF–FM, serving the Harrisburg area. Request includes recorders, consoles and other production equipment.

**Puerto Rico**

File No. 7254 CRB Catholic University Ser. Assoc., 529, Station 6, Ponce, PR 00731. Signed By: Mr. Clotaldo Santiago, Esq., Secretary/Treasurer. Funds Requested: $27,237. Total Project Cost: $36,316. To improve the facilities of noncommercial radio station WECU, operating on 88.9 MHz in Ponce, PR, by purchasing remote broadcast equipment. Project will also purchase an auxiliary transmitter to be used during frequent outages caused by lightning strikes at the transmitter site.

File No. 7256 PRB University of Puerto Rico, UPR Station, San Juan, PR 00931. Signed By: Mr. Juan Fernandez, Chancellor. Funds Requested: $120,221. Total Project Cost: $134,295. To plan for the establishment of a radio reading service for the blind to operate on the SCA channel of WRTU–FM, broadcasting at 89.7 MHz in San Juan. The radio reading service will serve an estimated 197,000 visually handicapped

people in the eastern half of the island of Puerto Rico.

**Rhode Island**

File No. 7285 CTB RI Public T/C Authority, 24 Mason Street, Providence, RI 02903. Signed By: Mr. John Renza, Chairman. Funds Requested: $600,975. Total Project Cost: $801,300. To improve the production capability of WSBE–TV located in Providence and serving the entire state, by replacing obsolete equipment. Request includes replacement of master control and routing switchers, a ¾ editing suite, and four quad VTR's with one inch machines. A still store is also requested.

**South Carolina**

File No. 7089 CRB South Carolina ETV Network, Drawer L, 2712 Millwood Ave., Columbia, SC 29250. Signed By: Mr. Henry Cauthen, President & General Manager. Funds Requested: $52,500. Total Project Cost: $70,000. To improve public radio station WLTR–FM, operating on 91.3 MHz, in Columbia. Project will replace obsolete and worn out production equipment and acquire needed test equipment. Station is the flagship station of the South Carolina Educational Radio Network.

File No. 7090 CRB South Carolina ETV Commission, Drawer L, 2712 Millwood Ave., Columbia, SC 29250. Signed By: Mr. Henry Cauthen, President & General Manager. Funds Requested: $90,000. Total Project Cost: $120,000. To activate a new public radio station to serve the Aiken area. Station will operate on 89.1 MHz and serve approximately 396,500 residents of Aiken and the surrounding area. Station will also provide service to the print handicapped via the station's subcarrier. Station will repeat the signal of the South Carolina Educational Radio Network from Columbia.

File No. 7091 CRB South Carolina ETV Commission, Drawer L, 2712 Millwood Ave., Columbia, SC 29250. Signed By: Mr. Henry Cauthen, President & General Manager. Funds Requested: $74,942. Total Project Cost: $99,942. To acquire 1231 subcarrier receivers (SCA) to be used by the print handicapped to receive the special programming over the South Carolina Educational Radio Network.

**South Dakota**

File No. 7126 CRB Lakota Communications, Inc., P.O. Box 150/ Porcupine Butte, Porcupine, SD 57772. Signed By: Mr. Hobart Yankton, Station Manager. Funds Requested: $20,376. Total Project Cost: $27,168. To improve the production capability of public radio station KILI–FM, 90.1 MHz, Porcupine, SD, by purchasing microphones, audio tape recorders, cartridge machines, and diverse other minor studio and test equipment. Many of the requested items will replace worn-out equipment. KILI–FM serves the Pine Ridge Lakota (Sioux) Reservation in southwestern South Dakota.

File No. 7201 CTB State Brd. of Dirs. for ETV, 414 East Clark Street, Vermillion, SD 57069. Signed By: Mr. Larry Miller, Deputy Executive Director. Funds Requested: $468,750. Total Project Cost: $625,000. To replace a 16-year-old transmitter at public TV station KDSD, Ch. 16, at Pierpont, SD. The project will also purchase associated test and remote control equipment. KDSD–TV, which is part of the South Dakota Public Broadcasting system, brings the only public television signal with locally-originated programming to over 86,000 residents of northeast SD.

File No. 7208 CRB State Brd. of Dirs. for ETV, 414 E. Clark Street, Vermillion, SD 57069. Signed By: Mr. Larry Miller, Deputy Executive Director. Funds Requested: $86,313. Total Project Cost: $115,086. To establish a public FM radio station at Lowry, SD, to operate at 91.9 MHz with an ERP of 100 kw. The station will act as a repeater in the South Dakota Public Radio system, which is managed from Vermillion. It will bring the first public radio signal to over 20,000 residents of north-central SD.

File No. 7211 CRB State Brd. of Dirs. for ETV, 414 E. Clark Street, Vermillion, SD 57069. Signed By: Mr. Larry Miller, Deputy Executive Director. Funds Requested: $111,086. Total Project Cost: $148,115. To establish a public FM radio station at Faith, SD, to operate at 97.1 MHz with an ERP of 100 kw. The station will act as a repeater in the South Dakota Public Radio system, which is managed from Vermillion. It will bring the first public radio signal to over 18,000 residents of northwest SD.

**Tennessee**

File No. 7031 CRB University of Tennessee, 108 Cadek Hall, Chattanooga, TN 37403. Signed By: Dr. Frederick Obear, Chancellor. Funds Requested: $33,473. Total Project Cost: $44,631. To improve the facilities of public radio station WUTC, operating on 88.1 MHz in Chattanooga, by acquiring a satellite receive terminal and additional production equipment. WUTC serves one million people in the greater Chattanooga area.

File No. 7058 CTB Upper Cumberland Broadcast Coun., SW Co. Tucker Stadium, Cookeville, TN 38502. Signed By: Mr. John Gentry, Jr., Chairman of the Board. Funds Requested: $440,000. Total Project Cost: $880,000. To improve the facilities of public television station WCTE, operating on Ch. 22 in Cookeville, by replacing obsolete production equipment, including cameras and videotape equipment. The project will also enable a power increase and provide first public television service to 119,111 people. WCTE currently serves 221,501 people in the upper Cumberland area.

File No. 7085 CTN East Tennessee State University, Lake Street at Maple, Johnson City, TN 37614. Signed By: Dr. Ronald Beller, President. Funds Requested: $836,706. Total Project Cost: $1,195,295. To establish a four channel ITFS system to provide instructional programs to some 417,000 people in the area of Johnson City, and, using two sets of 4 channel ITFS repeaters, in the areas of Kingsport and Greenville, TN.

File No. 7098 CTB Greater Chattanooga Public TV, 4411 Amnicola Highway, Chattanooga, TN 37406. Signed By: Mr. Walter Alley, President & General Manager. Funds Requested: $1,101,677. Total Project Cost: $1,478,903. To improve the production facilities of public television station WTCI, operating on Ch. 45 in Chattanooga, by replacing obsolete and worn out production equipment, including cameras, videotape recorders, switchers, editing, test and related equipment. WTCI serves 483,000 people in the greater Chattanooga area, including parts of northeast Alabama and northwest Georgia.

File No. 7103 CTB West Tennessee Public TV Council, Clement Hall, University of TN, Martin, TN 38328. Signed By: Mrs. Bettie Graham, President of Board WTPTC. Funds Requested: $1,190,209. Total Project Cost: $1,586,946. To improve the facilities of public television station WLJT, operating on Ch. 11 in Martin, by replacing obsolete transmitter and antenna, and adding STL and remote control capability and add a portable microwave for coverage of live events. The station serves 552,272 people in west Tennessee.

File No. 7125 PRB City of Knoxville, 400 W. Main Ave., P.O. Box 1631, Knoxville, TN 37902. Signed By: Mr. Kyle Testerman, Mayor. Funds Requested: $37,056. Total Project Cost: $38,456. To plan for the establishment of a radio reading service for the print handicapped to serve 230 people in Knoxville and eastern Tennessee.

File No. 7284 CTB Chattanooga Sta. Tech. Cmy. Col., 4501 Amnicola Highway, Chattanooga, TN 37406. Signed By: Mr. Harry Wagner, President. Funds Requested: $42,476. Total Project Cost: $56,635. To extend the program service of the applicant's ITFS system to two additional sites, South Pittsburgh

High School and the Southeastern Tennessee State Regional Correctional Facility in Pikeville.

**Texas**

File No. 7014 CTB SW Texas Public Brdcstg. Council, 501 S. Bowie, P.O. Box 9, San Antonio, TX 78291. Signed By: Ms. Joanne Winik, Vice President & Station Mgr. Funds Requested: $299,875. Total Project Cost: $399,834. To replace worn-out and obsolete studio equipment at public television station KLRN, operating on Ch. 9, San Antonio, Texas. The project will purchase two one-inch VTRs, a video production switcher, a master control switcher, and a 24-input audio board.

File No. 7027 CTB Central Texas College, Highway 190 West, Killeen, TX 76542. Signed By: Mr. Phillip Swartz, President. Funds Requested: $228,487. Total Project Cost: $304,650. To establish a public TV station at Waco, TX, to operate on Ch. 34 with an ERP of 80 kw. For most of its programming day, it will repeat the signal of public TV station KNCT, Ch. 46, at Central Texas College, Killeen, but it will also broadcast some Waco-orginated programming. The new station will replace KNCT's present translator, also on Ch. 34, and will bring a first public TV signal to approximately 70,000 residents of the Waco area.

File No. 7033 CTB Texas Tech University, 17th & Indiana, Lubbock, TX 79409. Signed By: Mr. Donald Haragan, Vice President. Funds Requested: $112,500. Total Project Cost: $150,000. To replace two obsolete and worn-out studio cameras at public TV station KTXT, Ch. 5, at Texas Tech University, Lubbock.

File No. 7089 CTB SW Texas Public Brdcstg. Council, 2504–B Whitis Street, Austin, TX 78705. Signed By: Mr. Bill Arhos, Station Manager. Funds Requested: $439,130. Total Project Cost: $627,328. To purchase four studio cameras and a production switcher for public TV station KLRU, Ch. 18, in Austin, TX, which brings the only public TV signal with local origination to over 630,000 residents of that area. The requested items will replace worn-out and obsolete equipment.

File No. 7127 CTN Access Houston Cable Corporation, 905 Kipling, Houston, TX 77006. Signed By: Mr. Tomas Cantrell, Executive Director. Funds Requested: $838,390. Total Project Cost: $1,117,854. To establish a production studio to allow community access to the cable television systems serving Houston, TX, and many of the Houston suburbs. Three channels have been made available for public and educational access. The access will be managed by Access Houston Cable Corporation, which is the group authorized by the City of Houston to conduct this activity.

File No. 7207 CTB South Texas Public Brdcstg. Sys., 4455 S. Padre Isl. Dr./Suite 38, Corpus Christi, TX 78411. Signed By: Mr. Terrel Cass, President & General Manager. Funds Requested: $674,325. Total Project Cost: $899,100. To improve the production capability and transmission reliability of public TV station KEDT, Ch. 6, Corpus Christi, TX, by replacing worn-out and obsolete equipment. The project will purchase an STL, three 1" and five ¾" VTRs, a routing switcher, an editing system, a film chain, and an electronic still store.

File No. 7288 CRB North Texas Public Brdcstg., Inc, 3000 Harry Hines Blvd., Dallas, TX 75201. Signed By: Mr. Richard Meyer, President. Funds Requested: $137,030. Total Project Cost: $182,707. To purchase a transmitter, antenna, transmission line, and transmitter switch kit at public radio station KERA–FM, 90.1 MHz, Dallas, TX. The requested items will replace equipment that is worn-out, obsolete, or inadequate for the station's needs.

File No. 7311 CTB El Paso Public Television Fnd., 105 Education Bldg./U. of Texas, El Paso, TX 79968. Signed By: Mr. Robert Stakes, Secretary. Funds Requested: $284,921. Total Project Cost: $379,895. To improve the program production capability of public TV station KCOS, Ch. 13, El Paso, by replacing worn-out, obsolete, or inadequate studio equipment. The project will purchase two 1" video tape recorders, a production switcher, a master control room switcher, a routing switcher, an editing system, and a character generator.

**Utah**

File No. 7146 CRB University of Utah, 103 Kingsbury Hall, Salt Lake City, UT 84112. Signed By: Mr. Ted Capener, Vice President. Funds Requested: $38,569. Total Project Cost: $51,425. To extend and improve the signal of KUER–FM operating on 90.1 MHz Salt Lake City, Utah by replacing obsolete dissemination equipment and installing a translator in Cedar City, Utah to provide a first public radio signal to 15,000 residents of Iron County.

File No. 7151 CRTB University of Utah, 205 James Talmage Building, Salt Lake City, UT 84112. Signed By: Mr. Ted Capener, Vice President. Funds Requested: $1,477,544. Total Project Cost: $1,970,059. To extend and improve the signals of KUED–TV, KULC–TV and KUER–FM operating on channels 7, 9 and 90.1 MHz respectively in Salt Lake City, Utah by continuing the construction of the state microwave system to Price, Castle Dale and St. George, adding additional translators and installing additional transmission and production facilities to better serve the rural areas of the state.

File No. 7196 CRB Listeners Cty. Radio of UT, Inc., 206 West 800 South, Salt Lake City, UT 84101. Signed By: Mr. John Greene, Station Manager. Funds Requested: $24,118. Total Project Cost: $32,157. To upgrade the program production capabilities of public radio station KRCL–FM operating on 90.9 MHz in Salt Lake City, Utah by replacing obsolete studio apparatus and remote broadcast equipment.

**Virginia**

File No. 7064 CTB Shenandoah Valley ETV Corp., 298 Port Republic Road, Harrisonburg, VA 22801. Signed By: Mr. Arthur Albrecht, President. Funds Requested: $275,475. Total Project Cost: $367,300. WVPR–TV in Harrisonburg requests replacement of three cameras and the master control/studio sync generators. The equipment for which replacement is requested does not produce broadcast quality signals.

File No. 7305 CTN Hampton Roads Ed. T/C Assoc, Inc, 5200 Hampton Boulevard, Norfolk, VA 23508. Signed By: Mr. John Morison, President & General Manager. Funds Requested: $660,668. Total Project Cost: $1,134,447. To extend and improve the ITFS network of WHRO–TV, operating on channel 15, Norfolk, Virginia by constructing additional transmitters in four new sites, connecting them by microwave and adding two channels to an existing system in order to better serve the educational needs of 1.2 million residents of the Hampton Roads-Norfolk area.

File No. 7314 CRB Hampton Roads Ed. T/C Assoc., 5200 Hampton Boulevard, Norfolk, VA 23508. Signed By: Mr. John Morison, President & General Manager. Funds Requested: $93,590. Total Project Cost: $133,700. To improve the signal and production capability of public radio station WHRO–FM operating on 89.5 MHz, Norfolk, Virginia by replacing obsolete studio equipment acquiring a back-up STL and additional SCA receivers to better serve the 1.2 million residents of southeastern Virginia.

File No. 7316 CRB Virginia Tech Foundation, Inc., 4235 Electric Road, S.W., Roanoke, VA 24014. Signed By: Mr. Charles Forbes, Executive Vice President. Funds Requested: $149,298. Total Project Cost: $199,066. To extend the signal of public radio station KVTF–FM, operating on 89.1 MHz, in Roanoke, Virginia by constructing a translator/repeater. This would provide a first

public radio service to 129,000 residents of greater Charlottesville, Virginia.

**Vermont**

File No. 7093 CTB University of Vermont, 88 Ethan Allen Avenue, Winooski, VT 05404. Signed By: Ms. Patricia Armstrong, Director of Sponsored Programs. Funds Requested: $523,500. Total Project Cost: $698,500. To increase power of WETK–TV from 30 kw to 60 kw and to replace existing obsolete transmitter. WETK serves the Burlington area.

**Washington**

File No. 7070 CRB Pacific Lutheran University, 121st & Park Avenue, Tacoma, WA 98447. Signed By: Dr. William Rieke, President. Funds Requested: $127,476. Total Project Cost: $190,264. To extend the service of public radio station KPLU, operating at 88.5 FM in Tacoma, to unserved areas of Washington State. Applicant will relocate the transmitter site to higher elevation to reach standards for Class C FM stations under FCC Docket 80/90. Project will provide first public radio service to 41,992 people, and will insure continued service to 237,721 people served by applicant's seven translator system.

File No. 7081 CTN The University of Washington, 401 Mercer Street, Seattle, WA 98109. Signed By: Mr. Donald Allen, Director, Grant & Contracts. Funds Requested: $592,858. Total Project Cost: $790,478. To activate an eight channel Instructional Television Fixed Service system operated by public television station KCTS, Ch. 9 in Seattle. The ITFS system will serve some 500,000 people throughout the Seattle area.

File No. 7306 CRB Spokane Public Radio, N. 2319 Monroe St., Spokane, WA 99205. Signed By: Mr. Barry Brenesal, General Manager. Funds Requested: $16,154. Total Project Cost: $21,539. To extend the service of public radio station KPBX, operating on 91.1 MHz in Spokane, by constructing a series of translators to provide service to South Spokane on 90.7 MHz, Sandpoint, ID on 88.9 MHz, Kellogg and Wallace, ID on 91.9 MHz and Coeur d'Alene, ID on 91.9 MHz.

**Wisconsin**

File No. 7080 CTB Milwaukee Dist. Brd. of VTAE, 1015 N. 6th Street, Milwaukee, WI 53203. Signed By: Dr. Russ Slicker, Chief Executive Officer. Funds Requested: $217,500. Total Project Cost: $435,000. To replace six studio cameras and two portable cameras, all obsolete and worn-out, at public TV stations WMVS/WMVT–TV, Chs. 10 and 36, Milwaukee, WI. The project will accomplish the replacement by purchasing three studio cameras and one compatible portable camera.

File No. 7133 CTB Wisconsin Educational Comm. Brd., 3319 West Beltline Highway, Madison, WI 53713. Signed By: Mr. Paul Norton, Executive Director. Funds Requested: $857,138. Total Project Cost: $1,714,276. To improve the service of the Wisconsin State public TV network by equipping two master control rooms (MCRs), one for the State system and one for public TV station WHA, Ch. 21, Madison. The MCRs will be co-located at the State network's new Telecommunications Operations Center (TOC), Madison. WHA–TV, a State network affiliate, produces extensive programming for the network. The project will also install a two-way MW to connect the State TOC with Station WHA–TV.

File No. 7134 CRB Wisconsin Educational Comm. Brd., 3319 West Beltline Highway, Madison, WI 53713. Signed By: Mr. Paul Norton, Executive Director. Funds Requested: $59,960. Total Project Cost: $119,920. To activate a public radio station at Park Falls, WI. It will have the call letters WLEF and will operate at 90.3 MHz with an ERP of 17.7 kw. It will be part of the Wisconsin State public radio system, which is managed from Madison by the State Educational Communications Board. WLEF–FM will bring the first public radio signal to 28,200 residents of north central WI and will use its subcarrier frequency for instructional programming and radio reading for the print-handicapped.

File No. 7142 CRB Gateway Technical Institute, 3520 30th Avenue, Kenosha, WI 53141. Signed By: Dr. John Birkholz, District Director. Funds Requested: $23,000. Total Project Cost: $46,000. To replace a worn-out transmitter and associated equipment at public radio station WGTD–FM, 91.1 MHz, licensed to Gateway Technical Institute, Kenosha, WI.

File No. 7217 CRB Univ. of Wisc./ Platteville, 1 University Plaza, Platteville, WI 53818–3099. Signed By: Mr. Stephen Zielke, Assistant Chancellor. Funds Requested: $40,772. Total Project Cost: $62,363. To extend the signal of noncommercial radio station WUSP–FM, 90.5 MHz, Platteville, WI, by increasing the ERP of its signal from 420 w to 2.5 kw. The project will replace a worn-out transmitter and purchase an antenna, transmission line, and associated equipment.

File No. 7292 CTB Wisconsin Educational Comm. Brd., 3319 West Beltline Highway, Madison, WI 53713. Signed By: Mr. Paul Norton, Executive Director. Funds Requested: $75,903. Total Project Cost: $151,805. To activate a TV translator on Ch. 53 to serve Adams County in central Wisconsin. The translator will repeat the signal of public TV station WHRM, Ch. 20, Wausau, WI, which in turn is part of the Wisconsin State Television Network. The translator will bring the first public TV signal to approximately 20,000 residents of Adams County.

**West Virginia**

File No. 7085 CTB WV Educational Brdcstg. Auth., 1900 Washington Street, E., Charleston, WV 25305. Signed By: Ms. Mary Jo Smith, Acting Executive Director. Funds Requested: $195,000. Total project Cost: $260,000. To improve the state network which is comprised of three television stations, by replacing four obsolete and wornout quad vtr's with one inch vtr's.

File No. 7087 CRB WV Educational Brdcstg. Auth., 1900 Washington Street E, Charleston, WV 25305. Signed By: Ms. Mary Jo Smith, Acting Executive Director. Funds Requested: $209,040. Total Project Cost: $278,721. To replace malfunctioning and inadequate production equipment of radio station WVPN–FM in Charleston. WVPN is the originating station for the eight station state network. Application requests turntables, recorders, consoles and other production equipment.

File No. 7252 CTB WV Educational Brdcstg. Auth., P.O. Box AH, Airport Road, Beckley, WV 25802–2831. Signed By: Ms. Mary J. Smith, Acting Executive Director. Funds Requested: $465,003. Total Project Cost: $620,004. To improve WSWP–TV, located in Beckley and serving the southwest portion of the state, by replacing an obsolete transmitter; request also includes stereo switcher and test equipment.

**Wyoming**

File No. 7084 CTB Central WY Comm. College Found., 2660 Peck Ave., Riverton, WY 82501. Signed By: Mr. Harmon Watt, Chairperson. Funds Requested: $188,947. Total Project Cost: $251,930. To extend the signal of public Television station KCWC–TV operating on channel 4, Riverton, Wyoming with a microwave fed translator located in Jackson Wyoming to bring the first public television service to 5,500 residents of Teton County Wyoming.

File No. 7176 CRB Powder River Public Radio, P.O. Box 1081, Gillette, WY 82716. Signed By: Ms. Janet Stevens, President. Funds Requested: $3,072. Total Project Cost: $4,096. To extend the signal of public radio station KUWR–FM operating on 91.9 MHz, Laramie, Wyoming with a translator located in

Gillette, Wyoming to provide a first public radio service to 12,800 residents of Campbell County, Wyoming.

File No. 7187 CRB University of Wyoming, P.O. Box 3984, 9th & Lewis St., Laramie, WY 82071. Signed By: Dr. James Tod, Vice President. Funds Requested: $98,282. Total Project Cost: $115,015. To extend the signal of public radio station KUWR–FM operating on 91.9 MHz Laramie, Wyoming by increasing the power from 50kw to 100kw thus providing first public radio service to 15,292 additional listeners.

**Alaska**

File No. 7139 CRB 6237 Gwandak Public Broadcasting, Inc., E 3rd Ave.,Wh. Alice Site, Box 189, Fort Yukon, AK 99740. Signed By: Mr. Barry Wallis, President. Funds Requested: $147,325. Total Project Cost: $198,435. To activate a noncommercial AM radio station in Fort Yukon, AK, to bring a first public radio signal to approximately 1200 residents of the Alaskan interior's Yukon Flats Region, over 75 per cent of whom are Athabaskan Indians. The new station will have local origination capability and will operate at 900 kHz with 5 kw of power.

**Alabama**

File No. 7001 CTN 6144 The University of Alabama, University Boulevard, Tuscaloosa, AL 35487. Signed By: Dr. Robert Wells, Assistant Vice President. Funds Requested: $328,878. Total Project Cost: $440,280. To improve/upgrade the production capabilities of the University Television Services. UTS provides major production facilities in support of the Alabama Public Television Network which serves the entire state. In addition, proposal seeks equipment to outfit an instructional TV classroom. This classroom will allow production of ITV programming without interfering with public TV productions.

File No. 7002 CRB 6013 Sable Cmty. Brdcstg. Corp., 711 Church Street, P.O. Box 3197, Hobson City, AL 36203. Signed By: Ms. Maudine Holloway, President. Funds Requested: $103,349. Total Project Cost: $137,799. To activate a new noncommercial educational FM station on 91.3 MHz in Hobson City. Station will serve an estimated 119,761 residents of Hobson City, Anniston, and Calhoun County.

File No. 7053 CRB 6276 University of AL, Birmingham, 1028 7th Ave., South, Birmingham, AL 35294. Signed By: Dr. Kenneth Pruitt, Associate Vice President. Funds Requested: $15,000. Total Project Cost: $20,000. To acquire approximately 250 new SCA receivers for use by four public radio stations in Alabama. Stations are WBHM—Birmingham, WUAL—Tuscaloosa, WLRH—Huntsville, and WTSU—Montgomery. Receivers will allow print handicapped individuals to receive radio reading service of WBHM–FM located in Birmingham.

**Arkansas**

File No. 7329 CRB 6261 University of Central Arkansas, Bruce & Donaghey Streets, Conway, AR 72032. Signed By: Mr. Bill Pate, President. Funds Requested: $66,620. Total Project Cost: $88,827. To improve and upgrade noncommercial educational radio station KUCA–FM, operating on 91.3 MHz, in Conway. KUCA–FM seeks to replace worn-out/obsolete production equipment and at the same time convert to stereo. Station serves approximately 350,000 residents of Central Arkansas.

**Arizona**

File No. 7197 CTB 6288 Arizona State University, Stauffer Building, Tempe, AZ 85287. Signed By: Dr. Herman Goldner, Director of Research Devel. Funds Requested: $277,500. Total Project Cost: $370,000. To extend the signal of public television station KAET–TV, channel 8, Phoenix/Tempe by constructing a microwave system to feed translators in the northcentral section of the state to provide first service to 3,128 residents of Yavapai and Coconino Counties.

**California**

File No. 7077 CRB 6188 University of Southern Cal., 3716 S. Hope St., P.O. Box 77913, Los Angeles, CA 90007. Signed By: Ms. Lyn Hutton, Senior Vice President. Funds Requested: $135,065. Total Project Cost: $180,087. To expand the facilities of public radio station KPSH, operating on 88.5 MHz in Palm Springs, CA by moving the transmitter site and increasing power to 3 KW. The project will also add local origination capability. The station will rebroadcast programs from Los Angeles and will serve an estimated 133,097 people in the Coachella Valley.

File No. 7117 CTN 6035 Imperial County Office of Ed., 1398 Sperber Road, El Centro, CA 92243. Signed By: Dr. William Fisher, Assistant Superintendent. Funds Requested: $268,280. Total Project Cost: $357,707. To establish a two channel ITFS system to serve the schools and citizens of Imperial County, CA.

File No. 7204 CRB 6131 Radio Bilingue, 1044 Fulton Mall, Fresno, CA 93721. Signed By: Mr. Hugo Morales, Executive Director. Funds Requested: $89,432. Total Project Cost: $119,243. To establish a new public radio station operating on 90.1 MHz to serve the Spanish-speaking residents of the Bakersfield area. The station would rebroadcast programs from KSJV Fresno, and would have studios for local origination.

File No. 7283 CTB 6185 KQED, Inc., 500 Eighth Street, San Francisco, CA 94103. Signed By: Mr. Eugene Zastrow, Executive Vice President. Funds Requested: $273,328. Total Project Cost: $455,548. To improve the production facilities of public television station KQED, operating on Ch. 9 in San Francisco, by replacing four obsolete studio cameras. KQED serves four million people in the San Francisco Bay area.

File No. 7297 CTB 6135 Minority Television Project, Inc., 353 Sacramento Street, San Francisco, CA 94111–3628. Signed By: Mr. Marvell Allen, Chief Finance Officer. Funds Requested: $350,748. Total Project Cost: $467,665. To establish a public television station operating on Ch. 32, San Francisco, CA, to serve Bay area black and minority audiences. Applicant is opposing the renewal of KQEC–TV, which currently broadcast on Ch. 32, San Francisco. Applicant proposes to purchase used Ch. 32 transmission terminal. Station would provide service to 4.5 million residents of the Bay area, including 1.5 million minorities.

File No. 7320 CTN 6095, 5399 Cmty. Media Resource Training Ctr, P.O. Box 20962, San Diego, CA 92120. Signed By: Mr. Donald Mason, President & General Manager. Funds Requested: $289,661. Total Project Cost: $386,215. To establish a noncommercial production facility to produce television programs for dissemination via cable to minority audiences in San Diego. Later dissemination is anticipated to nationwide minority audiences via low power television and other technology.

**Connecticut**

File No. 7230 CRB 6068 Connecticut Ed. Telecommunications Corp., 24 Summit Street, Hartford, CT 06106. Signed By: Mr. Jerry Franklin, President. Funds Requested: $113,614. Total Project Cost: $213,614. To establish a non-commercial FM radio station operating on 88.5 in Stamford which will provide first local service to the area.

**Florida**

File No. 7024 CRB 6286 School Brd. of Dade County, FL, 172 N.E. 15th Street, Miami, FL 33132. Signed By: Mr. Leonard Britton, Superintendent of Schools. Funds Requested: $80,246. Total Project Cost: $80,328. To improve and augment the facilities of noncommercial educational radio station WLRN–FM, operating on 91.3 MHz, in Miami.

Proposal will purchase a remote pickup transmitter, studio and remote production equipment and two earth station demodulators. Station serves approximately 3.2 million residents of Dade, Broward, Monroe and Palm Beach counties.

File No. 7025 CRB 6240 School Brd. of Dade County, FL, 172 N.E. 15th Street, Miami, FL 33132. Signed By: Mr. Leonard Britton, Superintendent of Schools. Funds Requested: $65,970. Total Project Cost: $87,960. To acquire an audio console and SCA receivers to improve and extend the radio reading services provided by WLRN–FM, in Miami. WLRN–FM provides radio reading services to the print handicapped in Dade, Broward, Monroe and Palm Beach counties.

File No. 7026 CTB 6321 School Brd. of Dade County, FL, 172 N.E. 15th Street, Miami, FL 33132. Signed By: Mr. Leonard Britton, Superintendent of Schools. Funds Requested: $932,025. Total Project Cost: $1,242,700. To acquire production equipment to improve and augment the facilities of public television station WLRN–TV, channel 17, in Miami. Production equipment includes cameras, switchers, recorders, consoles, editing equipment, char. generator, telecine and lighting equipment. WLRN–TV also proposes to acquire a back-up transmitter exciter and test equipment. Station serves approximately 2.9 million residents of Miami and the surrounding area.

File No. 7152 CRB 6194, 5130, 4185 University of South Florida, 4202 Fowler Ave., SVC 116, Tampa, FL 33620–6800. Signed By: Mr. Frank Lucarelli, Director of Sponsored Research. Funds Requested: $201,090. Total Project Cost: $268,121. To replace worn-out and obsolete broadcast equipment at station WUSF–FM, operating on 89.7 MHz, in Tampa. Equipment will allow an increase in local program production capabilities. WUSF–TV also seeks to purchase additional SCA receivers for use by the radio reading service for the print-handicapped.

File No. 7170 CTB 6182, 5328 Comm. TV Fnd. of South Florida, 14901 N.E. 20th Avenue, Miami, FL 33181. Signed By: Mr. Stephen Rogers, Vice President & General Mgr. Funds Requested: $217,842. Total Project Cost: $395,714. To acquire broadcast equipment to allow for the use of the secondary audio program (SAP) channel of WPBT–TV, channel 2, in Miami. SAP equipment will allow for the simultaneous broadcast of the same program in a second language. WPBT–TV will thus be able to serve both their Spanish and English speaking audiences.

File No. 7299 CRB 6197, 5129, 4183 University of South Florida, 4202 Fowler Ave., SVC 116, Tampa, FL 33620–6800. Signed By: Mr. Frank Lucarelli, Director. Funds Requested: $89,150. Total Project Cost: $118,867. To improve public radio station WSFP–FM, operating on 90.1 MHz, in Ft. Myers. Project will improve station by adding local origination equipment and additional SCA receivers for the radio reading service. In addition, will acquire satellite reception equipment. Station serves an estimated 500,000 residents of Ft. Myers and surrounding areas.

File No. 7333 CTB 6205 University of South Florida, 4202 Fowler Avenue, SVC 116, Tampa, FL 33620. Signed By: Mr. Frank Lucarelli, Director Sponsored Research. Funds Requested: $597,231. Total Project Cost: $796,309. To acquire production and satellite reception equipment for public television station WSFP–TV, channel 30, in Fort Myers. Equipment will allow for first local origination for the Fort Myers area. Station serves approximately 500,000 residents of a five county area.

**Iowa**

File No. 7155 CRB 6137 Iowa Community Radio, Inc., 205 E. Burlington, Fairfield, IA 52556. Signed By: Mr. William Cottle, President. Funds Requested: $193,932. Total Project Cost: $258,577. To establish a noncommercial public FM radio station on 90.5 MHz., in Fairfield, IA, to provide first service to 80,000 residents in the rural areas of southeast Iowa and Northeast-east Missouri.

File No. 7174 CTN 6162, 5090 Eastern Iowa Community College Dist., 306 West River Drive, Davenport, IA 52801–1221. Signed By: Mr. John Blong, Chancellor. Funds Requested: $265,276. Total Project Cost: $353,702. To activate an interconnected instructional fixed television service network on channels WHR–478, Muscatine, IA, WHR–510, Clinton, IA, and WHR–479, Bettendorf, IA, to provide locally originated educational and cultural telecommunications services to the communities along the Mississippi river in eastern Iowa.

**Idaho**

File No. 7111 CRB 6341 Boise State University, 1910 University Drive, Boise, ID 83725. Signed By: Mr. Jerold Garber, General Manager. Funds Requested: $155,618. Total Project Cost: $210,295. To extend and improve the signal of public radio station KBSU–FM, operating on 91.3 MHz, Boise Idaho, by changing the frequency to 90.3 MHz moving the transmitter site and increasing the power to 19.1 kw and upgrading the studio facilities to serve 105,314 additional listeners.

File No. 7181 CRB 6332 Wood River Public Brdcstg. Co., 114 Little Indio Lane, Hailey, ID. Signed By: Ms. Gretchen Guard, President of the Board. Funds Requested: $77,242. Total Project Cost: $102,989. To establish a noncommercial FM station operating on 95.3 MHz in Sun Valley Idaho, to provide first local origination service to 30,000 listeners in five counties of central Idaho.

**Illinois**

File No. 7154 CTN 6350 Governors State University, University Parkway, University Park, IL 60466. Signed By: Dr. Leo Goodman Malamuth, II, President. Funds Requested: $254,112. Total Project Cost: $338,816. To make available the telecommunications capabilities of Governors State University, University Park, IL, by activating a microwave interconnection to public television station WYIN–TV, channel 56, Gary, IN, and build a two channel ITFS system to provide a variety of educational and informational programs to the communities in northeast Illinois and northwest Indiana.

**Indiana**

File No. 7115 CTB 6040, 5385 The Vincennes University, 1002 N. 1st Street, Vincennes, IN 47591. Signed By: Dr. Phillip Summers, President. Funds Requested: $203,075. Total Project Cost: $270,766. To replace worn and obsolete studio cameras for public television station WVUT–TV, channel 22, Vincennes, IN, in order to improve programming services to the communities in Indiana and Illinois surrounding the city of Vincennes.

File No. 7153 CTB 6210 Northwest IN Public Broadcasting, 8149 Kennedy Ave., Highland, IN 46322. Signed By: Mr. Lawrence Ventura, Chairman. Funds Requested: $197,961. Total Project Cost: $263,950. To replace and refurbish worn and obsolete dissemination facilities and to provide two studio cameras to facilitate local production at public television station WYIN–TV, channel 56, Gary, IN, in order to provide broadcast service and enable local production services to northwest Indiana communities.

File No. 7214 CTB 6018, 5106, 4093 Metro. Indianapolis PB, Inc., 1401 N. Meridian Street, Indianapolis, IN 46202–2389. Signed By: Mr. Frank Meek, Executive Vice President. Funds Requested: $540,850. Total Project Cost: $739,645. To improve the dissemination and origination facilities of public television station WFYI–TV, channel 20, Indianapolis, IN, by replacing worn and

obsolete dissemination and origination equipment to provide needed programs to the Indianapolis metropolitan area and to the Indiana public television network.

**Kansas**

File No. 7129 CRB 6036 Hutchinson Community College, 815 N. Walnut, Suite 300, Hutchinson, KS 67501. Signed By: Dr. James Stringer, President. Funds Requested: $328,454. Total Project Cost: $435,273. To construct an FM transmission station in Salinas, KS, that will repeat the signal of public radio station KHCC–FM, at Hutchinson Community College, Hutchinson, KS. The new station will operate at 89.5 MHz with an ERP of 100 kw. It will be capable of broadcasting separate programming produced at KHCC–FM for the repeater's area of service. It will bring the first public radio signal with local origination to over 175,000 residents of north central Kansas.

**Massachusetts**

File No. 7322 CRB 6229 WICN public Radio, Inc., 6 Chatham St., P.O. Box 241, Worcester, MA 01601. Signed By: Mr. Henry Horner, President. Funds Requested: $134,012. Total project Cost: $178,683. To expand signal of WICN–FM in Worcester into unserved areas by increasing tower height from 100 to 300 ft and by replacing current antenna with a directional antenna. Application requests tower, antenna, STL and satellite downlink.

**Maryland**

File No. 7330 CTN 6238, 5401 Chesapeake College, P.O. Box 8, Wye Mills, MD 21679–0006. Signed By: Mr. Robert Schleiger, President. Funds Requested: $247,601. Total Project Cost: $330,135. To activate a new ITFS system to serve a five county area on the Eastern Shore of Maryland. Facility will be located in Wye Mills and will provide an instructional service as well as a mean of local origination.

**Michigan**

File No. 7030 CTN 6327,5112 City of Saline, 100 North Harris Street, Saline, MI 48176. Signed By: Mr. Mark Hopper, Mayor. Funds Requested: $350,000. Total Project Cost: $466,825. To establish an interconnection network with local production studio in order to provide nonbroadcast educational and civic programs via cable franchise dedicated public service channels in the communities of Saline, Dexter, Chelsea, Manchester, Clinton, Milan and Dundee in southeastern Michigan; the system is governed by cooperating municipal agreements with the city of Saline.

File No. 7056 CRB 6111, 5289, 4254, 3105, 2048 Central Michigan University, 3965 E. Broomfield, Mt. Pleasant, MI 48859. Signed By: Mr. Arthur Ellis, President. Funds Requested: $89,516. Total Project Cost: $120,966. To extend the signal of public radio station WCMU–FM, 89.5 MHz by establishing a repeater station on 90.1 MHz Bay City, MI, in order to provide network and locally originated educational and cultural radio programming to the communities in the "Thumb" area of Michigan.

File No. 7209 CRB 6311, 5411, 4066, 3026, 2109 Delta College, Delta Road, University Center, MI 48710. Signed By: Mr. D. J. Carlyon, President. Funds Requested: $142,800. Total Project Cost: $204,000. To activate a public radio station on 90.1 MHz, Bay City, MI, in order to bring first public radio service to 454,834 persons in the "Thumb" region of Michigan as well as in the Bay City, Midland and Saginaw areas of the state.

File No. 7220 CTB 6285, 5391 Delta College, Delta Road, University Center, MI 48710. Signed By: Mr. D. J. Carlyon, President. Funds Requested: $282,000. Total Project Cost: $470,100. To replace worn and obsolete origination equipment for public television station WUCM–TV, channel 19, University Center, MI, by providing studio production and control apparatus to better serve the communities in the tri-city (Saginaw, Midland and Bay City) area of east central Michigan.

File No. 7221 CRB 6165 Eastern Michigan University, 426 King Hall, Ypsilanti, MI 48197. Signed By: Mr. Roy Wilbanks, Vice President. Funds Requested: $138,832. Total Project Cost: $182,433. To expand the coverage area of public radio station WEMU–FM, 89.1 MHz, Ypsilanti, MI, by replacing worn and obsolete dissemination facilities in order to continue locally originated program services to the communities in the south eastern area of the state.

**Missouri**

File No. 7132 CRB 6330, 5063 St. Louis Board of Education, 1517 S. Theresa Ave., St. Louis, MO 63104. Signed By: Dr. Jerome Jones, Superintendent of Schools. Funds Requested: $240,792. Total Project Cost: $321,056. To extend the coverage and improve the dissemination and origination facilities of public radio station KSLH–FM, 91.5 MHz, St. Louis, MO, by replacing tower and antenna facilities which are worn and obsolete and by improving transmission and origination equipment to better serve the educational needs of the St. Louis community.

**Montana**

File No. 7121 CRB 6232 Dawson Community College, 300 College Drive, P.O. Box 421, Glendive, MT 59330. Signed By: Mr. Donald Kettner, President. Funds Requested: $4,263. Total Project Cost: $5,684. To extend the signal of public radio station KEMC–FM Billings Montana by constructing a translator facility in Glendive, Montana to provide first public radio service to 10,500 residents of Dawson County Montana.

**Nebraska**

File No. 7119 CRB 6326 University of Nebraska, Omaha, 60th & Dodge Street, Omaha, NE 68182–0234. Signed By: Mr. Del Weber, Chancellor. Funds Requested: $24,795. Total Project Cost: $33,085. To improve the production capabilities of noncommercial radio station KVNO–FM, 90.7 MHz, at the University of Nebraska at Omaha, by replacing worn-out and obsolete studio equipment. The project will purchase two audio tape recorders, two audio consoles, two cart machines, and a stereo recording amplifier.

File No. 7169 CTN 6088 Metropolitan Tech. Comm. College, 30th & Fort Sts., P.O. Box 3777, Omaha, NE 68103. Signed By: Dr. Richard Gilliland, President. Funds Requested: $215,908. Total Project Cost: $359,846. To construct an Instructional Television Fixed Service system originating from Metropolitan Technical Community College, Omaha, NE. The main production studios will be at the College's Elkhorn Valley campus. The system will provide instructional programming to schools, cable TV systems, and business sites in Dodge, Sarpy and Washington Counties in eastern Nebraska, many of whose residents do not now receive such televised educational materials.

**New Mexico**

File No. 7104 CTN 6195, 5006 The University of New Mexico 1130 University Blvd., NE., Albuquerque, NM 87102. Signed By: Ms. Ann Powell, Director, Research Admin. Funds Requested: $422,556. Total Project Cost. $563,408. To install a satellite uplink earth station, with an "agile" antenna for public TV station KNME–TV, Ch. 5, operated by the University of New Mexico, Albuquerque. The earth station will transmit instructional programming throughout the State as well as to selected Central and South American educational institutions. It will also permit teleconferencing on public issues. In addition, it will be a reserve facility for the Rocky Mountain CPP uplink.

BEST COPY AVAILABLE

File No. 7159 CRB 6254, 5118 Brd. of Ed., City of Albuquerque, 2020 Coal SE., Albuquerque, NM 87106. Signed By: Ms. Lillian Barna, Superintendent. Funds Requested: $46,565. Total Project Cost: $62,127. To extend the signal of noncommercial radio station KANW–FM, 89.1 MHz, in Albuquerque, NM, by increasing its transmitter power from 14.5 kw to 20.189 kw. The extension will bring the first public radio signal to over 40,000 residents of the area surrounding Albuquerque. The project will also purchase a "hot standby" studio-to-transmitter link for KANW.

File No. 7219 CTB 6223 Eastern New Mexico University, Station 52, Portales, NM 88130. Signed By: Mr. Duane Ryan, Director. Funds Requested: $303,077. Total Project Cost: $404,103. To improve the production capability of public TV station KENW, Ch. 3, Portales, NM, by purchasing a production video switcher, a production audio console, three 1" video tape recorders, video and audio distribution amplifiers, and diverse stereo equipment. The project will also construct a translator that will bring the station's signal to the Ruidoso-Capitan area of southern NM and will replace the lighting system of the station's tower in Caprock, NM.

**Nevada**

File No. 7162 CTB 6222 Rural Television System, 6205–A Franktown Road, Carson City, NV 89701. Signed By: Mr. Daniel Tone, RTS Administrator. Funds Requested: $153,070. Total Project Cost: $207,093. To establish a mobile production facility for Rural Television System operating from Carson City, Nevada to support the local program origination activities of their affiliates throughout the Rocky Mountain area.

File No. 7280 CTB 6243 Fallon Community Television, Inc., 310 N. Broadway, Fallon, NV 89406. Signed By: Mr. Myrl Nygren, Chairman of the Board. Funds Requested: $27,510. Total Project Cost: $36,680. To upgrade the programming capabilities of low power TV station K25AK operating on channel 25, Fallon, Nevada by installing local production capability for local origination programming.

File No. 7120 CTB 6009, 5028, 4256 Lyon County Brd. Commissioners, 15 S. Main Street, Yerington, NV 89447. Signed By: Mr. Don Cummings, Chairman of the Board. Funds Requested: $26,550. Total Project Cost: $35,400. To establish a TV translator operating on channel 48 in Yerington, Nevada to extend the signal of KNPB–TV, Reno to the 17,500 residents of Lyon County, Nevada.

**New York**

File No. 7215 CRB 6228 Niagara Frontier Radio Read. Ser, Appletree Mall, Union Road, Buffalo, NY 14227. Signed By: Mr. Robert Sikorski, Executive Director. Funds Requested: $118,125. Total Project Cost: $157,500. To activate a radio reading service which will provide service to the City of Buffalo as well as to Erie and Niagara counties. Equipment request includes SCA generator, production equipment and 1,000 receivers. Signal will be transmitted over subcarrier of WBEN–FM, a commercial station.

File No. 7337 CTN 6204, 5407 Hispanic Info T/C Ntwk of Amer., 80 East 11th St., Suite 314, New York, NY 10003. Signed By: Mr. Jose Rodreguez. Funds Requested: $295,989. Total Project Cost: $394,652. To build a video production and distribution facility in New Orleans that will produce educational and cultural programming which will be distributed via ITFS; Microband will lease excess system capacity.

**Ohio**

File No. 7049 CRB 6096 Miami University, Spring & Oak Streets, Oxford, OH 45056. Signed By: Mr. Edward Demske, Vice President. Funds Requested: $100,146. Total Project Cost: $166,910. To replace worn and obsolete studio origination equipment for public radio station WMUB–FM, 88.5 MHz, Oxford, OH, in order to provide locally originated and network programming services to the communities in west central Ohio and east central Indiana.

File No. 7210 CTB 6004 Bowling Green State University, 245 Troup Street, Bowling Green, OH 43403–0060. Signed By: Mr. Louis Katzner, Interim Assoc. Vice President. Funds Requested: $265,500. Total Project Cost: $379,414. To replace worn and obsolete origination equipment at public television station WBGU–TV, channel 57, Lima, OH, with new studio cameras to assure continued local production and improve the visual quality of programs designed to meet the needs of communities in the Bowling Green and Lima, Ohio area.

**Oklahoma**

File No. 7017 CRB 6044 Cameron University, 2800 W. Gore Blvd., Lawton, OK 73505. Signed By: Mr. Don Davis, President. Funds Requested: $129,355. Total Project Cost: $172,478. To establish a noncommercial FM radio station at Cameron University, Lawton, Oklahoma. The station will use the call letters KCCU–FM and operate at an ERP of 2 kw on 89.9 MHz. It will bring a first public radio signal to approximately 110,000 residents of southwest Oklahoma.

**Pennsylvania**

File No. 7031 CRB 6025, 5127 Metro. Pittsburgh Public Brdcstg, 4802 Fifth Ave., Pittsburgh, PA 15213. Signed By: Mr. Lloyd Kaiser. Funds Requested: $33,333. Total Project Cost: $44,445. To improve broadcast signal of public radio station WQED–FM serving Pittsburgh by replacing telephone lines with radio frequency STL.

File No. 7184 CRB 6260 Pittsburgh Comm. Brdcstg. Corp., Box 66, Chatham College, Pittsburgh, PA 15232–2814. Signed By: Ms. Kimberly Haas, General Manager. Funds Requested: $83,315. Total Project Cost: $111,087. To upgrade facilities of WYEP–FM, a non-commercial public radio station serving Pittsburgh, by replacing unreliable transmitter, antenna and other dissemination equipment. Project also includes request for remote pickup and test equipment.

File No. 7289 CTB 6227 WITF, Inc., 1982 Locust Lane, Harrisburg, PA 17109. Signed By: Mr. John Blair, Vice President & General Mgr. Funds Requested: $805,208. Total Project Cost: $806,944. To replace worn out and technically obsolete essential equipment at WITF–TV, serving the Harrisburg area; request includes STL, cameras, VTR's, timebased correctors, and test equipment.

**Puerto Rico**

File No. 7232 CTB 6280 Fundacion Ed. Ana G. Mendez, P.O. Box 21345, Cupey, Rio Piedr, PR 00928. Signed By: Mr. Jose Mendez, President. Funds Requested: $599,247. Total Project Cost: $864,980. To improve the facilities of public television stations WMTJ–TV, operating on Ch. 40 Farjado, and WQTQ, operating on Ch. 26 in Ponce, by constructing a satellite receive terminal and equipping a second production studio. The satellite receive terminal will enable the stations to receive programs from the Public Broadcasting Service. The studio, located in Rio Piedras, is intended to provide local programs to Ponce. The stations serve two and a half million residents of the island of Puerto Rico.

**South Dakota**

which is licensed to Sioux Falls College, Sioux Fall, SD. KCFS will shortly change frequencies—from 90.1 MHz to 100.1 MHz—and increase its ERP from 149 w to 3000 w. The project will also improve KCFS's program production capabilities by replacing an obsolete and worn-out audio console.

**Texas**

File No. 7006 CTN 6031,5309 Region IV Education Service Ctr., 7145 West Tidwell Road, Houston, TX 77092. Signed By: Dr. Tom Pate, Jr., Executive Director. Funds Requested: $277,316. Total Project Cost: $937,316. To construct the primary transmitting system, with production studios, for an interactive ITFS network for Education Service Center, Region 4, Houston, TX. The network will provide programming to business and industry in the greater Houston area.

File No. 7044 CRB 6090 Taping for the Blind, Inc., 3935 Essex Lane, Houston, TX 77027. Signed By: Mr. Donald Knowlton, President. Funds Requested: $18,675. Total Project Cost: $24,900. To extend and improve the radio reading service for the blind and print-handicapped produced by Taping for the Blind, Inc., Houston, TX, by purchasing 200 SCA receivers and replacing an audio console.

File No. 7076 CTB 6091, 5273, 4036 Amarillo Junior College District, P.O. Box 447, 2201 S. Washington, Amarillo, TX 79178. Signed By: Mr. W.L. Prather, Vice President, Business Aff. Funds Requested: $1,424,988. Total Project Cost: $1,899,984. To establish a noncommercial TV station on the campus of Amarillo College, Amarillo, TX. The station will have the call letters KACV–TV and will operate on Ch. 2 with an ERP of 100 kw. It will bring the first public TV signal with a local origination capability to over 300,000 residents of the northern part of the Texas Panhandle.

File No. 7171 CTB 6042, 5020, 4151, 3180, 2342 North Texas Public Brdcstg., Inc, 3000 Harry Hines Blvd., Dallas, TX 75201. Signed By: Mr. Richard Meyer, President. Funds Requested: $750,000. Total Project Cost: $3,736,146. To establish a noncommercial TV station to broadcast educational and instructional programming to the Dallas-Ft. Worth-Denton area of north Texas. The station will have the call letters KDTN–TV; it will operate on Ch. 2 with an ERP of 100 kw. Its main production studio will be in Denton. Its master control and additional production capability will be located at public TV station KERA, Dallas. Its tower site will be in Cedar Hill, TX.

File No. 7223 CTB 6228 Odessa Junior College District, 201 W. University, Odessa, TX 79764. Signed By: Dr. Bernhard Sedate, Vice President. Funds Requested: $296,250. Total Project Cost: $395,000. To improve the transmission reliability and the production capability of public TV station KOCV, Ch. 36, licensed to Odessa College, Odessa, TX, by purchasing a spare exciter and four 1" video tape machines.

**Utah**

File No. 7283 CRB 6117 Weber State College, 3750 Harrison Blvd., Ogden, UT 84408–1903. Signed By: Mr. Alan Dayley, Director Sponsored Projects. Funds Requested: $31,638. Total Project Cost: $42,185. To extend and improve the signal of student operated public radio station KWCR–FM operating on 88.1 MHz in Ogden, Utah by increasing station power from 100 watts to 3 kw and adding additional production equipment.

**Virginia**

File No. 7050 CTB 6349 Greater Washington Educational Television Assoc., Inc. 3620 South 27th Street, Arlington, VA 22206. Signed By: Mr. Robert Ruggiero, Sr. Vice President, Operations. Funds Requested: $284,112. Total Project Cost: $378,816. To improve public television station WETA, Channel 26, by replacing the on air and production switchers. Station serves the greater Washington, DC area.

File No. 7107 PRB 6178, 5250 Saint Paul's College, 406 Windsor Avenue, Lawrenceville, VA 23868. Signed By: Mr. Marvin Scott, President. Funds Requested: $22,500. Total Project Cost: $25,000. To plan for a noncommercial FM radio station which will serve the black residents of Lawrenceville, Virginia and surrounding Brunswick County.

File No. 7188 CTB 6088 Central Virginia ETV Corp., 23 Sesame Street, P.O. Box 35026, Richmond, VA 23235–0026. Signed By: Mr. Richard Hall, Vice President. Funds Requested: $357,434. Total Project Cost: $476,579. To establish noncommercial TV station operating on channel 41 in Charlottesville, Virginia to provide a local public television signal to the 55,000 residents of Albemarle County.

File No. 7246 CTB 6115, 5192 Central Virginia ETV Corporation, 8101A Lee Highway, Falls Church, VA 22042. Signed By: Mr. Daniel Ward, Corporate Vice President. Funds Requested: $625,075. Total Project Cost: $833,434. To improve the production and transmission capability of public television station WNVC–TV, channel 56, in Fairfax, Virginia by acquiring a satellite based remote truck, production switcher, antenna and backup STL to better serve 2.5 million residents of the greater Washington, DC area.

File No. 7309 CRB 6272 VA Voice for the Print Handicap., 401 Azalea Avenue, Richmond, VA 23227. Signed By: Mr. Stephen Larson, President. Funds Requested: $14,437. Total Project Cost: $19,250. To extend the services of the Virginia Voice for the Print Handicapped in the greater Richmond area by purchasing 275 SCA receivers.

**Vermont**

File No. 7063 CRB 6198 Vermont Public Radio, 107.9 Ethan Allen Avenue, Winooski, VT 05404. Signed By: Mr. Raymond Dilley, Executive Vice President. Funds Requested: $122,252. Total Project Cost: $163,003. To activate an FM transmitter in Rutland which will repeat the signal of WVPR in Windsor and will provide first public radio service to 42,000. Request includes antenna, transmitter, and various test and interconnection equipment.

**Washington**

File No. 7255 CRB 6093,5355 Clover Park School Dist. No. 400, 4500 Steilacoom Blvd., SW., Tacoma, WA 98499–4098. Signed By: Mr. Charles Alexander, Superintendent. Funds Requested: $127,782. Total Project Cost: $170,376. To extend the service of KTVI–FM, operating on 90.9 MHz Tacoma, by establishing a new transmission site and increase power. The project proposes to provide 50,000 persons with first public radio service.

File No. 7310 CRB 6224 Northern Sound Public Radio, 310–119 N. Commercial Street, Bellingham, WA 98225. Signed By: Ms. Gale Thompson, Secretary. Funds Requested: $117,569. Total Project Cost: $156,759. To establish a new radio station operating on 91.7 MHz in Bellingham, WA, to provide the first public radio service to 147,647 people living in the northern Puget Sound area of Washington State. The station would rebroadcast the public radio service of KUOW, Seattle and provide for local origination of programs from Bellingham. The project also includes the construction of translators to extend the station's signal to Anacortes, Bellingham, Mt. Vernon, Sequim, Friday Harbor, Oak Harbor, and Coupeville.

# Department of State

**48 CFR Ch. VI**
**Acquisition Regulations; Proposed Rule**

DEPARTMENT OF STATE

48 CFR Ch. VI

[SD-304]

Acquisition Regulations

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State (the Department or DOS) is publishing the Department of State Acquisition Regulation (DOSAR) as part of the Federal Acquisition Regulations System, which consists of the Federal Acquisition Regulation (FAR) and agency acquisition regulations that implement or supplement the FAR. This action is necessary to provide regulatory guidelines not otherwise found in the FAR for DOS acquisitions. By this action, the Department will (a) obtain public comments as required, and (b) ensure that the DOSAR accurately implements or supplements the FAR.

DATES: Comments must be submitted on or before June 29, 1987.

ADDRESSES: Comments may be mailed to the Office of the Procurement Executive, Room 227, SA–6, U.S. Department of State, Washington, DC 20520.

FOR FURTHER INFORMATION CONTACT: Joseph W. Globe or James Tyckoski, Office of the Procurement Executive (703) 235–2352.

SUPPLEMENTARY INFORMATION:

I. Background
II. Procedural Requirements
A. Executive Order 12291
B. Regulatory Flexibility Act
C. Paperwork Reduction Act
III. Public Comments

## I. Background

The Federal Acquisition Regulation (FAR) is the Federal Government's uniform regulation for the acquisition of personal property, supplies, and services. The FAR is codified as Chapter 1 of Title 48 of the Code of Federal Regulations. The FAR authorizes Federal agencies to issue regulations that implement or supplement the FAR to satisfy those agencies' specific needs. This proposed rule is the Department's implementation and supplementation of the FAR.

The proposed Department of State Acquisition Regulation (DOSAR) is published for review and comment in accordance with Office of Federal Procurement Policy, Policy Letter 83–2, dated May 25, 1983, which was issued under the authority of sections 6(d)(3) and 14(b) of the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 405(d)(3), 412(b)).

Reviewers of this proposed rule are reminded that lack of coverage in the DOSAR of a particular part, subpart, or section of the FAR means that the FAR coverage alone governs DOS acquisitions. The Department intends to amend the DOSAR, as circumstances warrant; like this proposed rule, such amendments will be processed in full compliance with the following procedural requirements.

## II. Procedural Requirements

### *A. Review Under Executive Order 12291*

Under Bulletin No. 85–7, the Director, Office of Management and Budget (OMB), extended the general exemption for procurement regulations from the review requirements of Executive Order 12291, titled "Federal Regulation." However, the exemption does not apply to such regulations that implement or supplement the Competition in Contracting Act of 1984, Pub. L. 98–369, or the Small Business and Federal Procurement Competition Enhancement Act of 1984, Pub. L. 98–577. Accordingly, the proposed rule, which includes DOSAR coverage for both laws, was submitted to OMB for review in accordance with Executive Order 12291.

The Office of Federal Procurement Policy recommended that several items covered in this proposed rule be considered for inclusion in the FAR, as the coverage may not be unique to the Department of State. This coverage includes:

1. Subsection 604.404–70, prescription for contracts involving classified information, as implemented by clause 652.204–70, Security Requirements, and prescription for security clearances for contractor personnel, as implemented by clause 652.204–71, Security Requirements—Personnel;

2. Paragraph 614.201–70(a), prescription for use of English language solicitations and contracts awarded or performed overseas, as implemented by clause 652.214–70, Language Version; and

3. Paragraph 619.201(d), responsibilities of the Small and Disadvantaged Business Utilization Specialist.

Additionally, the proposed rule includes coverage of items currently under review by the FAR councils; depending on the results of their efforts, the coverage contained in the DOSAR would be amended accordingly. This coverage includes:

1. Subpart 601.71, Ratification of Unauthorized Contractual Commitments; and

2. Paragraph 632.111–70(a), prescription for prompt payment, as implemented by clause 652.232–70, Prompt Payment.

### *B. Review Under the Regulatory Flexibility Act*

Consistent with the provisions of the Regulatory Flexibility Act, Pub. L. 96–354, and as required under 5 U.S.C. 605(b), the undersigned hereby certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities because the rule serves only to implement or supplement the Federal Acquisition Regulation.

### *C. Review Under the Paperwork Reduction Act*

This proposed rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act of 1980, Pub. L. 96–511 (44 U.S.C. 3501 et seq.). The proposed rule does not impose additional recordkeeping or reporting requirements beyond those contained in the FAR, for which OMB control numbers have already been assigned.

## III. Public Comments

The Department invites interested parties to participate in this rulemaking by submitting comments, including data, statements, and questions, with respect to the DOSAR proposed herein. The Department specifically requests other Federal agencies to comment on those items identified in section II.A. above for potential inclusion in the FAR, or for any other coverage contained in this proposed rule that could apply to them.

Comments should be submitted to the address indicated under the "ADDRESS" caption of this preamble. The Department will make all written comments available for public inspection at the Office of the Procurement Executive, Room 227, 1701 North Fort Myer Drive, Arlington, Virginia, between the hours of 8:30 a.m. and 4:45 p.m., Monday through Friday, except Federal holidays. All comments received not later than the date indicated under the "DATES" caption of this preamble will be considered prior to publication of the DOSAR as a final rule.

List of Subjects in 48 CFR Ch. VI

Government procurement.

For the reasons set out in the preamble, Chapter VI of Title 48 of the Code of Federal Regulations is proposed to be established as follows.

Dated: April 23, 1987.

John J. Conway,

*Procurement Executive.*

601.7103 Procedure.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3

601.000 Scope of part.

This part describes the Department of State Acquisition Regulation (DOSAR) in terms of establishment, relationship to the Federal Acquisition Regulation (FAR), arrangement, applicability, and deviation procedures. Acquisition procedures are integrated so as to provide a complete, logical and comprehensive publication.

Subpart 601.2—Administration

601.201 Maintenance of the FAR.

601.201–1 The two councils.

The Office of the Procurement Executive represents the Department of State (DOS) on the Civilian Agency Acquisition Council. The Procurement Executive shall appoint said representative for this purpose. The Office of the Procurement Executive is responsible for coordinating with all interested DOS elements proposed FAR revisions and for advocating FAR revisions sought by the Department.

### Subpart 601.3—Agency Acquisition Regulations

**601.301 Policy.**

(a) The Assistant Secretary for Administration is the agency head for the purposes of FAR 1.301. Under Delegation of Authority No. 120–3 (51 FR 16768, May 6, 1986), the Assistant Secretary for Administration redelegated to the Procurement Executive the authority to prescribe, promulgate, and amend DOS acquisition policies, rules, and regulations.

(b) The Department of State Acquisition Regulation (DOSAR) is prescribed under the authority of 22 U.S.C. 2658 and 40 U.S.C. 486(c) (Title II, Chapter 288, section 205(c) of the Federal Property and Administrative Services Act of 1949, as amended).

(c) The DOSAR implements and supplements the FAR. Deviations, as defined in FAR 1.401, are processed in accordance with FAR Subpart 1.4 and Subpart 601.4.

**601.302 Limitations.**

(a) The FAR and the DOSAR apply to all DOS acquisitions of personal property and services, including construction, both within and outside the United States, unless expressly excluded by this subpart, or exempt from the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 474(7)), or undertaken pursuant to Section 206 of the State Department Basic Authorities Act of 1956, as amended (22 U.S.C. 4306).

(b) The FAR and the DOSAR do not apply to the acquisition or leasing of real property.

(c) At posts where Joint Administrative Offices have been formed, the FAR and the DOSAR apply to all Agency for International Development (AID) administrative and technical support acquisitions, except in those areas which have been exempted by the cognizant administrative office.

**601.303 Publication and codification.**

(a) The DOSAR is issued as Chapter 6 of Title 48, Code of Federal Regulations. The DOSAR is established as Chapter 6 of the Federal Acquisition Regulations System. The DOSAR is divided into the same parts, subparts, section, subsections and paragraphs as is the FAR. However, when the FAR coverage is adequate by itself there will be no corresponding DOSAR coverage. Where the DOSAR implements a specific part, subpart, section, or subsection of the FAR, the DOSAR coverage is numbered and titled to correspond to the appropriate FAR number and title, except that the DOSAR number will include a 6 or 60 such that there will always be three numbers to the left of the decimal. For example, the DOSAR implementation of FAR 14.1 is shown as 614.1 and the DOSAR implementation of FAR 1.301 is shown as 601.301. Materials that supplement the FAR are assigned the numbers 70 and up. For example, DOSAR requires additional definitions than those used in FAR; this supplementary material is provided in 602.101–70.

(b) The DOSAR and its revisions are published in the Federal Register and in the Code of Federal Regulations, both of which may be purchased from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

(c)(1) The DOSAR shall be referenced in the same manner as described at FAR 1.104–2(c). Using the DOSAR coverage at 609.407–3(a) as a typical illustration, reference to the—

(i) Part would be "DOSAR Part 609" outside the DOSAR and "Part 609" within the DOSAR.

(ii) Subpart would be "DOSAR Subpart 609.4" outside the DOSAR and "Subpart 609.4" within the DOSAR."

(iii) Section would be "DOSAR 609.407" outside the DOSAR and "609.407" within the DOSAR.

(iv) Subsection would be "DOSAR 609.407–3" outside the DOSAR and "609.407–3" within the DOSAR.

(v) Paragraph would be "DOSAR 609.407–3(a)" outside the DOSAR and "609.407–3(a)" within the DOSAR.

(2) When any part, subpart, section, subsection, or paragraph of the DOSAR is referenced formally in official documents such as legal briefs, it shall be prefaced by "48 CFR."

### Subpart 601.4—Deviations From the FAR

**601.403 Individual deviations.**

(a) The authority to approve deviations, as defined in FAR 1.401, from the FAR in individual cases is reserved to the Procurement Executive except that, for acquisitions processed under the Foreign Service Buildings Act, 1926, as amended (22 U.S.C. 292 et seq.), the Deputy Assistant Secretary for Foreign Building may authorize such individual deviations, provided that officer first consults with the Procurement Executive.

(b) The Office of the Procurement Executive is the DOS central agency control point for individual deviations; that office shall provide to the FAR Secretariat a copy of each approved deviation.

**601.404 Class deviations.**

(a) The authority to approve class deviations from the FAR is reserved to the Procurement Executive. Prior to any such authorization, the Procurement Executive shall consult with the chairperson of the Civilian Agency Acquisition Council (CAA Council), unless the Procurement Executive determines that, in accordance with FAR 1.404(a)(1), urgency precludes such consultation.

(b) The Office of the Procurement Executive shall provide to the FAR Secretariat a copy of each approved deviation.

**601.405 Deviations pertaining to treaties and executive agreements.**

(a) The Procurement Executive shall determine whether a deviation pertaining to treaties and executive agreements is authorized under FAR 1.405 or that a request for deviation is required under FAR 1.405(e).

(b) The Office of the Procurement Executive is the DOS central agency control point for deviations pertaining to treaties and executive agreements; that office shall provide to the FAR Secretariat a copy of each approved deviation.

**601.470 Deviations from the DOSAR.**

(a) The authority to approve any deviations from the DOSAR is reserved to the Procurement Executive.

(b) The Office of the Procurement Executive is the DOS central agency control point for all DOSAR deviations.

**601.471 Documentation.**

The head of the contracting activity (see 601.603–70) shall submit to the Procurement Executive a written request for each deviation from the FAR or the DOSAR, whether for individual cases, classes of cases, or deviations pertaining to treaties and executive agreements. Each request shall include a statement setting forth the nature of the deviation and the reason(s) for the special action sought. The contracting officer shall include in the contract file a copy of each authorized deviation that pertains to the acquisition.

### Subpart 601.5—Agency and Public Participation

**601.570 Rule making.**

(a) The DOSAR has been promulgated and may be revised, as necessary, in accordance with the rule making procedures of the Administrative Procedure Act (5 U.S.C. 553) and the Office of Federal Procurement Policy (OFPP) Policy Letter 83–2, dated May 25, 1983. These procedures generally require

issuing a notice of proposed rule making inviting public comments, review and analysis of comments received, and publication of a discussion of the public comments received and actions taken as a result of the comments.

(b) The Procurement Executive shall either accomplish or concur in all DOS acquisition rule making.

## Subpart 601.6—Contracting Authority and Responsibilities

### 601.601 General.

The Procurement Executive is the agency head for the purposes of FAR 1.601. The Procurement Executive is the principal officer responsible for DOS acquisitions and, as such, that officer shall provide policy direction and prescribe standards, procedures, and regulations for the award and administration of DOS contracts, both within and outside the United States.

### 601.602 Contracting officers.

#### 601.602-1 Authority.

(a) DOS contracts are made pursuant to the foreign affairs management responsibilities conferred on the Secretary of State (22 U.S.C. 2656), and the various laws, regulations, and Executive Orders relating thereto.

(b) Except as otherwise provided by law, DOS regulations, and this DOSAR, the Procurement Executive has the authority to execute, award, and administer contracts, purchase orders, other contractual arrangements, and other agreements, including interagency agreements, for the expenditure of funds involved in the acquisition of personal property, services, real property, and for the sale of personal and real property. The Procurement Executive may further delegate this authority to those DOS employees appointed or designated to the contracting activities enumerated in 601.603-70.

#### 601.602-2 Responsibilities.

In no event shall the individual appointed and acting as the contracting officer also be responsible for approving any action that, pursuant to the FAR or the DOSAR, must be approved at a level above or by someone other than the contracting officer.

(a) *Contracting activities at overseas posts.* When the contracting officer also occupies the position, whether temporarily or permanently, responsible under the FAR or the DOSAR for approving the contracting officer's action(s), or in the absence of the official so designated to approve the contracting officer's action(s), the Deputy Chief of Mission shall be responsible for approving those actions.

(b) *Domestic contracting activities.* The head of the contracting activity shall identify any conflicts with respect to the policy prescribed in this subsection and submit to the Procurement Executive a written request for resolution of the conflict(s).

### 601.603 Selection, appointment, and termination of appointment.

#### 601.603-3 Appointment.

(a) The Procurement Executive appoints all DOS contracting officers, in conformance with FAR 1.603-3. The contracting officer shall retain the original copy of the Standard Form 1402, Certificate of Appointment, signed by the Procurement Executive.

(b) The Procurement Executive appoints DOS contracting officers for overseas posts by specific positions, not by individual, because Foreign Service personnel assignments are rotational.

#### 601.603-4 Termination.

#### 601.603-4-70 Assignment of contracting officer's responsibility.

Contracting officers appointed pursuant to 601.603-3 who relieve or succeed contracting officers previously assigned to a DOS contracting activity shall assume contracting officer's responsibility for the contracts effected by those contracting officers.

### 601.603-70 Delegations of authority.

(a) *Policy.* Pursuant to 601.602-1(b), the Procurement Executive has delegated procurement authority to the following contracting activities. These authorities may be modified or supplemented by the annual appropriations acts, but otherwise are not redelegable. Where more than one official is listed, the abbreviation "HCA" is used to designate each head of the contracting activity, as defined in FAR 2.101.

(b) *Delegations.*— (1) *Overseas posts.* The authority to enter into and administer contracts for the expenditure of funds involved in the acquisition of supplies, equipment, publications, and services and to sell personal property is delegated to the Principal Officer, the Administrative Officer, and the Principal General Services Officer (HCA).

(i) Direct transactions with vendors within the United States shall be $25,000 or less per transaction unless such transaction is under a contract executed by the Department of State, the General Services Administration or other U.S. Government Agency. Such transactions with U.S. vendors shall be in accordance with small purchase procedures described in FAR Part 13 and Part 613.

(ii) No authority is delegated to enter into cost-reimbursement or fixed-price incentive contracts.

(iii) When expressly authorized by a U.S. Government agency which does not have an authorized contracting officer at the post, the officers named above in this subparagraph may enter into contracts for that agency. Use of this authority is subject to the provisions of applicable regulations of that agency, any contracting officer designation issued by that agency, or any applicable interagency agreement(s). Statutory authorities and regulations of that agency apply to contracts entered into pursuant to this authority. The agency's authorization shall cite those statutes and regulations that implement, supplement, or deviate from the FAR, relative to the acquisition so authorized. In view of the contracting officer's responsibility for the legal, technical, and administrative sufficiency of contracts, questions regarding the propriety of contracting actions that the post is requested to take pursuant to this authority may be referred to the Department for resolution with the headquarters of the agency concerned.

(2) *Office of Foreign Buildings.* The authority to enter into and administer contracts pursuant to the Foreign Service Buildings Act, 1926, as amended (22 U.S.C. 292 et seq.), including the authority to make all determinations required or permitted by section 11 of said Act but not otherwise restricted therein, is delegated to the Deputy Assistant Secretary for Foreign Buildings and to the Assistant Director for Acquisitions (HCA).

(3) *Office of Supply, Transportation and Procurement.* The authority to enter into and administer contracts for the expenditure of funds involved in the acquisition of services and personal property, and for the sale of personal property, is delegated to the Chief of the Procurement Division.

(4) *Office of Language Services.* The authority to enter into and administer contracts for interpreting, translating, conference reporting, and related language support and escort services is delegated to the Director.

(5) *Office of Overseas Schools.* The authority to enter into and administer contracts pursuant to section 29 of the State Department Basic Authorities Act of 1956, as amended (22 U.S.C. 2701), including all determinations required or permitted but not otherwise restricted therein, is delegated to the Director.

(6) *Library.* The authority to enter into and administer contracts for the direct

purchase of printing, binding, and blank-book work, when authorized by the Public Printer Pursuant to the provisions of the Public Printing and Documents Act of 1968, as amended (44 U.S.C. 504), and for the acquisition of newspapers, books, maps, and periodicals is delegated to the Chief Librarian.

(7) *Office of Communications.* The authority to enter and administer contracts for leasing communications circuits is delegated to the Chief, Networks Staff.

(8) *Foreign Service Institute.* The authority to enter into and administer contracts pursuant to Chapter 7, Title I, of the Foreign Service Act of 1980, as amended (22 U.S.C. 4021 et seq.), including all determinations required or permitted but not otherwise restricted therein, is delegated to the Director of the Foreign Service Institute, the Executive Director, and the Supervisory General Services Officer (HCA).

(9) *Office of Foreign Missions.* The authority to enter into and administer contracts pursuant to Title II of the State Department Basic Authorities Act of 1956, as amended (22 U.S.C. 4301 et seq.), including all determinations required or permitted by section 206 of said Act but not otherwise restricted therein, is delegated to the Director, Office of Foreign Missions, and the Administrative Officer (HCA).

(10) *Office of International Conferences.* The authority to enter into and administer contracts pursuant to section 5, Title I, of the Department of State Basic Authorities Act of 1956, as amended (22 U.S.C. 2672), including all determinations required or permitted but not otherwise restricted therein, is delegated to the Director.

(11) *Bureau for Refugee Programs.* The authority to enter into and administer contracts pursuant to the Migration and Refugee Assistance Act of 1962, as amended (22 U.S.C. 2601 et seq.), and Executive Order 11077, dated January 22, 1963, including all determinations required or permitted but not otherwise restricted therein, is delegated to the Director, Bureau for Refugee Programs, and the Comptroller (HCA).

(12) *U.S. Mission to the United Nations.* The authority to enter into and administer contracts pursuant to the United Nations Participation Act of 1945, as amended (22 U.S.C. 287), including all determinations required or permitted but not otherwise restricted therein, is delegated to the Counselor for Administration.

## Subpart 601.70—Contract Review

### 601.7000 Policy.

The contracting officer shall review each proposed contractual document and its supporting file for completeness and accuracy. Each contract file shall contain all pertinent information applicable to the proposed action, which should be in sufficient detail to permit reconstruction of all significant events by any subsequent reviewer without referral to the individual responsible for the contractual action.

### 601.7002 Procedure.

(a) Prior to issuance of a solicitation or a solicitation amendment, award of a contract, or execution of a contract modification, any of which is estimated to exceed $100,000, the contracting officer shall forward the proposed contractual action to Office of the Procurement Executive for review. For contract modifications, the contracting officer shall submit such actions in accordance with 643.102–70(b).

(b) The Office of the Procurement Executive shall document the scope and extent of the review and shall submit written recommendations to the contracting officer on each proposed contract action reviewed. In the event the contracting officer and the reviewer cannot reach agreement on the recommendation(s), the contracting officer shall document the contract file to show the rationale for not adopting any recommendations, and shall forward the file to the officer one level above the contracting officer for resolution or approval, as appropriate. For purposes of this section, the officer who has resolution/approval authority shall not be the same individual who will sign the contractual document. In instances where the contracting officer is the head of the contracting activity, as identified at 601.603–70(b), that officer shall be the Procurement Executive for domestic acquisitions and the Principal Officer at post for overseas acquisitions.

(c) For postaward reviews, the Office of the Procurement Executive shall document the scope and extent of the review and shall submit the results of its findings to the contracting officer for appropriate action.

(d) The Procurement Executive may delegate or waive the review requirements. In such instances, the Procurement Executive shall provide to each head of the contracting activity, as appropriate, a written delegation or waiver of these requirements.

## Subpart 601.71—Ratification of Unauthorized Contractual Commitments

### 601.7100 Scope of subpart.

This subpart prescribes the policies and procedures for ratifying unauthorized contractual commitments.

### 601.7101 Definitions.

"Ratification" as used in this subsection, means the act of approving an unauthorized contractual commitment.

"Unauthorized contractual commitment" as used in this subsection, means an agreement that is not binding solely because the government representative who made it lacked the authority to enter into that agreement on behalf of the Government.

### 601.7102 Policy.

(a) The Government generally is not bound by agreements or contractual commitments made by persons to whom contracting authority has not been delegated. Such unauthorized acts violate the Federal Property and Administrative Services Act, other Federal laws, the FAR, the DOSAR, and good acquisition practice. Therefore, such unauthorized contractual commitments are serious violations that usually necessitate disciplinary action against the transgressor.

(b) The Procurement Executive may ratify an unauthorized contractual commitment if—

(1) The Government has obtained or will obtain benefit resulting from the unauthorized commitment;

(2) The Procurement Executive could have granted authority to enter into a contractual commitment at the time the unauthorized commitment was made and still has the authority to do so;

(3) The resultant contract would have met all requirements of law if made by an appropriate Contracting Officer;

(4) The contracting officer determines the price is fair and reasonable;

(5) The contracting officer recommends payment; and

(6) Funds are available and were available at the time the unauthorized contractual commitment was made.

(c) Unauthorized contractual commitments that involve claims subject to resolution under the Contracts Dispute Act of 1978 shall be processed in accordance with FAR Subpart 33.2.

### 601.7103 Procedure.

(a) The individual who made the unauthorized contractual commitment shall submit to the Procurement Executive, through the appropriate head

of the contracting activity (see 601.603–70), all records and documents concerning the commitment and a complete written statement of the facts, including but not limited to a statement as to why normal acquisition procedures were not followed, why the contractor was selected, a list of other sources considered, a description of work or products, an estimated or agreed contract price, certified funding citations, and a statement regarding the status of performance. Under exceptional circumstances, such as when the person who made the unauthorized contractual commitment is no longer available to attest to the circumstances of the unauthorized commitment, the Procurement Executive may waive the requirement that the responsible employee initiate and document the request for ratification; provided, the responsible office determines in writing that a commitment was in fact made by an employee, who shall be identified in the determination.

(b) The Procurement Executive, upon receipt and review of the complete file, may ratify the unauthorized contractual commitment if it has been submitted in compliance with this Subpart. Each ratified acquisition shall be forwarded to the head of the contracting activity for issuance of the appropriate contractual document(s). If the request for ratification is not justified, the Procurement Executive shall return the request to the head of the contracting activity with a written explanation for the decision and a recommendation for disposition of the action.

## PART 602—DEFINITIONS OF WORDS AND TERMS

Sec.

Subpart 602.1—Definitions

602.101 Definitions.
602.101–70 DOSAR definitions.

Subpart 602.2—Definitions Clause

602.201 Contract clause.
602.201–70 DOSAR contract clause.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 602.1—Definitions

602.101 Definitions.
602.101–70 DOSAR definitions.

For the purposes of the DOSAR, unless otherwise indicated, the following terms have the meanings set forth in this subpart.

"Consoldiated Receiving Point" or "CRP" means the packing firm employed by a Despatch Agency to receive and prepare items for shipment to a post. The CRP acts as agent for the government, and goods that are delivered to the CRP are constructively received by the government. The CRP receives, records, consolidates and packs items for shipment overseas under the direction of the Despatch Agency.

"Department" or "DOS" means the Department of State, including all of its activities wherever located.

"Despatch Agency" means the office responsible for the transportation of goods between the U.S. and posts within its specific geographic area as assigned by the Transportation Division, Office of Supply, Transportation and Procurement. There are four Despatch Agencies, one each in New York City; Baltimore, Maryland; Miami, Florida; and San Francisco, California.

"Government" means the Government of the United States of America unless specifically stated otherwise.

"Local procurement" means acquisition by a post in the country in which the post is located.

"Overseas post" means a "post" located oustide the United States of America.

"Post" means a diplomatic or consular mission of the United States of America, administered or managed by the DOS.

"Third country procurement" means acquisition by a post in a country other than the country in which the post is located and other than the United States.

### Subpart 602.2—Definitions Clause

602.201 Contract clause.

602.201–70 DOSAR contract clause.

The contracting officer shall insert the clause at 652.202–70, Definitions, in solicitations and contracts when the acquisition may be made from a source outside the United States or when the work may be performed outside the United States.

## PART 603—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

Sec.

Subpart 603.2—Contractor Gratuities to Government Personnel

603.203 Reporting suspected violations of the Gratuities clause.
603.204 Treatment of violations.

Subpart 603.3—Reports of Suspected Antitrust Violations

603.303 Reporting suspected antitrust violations.

Subpart 603.4—Contingent Fees

603.406 Evaluation of the SF 119.
603.406–1 Responsibilities.

Subpart 603.6—Contracts With Government Employees or Organizations Owned or Controlled by Them

603.602 Exceptions.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 603.2—Contractor Gratuities to Government Personnel

#### 603.203 Reporting suspected violations of the Gratuities clause.

(a) DOS employees are obligated to report immediately and in writing any apparent or suspected violation of the Gratuities clause at FAR 52.203–3 in connection with DOS operations.

(b) The report shall outline the events, acts, or conditions which indicate the apparent violation and shall include all pertinent documents.

(c) The report shall be made to or by the contracting officer, who shall review it for completeness and accuracy and forward it through the head of the contracting activity (see 601.603–70) to the Procurement Executive. If deemed necessary by the Procurement Executive, the report shall be forwarded to the DOS Office of Inspector General, which shall conduct an investigation and, if appropriate, provide to the Procurement Executive a report and recommendation(s).

#### 603.204 Treatment of violations.

(a) The Procurement Executive shall determine, after notice and hearing under DOS procedures, whether a violation of the Gratuities clause occurred.

(b) *Procedures.* Upon receipt of a written report from the contracting officer of an alleged violation of the Gratuities clause, the Procurement Executive may contact the contractor to clarify the facts or to afford the contractor the opportunity to appear with counsel, submit documentary evidence, present witnesses, and confront DOS personnel involved. Should the Procurement Executive request an investigation by the Office of the Inspector General, a written notice shall be sent to the contractor, which shall have the above opportunities during that investigation. The Procurement Executive shall make a final determination within 60 days of receipt of the initial report, unless extenuating circumstances require otherwise.

### Subpart 603.3—Reports of Suspected Antitrust Violations

#### 603.303 Reporting suspected antitrust violations.

(a) DOS employees are obligated to report immediately and in writing any

apparent or suspected antitrust violation, as described in FAR 3.303.

(b) The report shall outline the events, acts, or conditions which indicate the apparent violation and shall include all pertinent documents.

(c) The report shall be made to or by the contracting officer, who shall review it for completeness and accuracy and forward it through the head of the contracting activity (see 601.603–70), to the Office of the Legal Adviser, with a copy to the Procurement Executive. The Office of the Legal Adviser shall provide to the U.S. Attorney General a report on each suspected violation, with single copies to the head of the contracting activity and the Procurement Executive (see Subpart 609.4 for DOS debarment and suspension procedures).

### Subpart 603.4—Contingent Fees

#### 603.406 Evaluation of the SF 119.

#### 603.406–1 Responsibilities.

In carrying out responsibilities under FAR 3.406–1, the contracting officer shall obtain advice from the Procurement Executive and the Office of the Legal Adviser as to the legality and general propriety of the relationship disclosed thereon. Also, the contracting officer may request the Office of the Inspector General to develop further information if the facts available are deemed insufficient for a proper decision. After reviewing and evaluating all the information obtained, the contracting officer shall render a written decision that shall be included in the contract file, and shall provide a copy of the decision to the Procurement Executive.

### Subpart 603.6—Contracts With Government Employees or Organizations Owned or Controlled by Them

#### 603.602 Exceptions.

The authority to approve all exceptions under FAR 3.602 is reserved to the Procurement Executive.

## PART 604—ADMINISTRATIVE MATTERS

Sec.

Subpart 604.2—Contract Distribution
604.201 Procedures.
604.202 Agency distribution requirements.
Subpart 604.4—Safeguarding Classified Information Within Industry
604.404 Contract clause.
604.404–70 DOSAR contract clauses.
Subpart 604.6—Contract Reporting
604.602 Federal Procurement Data System.
604.602–70 DOS procedures.
Subpart 604.8—Contract Files
604.870 Numbering contract documents.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 604.2—Contract Distribution

#### 604.201 Procedures.

(a) The contracting officer shall retain a signed, unstamped original copy of the contract or modification. All other signed or reproduced copies shall be stamped "Duplicate Original" in accordance with FAR 4.101(b).

(b) The contracting officer shall record in the contract file distribution of the contract or contract modification. In addition to the distribution requirements provided in FAR 4.201, the contracting officer also shall distribute copies of the contract or contract modification as provided below.

(1) For Office of Foreign Buildings contracts let overseas, distribute one signed copy, stamped "Duplicate Original," to the Assistant Director for Acquisitions, Office of Foreign Buildings.

(2) For DOS contracts let in Washington, provide one unsigned copy of the contract, stamped "Duplicate," to Domestic Accounting, Office of Financial Operations.

#### 604.202 Agency distribution requirements.

As necessary, the contracting officer shall distribute reproduced copies of the signed contract or modification to those officers/offices involved in contract administrative support functions, e.g., the Contracting Officer's Representative; the requirements office; the Despatch Office or other receiving activity, particularly if it is the initial point of contact for receipt of goods or services; and each post or office where the contract will be performed. Where required by the laws of a foreign country, the original copy of the contract or modification shall be retained at overseas post.

### Subpart 604.4—Safeguarding Classified Information Within Industry

#### 604.404 Contract clause.

#### 604.404–70 DOSAR contract clauses.

(a) The contracting officer shall insert the clause at 652.204–70, Security Requirements, in solicitations and contracts performed outside the United States to the extent the contract involves access to classified information ("Confidential," "Secret," or "Top Secret") or access to administratively controlled information ("Limited Official Use"). Contractors or contract employees that are not U.S. citizens shall not have access to classified or administratively controlled information.

(b) The contracting officer shall insert the clause at 652.204–71, Security Requirements—Personnel, in solicitations and contracts performed outside the United States.

### Subpart 604.6—Contract Reporting

#### 604.602 Federal Procurement Data System.

#### 604.602–70 DOS procedures.

(a) Contracting activities that are integrated into the Department's Enhanced Automated Procurement Control System (EAPCS) or Acquisition Management System (AMS) shall enter into the EAPCS or AMS, as appropriate, each contract award over $25,000 for reporting to GSA through the Federal Procurement Data System.

(b) Contracting activities that are not integrated into the EAPCS or AMS shall report on Standard Form 279, Individual Contract Action Report, the information required for each contract action over $25,000.

(c) Each contracting activity shall prepare a cumulative quarterly report for all actions of $25,000 or less which are not otherwise reported on Standard Form 281, Summary of Procurement Actions of $10,000 or Less.

(d) Contracting activities required to report contract data pursuant to the Trade Agreements Act of 1979, Pub. L. 96–39, shall report such action along with the other data reports.

(e) The head of the contracting activity shall submit these reports to the Office of the Procurement Executive within 20 calendar days following the end of each fiscal quarter. The HCA shall ensure that data required, including that relating to consultant type awards, is accurate and complete.

(d) These procedures do not apply to consulting services obtained through appointment procedures, which are reported by the Office of Management, Bureau of Personnel (PER/MGT) to the Central Personnel Data File operated by the Office of Personnel Management.

### Subpart 604.8—Contract Files

#### 604.870 Numbering contract documents.

All contract documents, including small purchases and other simplified purchase documents, shall be numbered in accordance with the DOS worldwide standardized numbering system. This system consists of a set of four digits, which identifies the specific allotment/operating allowance to be charged, followed by a hyphen and a second set of six digits, which identifies the

obligation number of the transaction, the first digit (left side) of which indicates the fiscal year of the obligation. Contracting documents prepared for other Federal agencies may be numbered in accordance with their requests.

## SUBCHAPTER B—COMPETITION AND ACQUISITION PLANNING

## PART 605—PUBLICIZING CONTRACT ACTIONS

Sec.

Subpart 605.2—Synopsis of Proposed Contract Actions

605.202 Exceptions.
605.202–70 Foreign acquisitions.
605.207 Preparation and transmittal of synopsis.
605.207–70 Acquisitions available from only one responsible source.

Subpart 605.5—Paid Advertisements

605.502 Authority.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3

### Subpart 605.2—Synopsis of Proposed Contract Actions

#### 605.202 Exceptions.

#### 605.202–70 Foreign acquisitions.

(a) *Policy.* Under certain conditions, waiver of the requirement to synopsize in the *Commerce Business Daily* (CBD), as provided in FAR Subpart 5.1, is necessary for acquisitions by overseas posts when these acquisitions are made from sources outside the United States, its possessions, and Puerto Rico. This general waiver policy was processed in compliance with and as authorized by section 18(c)(3) of the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) and section 8(g)(3) of the Small Business Act (15 U.S.C. 637 et seq.). This policy applies only to acquisitions funded under DOS appropriations.

(b) *Purpose.* This section sets forth the procedures necessary to determine whether to apply the waiver policy. The policy and procedures apply only to acquisitions by overseas posts when the acquisitions are made from sources outside the United States, its possessions, and Puerto Rico.

(c) *Procedures.* (1) When a DOS contracting activity at post receives a request for supplies or services from a requirements office, the request must include a memorandum identifying all established sources of supply known to the requirements office, critical dates for delivery, installation and operational dates, an estimate of the total time lapse between the date of order and final contractor performance, the urgency of the requirement, and any other factors that may be unique or mandatory to the acquisition.

(2) The contracting activity shall review the information provided by the requirements office to determine whether publication of a CBD notice is required.

(i) If the head of the contracting activity determines that publication of a CBD notice will not delay or otherwise adversely impact the post's ability to satisfy the identified acquisition, the notice shall be published in accordance with FAR Subpart 5.2.

(ii) If the head of the contracting activity determines that publication of a CBD notice will delay or otherwise adversely impact the post's ability to satisfy the identified acquisition, the head of the contracting activity may waive the CBD notice requirements of FAR Subpart 5.1. This determination must be in writing and made in consideration of such factors as overseas delivery, installation, maintenance or replacement requirements, special product or performance specifications, and security clearance requirements for suppliers. The contracting activity shall conduct a negotiated acquisition with qualified local sources. If there are known U.S. firms or firms with U.S. affiliations in local residence capable of supplying the required supplies or services, the contracting activity shall ensure that these firms are included in the source list for the acquisition. Competition in such acquisitions, including the use of formal solicitations, shall be obtained in all cases to the extent feasible and consistent with FAR Part 6 and Part 606.

(iii) The authority to make the determinations under this paragraph is not redelegable.

(d) *Documentation.* (1) Whenever the head of the contracting activity at post determines that use of this waiver authority is required, the following documentation shall be prepared and placed in the contract file:

(i) A Determination and Findings (see FAR Subpart 1.7) as to the existence of an overseas acquisition where it is unreasonable or inappropriate to publish a notice in Commerce Business Daily.

(ii) A memorandum stating what efforts have been made to identify known and qualified sources and to obtain competition, detailing what negotiation procedures were followed, and justifying the selection and award.

(2) The head of the contracting activity shall sign all documents required under this section. This official's signature shall constitute approval of the determination to apply the waiver policy and certification of the completeness and accuracy of the information upon which the waiver is based.

#### 605.207 Preparation and transmittal of synopsis.

#### 605.207–70 Acquisitions available from only one responsible source.

In addition to the information required at FAR 5.207, each synopsis of a proposed acquisitions from only one responsible source (41 U.S.C. 253(c)(1)) shall include a description of specific contractor qualifications or capabilities required to perform the work and a description of the information a potential source must submit.

### Subpart 605.5—Paid Advertisements

#### 605.502 Authority.

The Procurement Executive is the agency head for the purposes of FAR 5.502. The authority to approve the publication of paid advertisements, notices, and proposals in both newspapers and other media within the United States is reserved to the Procurement Executive. For acquisitions by overseas posts, the authority to approve the publication of paid advertisements, notices, and proposals in both newspapers and other media outside the United States is delegated the Principal General Services Officer, except that, when that officer is the contracting officer for the acquisition, the approving officer shall be either the Administrative Officer or the Principal Officer, as appropriate.

## PART 606—COMPETITION REQUIREMENTS

Sec.

Subpart 606.1—Full and Open Competition

606.101 Policy.
606.101–70 Foreign acquisitions not synopsized.

Subpart 606.3—Other Than Full and Open Competition

606.303–1 Requirements.
606.304 Approval of the justification.
606.304–70 Acquisitions by overseas posts.

Subpart 606.5—Competition Advocates

606.501 Requirement.
606.501–70 Overseas posts.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

Subpart 606.1—Full and Open Competition

606.101 Policy.

606.101-70 Foreign acquisitions not synopsized.

As provided in 605.202-70, overseas posts may exempt certain acquisitions from the requirement to synopsize in the *Commerce Business Daily*. Full and open competition for such acquisitions is met when the competitive procedures prescribed in FAR 6.102 are used. Also, when the contracting officer follows the optional publicizing methods authorized by FAR 5.101(a)(2) and/or FAR 5.101(b), as appropriate, no other justifications or approvals are required for such acquisitions.

Subpart 606.3—Other Than Full and Open Competition

606.303-1 Requirements.

Justifications for contract actions under FAR 6.303-1(d) shall be forwarded by the contracting officer to the Office of the Procurement Executive for transmittal to the Office of the United States Trade Representative.

606.304 Approval of the justification.

606.304-70 Acquisitions by overseas posts.

For acquisitions under FAR 6.304(a)(3), the justification shall be approved in writing by the Principal Officer.

Subpart 606.5—Competition Advocates

606.501 Requirement.

606.501-70 Overseas posts.

The Competition Advocate for each overseas post is the Administrative Officer at post.

## PART 608—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Sec.
608.000 Scope of part.

Subpart 608.4—Ordering From Federal Supply Schedules

608.402 Applicability.

Subpart 608.70—Acquisition or Leasing of Official Vehicles

608.7001 Definition.
608.7002 Policy.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.1.

608.000 Scope of part.

This subpart prescribes certain mandatory and optional sources of supply for overseas posts.

Subpart 608.4—Ordering From Federal Supply Schedules

608.402 Applicability.

Use of the Federal Supply Schedules is not mandatory for overseas posts nor is it required for any acquisitions inside the United States for use outside the United States.

Subpart 608.70—Acquisition or Leasing of Official Vehicles

608.7001 Definition.

"Official vehicle" means a U.S. Government-owned or leased motor vehicle that is fueled by petroleum, has a minimum of four wheels, and is designed primarily for use on highways. Examples are passenger vehicles, such as sedans and station wagons, buses, and trucks, such as carryalls and light-, medium-, and heavy-duty maintenance-type vehicles (cargo haulers).

608.7002 Policy.

(a) Overseas posts may not acquire official vehicles without the prior approval of the Motor Vehicle branch of the Supply Division, Office of Supply, Transportation and Procurement.

(b) Overseas posts may not lease official vehicles for more than sixty consecutive days without the prior approval of the Motor Vehicle branch of the Supply Division, Office of Supply, Transportation and Procurement.

(c) This policy does not apply to acquisitions (including leases) by overseas posts for other agencies. Such acquisitions are governed by the policies and regulations of the requesting agency (see Subpart 617.72).

## PART 609—CONTRACTOR QUALIFICATIONS

Subpart 609.2—Qualifications Requirements

Sec.
609.202 Policy.

Subpart 609.4—Debarment, Suspension, and Ineligibility

609.403 Definitions.
609.403-70 DOSAR definitions.
609.404 Consolidated List of Debarred, Suspended, and Ineligible Contractors.
609.405 Effect of listing.
609.405-1 Continuation of current contracts.
609.405-2 Restrictions on subcontracting.
609.405-70 Termination action decision.
609.405-71 Treatment to be accorded listed contractors.
609.406 Debarment.
609.406-1 General.
609.406-3 Procedures.
609.407 Suspension.
609.407-1 General.
609.407-3 Procedures.

Subpart 609.5—Organizational Conflicts of Interest

609.503 Waiver.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

Subpart 609.2—Qualifications Requirements

609.202 Policy.

The Procurement Executive is the agency head for the purposes of FAR 9.202. The authority to prepare justifications required under FAR 9.202(a)(1) is delegated to the head of the contracting activity (see 601.603-70).

Subpart 609.4—Debarment, Suspension, and Ineligibility

609.403 Definitions.

The Procurement Executive is the agency head for the purposes of FAR 9.403.

"Debarring official" means the head of the contracting activity (see 601.603-70).

"Suspending official" means the head of the contracting activity (see 601.603-70).

609.403-70 DOSAR definitions.

"Fact-finding official" means the chairperson of a three member fact-finding panel. The panel comprises one representative each from the Office of the Legal Adviser, the contracting activity, and the requirements office. The representative from the Office of the Legal Adviser is the panel chairperson.

"Notice" means a written communication sent by certified mail (return receipt requested) to the last known address of the party, its identified counsel, or its agent. In the case of a business, such notice may be sent to any partner, principal officer, director, owner or co-owner, or joint venturer. If no return receipt is received within 10 calendar days of mailing, receipt shall then be presumed. This definition applies to the notice requirements in FAR 9.406-3 and FAR 9.407-3.

609.404 Consolidated list of debarred, suspended, and ineligible contractors.

(a) The Procurement Executive shall maintain records containing the information required in FAR 9.404.

(b) Within 5 working days after a debarment or suspension action becomes effective or after such an action has been modified or rescinded, the Procurement Executive shall notify GSA of the action and provide the information required in FAR 9.404(b) and FAR 9.404(c)(3).

(c) The head of the contracting activity (see 601.603–70) shall establish procedures to ensure that the Consolidated List of Debarred, Suspended, and Ineligible Contractors is used effectively by that activity's personnel.

(d) The head of the contracting activity shall ensure that contractors who have been debarred, suspended, or declared ineligible are removed from the contracting activity's solicitation mailing lists for the period of the exclusion.

(e) Prior to initiating a pre-award survey or any of the contracting actions set forth in FAR 9.404(c)(5) with respect to a particular bidder, offeror, or proposed subcontractor, the contracting officer shall review the current copy of the Consolidated List.

**609.405 Effect of listing.**

The Procurement Executive is the agency head for the purposes of FAR 9.405.

**609.405–1 Continuation of current contracts.**

The Procurement Executive is the agency head for the purposes of FAR 9.405–1. The decision whether to terminate a current contract shall be made in consideration of the circumstances listed in 609.405–70.

**609.405–2 Restrictions on subcontracting.**

The Procurement Executive is the agency head for the purposes of FAR 9.405–2.

**609.405–70 Termination action decision.**

Prior to making a decision to terminate, based on the considerations listed below, the contracting officer shall have the proposed action reviewed by agency contracting and technical personnel and by the Office of the Legal Adviser.

(a) *Termination for default.* Termination for default under a contract's default clause is appropriate when the circumstances giving rise to the debarment or suspension also constitute a default in the contractor's performance of that contract. Debarment or suspension of the contractor for reasons unrelated to the performance of that contract may not support a termination for default.

(b) *Termination for convenience or cancellation.*

Termination for convenience or cancellation under appropriate contract clauses should be considered when the contractor presents a significant risk to the Government in completing a current contract and when such termination for convenience or cancellation is determined to be in the Government's best interests. In making this determination, the contracting officer should consider such factors as the—

(1) Seriousness of the cause for debarment or suspension;

(2) Extent of contract performance;

(3) Potential costs to the Government;

(4) Urgency of the requirement and the impact of the delay; and/or

(5) Availability of other safeguards to protect the Government's interests.

(c) *Concurrence and approval.* The contracting officer's decision to terminate an existing contract with a debarred or suspended contractor must have—

(1) Written concurrence from the Office of the Legal Advisor, and

(2) Approval one level above the contracting officer.

**609.405–71 Treatment to be accorded listed contractors.**

The Procurement Executive may determine in writing that there is a compelling reason to accord debarred or suspended contractors treatment other than permitted by FAR 9.405–1(b), FAR 9.405–2, or FAR 9.406–1(c).

**609.406 Debarment.**

**609.406–1 General.**

The Procurement Executive is the agency head for the purposes of FAR 9.406–1(c).

**609.406–3 Procedures.**

(a) *Investigation and referral.* (1) DOS employees aware of any cause that may serve as the basis for debarment shall immediately refer those cases through the contracting officer to the debarring official. The debarring official shall immediately refer to the Office of the Inspector General all reported cases that involve possible criminal or fraudulent activities for investigation by that office.

(2) Referrals for consideration of debarment shall include—

(i) The cause for debarment (see FAR 9.406–2);

(ii) A statement of facts;

(iii) Copies of supporting documentary evidence and a list if all necessary or probable witnesses, including addresses and telephone numbers, together with a statement concerning their availability to appear at a fact-finding proceeding and the subject matter of their testimony;

(iv) A list of all contractors involved, either as principals or as affiliates, including current or last known home and business addresses and ZIP codes;

(v) A statement of the acquisition history with such contractors;

(vi) A statement concerning any known pertinent active or potential criminal investigation, criminal or civil court proceedings, or administrative claim before Boards of Contract Appeals; and

(vii) A statement from each DOS organizational element affected by the debarment action as to the impact of a debarment on DOS programs.

(b) *Decisionmaking process.* (1) If the contractor does not respond to a debarment notice within 30 calendar days after receipt of the notice, the debarring official may put the debarment into effect.

(2) In response to the debarment notice, if the contractor or its representative notifies the debarring official within 30 days after receipt of the notice that it wants to present information and arguments in person to the debarring official, that official shall chair such a meeting within 20 calendar days of receipt of the request, unless the contractor requests a longer period of time. The oral presentation shall be conducted informally and a transcript need not be made. However, the contractor may supplement its oral presentation with written information and arguments for inclusion in the administrative record.

(3) Pursuant to FAR 9.406–3(b)(2), the contractor may request and shall be entitled to a hearing before the fact-finding panel. The fact-finding panel shall conduct the hearing within 20 calendar days of receipt of the request, unless the contractor requests a longer period of time.

(4) The debarring official shall convene the fact-finding panel for this purpose and shall provide the panel with a copy of all documentary evidence on the matter. Upon receipt of such material, the fact-finding official shall notify the contractor and schedule a hearing date.

(5) In addition to the purposes provided in FAR 9.406–3(b)(2), the hearing is intended to provide the debarring official with findings of fact based on a preponderance of evidence submitted to the fact-finding panel and to provide the debarring official with a determination as to whether a cause for debarment exists, based on the facts as found.

(6) The fact-finding panel shall conduct its hearing in accordance with rules promulgated by the fact-finding official. The rules shall be as informal as is practicable, consistent with FAR 9.406–3(b). The fact-finding official is responsible for making the transcribed record of the hearing, unless the contractor and the fact-finding panel agree to waive the requirement for a transcript.

(7) The fact-finding official shall deliver written findings and the

transcribed record, if made, to the debarring official within 10 calendar days after the hearing. The findings shall resolve any facts in dispute based on a preponderance of the evidence presented and recommend whether a cause for debarment exists.

(c) *Notice of proposal to debar.* (1) Upon receipt of a complete referral and after consulting with the Office of the Legal Adviser, the debarring official shall decide whether to initiate debarment action.

(2) When a determination is made to initiate action, the debarring official shall provide to the contractor and any specifically named affiliates written notice in accordance with FAR 9.406–3(c). A copy of the notice shall be provided to the DOS officer who made the referral and to each DOS organizational elements affected by the determination.

(3) When a determination is made not to initiate action, the debarring official shall so advise the DOS officer who made the referral.

(d) *Debarring official's decision.* In addition to complying with FAR 9.406–3(d) and FAR 9.406–3(e), the debarring official shall provide single copies of the decision to each DOS organizational element affected by the decision and to the Office of the Procurement Executive for subsequent submission to the General Services Administration in accordance with 609.404.

**609.407 Suspension.**

**609.407–1 General.**

The Procurement Executive is the agency head for the purposes of FAR 9.407–1(c).

**609.407–3 Procedures.**

(a) *Investigation and referral.* Investigation and referral shall be accomplished as provided in 609.406–3(a), except that referrals made to the suspending official shall cite causes pertinent to a suspension action (see FAR 9.407–2).

(b) *Decisionmaking process.* (1) If the contractor does not respond to a notice of suspension within 30 calendar days after receipt of the notice, the suspending official may proceed with completion of investigation.

(2) The DOS decisionmaking process for a suspension action pursuant to FAR 9.407–3(b) follow those established for a debarment act (see 609.406(b)), except that the contractor may request and shall be entitled to a hearing before the fact-finding panel only if permitted under FAR 9.407–3(b)(2).

(c) *Notice of suspension.* Notice of suspension shall be accomplished as provided in 609.406–3(a), except that the suspending official shall process the notice in accordance with FAR 9.407–3(c).

(d) *Suspending official's decision.* In addition to complying with FAR 9.407–3(d), the suspending official shall provide single copies of the decision to each DOS organizational element affected by the decision and to the Office of the Procurement Executive for subsequent submission to the General Services Administration in accordance with 609.404.

## Subpart 609.5—Organizational Conflicts of Interest

**609.503 Waiver.**

The Procurement Executive is the agency head for the purposes of FAR 9.503.

## SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

## PART 613—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Sec.

Subpart 613.1—General

613.103 Policy.
613.103–70 Acquisition by overseas posts.
613.104 Procedures.
613.104–70 Delivery.
613.104–71 Numbering small purchase documents.

Subpart 613.5—Purchase Orders

613.501 General.
613.505 Purchase order and related forms.
613.505–2 Agency order forms in lieu of Optional Forms 347 and 348.
613.507 Clauses.
613.507–70 DOSAR clauses.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 613.1—General

**613.103 Policy.**

**613.103–70 Acquisition by overseas posts.**

(a) Overseas posts are authorized to make small purchases directly from sources within or outside the United States, in accordance with FAR Part 13, this Part 613, and 601.603–70(b)(1). Overseas posts are authorized to purchase from both Government contract sources, such as Federal Supply Schedules, DOS supply schedules, and noncontract sources within the United States.

(b) The dollar limitation on purchases from U.S. vendors prescribed in 601.603–70(b)(1)(i) applies to the total cost of the order, including all estimated handling and freight charges, to be paid to the vendor. However, the dollar limitation does not apply to purchases under Government contracts existing at the time of purchase.

(c) Overseas posts shall ensure that the terms and conditions required by FAR Part 13 are added or incorporated by reference on the documents used for small purchases from U.S. vendors.

**613.104 Procedures.**

**613.104–70 Delivery.**

FAR Subpart 8.4 prescribes procedures for delivery of purchases from Federal Supply Schedule contractors. These procedures should be followed, as applicable, in purchasing from other government contractors.

**613.104–71 Numbering small purchase documents.**

All small purchase documents shall be numbered as prescribed in 614.201–71.

### Subpart 613.5—Purchase Orders

**613.501 General.**

The contracting officer shall distribute copies of each purchase order in conformance with Subpart 604.2.

**613.505 Purchase order and related forms.**

**613.505–2 Agency order forms in lieu of Optional Forms 347 and 348.**

(a) In lieu of Optional Forms 347 and 348, DOS contracting activities may use either—

(1) Optional Form (OF) 206, Purchase Order, Receiving Report and Voucher, and Optional Form 206A, Continuation Sheet (illustrated at 653.302–206 and 653.302–206A, respectively); or

(2) Department of State Form (DST) 1069, Order—Supplies or Services (illustrated in 653.303–DST–1069).

(b) Both OF 206 and form DST 1069 provide the requisite space for purchase data and budgetary, accounting and voucher payment data. Either form may be used as—

(1) A purchase order for small purchases;

(2) A delivery order under an established contract;

(3) Documentation in connection with a blanket purchase agreement; and/or

(4) A voucher.

(c)(1) When using OF 206, contracting activities may use Optional Form (OF) 127, Receiving and Inspection Report (illustrated in 653.302–127), for that purpose.

(2) When using form DST 1069 as a purchase order and until such time as the form is revised, contracting activities shall replace the "Terms and Conditions Applicable to Purchase Orders" (located on the reverse of the original copy) with

the appropriate FAR and DOSAR clauses, in accordance with 613.507–70.

**613.507 Clauses.**

**613.507–70 DOSAR Clauses.**

In addition to the clauses prescribed in FAR 13.507, each DOS purchase order shall incorporate all DOSAR clauses required for or applicable to the acquisition. All such clauses may be listed on a separate document and attached to each copy of the purchase order, in which case the document shall be identified by the purchase order number and the name and address of the contracting activity.

## PART 614—SEALED BIDDING

Sec.

**Subpart 614.2—Solicitation of Bids**

614.201 Preparation of Invitation For Bids (IFB).
614.201–7 Contract clauses.
614.201–70 DOSAR contract clauses.

**Subpart 614.4—Opening of Bids and Award of Contract**

614.402 Opening of bids.
614.402–1 Unclassified bids.
614.402–70 Waiver of public opening of bids.
614.404 Rejection of bids.
614.404–1 Cancellation of invitations after opening.
614.406 Mistakes in bids.
614.406–3 Other mistakes disclosed before award.
614.406–4 Mistakes after award.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 614.2—Solicitation of Bids

**614.201 Preparation of Invitation for Bids (IFB).**

**614.201–7 Contract clauses.**

**614.201–70 DOSAR contract clauses.**

(a)(1) When contracting by sealed bidding, the contracting officer shall insert the clause at 652.214–70, Language Version, in all solicitations and contracts awarded or performed overseas.

(2) Use of English language solicitations and contracts is mandatory unless a deviation has been approved by the Procurement Executive in accordance with 601.470. If any part of a contract is not written in the English language, the contracting officer shall attach an accurate English language translation of such part to the original and each copy of the contract, unless the contracting officer determines such action is infeasible.

(b) When contracting by sealed bidding, the contracting officer shall insert the clause at 652.214–71, Notices, in all solicitations and contracts awarded or performed overseas.

(c) When contracting by sealed bidding, the contracting officer shall insert the clause at 652.214–72, Authorization to Perform, in all solicitations and contracts awarded or performed overseas.

(d) See 615.106–70 regarding use of the clauses prescribed in this subsection when contracting by negotiation.

### Subpart 614.4—Opening of Bids and Award of Contract

**614.402 Opening of bids.**

**614.402–1 Unclassified bids.**

After the unclassified bids have been opened pursuant to FAR 14.402–1, the bid opening officer shall announce that the opening of bids has been completed and that all bidders will be notified as soon as possible regarding the award.

**614.402–70 Waiver of public opening of bids.**

Overseas posts may request waiver of the public opening of bids if that activity is inconsistent with local law or legal practice, or with post security. For such purposes, the Procurement Executive must approve a deviation in accordance with 601.470.

**614.404 Rejection of bids.**

**614.404–1 Cancellation of invitations after opening.**

The Procurement Executive is the agency head for the purposes of FAR 14.404–1. For overseas acquisitions, the Principal Officer at the overseas post is the Procurement Executive's designee for the purposes of FAR 14.404–1.

**614.406 Mistakes in bids.**

**614.406–3 Other mistakes disclosed before award.**

The Procurement Executive is the agency head for the purposes of FAR 14.406–3. For overseas acquisitions, the Principal Officer at the overseas post is the Procurement Executive's designee, without power of redelegation, for the purposes of FAR 14.406–3.

**614.406–4 Mistakes after award.**

The determinations required under FAR 14.406–4 shall be made by the head of the contracting activity (see 601.603–70). In conformance with FAR 14.406–4(d), the head of the contracting activity shall consult with the Office of the Legal Adviser prior to making any determinations pursuant to this subsection.

## PART 615—CONTRACTING BY NEGOTIATION

Sec.

**Subpart 615.1—General Requirements for Negotiation**

615.106 Contract clauses.
615.106–1 Examination of Records clause.
615.106–70 DOSAR contract clauses.

**Subpart 615.6—Source Selection**

615.607 Disclosure of mistakes before award.
615.608 Proposal evaluation.
615.612 Formal source selection.

**Subpart 615.8—Price Negotiation**

615.804 Cost or pricing data.
615.804–3 Exemptions from or waiver of submission of certified cost or pricing data.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 615.1—General Requirements for Negotiation

**615.106 Contract clauses.**

**615.106–1 Examination of Records clause.**

See Subpart 625.9 for conditions for omission of the Examination of Records clause.

**615.106–70 DOSAR contract clauses.**

When contracting by negotiation, the contracting officer shall insert the clauses at 652.214–70, Language Version, 652.214–71, Notices, and 652.214–72, Authorization to Perform, in all solicitations and contracts, under the same conditions prescribed in 614.201–70.

### Subpart 615.6—Source Selection

**615.607 Disclosure of mistakes before award.**

The Procurement Executive is the agency head for the purposes of FAR 15.607(c)(3). The determinations required under FAR 15.607(c)(3) shall be made by the head of the contracting activity (see 601.603–70).

**615.608 Proposal evaluation.**

The Procurement Executive is the agency head for the purposes of FAR 15.608(b).

**615.612 Formal source selection.**

The Procurement Executive is the agency head for the purposes of FAR 15.612(b). When using formal source selection, the head of the contracting activity shall be the source selection authority. If that official is the contracting officer for the acquisition, then the Procurement Executive shall designate a different official as the source selection authority.

Subpart 615.8—Price Negotiation

615.804 Cost or pricing data.

615.804–3 Exemptions from or waiver of submission of certified cost or pricing data.

The Procurement Executive is the agency head for the purposes of FAR 15.804–3(i). The waiver authority of FAR 15.804–3(i) is delegated, without power of redelegation, to the head of the contracting activity.

## PART 616—TYPES OF CONTRACTS

Sec.

Subpart 616.1—Selecting Contract Types

616.102 Policies.
616.102–70 Overseas posts.

Subpart 616.2—Fixed-Price Contracts

616.203 Fixed-price contracts with economic price adjustment.
616.203–4 Contract clauses.
616.207 Firm-fixed-price, level-of-effort term contracts.
616.207–3 Limitations.

Subpart 616.3—Cost-Reimbursement Contracts

616.301–3 Limitations.
616.306 Cost-plus-fixed-fee contracts.

Subpart 616.5—Indefinite-Delivery Contracts

616.505 Contract clauses.
616.505–70 DOSAR contract clause.

Subpart 616.6—Time-and-Materials, Labor-Hour, and Letter Contracts

616.603 Letter contracts.
616.603–2 Application.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 616.1—Selecting Contract Types

#### 616.102 Policies.

#### 616.102–70 Overseas posts.

Pursuant to 601.603–70(b)(1)(ii), no authority is delegated to overseas posts to enter into cost-reimbursement or fixed-price incentive contracts. When the head of the contracting activity (see 601.603–70) at post determines that no other type contract will suffice to obtain needed supplies or services, that officer shall request the Procurement Executive to delegate authority to enter into a cost-reimbursement or fixed-price incentive contract, as appropriate. Such requests shall be submitted on a case-by-case basis.

### Subpart 616.2—Fixed-Price Contracts

#### 616.203 Fixed-price contracts with economic price adjustment.

#### 616.203–4 Contract clauses.

The contracting officer may use an economic price adjustment clause based on cost indexes of labor or material in accordance with the circumstances listed in FAR 16.203–4(d) and after obtaining the approval of the head of the contracting activity.

#### 616.207 Firm-fixed-price, level-of-effort term contracts.

#### 616.207–3 Limitations.

The head of the contracting activity is the chief of the contracting office for the purposes of FAR 16.207–3.

### Subpart 616.3—Cost-Reimbursement Contracts.

#### 616.301–3 Limitations.

The determination and findings required in FAR 16.301–3(c) shall be executed by the contracting officer and approved at a level above the contracting officer.

#### 616.306 Cost-plus-fixed-fee contracts.

The Procurement Executive is the agency head for the purposes of FAR 16.306(c)(2).

### Subpart 616.5—Indefinite-Delivery Contracts

#### 616.505 Contract clauses.

#### 616.505–70 DOSAR contract clause.

The contracting officer shall insert the clause at 652.216–70, Ordering—Requirements or Indefinite Quantity Contract, whenever the clause at FAR 52.216–21, Requirements, or the clause at FAR 52.216–22, Indefinite Quantity, is used.

### Subpart 616.6—Time-and-Materials, Labor-Hour, and Letter Contracts

#### 616.603 Letter contracts.

#### 616.603–2 Application.

The contracting officer, after obtaining approval of the head of the contracting activity, is authorized to extend the period for definitization of a letter contract in accordance with FAR 16.603–2(c) and when such action is in the best interest of the Government. For this purpose, the contracting officer shall execute a written determination and findings, and submit it to the head of the contracting activity for approval.

## PART 617—SPECIAL CONTRACTING METHODS

Sec.

Subpart 617.1—Multiyear Contracting

617.102 Policy.
617.102–2 General.

Subpart 617.2—Options

617.201 definitions.
617.201–70 DOSAR Definitions.
617.207 Exercise of options.
617.207–70 Synopsis and competition requirements.

Subpart 617.5—Interagency Acquisitions Under the Economy Act

617.502 General.

Subpart 617.6—Management and Operating Contracts

617.602 Policy.

Subpart 617.70—Standardization

617.7000 Scope of subpart.
617.7001 Policy.
617.7002 Procedures.

Subpart 617.71—International Narcotics Control Program Acquisitions

617.7100 Scope of subpart.
617.7101 Policy.
617.7102 Applicability.

Subpart 617.72—Acquisitions for Other Posts or Other Agencies

617.7201 Policy.
617.7202 Procedures.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 617.1—Multiyear Contracting

#### 617.102 Policy.

#### 617.102–2 General.

(a) Pursuant to section 14 of the State Department Basic Authorities Act of 1956, as amended (22 U.S.C. 2679a), any DOS acquisition for property or services, or both, by any contract funded on an annual basis may nevertheless be made for periods not in excess of 5 years when—

(1) Appropriations are available and adequate for payment for the first fiscal year and all potential cancellation costs; and

(2) The Procurement Executive determines that—

(i) The need of the Government for the property or services being acquired over the period of the contract is reasonably firm and continuing;

(ii) Such a contract will serve the best interests of the Government by encouraging effective competition or promoting economies in performance and operation; and

(iii) Such a method of contracting will not inhibit small business participation.

(b) For overseas posts, the Procurement Executive may delegate to the Principal Officer, on an individual contract or class of contracts basis, the authority to make the determination required by 617.103–1(a)(2). The Principal Officer may not redelegate this authority.

(c) In the event that funds for the continuation of such a contract are not made available into a subsequent fiscal year, the contract shall be canceled. Any cancellation costs incurred shall be

paid from appropriations currently available for the acquisition of similar property or services and not otherwise obligated, or appropriations made for such cancellation purposes.

## Subpart 617.2—Options

### 617.201 Definitions.

### 617.201-70 DOSAR definitions.

"Evaluated option" means an option that is evaluated for award purposes by adding the total price for the option(s) to the total price for the basic requirement.

"Priced option" means an option where the prices for the option quantities or performance periods are specified in the contract at the time of award and the option prices are not subject to renegotiation or adjustment at the time the option is exercised unless an economic price adjustment clause is included in the contract.

"Unpriced option" means an option where the prices for the option quantities or performance periods are not specified in the contract at the time of award and the option prices are negotiated at the time the option is exercised.

"Unevaluated option" means an option that is not included in the evaluation for award purposes.

### 617.207 Exercise of options.

### 617.207-70 Synopsis and competition requirements.

(a) If the synopsis for the original contract action described the option provisions in sufficient detail to comply with the requirements of FAR 5.207 and the option was evaluated, a synopsis of the option before it is exercised is not required. An evaluated and priced option that was properly synopsized as provided at FAR 5.207 meets the full and open competition requirements of FAR Subpart 6.1 or the requirements of FAR Subpart 6.2 for full and open competition after exclusion of sources.

(b) If the synopsis for the original contract action did not describe the option provisions or in those instances where an unevaluated option was included in the contract, the option must be synopsized in accordance with FAR 5.207 before the option can be exercised. Unpriced options and unevaluated options are considered to be new acquisitions and the justification requirements of FAR Subpart 6.3 must be met before the option is exercised.

## Subpart 617.5—Interagency Acquisitions Under the Economy Act

### 617.502 General.

The Procurement Executive is the agency head for the purposes of FAR 17.502. The determinations required under FAR 17.502 shall be made by the head of the contracting activity (see 601.603-70).

## Subpart 617.6—Management and Operating Contracts

### 617.602 Policy.

The Assistant Secretary for Administration is the agency head for the purposes of FAR 17.602.

## Subpart 617.70—Standardization

### 617.7000 Scope of subpart.

This subpart prescribes the policies and procedures for DOS standardization of technical equipment.

### 617.7001 Policy.

(a) Standardization of technical equipment is necessary to meet long-term DOS requirements, particularly for technical equipment used by overseas posts, where compatibleness and maintenance support are important considerations. Adherence to the statutory requirements for full and open competition necessitate that the initial acquisition of any technical equipment should be processed in conformance with FAR Subparts 6.1 and 6.2. However, where the technical/performance specifications of the technical equipment preclude full and open competition, the acquisition shall be processed in conformance with FAR Subpart 6.3.

(b) Contracts for technical equipment may be awarded through other than full and open competition pursuant to a standardization when such standardization would—

(1) Limit the variety and quantity of parts that must be carried in stock;

(2) Make available only those parts that may be interchanged among items of damaged or worn equipment;

(3) Allow acquisition from selected suppliers of technical equipment that is available from a number of suppliers but that otherwise would vary so in performance or design characteristics (notwithstanding detailed specifications and rigid inspection) as to prevent standardization and interchangeability of parts.

(c) All standardization requests shall be submitted in writing for the approval of the Procurement Executive. This authority is not redelegable.

### 617.7002 Procedures.

(a) Each standardization request shall be submitted to the Procurement Executive in writing by a contracting officer through the head of the contracting activity. Where the standardization request results from an acquisition that was processed under full and open competition procedures, the authority is the standardization clause included in the solicitation, and the standardization request shall be identified as a Determination and Findings. The authority for standardization requests for acquisitions processed under other than full and open competition procedures is 41 U.S.C. 253(c)(1), and the standardization request shall be submitted as a Justification and Approval for Other Than Full and Open Competition. In addition to the requirements of this subpart, such a justification shall comply with FAR 6.303-2.

(b) Before approving the standardization, the Procurement Executive shall consider—

(1) The feasibility, from an economical and timely deployment standpoint, of distributing or redistributing on a selected geographic basis the equipment and parts already in the supply system;

(2) The practicability or economy of using or developing an agency design that would permit standardization of components and parts;

(3) The practicability of interchanging parts and cannibalizing equipment;

(4) Whether future acquisition of the selected item of equipment can be affected at reasonable prices;

(5) Whether standardization will appreciably reduce the variety and quantity of parts that must be carried in stock;

(6) Whether standardization will render obsolete large dollar value inventories of equipment and supporting parts already in the supply system, without compensating benefits;

(7) Whether standardization will enhance agency mission capability;

(8) Possible savings in training personnel or in acquiring technical literature;

(9) Whether the standardization will adversely affect existing specifications and standards;

(10) The degree to which the current design of the specified make and model has been changed from the design of the equipment in the supply system; and

(11) In cases where DOS mission capability is not overriding, whether the benefits and/or cost savings anticipated from standardization will equal or exceed those to be expected from competition.

(c) In deciding whether to approve the standardization request, the Procurement Executive shall consult other user offices, as appropriate, to ensure the full benefits of the action.

(d) In order to approve the standardization request, the Procurement Executive shall determine that—

(i) The equipment constitutes technical equipment, and

(ii) Standardization of the equipment and interchangeability of its parts are necessary and in the public interest.

(e) Each standardization request shall specify an effective period, which shall bear a reasonable relationship to the life of the technical equipment. Periodic review(s) shall be made during and as stated in the standardization, to determine whether the standardization should be continued, revised, or canceled.

(f) The Office of the Procurement Executive shall maintain a master list of items standardized under this subpart.

### Subpart 617.71—International Narcotics Control Program Acquisitions

#### 617.7100 Scope of subpart.

This subpart prescribes policies for acquisitions under the International Narcotics Control (INC) Program, which is authorized by section 481 of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2291).

#### 617.7101 Policy.

(a) The Procurement Executive is responsible for INC Program acquisitions. In this capacity, the Procurement Executive has the specific authority to enter into and administer INC funded contracts. Unless otherwise directed by the Secretary of State or provided in DOS regulations, the Procurement Executive shall also provide policy direction and prescribe or approve standards, procedures, and internal instructions for the award and administration of INC funded contracts, including contracts with individuals for personal services abroad.

(b) To accomplish the purposes of the INC Program, the following implementing authorities and regulations may be utilized to the extent the Procurement Executive deems necessary or appropriate in the performance of the acquisition function.

(1) The Foreign Assistance Act of 1961, as amended.

(2) Sections 1, 2, and 3 of Executive Order No. 11223 of May 12, 1965.

(3) Chapter 7 of this Title, Agency for International Development Acquisition Regulation, 48 CFR 7, including any amendments thereto.

(c) Authority to perform functions under this subpart may be redelegated.

#### 617.7102 Applicability.

The provisions of this subpart apply to acquisitions under the INC Program both within and outside the United States.

### Subpart 617.72—Acquisitions for Other Posts or Other Agencies

#### 617.7201 Policy.

As provided in 601.603–70(b)(1), DOS overseas posts may be authorized to acquire supplies and services for other posts or for other agencies.

#### 617.7202 Procedures.

(a) The requesting post or agency shall provide a document containing a complete description of the acquisition, appropriate fiscal data, and a certification of funds availability. For acquisitions requested by other agencies, the requesting agency also must provide its statutory and/or regulatory authority, as applicable, for each acquisition.

(b) As necessary, the contracting post shall provide to the requesting post or agency availability and price information. The contracting post shall notify the requesting post of the actual dollar cost so that any remainder of the obligation may be liquidated.

(c) The contracting officer shall process the acquisition in compliance with the appropriate FAR and DOSAR regulations.

## SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

## PART 619—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Sec.

Subpart 619.2—Policies

619.201 General policy.

Subpart 619.4—Cooperation With the Small Business Administration

619.402 Small Business Administration procurement center representatives.

619.402–70 DOS designee.

Subpart 619.5—Set-Asides for Small Business

619.501 General.

619.505 Rejecting set-aside recommendations.

Subpart 619.6—Certificates of Competency and Determinations of Eligibility

619.602 Procedures.

619.602–3 Referral.

Subpart 619.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

619.705 Responsibilities of the contracting officer under the subcontracting assistance program.

619.705–2 Determining the need for a subcontracting plan.

619.705–3 Preparing the solicitation.

619.705–4 Reviewing the subcontracting plan.

619.705–6 Postaward responsibilities of the contracting officer.

619.705–6–70 Reporting responsibilities.

Subpart 619.8—Contracting With the Small Business Administration (the 8(a) Program)

619.801 General.

619.803 Selecting acquisitions for the 8(a) program.

619.803–70 Responsibilities of the Office of Small and Disadvantaged Business Utilization.

619.870 Acquisition of technical requirements.

Subpart 619.9—Contracting Opportunities for Woman-Owned Small Businesses

619.901 Policy.

**Authority:** 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 619.2—Policies

#### 619.201 General policy.

(a) The Director, Office of Small and Disadvantaged Business Utilization (OSDBU), is responsible for performing all functions and duties prescribed in FAR 19.201 (c) and (d).

(b) In addition to the requirements of FAR 19.201(b), each head of the contracting activity (see 601.603–70), or designee, is responsible for establishing in coordination with the OSDBU director annual goals for the DOS small and disadvantaged business program.

(c) The Under Secretary for Management is the agency head for the purposes of FAR 19.201(c).

(d) Pursuant to FAR 19.201(d), each Small and Disadvantaged Business Utilization Specialist (SDBUS) is responsible for—

(1) Maintaining a program to locate capable small business, small disadvantaged business, and women-owned business sources to fulfill DOS acquisition requirements;

(2) Coordinating inquiries and requests for advice from small business, small disadvantaged business, and women-owned business sources on DOS contracting and subcontracting opportunities and other acquisition matters;

(3) Prior to the issuance of solicitations (or contract modifications for additional supplies or services) in excess of $25,000, which have not been reviewed, reserved, or set-aside by the contracting officer, reviewing the contracting officer's justification for such action;

(4) Advising contracting activities on new or revised small business, small disadvantaged business, or women-

owned business policies, regulations, procedures, and other related information;

(5) Assuring that small business, small disadvantaged business and women-owned business concerns are provided adequate specifications or drawings by initiating actions, in writing, with appropriate technical and contracting personnel to ensure that all necessary specifications or drawings for current and future acquisitions, as appropriate, are available;

(6) Reviewing all requirements to assure that small business, small disadvantaged business, and women-owned business sources will be afforded an equitable opportunity to compete and, as appropriate, initiating recommendations for small business set-asides;

(7) Assuring that contract financing available under existing regulations is offered when appropriate and that requests by small business concerns for such financing are not treated as a handicap in the award of contracts;

(8) Providing assistance to the contracting officer in making determinations concerning responsibility of prospective contractors whenever small business concerns are involved;

(9) Participating in the evaluation of a prime contractor's small business and small disadvantaged business subcontracting plans;

(10) Assuring that the participation of small business, small disadvantaged business, and women-owned business concerns is accurately reported;

(11) Attending, as appropriate, debriefings to unsuccessful small business and small disadvantaged business concerns to assist those firms in understanding requirements for responsiveness and responsibility so that the firm may be able to qualify for future awards;

(12) Making available to SBA copies of solicitations when so requested;

(13) When a bid or offer from a small business, small disadvantaged business, or women-owned business has been rejected for nonresponsiveness or nonresponsibility, upon request, aid, counsel, and assist that firm in understanding requirements for responsiveness and responsibility so that the firm may be able to qualify for future awards;

(14) Participating in Government-industry conferences to assist small business, small disadvantaged business and women-owned business concerns, including Business Opportunity/Federal Acquisition Conferences, Minority Business Enterprises Acquisition Seminars and Business Opportunity Committee meetings;

(15) Maintaining a list of supplies and services that have been placed as repetitive small business set-asides;

(16) Participating in the development, implementation, and review of automated source systems to assure that the interests of small business, small disadvantaged business, and women-owned business concerns are fully considered;

(17) Advising potential sources how they can obtain information about competitive acquisitions;

(18) Providing small business, small disadvantaged business, and women-owned business sources information regarding assistance available from Federal agencies such as the Small Business Administration, Minority Business Development Agency, Bureau of Indian Affairs, Economic Development Administration, National Science Foundation, Department of Labor and others, including State agencies and trade associations; and

(19) Participating in interagency programs relating to small business, small disadvantaged business, and labor surplus area matters as authorized by the OSDBU director.

## Subpart 619.4—Cooperation With the Small Business Administration

### 619.402 Small Business Administration procurement center representatives.

### 619.402-70 DOS designee.

Where the FAR requires action by a Small Business Administration procurement center representative, but one has not been assigned to the DOS contracting activity, the OSDBU director shall perform the action so required.

## Subpart 619.5—Set-Asides for Small Business

### 619.501 General.

A Small and Disadvantaged Business Utilization Specialist (SDBUS) shall review individual requirements prior to issuance of solicitations or consideration of other sources to determine the suitability of the acquisition for small business set-aside. Upon receipt of the SDBUS recommendation, the contracting officer shall promptly approve or disapprove the SDBUS recommendation, stating in writing the reason(s) for any disapproval.

### 619.505 Rejecting set-aside recommendations.

The Procurement Executive is the agency head for the purposes of FAR 19.505.

## Subpart 619.6—Certificates of Competency and Determinations of Eligibility

### 619.602 Procedures.

### 619.602-1 Referral.

The contracting officer shall transmit to the OSDBU director concurrently with the submission to the appropriate SBA Regional Office, a copy of the documentation supporting the determination that a small business concern is not responsible, as required by FAR 19.602-1(a).

## Subpart 619.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

### 619.705 Responsibilities of the contracting officer under the subcontracting assistance program.

### 619.705-2 Determining the need for a subcontracting plan.

The contracting officer shall provide to the OSDBU director a copy of each determination made under FAR 19.705-2(c).

### 619.705-3 Preparing the solicitation.

Whenever the clause at FAR 52.219-8, Small Business and Small Disadvantaged Business Subcontracting Program, is used in a solicitation for a negotiated acquisition, a notification also must be included in the solicitation. This notification shall advise prospective offerors that subcontracting plans may be requested from all concerns determined to be in the competitive range.

### 619.705-4 Reviewing the subcontracting plan.

OSDBU shall review subcontracting plans submitted by apparent successful offerors to determine if small and small disadvantaged businesses are afforded the maximum practicable opportunity to participate as subcontractors. OSDBU shall recommend to the contracting officer changes needed to subcontracting plans found to be deficient.

### 619.705-6 Postaward responsibilities of contracting officer.

### 619.705-6-70 Reporting responsibilities.

(a) The contracting officer shall forward to the OSDBU director a copy of each subcontracting plan that was incorporated into a contract or contract modification. Each contracting activity shall maintain a list of its active prime contracts that contain subcontracting plans.

(c) Contracting officers shall collect subcontracting data from contractors

required to establish subcontracting plans in support of small and small disadvantaged business concerns. This data shall be collected quarterly and semi-annually, using Standard Form 295, Summary Subcontracting Report, for the quarterly submissions, and Standard Form 294, Subcontracting Report for Individual Contracts, for the semi-annual submissions. The head of the contracting activity shall forward these reports to the OSDBU director, not later than the 30th day of the month following the close of the reporting period.

### Subpart 619.8—Contracting With the Small Business Administration (the 8(a) Program)

**619.801 General.**

The Procurement Executive is the agency head for the purposes of FAR 19.801(b)(2).

**619.803 Selecting acquisitions for the 8(a) program.**

**619.803-70 Responsibilities of the Office of Small and Disadvantaged Business Utilization.**

(a) Firms participating in the 8(a) program shall be reviewed by the OSDBU to match DOS requirements with the capabilities of such businesses. The OSDBU shall make the capabilities of these sources known to program and contracting personnel and shall obtain other information, as required.

(b) Acquisitions determined by DOS to be not suitable for the 8(a) program shall be reviewed by the OSDBU to determine the feasibility of small business set-asides, in conformance with FAR 19.504.

**619.870 Acquisition of technical requirements.**

(a) *Offering Letter.* When a decision has been made by the OSDBU and contracting officer to process an acquisition through the SBA under the 8(a) program, the contracting activity shall promptly furnish the applicable SBA office a letter offering the acquisition to the SBA, with an information copy to the SDBUS. The offering letter should transmit the complete acquisition package.

(b) The contracting officer has a greater latitude in holding discussions with the concerns solicited under an 8(a) program acquisition than under a non-8(a) program acquisition. The technical evaluation must be carefully reviewed to determine if any source declared to be unacceptable is capable of being made acceptable.

### Subpart 619.9—Contracting Opportunities for Women-Owned Small Businesses

**619.901 Policy.**

(a) The Office of Small and Disadvantaged Business Utilization shall establish, in coordination with the heads of the contracting activities, annual goals for contract awards to women-owned businesses.

(b) Contracting activities shall report as part of their Federal Procurement Data System submissions (see 604.602-70) awards to women-owned small businesses.

## PART 622—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

Sec.

Subpart 622.6—Walsh-Healey Public Contracts Act

622.604 Exemptions.
622.604-2 Regulatory exemptions.

Subpart 622.8—Equal Employment Opportunity

622.807 Exemptions.

Subpart 622.13—Special Disabled and Vietnam Era Veterans

622.1303 Waivers.

Subpart 622.14—Employment of the Handicapped

622.1403 Waivers.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 622.6—Walsh-Healey Public Contracts Act

**622.604 Exemptions.**

**622.604-2 Regulatory exemptions.**

The Procurement Executive is the agency head for the purposes of FAR 22.604(c).

### Subpart 622.8—Equal Employment Opportunity

**622.807 Exemptions.**

The Procurement Executive is the agency head for the purposes of FAR 22.807(a)(1).

### Subpart 622.13—Special Disabled and Vietnam Era Veterans

**622.1303 Waivers.**

The Procurement Executive is the agency head for the purposes of FAR 22.1303(a).

### Subpart 622.14—Employment of the Handicapped

**622.1403 Waivers.**

The Procurement Executive is the agency head for the purposes of FAR 22.1403(a).

## PART 623—ENVIRONMENT, CONSERVATION, AND OCCUPATIONAL SAFETY

Sec.

Subpart 623.1—Pollution Control and Clean Air and Water

623.104 Exemptions.
623.107 Compliance responsibilities.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 623.1—Pollution Control and Clean Air and Water

**623.104 Exemptions.**

The Procurement Executive is the agency head for the purposes of FAR 23.104(c).

**623.107 Compliance responsibilities.**

The Procurement Executive is the agency head for the purposes of FAR 23.107.

## PART 625—FOREIGN ACQUISITION

Sec.

Subpart 625.1—Buy American Act—Supplies

625.102 Policy.

Subpart 625.2—Buy American Act—Construction Materials

625.200 Scope of subpart.

Subpart 625.3—Balance of Payments Program

625.300 Scope of subpart.
625.300-70 Overseas acquisitions.
625.302 Policy.
625.304 Excess and near-excess foreign currencies.

Subpart 625.7—Restrictions on Certain Foreign Purchases

625.703 Exceptions.

Subpart 625.9—Omission of the Examination of Records Clause

625.903 Conditions for omission.
625.904 Determination and findings.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 625.1—Buy American Act—Supplies

**625.102 Policy.**

The Procurement Executive is the agency head for the purposes of FAR 25.102(a)(3) and (4).

BEST COPY AVAILABLE

### Subpart 625.2—Buy American Act—Construction Materials

#### 625.200 Scope of subpart.

The Procurement Executive is the agency head for the purposes of FAR Subpart 25.2.

### Subpart 625.3—Balance of Payments Program

#### 625.300 Scope of subpart.

#### 625.300-70 Overseas acquisitions.

This program applies to acquisitions of supplies and services for use outside the United States regardless of the contractor's location.

#### 625.302 Policy.

The Procurement Executive is the agency head for the purposes of FAR 25.302(b)(3). For overseas acquisitions, the Principal Officer at the overseas post is the Procurement Executive's designee for the purposes of FAR 25.302(b)(3).

#### 625.304 Excess and near-excess foreign currencies.

The Procurement Executive is the agency head for the purposes of FAR 25.304(c).

### Subpart 625.7—Restrictions on Certain Foreign Purchases

#### 625.703 Exceptions.

The Procurement Executive is the agency head for the purposes of FAR 25.703(b).

### Subpart 625.9—Omission of the Examination of Records Clause

#### 625.903 Conditions for omission.

The Procurement Executive is the agency head for the purposes of FAR 25.903.

#### 625.904 Determination and findings.

(a) Each determination and findings to omit FAR clause 52.215–1, Examination of Records by Comptroller General, shall be prepared in writing and submitted to the Procurement Executive.

(b) The Procurement Executive shall forward the approved determination and findings to the requesting contracting activity for inclusion in the contract file, or inform the contracting activity in writing if the determination and findings is not approved, as appropriate.

## SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

## PART 628—BONDS AND INSURANCE

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 628.70—Indemnification

#### 628.7001 DOSAR contract clause.

(a) Contractors should not ordinarily be required to assume risks which a private buyer would guard against through insurance. There may be occasions, however, when a contractor's assumption of such risks is in the best interest of the Government. The clause in paragraph (b) below is authorized for use on those occasions. In the determination of its use, the contracting officer should weigh the advantages it provides against the likelihood of a resultant increase in the contract price.

(b) The contracting officer shall insert the clause at 652.228–70, Indemnification, in solicitations and contracts when it is determined that the contractor's assumption of risk is in the best interest of the Government.

## PART 629—TAXES

Sec.

Subpart 629.1—General

629.101 Resolving tax problems.

Subpart 629.2—Federal Excise Taxes

629.202 General exemptions.
629.202–70 Exemption from other Federal taxes.

Subpart 629.3—State and Local Taxes

629.302 Application of State and local taxes to the Government.
629.303 Application of State and local taxes to Government contractors and subcontractors.

Subpart 629.4—Contract Clauses

629.401 Domestic contracts.
629.401–70 DOSAR contract clause.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 629.1—General

#### 629.101 Resolving tax problems.

In certain instances, acquisitions by posts are exempt from various taxes in foreign countries. Contracting officers shall ascertain such exemptions and take maximum advantage of them.

### Subpart 629.2—Federal Excise Taxes

#### 629.202 General exemptions.

#### 629.202–70 Exemptions From other Federal taxes.

Taxable articles purchased for presentation abroad as gifts to foreign dignitaries and taxable articles purchased for presentation as gifts to foreign dignitaries visiting in the United States but which are to be taken out of the United States may be exempt from retail taxes or manufacturers excise taxes, in accordance with the letter of October 18, 1963, from the Chief, Excise Tax Branch, Internal Revenue Service.

### Subpart 629.3—State and Local Taxes

#### 629.302 Application of State and local taxes to the Government.

The Office of the Legal Adviser is the agency-designated counsel for the purposes of FAR 29.302(a).

#### 629.303 Application of State and local taxes to Government contractors and subcontractors.

The Procurement Executive is the agency head for the purposes of FAR 29.303(a). The Office of the Legal Adviser is the agency-designated counsel for the purposes of FAR 29.303(c).

### Subpart 629.4—Contract Clauses

#### 629.401 Domestic contracts.

#### 629.401–70 DOSAR contract clause.

The contracting officer shall insert the clause at 652.229–71, Excise Tax Exemption Statement for Contractors Within the United States, in solicitations and contracts if the prospective contractor is located inside the United States and the acquisition involves export of supplies to an overseas post.

## PART 630—COST ACCOUNTING STANDARDS

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 630.3—CAS Contract Requirements

#### 630.304 Waiver.

The Assistant Secretary for Administration is the agency head for the purposes of FAR 30.304(b)(1). The Deputy Secretary of State is the agency head for the purposes of FAR 30.304(b)(2). The Procurement Executive is the agency head for the purposes of FAR 30.304(c).

## PART 632—CONTRACT FINANCING

Sec.

Subpart 632.1—General

632.111 Contract clauses.
632.111–70 DOSAR contract clauses.

Subpart 632.4—Advance Payments

632.402 General.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 632.1—General

**632.111 Contract clauses.**

**632.111-70 DOSAR contract clauses.**

(a) The contracting officer shall insert the clause at 652.232-70, Prompt Payment, in solicitations, contracts, and orders, in accordance with the following guidelines.

(1) For purchase orders or delivery orders that do not require written proposals by the suppliers, the contracting officer shall include in the order the information concerning the contractor's representative in paragraph (b) of the clause. The individual who provides the quotation to the Government generally should be the contractor's representative.

(2) The contracting officer shall specify delivery point(s) and ultimate destination point(s) in the solicitation, contract, or order, and not in the clause.

(3) When the contracting officer provides for a contract payment due date of less than 30 calendar days, the contracting officer shall modify paragraph (c)(1) of the clause by specifying the appropriate number of days directly below the title of the clause, in conformance with FAR 52.104(b). Prior to authorizing payment of less than 30 calendar days, the contracting officer shall consult first with the designated payment office.

(4) When partial deliveries are involved, the contracting officer shall modify paragraph (c) of the clause by specifying that partial payments will be made. The contracting officer shall add this information directly below the title of the clause, in conformance with FAR 52.104(b).

(5) For the sole purpose of computing any interest penalty that might be due to the contractor, Government acceptance shall be constructively deemed to have occurred on the fifth working day after the contractor has delivered supplies or performed services in accordance with the terms and conditions of the contract, unless there is a disagreement over quantity, quality, or contractor compliance with a contract provision. When the contracting officer determines that a longer period for acceptance is appropriate due to the nature of the supplies or services to be received, inspected, tested, and accepted by the Government, the contracting officer shall modify paragraph (c)(2) of the clause by specifying the appropriate number of days directly below the title of the clause, in conformance with FAR 52.104(b). When more than a 15 calendar day acceptance period is to be established contractually, the contracting officer shall first obtain the written approvals of the head of the contracting activity and the program officer for the acquisition.

(6) *Exemptions.* The contracting officer shall not use the clause in contracts for utilities (gas, water, or electricity) when late payment charges are included in the contract or established by tariff, state, or local regulatory commissions.

### Subpart 632.4—Advance Payments

**632.402 General.**

(a) The Procurement Executive is the agency head for the purposes of FAR 32.402(c)(1)(iii).

(b) Advance payment provisions for acquisitions by overseas posts shall not be authorized without the prior approval of the Procurement Executive.

## PART 633—PROTESTS, DISPUTES, AND APPEALS

Sec.

**Subpart 633.1—Protests**

633.102 General.
633.103 Protests to the agency.
633.104 Protests to GAO.
633.105 Protests to GSBCA.

**Subpart 633.2—Disputes and Appeals**

633.203 Applicability.
633.211 Contracting officer's decision.
633.212 Contracting officer's duties upon appeal.
633.270 Disputes and appeals under DOS contracts subject to the Contract Disputes Act of 1978.
633.270-1 Scope of section.
633.270-2 Designation.
633.270-3 DOS support.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 633.1—Protests

**633.102 General.**

All communications relative to protests filed with the General Accounting Office (GAO) or the General Services Administration Board of Contract Appeals (GSBCA) shall be coordinated with the Office of the Legal Adviser.

**633.103 Protests to the agency.**

For protests filed with the Department and received before award, the contracting office shall obtain the advice of the Office of the Legal Adviser before making the determination under FAR 33.103(a).

**633.104 Protests to GAO.**

The following procedures implement the corresponding paragraphs of FAR 33.104.

(a) *General.* (1) Upon being telephonically advised by the GAO of the receipt of a protest, before or after award, the Office of the Legal Adviser shall inform the appropriate head of the contracting activity (see 601.603-70), who shall immediately notify the contracting officer. For protests concerning ADP acquisitions, the Office of the Legal Adviser shall also inform the Deputy Assistant Secretary for Information Systems. After receiving a copy of the protest from GAO and its request for an administrative report, the Office of the Legal Adviser shall promptly provide the same to the head of the contracting activity involved, who shall promptly provide a copy to the contracting officer and request a written report in conformance with FAR 33.104(a)(2).

(2) In addition to the requirements in FAR 33.104(a)(2), the report responsive to the protest shall be appropriately titled and dated, shall cite the GAO file number, and shall be prepared and signed by the contracting officer. The contracting officer shall prepare the report with the assistance of the Office of the Legal Adviser. If appropriate, the report shall contain a statement regarding any urgency for the acquisition and the extent to which a delay in award may result in significant performance difficulties or additional expense to the Government. If award is not urgent, the report shall include an estimate of the length of time an award may be delayed without significant expense or difficulty in performance. The head of the contracting activity shall submit to the Office of the Legal Adviser an original and two complete copies of the contracting officer's report. The contracting officer shall provide one complete copy to each interested party who responded to GAO, to the contracting officer, or to the Office of the Legal Adviser pursuant to the notification under paragraph (a)(3) below. In submitting the report to GAO, the Office of the Legal Adviser shall identify all parties to whom the report has been furnished.

(3) As required by FAR 33.104(a)(3) and 4 CFR 21.3, the contracting officer shall promptly notify all interested parties, including offerors (or the contractor if the protest is after award) involved in or affected by the protest, that a protest has been filed with the GAO and the basis for the protest. The contracting officer shall place a written record of such notifications in the contract file. The contracting officer shall promptly transmit by letter a copy of the protest to all interested parties previously notified and include a statement requiring furnishing of views and information directly to the GAO.

The contracting officer shall send copies of such cover letters concurrently to the Office of the Legal Adviser. Cover letters shall contain a specified period of time for submission of comments, in accordance with FAR 33.104(a)(3), and include instructions that any comments submitted to the GAO should also be submitted simultaneously to the contracting officer and the Office of the Legal Adviser. Materials submitted by the protester may be withheld from interested parties in accordance with 4 CFR 21.3(b).

(4) All DOS personnel shall handle protests on a priority basis. If the specific circumstances of the protest require a longer period than allowed under FAR 33.104(a)(3), the head of the contracting activity shall immediately notify the Office of the Legal Adviser, which shall prepare a written request for extension of the period in accordance with 4 CFR 21.3(d). The head of the contracting activity shall deliver the protest report to the Office of the Legal Adviser within 15 work days from the date of telephonic notification by the Office of the Legal Adviser. For reports involving use of the 10 work day express option provided at FAR 33.104(a)(4), the Office of the Legal Adviser shall establish the report delivery date after consultation with the head of the contracting activity.

(b) *Protests before award.* If a protest before award has been filed with GAO and the contracting officer determines in writing that it is necessary to make award under the circumstances in FAR 33.104(b)(1), the contracting officer shall first obtain advice from the Office of the Legal Adviser. The contracting officer shall submit the written determination to the head of the contracting activity for approval.

(f) *Notice to GAO.* The Procurement Executive is the agency head for the purposes of FAR 33.104(f). The head of the contracting activity is authorized to submit the report required in FAR 33.104(f). The report shall be submitted to the Comptroller General through the Office of the Legal Adviser. For decisions concerning ADP acquisitions, the head of the contracting activity shall provide a copy of the report to the Deputy Assistant Secretary for Information Systems.

**633.105 Protests to GSBCA.**

The following procedures implement FAR 33.105.

(a) Upon receipt of a copy of a protest to GSBCA, the contracting officer or the official designated in the solicitation shall immediately notify the Office of the Legal Adviser and the Deputy Assistant Secretary for Information Systems. The contracting officer is responsible for compliance with the requirements in FAR 33.105(a)(2). The contracting officer shall include in the contract file a record of such notifications to all parties and related correspondence with GSBCA. The contracting officer shall provide to the Office of the Legal Adviser a copy of the list of interested parties notified, simultaneously with submission of the list to the GSBCA.

(b) The contracting officer shall submit to the Office of the Legal Adviser an original and two copies of the protest file, documented in conformance with FAR 33.105(b), within 8 work days after the filing of a protest. The contracting officer also shall provide a complete copy of the file to the protester and all other interested parties within 10 work days after filing of the protest. The protest file shall be organized to comply with the requirements of Rule 4(b) of the GSBCA Rules of Procedure (48 CFR 61). The Office of the Legal Adviser shall then submit the file to the GSBCA within 10 work days after filing of the protest.

(c) The Office of the Legal Adviser shall represent the contracting officer at any hearing on suspension of the agency's delegation of procurement authority or at any hearing on the merits of the protest. The Office of the Legal Adviser shall notify the contracting officer and the Deputy Assistant Secretary for Information Systems of the results of any hearing.

(d) The Procurement Executive is the agency head for the purposes of FAR 33.105(e). The head of the contracting activity is authorized to execute the Determination and Findings (D&F) required in FAR 33.105(d)(1).

**Subpart 633.2—Disputes and Appeals**

**633.203 Applicability.**

The Procurement Executive is the agency head for the purposes of FAR 33.203(b).

**633.211 Contracting officer's decision.**

(a) In the second sentence of FAR 33.211(a)(4)(v), contracting officers shall replace "the Board of Contact Appeals" with "Armed Services Board of Contract Appeals, 200 Stovall Street, Alexandria, VA 22332."

(b) Prior to issuing a contracting officer's final decision, the contracting officer shall obtain assistance, as appropriate, from the Office of the Legal Adviser.

**633.212 Contracting officer's duties upon appeal.**

Upon receipt of a notice of appeal from a contractor the contracting officer shall notify the Office of the Legal Adviser, which will designate an attorney to represent the DOS before the Armed Services Board of Contract Appeals.

**633.270 Disputes and appeals under DOS contracts subject to the Contract Disputes Act of 1978.**

**633.270-1 Scope of section.**

This section concerns disputes arising under DOS contracts and the transfer of certain appellate and review functions from the Department of State to the Armed Services Board of Contract Appeals.

**633.270-2 Designation.**

The Armed Services Board of Contract Appeals (ASBCA) is the authorized representative of the Secretary of State and the Procurement Executive for the purposes of hearing and resolving disputes arising under DOS contracts subject to the Contract Disputes Act of 1978. The ASBCA shall hear and determine appeals by contractors from contracting officers' final decisions on disputed issues arising under DOS contracts subject to the Contract Disputes Act of 1978.

**633.270-3 DOS support.**

The Procurement Executive shall ensure the support of all DOS personnel in processing appeals before the ASBCA. The Procurement Executive is authorized to require such DOS officers and employees to cooperate for this purpose.

## SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

## PART 634—MAJOR SYSTEM ACQUISITION

Sec.
634.001 Definitions.
634.001-70 Supplemental definitions.
634.002 Policy.
634.003 Responsibilities.
634.004 Acquisition strategy.

Authority: 22 U.S.C. 2658, 40 U.S.C. 486(c), 48 CFR 1.3.

**634.001 Definitions.**

"Major system":

(a) The definition of "major system" in OMB Circular No. A–109, Major System Acquisitions (A–109), provides no exclusions; however, FAR 34.001 excludes from the definition of "major system" construction or other improvements to real property. Acquisition of capital project systems

by the Office of Foreign Buildings, which would otherwise be subject to the requirements of A–109 are thus exempted from these requirements. Under separate authority, the DOS has other existing controls that provide the necessary review, approval, and monitoring procedures to manage capital project systems acquisitions by the Office of Foreign Buildings.

(b) Pursuant to A–109 and paragraph (b) of the definition of "major system" prescribed in FAR 34.001, any DOS system shall be considered a major system if total acquisition costs with private industry are expected to equal or exceed $10,000,000.

(c) The acquisition executive is the agency head for the purposes of paragraph (c) of the definition of "major system" prescribed in FAR 34.001. The acquisition executive is authorized to designate as a major system acquisition any DOS system not expected to meet or exceed the $10,000,000 threshold identified in paragraph (b) above; provided, that the determination shall be made in accordance with the requirements of A–109, FAR Part 34, and this Part 634.

(d) Classification as a major system acquisition is independent of the number of component DOS contracting activities involved in the process. A major system acquisition may occur entirely within the jurisdiction of a single contracting activity or it may involve more than one DOS contracting activity.

(e) Each major system acquisition shall be in response to a need of one of the DOS major missions, which are identified in volume 1 of the Foreign Affairs Manual System.

**634.001–70 Supplemental definitions.**

Section five of A–109 defines several terms in addition to those defined in FAR 34.002.

**634.002 Policy.**

The objective of A–109 is to assure effectiveness and efficiency in acquiring major systems. Section six of A–109 provides general policy guidelines in addition to those prescribed in FAR 34.002.

**634.003 Responsibilities.**

(a) The Procurement Executive is the agency head for the purposes of FAR 34.003(a).

(b)(1) The Deputy Assistant Secretary for Operations is the agency head for the purposes of FAR 34.003(c) and the acquisition executive for the purposes of A–109. The acquisition executive shall ensure that the DOS implements A–109 and that the management objectives of A–109 are realized. The acquisition executive is responsible for—

(i) Designating a program manager for each major system acquisition;

(ii) Designating any DOS acquisition as a major system acquisition; and

(iii) Approving the written charter and project control system for each major system acquisition.

(2) The Office of Operations assists the acquisition executive in accomplishing the above responsibilities. The Office of Operations shall access the budget development and review process to identify potential major system acquisitions and bring them to the attention of the acquisition executive.

(c)(1) The Assistant Secretary for Administration is the agency head for the purposes of FAR 34.003(c)(3). As such, that officer makes four key decisions in each major system acquisition. These key decisions are summarized in section nine and elaborated in sections ten through thirteen of A–109.

(2) The key DOS executives, i.e., the Secretary, Deputy Secretary, Under Secretaries, and Assistant Secretaries, individually or as a group, participate in identifying and defining specific DOS mission needs to be fulfilled and in assigning priorities to these needs. These officers also assist the Assistant Secretary for Administration in making the key decisions identified in section nine of A–109.

(d) Heads of contracting activities (see 601.603–70) shall—

(1) Become familiar with the requirements of and ensure that contracting activity personnel are knowledgeable of A–109;

(2) Ensure that all potential major system acquisitions are brought to the attention of the acquisition executive;

(3) Recommend qualified candidates for designations as program managers for each major system acquisition within their jurisdictions;

(4) Ensure that program managers fulfill their responsibilities and discharge their duties;

(5) Cooperate with the acquisition executive and the Office of the Comptroller in implementing A–109 requirements;

(6) Adhere to the principles outlined in A–109 with regard to all major system acquisitions; and

(7) Use the principles outlined in the Circular as a guideline for other acquisitions.

(e) Program managers shall—

(1) Plan and carry out the proposed objective of the major system acquisition;

(2) Schedule and monitor all aspects of the project using an appropriate project control system;

(3) Provide analysis papers to recommend decisions to the key DOS executives (see subparagraph (c)(2)); and

(4) Document DOS compliance with A–109.

**634.004 Acquisition strategy.**

(a) Upon designation by the acquisition executive, the program manager shall assume operational responsibility for the planning and execution of the major system acquisition.

(b) The program manager shall work closely with the acquisition executive to develop a written charter outlining the authority, responsibility, accountability, and budget for accomplishing the proposed objective.

(c) The program manager shall develop a project control system to schedule, monitor, and regularly report on all aspects of the project. The control system shall be presented to the acquisition executive for approval. In developing the control system, the program manager shall provide for appropriate reporting periods and for checkpoints consistent with the key decisions prescribed in section nine of A–109.

(d) Upon initiation of the project, the program manager shall report regularly (at least monthly) to the acquisition executive on the progress achieved to that point. The reports shall include information with regard to the requirements of A–109 and how the objectives of the circular have been realized to present time. Also, the reports shall contain a statement as to what is planned for the next reporting period both in terms of the project itself and the requirements of A–109.

(e) As each key decision point is reached, the program manager shall prepare detailed analysis, findings, and recommendations to be submitted, through the acquisition executive, to the key DOS executives. The program manager shall also prepare additional reports and documentation as requested by the key DOS executives.

(f) The program manager shall work closely with the Office of the Comptroller, with regard to budgeting and financing for the major system and shall provide the necessary information to OMB and Congress as required by A–109.

## PART 636—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Sec.

Subpart 636.1—General

636.101 Applicability.
636.101–70 Exception.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 636.1—General

#### 636.101 Applicability.

#### 636.101–70 Exception.

Contracts for overseas construction, including capital improvements, alterations, and major repairs, may be excepted from the provisions of this Title under the authority of the Foreign Service Buildings Act of 1926, as amended, 22 U.S.C. 292 et seq., as further codified at section 474 of Title 40, Public Buildings, Property, and Works, of the U.S. Code.

## PART 637—SERVICE CONTRACTING

Sec.

Subpart 637.1—Service Contracts—General

637.103 Contracting officer responsibility.
637.104 Personal services contracts.
637.104–70 DOS personal services contracts.

Subpart 637.2—Consulting Services

637.204 Policy.
637.204–70 Supplemental policy.
637.205 Management control.
637.205–70 Supplemental management controls.
637.270 DOSAR contract clause.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 637.1—Service Contracts—General

#### 637.103 Contracting officer responsibility.

The Office of the Legal Adviser is the DOS legal counsel for the purposes of FAR 637.103(a)(2).

#### 637.104 Personal services contracts.

The Office of the Legal Adviser is the DOS legal counsel for the purposes of FAR 637.104(e).

#### 637.104–70 DOS personal services contracts.

(a) In accordance with FAR 37.104(b), DOS statutory authorities for personal services contracts are—

(1) For the Department, section 2(c) of the State Department Basic Authorities Act of 1956, as amended (22 U.S.C. 2669);

(2) For the Bureau for Refugee Programs, section 5(a)(6) of the Migration and Refugee Assistance Act of 1962, as amended (22 U.S.C. 2605);

(3) For the Bureau for International Narcotics Matters, section 636(a)(3) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2396);

(4) For the Foreign Service Institute, section 704(a)(4) of the Foreign Service Act of 1980, as amended (22 U.S.C. 4024);

(5) For the the Office of Foreign Missions, section 208(d) of Title II—Authorities Relating to the Regulation of Foreign Missions, of the State Department Basic Authorities Act of 1956, as amended (22 U.S.C. 4308);

(6) For the Office of Foreign Buildings, section 5 of the Foreign Service Buildings Act, 1926, as amended (22 U.S.C. 296); and

(7) For the Bureau of International Organization Affairs, the separate State Department appropriations acts.

(b)(1) DOS contracting activities may not enter into personal services contracts pursuant subparagraph (a)(1) above unless the Procurement Executive has redelegated specific authority for such contracts.

(2) DOS contracting activities may not enter into personal services contracts pursuant to the authorities of (a)(2) through (a)(6) unless the office identified with each authority has approved use of the authority and, as necessary, the Procurement Executive has redelegated specific authority for such contracts.

### Subpart 637.2—Consulting Services

#### 637.204 Policy.

#### 637.204–70 Supplemental policy.

In addition to the policy prescribed in FAR 37.204(c), consulting services will normally be obtained on an intermittent or temporary basis; repeated or extended contracts are not to be effected except under extraordinary circumstances and with the prior approval of the head of the contracting activity (see 601.603–70). Also, grants and cooperative agreements may not be used as legal instruments for consulting services arrangements.

#### 637.205 Management controls.

The following regulations implement FAR 37.205.

(a) The Assistant Secretary for Administration is the DOS consulting services manager.

(b) All requests for consulting services contracts must be submitted first to the Office of Management, Bureau of Personnel (PER/MGT). PER/MGT shall review the request for appropriateness and forward the request to the Office of Foreign Service Career Development and Assignments (PER/FCA). Provided there are no in-house staff resources available to meet the request or which cannot be made available within a reasonable period of time, PER/FCA will issue a Certificate of Need. PER/MGT also shall obtain from the Office of Position and Pay Management (PER/PPM) guidance on the appropriate pay range for the work. Except for requests for consulting services contracts of $50,000 or more, PER/MGT shall forward the complete package to the contracting activity.

(c) Requests for consulting services contracts of $50,000 or more shall be forwarded by PER/MGT to and for the approval of the Assistant Secretary for Administration, after completion of the documentation identified in paragraph (b) above. The approved request shall then be forwarded to the contracting activity or, in the case of requests by overseas posts, to the appropriate geographic bureau.

(d) Individuals assigned responsibility for administering DOS consulting services contracts, including evaluating contractor performance, shall do so in accordance with FAR Part 42 and Part 642. In the event of deficient performance, the contract administrator shall provide prompt written notice to the contractor, with a copy of the notice to the contracting officer. Within 30 days after completion of the contractor's work, the contract administrator shall complete and deliver to the contracting officer Department of State Form (DS) 1771, Contractor Evaluation Statement (illustrated in 653.303–DS–1771).

(e) *Overseas posts.* Overseas posts shall transmit to the appropriate geographic bureau each request for a consulting services contract. Overseas posts shall enter into consulting services contracts only upon receipt of clearance from the geographic bureau. In considering such requests, the bureau shall follow the approval and authorization procedures prescribed in paragraphs (b) and (c) above. Post contracting officers shall observe the management controls specified in FAR 37.205 and this subpart in the award and administration of such contracts.

#### 637.205–70 Supplemental management controls.

In addition to the requirements in FAR 37.205—

(a) The office requesting a consulting services contract shall include in the request—

(1) A statement certifying that the services are purely advisory in nature, do not include the performance or supervision of operating functions, and are not personal in nature, i.e., the contract will not be characterized by an employer-employee relationship

between the Government and the consultant; and

(2) Specific evaluation criteria along with the proposed weights for each criterion for use in selecting the best qualified offeror.

(b) The contracting officer shall ensure that awards over $10,000 for consulting services contracts are identified and reported as part of the contracting activity's Federal Procurement Data System submissions (see 604.602–70).

(c) Each contracting activity or, in the case of requests by overseas posts, the appropriate geographic bureau, shall maintain a list of current consulting services contracts, to include the contract number, date of award, requesting activity, type of award (full and open competition or statutory authority for other than full and open competition), name and address of awardee, contract price, and a brief description of the services.

**652.237-70 DOSAR contract clause.**

The contracting officer shall include the clause at 652.237–70, Reports (Consulting Services), in solicitations and contracts for consulting services that require submission of written reports.

## SUBCHAPTER G—CONTRACT MANAGEMENT

## PART 642—CONTRACT ADMINISTRATION

Sec.

Subpart 642.2—Assignment of Contract Administration

642.270 Contracting Officer's Representative (COR)
642.271 DOSAR contract clause.

Subpart 642.5—Corporate Administrative Contracting Officer

642.502 Assignment and location.

Subpart 642.14—Traffic and Transportation Management

642.1406–2 Contract clause.
642.1406–2–70 DOSAR contract clauses.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 642.2—Assignment of Contract Administration

**642.270 Contracting Officer's Representative (COR).**

(a) Contracting officers may designate technically qualified personnel as their authorized representatives to assist in the administration of contracts. The COR must be a U.S. Government employee. The contracting officer shall provide to the COR a written appointment that shall define the scope and limitations of the COR's authority. The contracting officer shall provide a copy of the COR's appointment to the contractor and, as necessary, copies to the requirements and payments offices. The COR shall not be authorized to make any commitments or changes that will affect the price, quality, quantity, or delivery terms of a contract.

(b) Contracting officers also may designate technically qualified personnel as their authorized representatives to assist in the administration of small purchases and other simplified purchase procedures. The authorities delegated under such appointments may not exceed those provided in paragraph (a) above.

**642.271 DOSAR contract clause.**

The contracting officer shall insert the clause at 652.242–70, Contracting Officer's Representative, in solicitations and contracts when appointment of a contracting officer's authorized representative is anticipated.

### Subpart 642.5—Corporate Administrative Contracting Officer

**642.502 Assignment and location.**

The Procurement Executive is the agency head for the purposes of FAR 42.502(a).

### Subpart 642.14—Traffic and Transportation Management

**642.1406–2 Contract clause.**

**642.1406–2–70 DOSAR contract clauses.**

(a) The contracting officer shall insert the clause at 652.242–71, Notice of Shipment, in solicitations and contracts entered into and performed outside the United States, when overseas shipment of supplies is required.

(b) The contracting officer shall insert the clause at 652.242–72, Shipping Instructions, solicitations and contracts with a source in the United States and overseas shipment of supplies is required.

## PART 643—CONTRACT MODIFICATIONS

Sec.

Subpart 643.1—General

643.102 Policy.
643.102–70 Contract compliance and review.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 643.1—General

**643.102 Policy.**

**643.102–70 Contract compliance and review.**

(a) When applicable, the contracting officer shall ensure the proposed contract modification complies with the competition requirements of FAR Part 6 and DOSAR Part 606.

(b) Subpart 601.70 prescribes the review requirements for modifying contracts for supplies and services, including construction. The contracting officer shall submit such contract modifications to the Office of the Procurement Executive when the modification itself exceeds $100,000, when the modification will cause the contract to exceed $100,000, or when any proposed change under the modification results in an increase or decrease exceeding $100,000 in any of the individual cost elements of the existing contract.

## PART 645—GOVERNMENT PROPERTY

Sec.

Subpart 645.3—Providing Government Property to Contractors

645.302 Providing facilities.
645.302–1 Policy.

Subpart 645.6—Reporting, Redistribution, and Disposal of Contractor Inventory

645.606 Screening of contractor inventory.
645.606–6 Waiver of screening requirements.
645.610 Sale of surplus contractor inventory.
645.610–2 Exemptions from sale by GSA.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 645.3—Providing Government Property to Contractors

**645.302 Providing facilities.**

**645.302–1 Policy.**

The Procurement Executive is the agency head for the purposes of FAR 45.302–1(a)(4).

### Subpart 645.6—Reporting, Redistribution, and Disposal of Contractor Inventory

**645.606 Screening of contractor inventory.**

**645.606–6 Waiver of screening requirements.**

The Procurement Executive is the agency head for the purposes of FAR 45.606–6.

645.610 Sale of surplus contractor inventory.

645.610-2 Exemptions from sale by GSA.

The Procurement Executive is the agency head for the purposes of FAR 45.610-2(a).

## PART 646—QUALITY ASSURANCE

Sec.

Subpart 646.7—Warranties

646.710 Contract clauses.
646.710-70 DOSAR contract clause.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 646.7—Warranties

646.710 Contract clauses.

646.710-70 DOSAR contract clause.

The contracting officer shall insert the clause at 652.246-70, Commercial Warranty, in solicitations and contracts for commercial supplies or services awarded and performed outside the United States.

## PART 648—VALUE ENGINEERING

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### Subpart 648.1—Policies and Procedures

648.102 Policies.

The Procurement Executive is the agency head for the purposes of FAR 48.102.

## SUBCHAPTER H—CLAUSES AND FORMS

## PART 652—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Sec.
652.000 Scope of part.

Subpart 652.1—Instructions for Using Provisions and Clauses

652.100 Scope of subpart.
652.100-70 Policy.
652.102 Incorporating provisions and clauses.
652.102-1 Incorporation by reference.

Subpart 652.2—Texts of Provisions and Clauses

652.200 Scope of subpart.
652.203-70 Definitions.
652.204-70 Security requirements.
652.204-71 Security requirements—personnel.
652.214-70 Language version.
652.214-71 Notices.
652.214-72 Authorization to perform.
652.216-70 Ordering—indefinite delivery contracts.
652.228-70 Indemnification.
652.229-70 Excise tax exemption statement for contractors within the United States.
652.232-70 Prompt payment.
652.232-71 Method of payment.
652.237-70 Reports (consulting services).
652.242-70 Contracting officer's representative (COR).
652.242-71 Notice of shipments.
652.242-72 Shipping instructions.
652.246-70 Commercial warranty.

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

### 652.000 Scope of part.

This part sets forth solicitation provisions and contract clauses, in addition to those prescribed in FAR Part 52, for use in DOS acquisitions.

### Subpart 652.1—Instructions for Using Provisions and Clauses

### 652.100 Scope of subpart.

### 652.100-70 Policy.

(a) The solicitation provisions and contract clauses in FAR Subpart 52.2 or this Subpart 652.2 shall be used as prescribed therein, except when the use of any provision or clause is prohibited by or inconsistent with local laws, or the supplies or services could not be obtained if the provision or clause were to be included.

(b) The contracting officer shall justify the exclusion of any provisions or clauses in accordance with FAR Subpart 1.4 and 601.470.

### 652.102 Incorporating provisions and clauses.

### 652.102-1 Incorporation by reference.

The Procurement Executive is the agency head for the purposes of FAR 52.102-1(a)(2)(ii).

### Subpart 652.2—Texts of Provisions and Clauses

### 652.200 Scope of subpart.

This subpart sets forth the text of all DOSAR provisions and clauses, and for each provision and clause provides a cross-reference to the location in the DOSAR that prescribes its use.

### 652.203-70 Definitions.

As prescribed in 603.201-70, insert the following clause in solicitations and contracts if the contract will be performed outside the United States.

**Definitions (Apr 1987)**

"American Embassy" and "Embassy" mean the diplomatic or consular mission of the United States of America for which all supplies or services are provided under the contract.

"Department" means the Department of State, including all of its activities wherever located.

"Government" means the Government of the United States of America, unless specifically stated otherwise.

(End of clause)

### 652.204-70 Security requirements.

As prescribed in 604.404-70, insert the following clause in solicitations and contracts performed outside the United States to the extent the contract involves access to classified information ("Confidential," "Secret," or "Top Secret") or administratively controlled information ("Limited Official Use"). Contractors or contract employees that are not U.S. citizens shall not have access to classified or administratively controlled information.

**Security Requirements (Apr 1987)**

(a) This clause applies to the extent that this contract involves information the Government has determined to be classified ("Confidential," "Secret," or "Top Secret," hereinafter referred to as "classified") or administratively controlled ("Limited Official Use," hereinafter referred to as "administratively controlled").

(b) The Contractor (1) shall be responsible for safeguarding all classified or administratively controlled information in accordance with paragraph (d) below and shall not supply, disclose, or otherwise permit any unauthorized person access to classified or administratively controlled information; (2) shall not make or permit to be made any reproductions of classified information or administratively controlled information, except with the prior written authorization of the Contracting Officer, Post Security Officer, or Regional Security Officer; (3) shall submit to the Contracting Officer, at such times as the Contracting Officer may direct, an accounting of all reproductions of classified or administratively controlled information; and (4) shall not incorporate in any other project any matter which will disclose classified or administratively controlled information except with the prior written authorization of the Contracting Officer.

(c) The Contractor shall not permit any non-U.S. citizen access to classified or administratively controlled information. The Contractor shall not permit any individual access to classified information without the prior written authorization of the Contracting Officer, Post Security Officer, or Regional Security Officer.

(d) The Contractor shall follow the procedures for classifying, marking, handling, transmitting, disseminating, storage, and destroying official materials in accordance with the Uniform Regulations (Foreign Affairs Manual, Volume 5, Chapter 900, "Policy and Procedural Security"). The Contracting Officer, Post Security Officer, or Regional Security Officer shall provide a copy of this document to the Contractor. The Contracting Officer shall provide any supplements to these regulations to the Contractor in writing.

(e) The Contractor agrees to submit immediately to the Contracting Officer, Post Security Officer, a complete detailed report, appropriately classified, of any information which the Contractor may have concerning existing or threatened espionage, sabotage, or subversive activity.

(f) The Government agrees that when necessary it shall indicate by security classification or administratively controlled designation the degree of importance to the national security of information to be furnished by the Contractor to the Government or by the Government to the Contractor. The Government shall give written notice to the Contractor of such security classification or administratively controlled designation and of any subsequent changes thereof. The Contractor shall rely on any letter or other written instrument signed by the Contracting Officer changing a security classification or administratively controlled designation of information.

(g) The Contractor agrees to certify after completion of this contract that it has surrendered or disposed of all classified or administratively controlled information in its custody in accordance with applicable security regulations or instructions.

(End of clause)

**652.204-71 Security requirements—personnel.**

As prescribed in 604.404-70, insert the following clause in solicitations and contracts performed outside the United States.

**Security Requirements—Personnel (Apr 1987)**

The Contractor agrees, if directed by the Contracting Officer, to furnish the Government with the name, date and place of birth, current address, and such other biographical information as is readily available to the Contractor, concerning any individual before permitting said individual to perform under this contract. The Contractor further agrees to permit only those individuals approved by the Government to be used in the performance of this contract.

(End of clause)

**652.214-70 Language version.**

As prescribed in 614.201-70(a), insert the following clause in solicitations and contracts effected and performed outside the United States, except when the Procurement Executive has approved a waiver of this clause.

**Language Version (Apr 1987)**

The English language version of this contract is the official version and binding on both parties.

(End of clause)

**652.214-71 Notices.**

As prescribed in 614.270(b), insert the following clause in solicitations and contracts entered into and performed outside the United States.

**Notices (Apr 1987)**

Any notice or request relating to this contract given by either party to the other shall be in writing. Said notice or request shall be mailed or delivered by hand to the other party at the address provided in the schedule of the contract. All modifications to the contract must be made in writing by the Contracting Officer.

(End of Clause)

**652.214-72 Authorization to perform.**

As prescribed in 614.270(c), insert the following clause in solicitations and contracts performed outside the United States.

**Authorization to perform (Apr 1987)**

The Contractor warrants that: (a) It has obtained authorization to operate and do business in the country or countries in which this contract will be performed; (b) it has obtained, at no cost to the Government, all necessary licenses and permits required to perform this contract; and (c) it shall comply fully with all laws, decrees, labor standards and regulations of said country or countries during the performance of this contract.

(End of clause)

**652.216-70 Ordering—indefinite delivery contract.**

As prescribed in 616.505-70, insert the following clause in solicitations and contracts when a definite-quantity contract, a requirements contract, or an indefinite-quantity contract is contemplated.

**Ordering—Indefinite Delivery Contract (Apr 1987)**

The Government shall use one of the following forms to issue orders under this contract:

(a) Optional Form (OF) 347, Order for Supplies or Services;

(b) Optional Form (OF) 206, Purchase Order, Receiving Report and Voucher; or

(c) Department of State Form (DST) 1060, Order—Supplies or Services.

(End of clause)

**652.228-70 Indemnification.**

As prescribed in 628.7001(b), insert the following clause in solicitations and contracts when the contractor's assumption of risk is in the best interest of the Government.

**Indemnification (Apr 1987)**

The Contractor expressly agrees to indemnify and to save the Government, its officers, agents, servants, and employees harmless from and against any claim, loss, damages, injury, and liability, however caused, resulting from or arising out of the Contractor's fault or negligence in connection with the performance of work under this contract. Further, any negligence or alleged negligence of the Government, its officers, agents, servants, or employees, shall not bar a claim for indemnification unless the act or omission of the Government, its officers, agents, servants, or employees is the sole competent, and producing cause of such claim, loss, damages, injury, or liability.

(End of clause)

**652.228-70 Excise tax exemption statement for contractors within the United States.**

As prescribed in 629.401-70, insert the following clause in solicitations and contracts if the prospective contractor is located inside the United States and the acquisition involves export of supplies to an overseas post.

**Excise Tax Exemption Statement for Contractors Within the United States (Apr 1987)**

This is to certify that the item(s) covered by this contract is/are for export solely for the use of the U.S. Foreign Service Post identified in the contract schedule.

The Contractor shall use a photocopy of this contract as evidence of intent to export. Final proof of exportation may be obtained from the agent handling the shipment. Such proof shall be accepted in lieu of payment of excise tax.

(End of clause)

**652.232-70 Prompt payment.**

As prescribed in 632.111-70(a) insert the following clause in all solicitations, contracts, and orders, except as provided in 632.111-70(a)(6).

**Prompt Payment (Apr 1987)**

Notwithstanding any other payment provision in this contract, the Government will make invoice payments and contract financing payments under the terms and conditions specified in this clause. Payment shall be considered as being made on the date on which a check for payment is dated or a wire transfer is made. All days referred to in this clause are calendar days, unless otherwise specified.

(a) *Designated payment office.* The designated payment office for this contract or order is shown in Block 25 of Standard Form 33, Solicitation, Offer and Award, or Block 12 of Standard Form 26, Award/Contract, of the contract, or as shown in other applicable contract or order documents.

(b) *Contractor's representative.* The Contractor shall provide to the designated payments office and the Contracting Officer the name, title, address, and telephone number of its representative for matters pertaining to payments.

(c) *Payment due date.* (1) The due date for making invoice payments by the designated payment office shall be the later of the following two events: (i) The 30th day after the Government office designated to receive invoices has received a proper invoice from the Contractor, or (ii) the 30th day after Government acceptance of supplies delivered or services performed by the Contractor. However, on a final invoice for any balance of funds due the Contractor for supplies delivered or services performed under the contract but where the payment amount is subject to contract settlement actions, acceptance shall be deemed to have occurred on the effective date of the contract settlement.

(2) For purposes of computing any interest penalty that might be due the Contractor, Government acceptance shall be constructively deemed to have occurred on the fifth working day after the Contractor delivered the supplies or completed performance of the services in accordance with the terms and conditions of the contract, unless there is a disagreement over quantity, quality, or Contractor compliance with a contract provision.

(3) When the payment due date is based on constructive acceptance by the Government, and not on formal acceptance by the Government, payment shall not constitute formal acceptance, and the Contractor may be required to repay the amounts paid, including shipping costs, for any supplies or services the Government later determines to be unacceptable. Also, when the contract or order provides that the supplies are shipped f.o.b. origin and final inspection and acceptance will occur at the ultimate destination point, payment for such supplies shall not constitute final acceptance.

(4) The Contracting Officer or designee shall notify the Contractor of any non-conforming supplies.

(d) *Invoice requirements.* (1) An invoice is the Contractor's written request for payment under the contract for supplies delivered or services rendered to the Government. The Contractor shall prepare and submit each invoice to the designated payment office (see paragraph (a) of this clause) or to the office designated to receive invoices as specified in the contract. Unless otherwise provided in the contract, the Contractor shall prepare each invoice in quadruplicate, with one copy marked "original."

(2) A proper invoice must include the following:

(i) Name and address of the Contractor;

(ii) Invoice date and number;

(iii) Contract number or other authorization for supplies delivered or services rendered, including the order number and/or contract line item number(s);

(iv) Description of supplies or services;

(v) Quantities and unit measures of supplies delivered or services rendered;

(vi) Unit prices, extended prices, and total price billed;

(vii) Shipping terms for supplies (see subparagraph (d)(3) below);

(viii) Payment terms, e.g., prompt payment discount terms, cash discounts, or net;

(ix) Name and address of the Contractor's official or office, which must be the same as that in the contract or on a proper notice of assignment, to which payment is to be sent;

(x) Name, title, telephone number, and complete mailing address of the Contractor's official to be notified in the event of an improper invoice; and

(xi) Any other information or documentation required by other clauses in the contract.

(3) *Shipping terms.* When the invoice includes supplies shipped by the Contractor, the Contractor shall include on the invoice the shipment number and date of shipment and such other documentation or information required by the contract or order. The invoice shall show parcel post charges, if any, as a separate item, indicating the gross weight and shipping point. Prepaid freight or express charges must be supported by the original freight or express receipts. For supplies shipped f.o.b. origin, the invoice shall include proper documentation that the supplies have been delivered to and accepted for shipment by an approved carrier. For supplies shipped on Government bills of lading, the invoice shall include the bill of lading number and net weight of shipment.

(4) If an invoice does not contain the required information, the Government reserves the right to reject the invoice as improper and return it to the vendor within 15 days of receipt at the office designated to receive invoices. Whenever the invoice is returned, the Government shall not establish a payment due date until the Contractor submits a proper invoice.

(e) *Interest penalties.* The Prompt Payment Act (Pub. L. 99–177) requires payment of interest to a Contractor if payment is not made for property or services within 15 days after the specified payment due date (see paragraph (c) above). The interest penalty shall be paid by the Government, without request from the Contractor. Application of interest penalties shall be as follows.

(1) Interest due the Contractor shall be at the rate applicable on the payment date, as established by the U.S. Secretary of the Treasury under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611) and published in the Federal Register.

(2) Interest shall be calculated from the first day after the payment due date through the payment date.

(3) Interest penalities remaining unpaid for any 30 day period shall be added to the principal; thereafter, interest penalties shall accrue monthly on the total of principal and previously accrued interest. Interest penalties shall not continue to accrue after filing of a claim under the Contract Disputes Act of 1978 or for more than one year.

(4) An interest penalty shall be paid if the Government takes a discount after the discount period has expired, and fails to correct the underpayment within 15 days after the expiration of the discount period. The interest penalty will be calculated on the amount of discount taken for the period beginning with the first day after the end of the discount period through the date when the Contractor is paid.

(5) An interest penalty shall be paid if the Government fails to make notification of an improper invoice within 15 days of receipt of an invoice at the office designated to receive invoices (3 days for meat or meat food products and 5 days for perishable agricultural commodities). The corrected, proper invoice shall be reduced by the number of days between the 15th day and the day notification was transmitted to the business concern. Calculation of interest penalties, if any, shall be based on an adjusted due date reflecting the reduced number of days allowable for payment.

(f) *Payments for contract financing requests.* A contract financing payment is the disbursement of monies to a Contractor for operating capital incidental to contract performance, such as advance payments and interim cost-reimbursements. The Contractor shall prepare contract financing requests in accordance with the contract financing terms included in the contract or as directed by the Contracting Officer. The Government will process such financing requests as expeditiously as possible, but not later than 30 days after receipt of a proper financing request by the office designated to receive contract financing requests. In the event that an audit or other review of a specific financing request is required to ensure compliance with the terms and conditions of the contract, the designated payment office is not compelled to make payment by the due date specified. Contract financing payments shall not be assessed an interest penalty for payment delays, and are therefore not subject to the terms of paragraph (e) of this clause.

(End of clause)

**652.232–71 Method of payment.**

As prescribed in 632.111–70(b), insert the following clause in all solicitations, contracts, and orders when the value of the contract or order is expected to be $10,000 or more.

**Method of Payment (Apr 1987)**

(a) Payments under this contract shall be made either by check or by wire transfer through the Treasury Financial Communications System, at the option of the Government.

(b) The designated payment office for this contract or order is shown in Block 25 of Standard Form 33, Solicitation, Offer and Award, or Block 12 of Standard Form 26, Award/Contract, of the contract, or as shown in other applicable contract or order documents.

(c) Not later than seven days after receipt of notice of award, the Contractor shall provide to the designated payments office and the Contracting Officer the following information:

(i) Name, address, and telegraphic abbreviation of the Contractor's receiving financial institution;

(ii) Contractor's name and account number at the receiving financial institution;

(iii) Receiving financial institution's 9-digit American Bankers Association (ABA) identifying number for routing transfer of funds (provide this number only if the receiving financial institution has a access to the Federal Reserve Communications System, otherwise indicate "N/A");

(iv) If the receiving financial institution does not have access to the Federal Reserve Communications System, provide the name, address, telegraphic abbreviation, and 9-digit ABA identifying number of the correspondent financial institution through which the Department may route electronic funds transfer messages and payments to the receiving financial institution; and

(v) Name, title, address, and telephone number of the Contractor's representative for matters pertaining to its bank account and the above information.

(d) The Contractor shall provide written notification of any changes to the information furnished under this clause to the designated payment office and the Contracting Officer. The Contractor shall provide this information

at least thirty days before the effective date of the change.

(e) The document furnishing the information required under this clause must be dated and contain the signature, title, and telephone number of the contractor official authorized to provide it as well as the contractor's name and contract number.

(End of clause)

**652.237-70 Reports (consulting services).**

As prescribed in 637.270, insert the following clause in solicitations and contracts for consulting services.

**Reports (Consulting Services) (Apr 1987)**

The Contractor shall submit all reports with covers that display the following information:

(1) Name and business address of the Contractor;

(2) Contract number;

(3) Contract dollar amount (including modifications);

(4) Type of award, i.e., full and open competition or statutory authority for other than full and open competition;

(5) Name of the individual who requested the consulting services, and the name and telephone number of the requesting individual's office; and

(6) The following notation: Note: Public Law 97-101, section 412 required that upon transfer of the contents of this report, or any other Government document, the new document shall appropriately identify the contract and contractor involved in the development of this report.

(End of clause)

**652.243-70 Contracting officer's representative (COR).**

As prescribed in 642.271, insert the following clause in solicitations and contracts when one or more contracting officer representatives are required.

**Contracting Officer's Representative (COR) (Apr 1987)**

The Contracting Officer may designate in writing one or more Government employees, by name and position title, to take action for the Contracting Officer under this contract. Each designee shall be identified as a Contracting Officer's Representative (COR). Such designation(s) shall specify the scope and limitations of the authority so delegated; provided, that the designee may not change the terms or conditions of the contract, unless the COR is a warranted Contracting Officer and this authority is delegated in the designation.

(End of clause)

**652.242-71 Notice of shipments.**

As prescribed in 642.1406-270(a), insert the following clause in solicitations and contracts entered into and performed outside the United States, when overseas shipment of supplies is required.

**Notice of Shipments (Apr 1987)**

At the time of delivery of supplies to a carrier for onward transportation, the Contractor shall give notice of prepaid shipment to the consignee establishment, and to such other persons as instructed by the Contracting Officer. If the Contractor has not received such instructions by 24 hours prior to the delivery time, the Contractor shall contact the Contracting Officer and request instructions from the Contracting Officer concerning the notice of shipment to be given.

(End of clause)

**652.242-72 Shipping instructions.**

As prescribed in 642.1406-270(b), insert the following clause in solicitations and contracts with a source in the United States and requiring overseas shipment of supplies.

**Shipping Instructions (Apr 1987)**

(a) Each packing box shall be of solid construction in accordance with best commercial practices and sufficiently strong in direct ratio to the weight of the contents to withstand excessively rough handling while in transit overseas. It shall be constructed of lumber that is well seasoned, reasonably sound, free from bad cross grain and from knots or knotholes that interfere with nailing or that occupy more than ⅓ of the width of the piece of lumber. Box shall be constructed with three-way corners and diagonal bracing. All nails shall be cement-coated, of correct size and properly spaced to avoid splitting or warping, and shall be driven into the grain of the wood. Dimension of lumber shall be in accordance with the following table, dependent upon the weight of the contents:

| Weight of box and contents | Minimum dimensions of lumber for skids, frame members, and single diagonal braces |
|---|---|
| Up to 100 lbs. | ¾" x 2¼" |
| 101 to 250 lbs. | ⅛" x 2⅛" |
| 251 to 400 lbs. | ⅛" x 3⅛" |
| 401 to 650 lbs. | ⅛" x 4⅛" or 1" x 3⅛" |

(b) Each box shall be lined with waterproof paper and shall be bound with ¾" steel straps firmly stapled in position to prevent the straps from slipping off the box. Articles must be secured and braced inside the shipping container to prevent the articles from shifting.

(c) Packing cases weighing 1000 pounds and more must be equipped with skids. Each skid shall consist of two end sections of 2 x 6-inch lumber placed flat and a center section of 2 x 4-inch lumber placed flat and then arranged in line to provide 10-inch forklift spaces between center and end sections. When goods are ready for shipment, the Contractor shall prepare four (4) copies of a packing list, indicating the contract and, if applicable, order numbers; case number; itemized list of contents; net and gross weights in pounds and kilograms; and outside dimensions, including all clears, of each shipping container. The Contractor shall provide three (3) copies of the packing list to the U.S. Despatch Agent specified in the contract or order. The Contractor shall place the fourth copy of the packing list in the packing case number one, which shall be marked as such so that it is easily identified by the consignee. Upon receipt of the packing list, the Despatch Agent will furnish export marks and instructions regarding shipment to the port specified, depending upon steamer services available at the time.

(d) The export marks shall be stenciled on one side of each box reserved for that purpose, and the appropriate case number stenciled in the lower left-hand corner of the same side. The contract and, as necessary, order numbers, net and gross weights in pounds and kilograms shall be stenciled on the same side. (One kilogram equals 2.2046 pounds avoirdupois.) However, if the size of the box is too small to accommodate all stenciling on one side, the contract and order numbers and weights may be stenciled on the side opposite that used for the export marks and case number.

(e) The contract and, as necessary, order numbers must appear on all containers and papers relating to this clause.

(End of clause)

**652.246-70 Commercial warranty.**

As prescribed in 646.710-70, insert the following clause in solicitations and contracts for commercial supplies or services awarded and performed outside the United States.

**Commercial Warranty (Apr 1987)**

The Contractor agrees that the supplies or services furnished under this contract shall be covered by the most favorable commercial warranties the Contractor gives to any customer for such supplies or services. The rights and remedies provided herein are in addition to and do not limit any rights afforded to the Government by any other clause of this contract.

(End of clause)

## PART 53—FORMS

Sec.
653.000 Scope of part.

Subpart 653.1—General

653.101 Requirements for use of forms.
653.101-70 Policy.
653.107 Obtaining forms.
653.110 Continuation sheets.

Subpart 653.2—Prescription of Forms

653.200 Scope of subpart.
653.213 Small purchase and other simplified purchase procedures (OF 206, OF 206A, DST 1089, OF 127).
653.237 Service contracting (DS 1771).

Subpart 653.3—Illustrations of Forms

653.300 Scope of subpart.
653.302.127 Optional Form 127, Receiving and Inspection Report
653.302.206 Optional Form 206, Purchase Order, Receiving Report and Voucher
653.302.206A Optional Form 206A, Purchase Order, Receiving Report and Voucher—Continuation Sheet

653.303–DS–1771 Department of State Form (DS) 1771, Contractor Evaluation Statement

653.303–DST–1069 Department of State Form 1069, Order—Supplies or Services

Authority: 22 U.S.C. 2658; 40 U.S.C. 486(c); 48 CFR 1.3.

**653.000 Scope of part.**

This part prescribes DOSAR forms in addition to those provided in FAR Part 53.

## Subpart 653.1—General

**653.101 Requirements for use of forms.**

**653.101–70 Policy.**

(a) The forms in FAR Subpart 53.2 or in Subpart 653.2 shall be used as prescribed therein, except when the use of any form is prohibited by or inconsistent with local laws, or the supplies or services could not be obtained if the form were used.

(b) The contracting officer shall justify the exclusion of any form in accordance with FAR Subpart 1.4 and 601.470.

**653.107 Obtaining forms.**

(a) Contracting activities at overseas posts may need to use Federal Standard Requisition and Issuance Procedure (FEDSTRIP) requisitioning to obtain standard and optional forms.

(b) Contracting activities shall obtain DOS forms from the appropriate source listed in Appendix A of section 060, Volume 2 of the Foreign Affairs Manual.

**653.110 Continuation sheets.**

The provisions of FAR 53.110 also apply to forms prescribed in the DOSAR.

## Subpart 653.2—Prescription of Forms

**653.200 Scope of subpart.**

This subpart prescribes or references optional and DOS forms for use in acquisition. Consistent with FAR 53.200, this subpart is arranged by subject matter, in the same order as and keyed to the parts of the DOSAR in which the form usage requirements are addressed.

**653.213 Small purchase and other simplified purchase procedures (OF 206, OF 206A, DST 1069, OF 127).**

As provided in FAR 53.213(e), the following forms are approved for use in lieu of Optional Forms 347 and 348.

(a) Optional Form (OF) 206, Purchase Order, Receiving Report and Voucher, and Optional Form 206A, Continuation Sheet (see 613.505–2(a)(1)).

(b) Department of State Form (DST) 1069, Order—Supplies or Services (see 613.505–2(a)(2); also see 613.505–2(c)(2) regarding replacement of the "Terms and Conditions Applicable to Purchase Orders," which are located on the reverse of the original copy of the DST 1069).

(c) When using OF 206, contracting activities may use Optional Form 127, Receiving and Inspection Report, for that purpose (see 613.505–2(c)(1)).

**653.237 Service contracting (DS 1771).**

Department of State Form (DS) 1771, Contractor Evaluation Statement. DS 1771, prescribed in 637.205(d), shall be used to evaluate consulting services contracts.

## Subpart 653.3—Illustrations of Forms

**653.300 Scope of subpart.**

This subpart contains illustrations of forms prescribed in the DOSAR but not illustrated in FAR Subpart 53.3. Forms are numbered in sequence, with optional forms preceded by "653.302" and DOS forms preceded by "653.303," in accordance with FAR Subpart 53.3.

653.303-DS-1771 DEPARTMENT OF STATE FORM (DS) 1771, CONTRACTOR EVALUATION STATEMENT

DEPARTMENT OF STATE

WASHINGTON, D.C. 20520

## CONTRACTOR EVALUATION STATEMENT

| (If additional space is required, continue on blank paper, referencing items by number) | Date Prepared |
|---|---|

NOTE: The information contained on this form is for the internal use of the Department of State and shall not be disclosed outside the Department except as authorized by the Assistant Secretary of State for Administration

| TO: Chief Contract Section<br>OPR/ST/P, Room 530, SA6<br>Washington, D.C. 20520 | FROM: (Name and location of program office) |
|---|---|
| Name and Address of Contractor | Contract No. |

### I. EVALUATION OF CONTRACTOR'S PERFORMANCE

1. Explain the contractor's performance as compared to the requirements of the statement of work and its proposal, including quantity, quality, and timeliness of work done.

2. Explain relationship of contractor's personnel to the Department and other parties involved in the performance of the contract. (Did contractor's personnel conduct themselves in a professional and businesslike manner? Did they respond in a constructive way for problems and difficulties as they arose? Was there stability in the leadership and personnel assigned to the contractor or were there numerous changes?)

3. Did contractor report on progress in a timely and thorough manner as called for by the contract?
☐ Yes ☐ No (Explain)

4. Did contractor perform within the cost structure of the contract? ☐ Yes ☐ No (Explain)

5. To what extent was the final product of the contractor, including data and conclusions, responsive to the stated purpose of the contract?

6. How do you rate the contractor's overall performance?
☐ Excellent ☐ Satisfactory ☐ Less Than Satisfactory (Explain)

7. Do you recommend that the contractor be used again? ☐ Yes ☐ No (Explain)

### II. EVALUATOR

| Typed name and title of Technical Project Officer | Signature | Date Signed |
|---|---|---|

### III. APPROVAL (By Deputy Assistant Secretary/Major Office Director)

| Typed name and title of approving official | Signature | Date Approved |
|---|---|---|

**BILLING INSTRUCTIONS**

Contractor's invoice shall be submitted in an original and one copy to:
Office of Finance — General Claims
P.O. Box 9487
Rosslyn Station
Arlington, VA 22209

Invoices must show the Department's 10 digit order number, time payment discount (even if not), description of each item, quantity, unit cost and total amount. Contractor must furnish signed receipt from transportation carrier as proof that shipment has been forwarded.

When Contractor is requested to prepay transportation charges against an F.O.B. order, such charges are to be added as a separate item to the invoice and must be supported by a paid transportation receipt. If shipment via APO, furnish postal receipts.

FORM DST - 1099-4-81 ORIGINAL CONTRACTOR

## TERMS AND CONDITIONS APPLICABLE TO PURCHASE ORDER

**Note: If a contract number is shown, Terms and Conditions of the applicable contract shall apply to this Delivery Order which is issued pursuant thereto.**

1. INSPECTION AND ACCEPTANCE - Inspection and acceptance will be at destination, unless otherwise provided. Until delivery and acceptance, and after any rejection, risk of loss will be on the Contractor unless loss results from negligence of the Government.

2. VARIATION IN QUANTITY - No variation in the quantity of any item called for by this contract will be accepted unless such variation has been caused by conditions of loading, shipping, or packing, or allowances in manufacturing processes, and then only to the extent, if any, specified elsewhere in this contract.

3. DISCOUNTS - (a) Time discounts will be computed from: (1) date of delivery of the supplies to carrier when delivery and acceptance are at the point of origin, (2) date of delivery at destination or port of embarkation, when delivery and acceptance are at either of those points, or (3) date a proper invoice or voucher is received in the office specified by the Government, if the latter date is later than the date of delivery. (b) Payment will be deemed to have been made on the date which appears on payment checks.

4. DISPUTES - (This contract is governed by the Contract Disputes Act of 1978 (Public Law 95-563 "the Act")). The Act provides administrative procedures for the submittal, analysis, negotiation, and if necessary, litigation of claims relating to this contract. The parties to this contract must comply with certain time restrictions on rendering of contracting officer decisions on claims, and on the appeal of those decisions. Further details on the rights and remedies under the Act may be found in the Federal Procurement Regulations at 1-1.318.4.

5. FOREIGN SUPPLIES - This contract is subject to the Buy American Act (41 U.S.C. 10 a-d) as implemented by Executive Order 10582 of December 17, 1954, and any restrictions in appropriation acts on the procurement of foreign supplies.

6. CONVICT LABOR - In connection with the performance of work under this contract, the Contractor agrees not to employ any person undergoing sentence or imprisonment except as provided by Public Law 89-176, September 10, 1965 (18 U.S.C. 4082(c) (2)) and Executive Order 11775, December 29, 1973.

7. OFFICIALS NOT TO BENEFIT - No member of or Delegate to Congress or resident commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

8. COVENANT AGAINST CONTINGENT FEES - The Contractor warrants that no person or selling agency has been employed or retained to solicit or secure this contract upon any agreement or understanding for a commission, percentage, brokerage, or contingent fees, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the Contractor for the purpose of securing business. For breach or violation of this warranty the Government shall have the right to annul this contract without liability or in its discretion to deduct from the contract price or consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee.

9. FEDERAL, STATE, AND LOCAL TAXES - Except as may be otherwise provided in this contract, the contract price includes all applicable Federal, State, and local taxes and duties in effect on the date of this contract but does not include any taxes from which the Government, the contractor or this transaction is exempt. Upon request of the Contractor, the Government shall furnish a tax exemption certificate or similar evidence of exemption with respect to any such tax not included in the contract price pursuant to this clause. For the purpose of this clause, the term "date of this contract" means the date of the contractor's quotation or, if no quotation, the date of this Purchase Order.

10. SERVICE CONTRACT ACT OF 1965, As Amended (Service contracts not exceeding $2,500) - Except to the extent that an exemption, variation, or tolerance would apply pursuant to 29 CFR 4.6 if this were a contract in excess of $2,500, the Contractor and any sub-contractor hereunder shall pay all of his employees engaged in performing work on the contract not less than the minimum wage specified under section 6(a) (1) of the Fair Labor Standards Act of 1938, as amended. All regulations and interpretations of the Service Contract Act of 1965 expressed by 29 CFR Part 4 are hereby incorporated by reference in this contract.

11. The following terms and conditions are applicable to purchases in excess of $2,500: (a) Employment of the Handicapped - Federal Procurement Regulation, Temporary Regulation 38, dated May 26, 1976. (b) Contract Work Hours and Safety Standards Act - Overtime Compensation Section - Federal Procurement Regulation 1-12.303. (c) Service Contract Act of 1965 - (Services contracts in excess of $2,500) Federal Procurement Regulation 1-12.904-1.

## MARKING INSTRUCTIONS

CONTAINERS OR PACKAGES shall be plainly marked to show the order number, brief description of contents, including form number, if any, quantity and vendor's name. Receiving clerk may reject any deliveries which do not bear such identification.

## SHIPPING DOCUMENTS AND CORRESPONDENCE

All shipping documents and correspondence pertaining to this order (except invoices as stated below) shall be referred or forwarded to the person and organization who signed the order. Such documents MUST refer to the departments order number.

**Federal Aviation Administration**

**14 CFR Parts 43, 91, 121, 125, 129 and 135**

**Foreign Air Carriers and Operators of Certain Large U.S.-Registered Airplanes; Final Rule**

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 43, 91, 121, 125, 129, and 135

[Docket No. 24856; Amdts. No. 43-26, 91-201, 121-192, 125-8, 129-14 and 135-24]

# Foreign Air Carriers and Operators of Certain Large U.S.-Registered Airplanes

AGENCY: Federal Aviation Administration (FAA), (DOT).

ACTION: Final rule.

SUMMARY: These amendments require that U.S.-registered aircraft leased by foreign persons be maintained in accordance with acceptable maintenance standards and clarify certain rules to preclude the commingling of noncommon (private) and common-carriage operations. These amendments are necessary to upgrade certain regulations regarding the leasing of U.S.-registered aircraft by foreign persons and to clarify the inspection and maintenance requirements applicable to foreign persons conducting private and common-carriage operations with U.S.-registered airplanes.

EFFECTIVE DATE: August 25, 1987.

FOR FURTHER INFORMATION CONTACT: Messrs. David L. Catey, Manager, Project Development Branch (AFS-240), Air Transportation Division, telephone (202) 267-3747, or Bob Baker, Manager, Project Development Branch (AFS-360), Aircraft Maintenance Division, telephone (202) 267-3788, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

SUPPLEMENTARY INFORMATION:

## Background

On October 9, 1980, Part 125 of the Federal Aviation Regulations (FAR) was published in the Federal Register (45 FR 67214). With certain exceptions, not germane to the current discussion, Part 125 up to now has applied to the operation of all U.S.-registered airplanes having a passenger seating configuration of 20 or more, or a maximum payload capacity of 6,000 pounds or more, unless they are required to be operated under the rules of Part 121, 135, or 137 of the regulations.

Although Part 125 was not intended to provide acceptable safety levels for common-carriage operations, the inspection programs and maintenance requirements of § 125.247 currently apply to U.S.-registered airplanes operated outside the United States by foreign persons. This results because Part 125 governs operation of a U.S.-registered airplane of the prescribed size unless that operation is required to be conducted under the rules of Parts 121, 135, or 137. Accordingly, up to now there has been no exclusion from Part 125 for operators under Part 129—Operations of Foreign Air Carriers.

At the time Part 125 was published, the FAA was considering rulemaking to revise Part 129 to cover inspection and maintenance requirements for U.S.-registered aircraft. Requiring foreign air carriers to comply with Part 125 immediately was deemed inappropriate in light of the possibility of change to Part 129. Consequently, in adopting Part 125, the agency established a deferred compliance date of January 1, 1983, for foreign air carriers. By Amendments 125-4 (47 FR 44718; October 12, 1982), 125-5 (49 FR 34815; September 4, 1984), 125-6 (51 FR 873; January 8, 1986), and 125-7 (52 FR 6956; March 6, 1987), the agency extended the January 1, 1983, compliance date to September 1, 1984, February 28, 1986, February 28, 1987, and February 29, 1988, respectively, to provide sufficient time for completion of this rulemaking.

Subsequent to the adoption of Part 125, the agency has carefully monitored the operating experience of large U.S.-registered airplanes operated under Part 125. The operating experience can be divided into two main areas of interest. First, the frequency with which foreign air carreirs operate U.S.-registered airplanes under lease has shown a marked increase. These lease agreements are desirable since they provide a means for U.S. air carriers to arrange for use of these airplanes during periods of reduced traffic levels. The second area concerns the distinction between common carriage and noncommon carriage operations.

Most foreign air carriers and foreign persons engaged in common-carriage operations have aircraft maintenance program requirements adopted by their domestic governments which are consistent with the international standards in Part I of Annex 6 to the Convention on International Civil Aviation Organization (ICAO). ICAO, Annex 6, requires each operator to comply with the terms of the aircraft's certificate of airworthiness and to maintain the aircraft in an airworthy condition. To meet these requirements, each foreign operator of a U.S.-registered aircraft used in common carriage must ensure that the aircraft is maintained by a qualified organization with a well-trained staff and adequate workshops, equipment, and facilities. That organization must also have appropriate maintenance manuals, records, and procedures regarding training, inspection, and release of the aircraft. However, some countries may not have requirements completely consistent with the ICAO aircraft maintanence program requirements. This means that U.S.-registered airplanes operated by foreign air carriers or persons from those countries might not meet those international standards. To allow operation of these aircraft would be inconsistent with U.S. international obligations for aircraft of its registry. These amendments will therefore require compliance with the United States' international airworthiness obligations.

Concerning the second main aspect of the operating experience of large U.S.-registered airplanes of the size covered by Part 125, that part was designed to provide a regulatory scheme for an appropriate level of safety for airplanes not used in common carriage. This regulatory intent is stated explicitly in § 125.11. That section prohibits common carriage by a Part 125 certificate holder and declares that any person holding an air carrier operating certificate is ineligible for a certificate under Part 125. The sole exception to the principle that Part 125 is intended to apply only to noncommon carriage to date has been the case of a foreign person common carrier compelled to operate under the rules of Part 125 by operating a U.S.-registered airplane of the size covered by that part. These amendments eliminate that exception by expanding Part 129 to apply to each foreign operator of a U.S.-registered aircraft engaged in common carriage operating either into and out of or wholly outside the United States.

On December 10, 1985, the FAA published Notice No. 85-24 (50 FR 50588, December 10, 1985) to resolve the issues discussed above. The public comment period closed on April 10, 1986.

## Analysis of Comments

Seven public commenters responded to Notice No. 85-24. Two commenters supported the proposals to preclude the commingling of noncommon (private) and common-carriage operations. No comments were received with respect to the operational as opposed to the airworthiness and maintenance proposals of Notice No. 85-24. This, to preclude the commingling of noncommon (private) and common-carriage operations, new §§ 121.3(i), 125.11(c), 129.1(b), 129.11(a)(4) and (c), 135.11(c), and a new paragraph 5 of Section V. A., of paragraph (b) of Appendix A of Part 129 are adopted as proposed. Also, the proposals to revise

BEST COPY AVAILABLE

§§ 125.1(a) and (b)(1), (3), and (4), 129.1(a) and 129.11(a) are adopted as proposed.

Section 125.1(d) is removed because the cutoff date of January 1, 1983, is obsolete, and the reference to paragraph (d) is also removed from § 125.1(a).

Proposed § 125.11(a) is revised by replacing the words "is authorized to operate aircraft under an operating certificate or operations specifications" with the words "holds the appropriate operating certificate and/or operations specifications necessary to conduct operations." This revision is consistent with terminology used in SFAR 38–2. Proposed § 125.11(a) is adopted with this modification.

Several commenters recommended that proposed § 129.14(b) be revised to require a maintenance program that would be equivalent to the continuous maintenance program required for Part 121 air carriers. It was suggested that a more specific reference is needed to address the significant maintenance aspects of Part 121 which would clearly exclude an obligation for the foreign air carrier to follow other certification requirements of Part 121 or 135. To the same general effect is the suggestion of another commenter who proposes a change to language in proposed § 129.14(b) to require that the program selected meet the requirements consistent with § 121.367 or § 135.425 as appropriate. The FAA does not agree with these suggestions. A primary objective of the amendment is to require that a U.S.-registered aircraft leased by a foreign person be maintained in accordance with maintenance standards that are consistent with the requirement of the country which is a member of the International Civil Aviation Organization. The FAA considers it would be inappropriate to specify all the applicable FAR sections or to limit an operator's maintenance program requirements to those two sections because an acceptable maintenance program must be in compliance with numerous other sections of Parts 121 and 135, as appropriate.

Another commenter questions who would be responsible for airworthiness control when a foreign operator under Part 129 operates a U.S.-registered aircraft. Proposed § 129.14(a) and (b) would require each foreign person who operates a U.S.-registered aircraft in common carriage to meet prescribed maintenance requirements. Aircraft maintenance programs which are consistent with the international standards in Part I of ICAO Annex 6 require each operator to comply with the terms of the aircraft's certificate of airworthiness and to maintain the aircraft in an airworthy condition. The Federal Aviation Regulations prescribed airworthiness standards for all U.S.-registered aircraft operating within or outside the United States, irrespective of the person operating the aircraft. This includes U.S.-registered aircraft operated by a foreign air carrier or foreign person.

The FAA has further reviewed the maintenance requirements proposed in § 129.14(b) and the comments received concerning the proposed wording of that paragraph. As written, the proposal creates a misunderstanding as to what would constitute an acceptable maintenance program as required by proposed § 129.14(a). In addition, proposed § 129.14(b) would have provided that U.S.-registered aircraft operated by foreign persons would be adequately maintained in accordance with either Part 121 or Part 135, without regard to or consideration of the maintenance standards that are consistent with the requirement of the country which is a member of the ICAO. Further, specific requirements of a maintenance program would best be identified in an Advisory Circular which could address specific requirements for a particular type of operation. Based on the foregoing, § 129.14 has been revised to impose a general requirement that U.S.-registered aircraft operated in common carriage by any foreign air carrier or any foreign person be maintained in accordance with a maintenance program which has been approved by the FAA Administrator. The specific requirements of the program will be addressed in an Advisory Circular that will provide guidance as to what would constitute an approved maintenance program. The Advisory Circular will be disseminated to FAA International Field Offices and Flight Standards District Offices.

Two commenters recommend that the maintenance rules of Part 43 be revised to include reference to Part 129. The FAA agrees and has adopted this recommendation by amending § 43.13(C).

## Regulatory Evaluation

These amendments clarify the maintenance and minimum equipment list requirements applicable to U.S.-registered aircraft operated by foreign persons. Section 129.11(a)(4) will impose only a minimal cost by requiring that the registration markings of each U.S.-registered aircraft be listed on the foreign air carrier's Part 129 operations specifications.

Two commenters support the proposed sections that would preclude the comingling of noncommon (private) and common-carriage operations, and no opposing comments were received. A minimal cost may result from the adoption of these amendments. A remote possibility exists that one or several transport category aircraft may be currently listed on both a Part 125 (private-carriage) operations specifications and either a Part 121, Part 129 or Part 135 (common carriage) operations specifications. Although such simultaneous listing of an aircraft and both private- and common-carriage operations specifications is contrary to current FAA administrative practies, a minimal cost may be incurred by the FAA and a few aircraft operators to delist and aircraft from either the private-carriage operations specifications or the common-carriage operations specifications. In addition, the few operators who may be using the same aircraft in private- and common-carriage operations under a simultaneous listing may lose some utilization of their aircraft as a result of this rule. Any costs that would be incurred are expected to be very minor, however, because of the very limited extent of this practice.

New § 129.14(b) provides for the use of a minimum equipment list by a foreign air carrier of foreign person using any U.S.-registered aircraft in common-carriage operations. The provisions of § 129.14(b) are more explicit and appropriate to common-carriage operations than the minimum equipment list requirements provided in § 91.30, which were reinstated effective March 13, 1986 (50 FR 51168, December 13, 1985), in Amendment 91–192. Both Amendment 91–192 and these amendments preclude the necessity for exemptions, thereby reducing the administrative burden of both foreign air carriers and the FAA.

## Conclusion

These amendments will facilitate the agency's maintaining distinctions among Parts 91,121,125,129, and 135 of the regulations so that all U.S.-registered aircraft meet appropriate standards applicable to the type of operations (air transportation versus other air commerce) being conducted. They also provide for minimum equipment list use by foreign air carriers and other foreign persons using any U.S.-registered aircraft in common carriage operations without the necessity of obtaining an exemption. These amendments will have either no impact or a small positive impact on trade opportunities of U.S. and foreign persons who may wish to enter into aircraft lease agreements. Accordingly, for these reasons and those

discussed under the heading entitled "Regulatory Evaluation," the FAA has determined that these amendments are not considered to be significant under DOT Regulatory Policies and Procedures (44 CFR Part 11034; February 26, 1979) and are not major as defined in Executive Order 12291. For these reasons and because these amendments will result in negligible costs, I certify that, under the criteria of the Regulatory Flexibility Act, the amendments will not have a significant economic impact on a substantial number of small entities. The overall economic impact of this rulemaking is so minimal that it does not require a full regulatory evaluation. In addition, benefits to this agency and some foreign operators are expected to accrue from the elimination of the need for certain exemptions.

**List of Subjects**

*14 CFR Part 43*

Air carriers, Air transportation, Aircraft, Aviation safety, Safety.

*14 CFR Part 91*

Air carriers, aviation safety, Safety, Aircraft, Air transportation.

*14 CFR Part 121*

Aviation safety, Safety, Air carriers, Air transportation, Aircraft, Airplanes, Airspace, Foreign air carriers, Transportation, Common carriers.

*14 CFR Part 125*

Aircraft, Airplanes, Airworthiness, Air transportation.

*14 CFR Part 129*

Aircraft, Air carrier, Airworthiness.

*14 CFR Part 135*

Air carriers, Aviation safety, Safety, Air transportation, Aircraft, Transportation, Airspace, Airplanes.

**Adoption of the Amendments**

In consideration of the foregoing, Parts 43, 91, 121, 125, 129, and 135 of the FAR (14 CFR Parts 43, 91, 121, 125, 129, and 135) are amended as follows:

**PART 43—MAINTENANCE, PREVENTIVE MAINTENANCE, REBUILDING, AND ALTERATION**

1. The authority citation for Part 43, continues to read as follows:

Authority: 49 U.S.C. 1354, 1421 through 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

**§ 43.13 [Amended]**

2. Section 43.13(c) is amended by inserting "and Part 129 operators holding operations specifications" after "135" wherever it appears.

**PART 91—GENERAL OPERATING AND FLIGHT RULES**

3. The authority citation for Part 91 continues to read as follows:

Authority: 49 U.S.C. 1301(7), 1303, 1344, 1348, 1352 through 1355, 1401, 1421 through 1431, 1471, 1472, 1502, 1510, 1522, and 2121 through 2125; Articles 12, 29, 31, and 32(a) of the Convention on ICAO (61 Stat. 1180); 42 U.S.C. 4321 et seq.; E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

4. By revising § 91.161(b) to read as follows:

**§ 91.161 Applicability.**

* * * * *

(b) Sections 91.165, 91.169, 91.171, 91.173, and 91.174 of this subpart do not apply to an aircraft maintained in accordance with a continuous airworthiness maintenance program as provided in Part 121, 127, 129, or § 135.411(a)(2) of this chapter.

* * * * *

**PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT**

5. The authority citation for Part 121 continues to read as follows:

Authority: 49 U.S.C. 1354 (a), 1355, 1356, 1357, 1401, 1421 through 1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983).

6. By amending § 121.3 by adding a new paragraph (i) to read as follows:

**§ 121.3 Certification requirements: General.**

* * * * *

(i) No holder of an air carrier operating certificate may operate or list on any required listing of its aircraft any aircraft listed on any operations specifications issued under Part 125 of this chapter.

**PART 125—CERTIFICATION AND OPERATIONS: AIRPLANES HAVING A SEATING CAPACITY OF 20 OR MORE PASSENGERS OR A MAXIMUM PAYLOAD CAPACITY OF 6,000 POUNDS OR MORE**

7. The authority citation for Part 125 continues to read as follows:

Authority: 49 U.S.C. 1354, 1421 through 1430, and 1502; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983).

8. By amending § 125.1 by removing paragraphs (d) and (e) and by revising paragraphs (a) and (b)(1), (3), and (4) to read as follows:

**§ 125.1 Applicability**

(a) Except as provided in paragraphs (b) and (c) of this section, this part prescribes rules governing the operations of U.S.-registered civil airplanes which have a seating configuration of 20 or more passengers, or a maximum payload capacity of 6,000 pounds or more when common carriage is not involved.

(b) * * *

(1) They are required to be operated under Part 121, 129, 135, or 137 of this chapter;

* * * * *

(3) They are being operated by a Part 125 certificate holder without carrying passengers or cargo under Part 91 for training, ferrying, positioning, or maintenance purposes;

(4) They are being operated under Part 91 by an operator certificated to operate those airplanes under Part 121, 135, or 137 of this chapter or are being operated by a foreign air carrier or a foreign person in common carriage solely outside the United States under Part 91 of this chapter; or

* * * * *

9. By amending § 125.11 by revising paragraph (a) and by adding a new paragraph (c) to read as follows:

**§ 125.11 Certificate eligibility and prohibited operations.**

(a) No person is eligible for a certificate or operations specifications under this part if the person holds the appropriate operating certificate and/or operations specifications necessary to conduct operations under Part 121, 129 or 135 of this chapter.

* * * * *

(c) No person holding operations specifications under this part may operate or list on its operations specifications any aircraft listed on any operations specifications or other required aircraft listing under Part 121, 129, or 135 of this chapter.

**PART 129—OPERATIONS OF FOREIGN AIR CARRIERS**

10. The authority citation for Part 129 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1356, 1357, 1421, 1502, and 1511; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983).

11. By revising the title of Part 129 to read as follows:

## PART 129—OPERATIONS: FOREIGN AIR CARRIERS AND FOREIGN OPERATORS OF U.S.-REGISTERED AIRCRAFT ENGAGED IN COMMON CARRIAGE

12. By revising § 129.1 to read as follows:

**§ 129.1 Applicability.**

(a) Except as provided in paragraph (b) of this section, this part prescribes rules governing the operation within the United States of each foreign air carrier holding a permit issued by the Civil Aeronautics Board or the Department of Transportation under section 402 of the Federal Aviation Act of 1958 (49 U.S.C. 1372) or other appropriate economic or exemption authority issued by the Civil Aeronautics Board or the Department of Transportation.

(b) Section 129.14 also applies to U.S.-registered aircraft operated in common carriage by a foreign person or foreign air carrier solely outside the United States. For the purpose of this part, a foreign person is any person, not a citizen for the United States, who operates a U.S.-registered aircraft in common carriage solely outside the United States.

13. By amending § 129.11 by revising the introductory text of paragraph (a) and by adding a new paragraph (a)(4) and a new paragraph (c) to read as follows:

**§ 129.11 Operations specifications.**

(a) Each foreign air carrier shall conduct its operations within the United States in accordance with operations specifications issued by the Administrator under this part and in accordance with the Standards and Recommended Practices contained in Part I (International Commercial Air Transport) of Annex 6 (Operation of Aircraft) to the Convention on International Civil Aviation Organization. Operations specifications shall include:

* * * * *

(4) Registration markings of each U.S.-registered aircraft.

* * * * *

(c) No person operating under this part may operate or list on its operations specifications any airplane listed on operations specifications issued under Part 125.

14. by adding a new § 129.14, following § 129.13, to read as follows:

**§ 129.14 Maintenance program and minimum equipment list requirements for U.S.-registered aircraft.**

(a) Each foreign air carrier and each foreign person operating a U.S.-registered aircraft within or outside the United States in common carriage shall ensure that each aircraft is maintained in accordance with a program approved by the Administrator.

(b) No foreign air carrier or foreign person may operate a U.S.-registered aircraft with inoperable instruments or equipment unless the following conditions are met:

(1) A master minimum equipment list exists for the aircraft type.

(2) The foreign operator submits for review and approval its aircraft minimum equipment list based on the master minimum equipment list, to the FAA Flight Standards District Office having geographic responsibility for the operator. The foreign operator must show, before minimum equipment list approval can be obtained, that the maintenance procedures used under its maintenance program are adequate to support the use of its minimum equipment list.

(3) For leased aircraft maintained and operated under a U.S. operator's continuous airworthiness maintenance program and FAA-approved minimum equipment list, the foreign operator submits the U.S. operator's approved continuous airworthiness maintenance program and approved aircraft minimum equipment list to the FAA office prescribed in paragraph (b)(2) of this section for review and evaluation. The foreign operator must show that it is capable of operating under the lessor's approved maintenance program and that it is also capable of meeting the maintenance and operational requirements specified in the lessor's approved minimum equipment list.

(4) The FAA letter of authorization permitting the operator to use an approved minimum equipment list is carried aboard the aircraft. The minimum equipment list and the letter of authorization constitute a supplemental type certificate for the aircraft.

(5) The approved minimum equipment list provides for the operation of the aircraft with certain instruments and equipment in an inoperable condition.

(6) The aircraft records available to the pilot must include an entry describing the inoperable instruments and equipment.

(7) The aircraft is operated under all applicable conditions and limitations contained in the minimum equipment list and the letter authorizing the use of the list.

15. By amending paragraph (b) of Appendix A of Part 129, by amending Section V. A., by adding a new paragraph 5 to read as follows:

**Appendix A—Application for Operations Specifications by Foreign Air Carriers**

(b) * * *

Section V. Aircraft. * * *

A. *Aircraft.*

5. Registration markings of each U.S.-registered aircraft.

* * * * *

## PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS

16. The authority citation for Part 135 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1355(a), 1421 through 1431, and 1502; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

17. By amending § 135.11, by adding a new paragraph (c) to read as follows:

**§ 135.11 Application and issue of certificate and operations specifications.**

* * * * *

(c) No person holding operations specifications issued under this part may list on its operations specifications or on the current list of aircraft required by § 135.63(a)(3) any airplane listed on operations specifications issued under Part 125.

Issued in Washington, DC, on May 19, 1987.

Donald D. Engen,

# Department of the Interior

**Office of Surface Mining Reclamation and Enforcement**

**30 CFR Parts 773 and 778**

**Requirements for Surface Coal Mining and Reclamation Permit Approval; Ownership and Control Information; Proposed Rule**

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 773 and 778

Requirements for Surface Coal Mining and Reclamation Permit Approval; Ownership and Control Information

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) of the U.S. Department of the Interior (DOI) proposes to revise its regulations which specify what information must be included in a surface coal mining permit application. The revision is needed to conform the information reporting requirements for a permit with changes in the permitting process recently proposed by OSMRE. The revision will require the submission of additional information concerning persons who own or control a permit applicant.

DATES:

*Written Comments:* OSMRE will accept written comments on the proposed rule until 5 p.m. Eastern time on August 6, 1987.

*Public Hearings:* Upon request, OSMRE will hold public hearings on the proposed rule in Washington, D.C.; Denver, Colorado; and Pittsburgh, Pennsylvania at 9:30 a.m. local time on July 30, 1987. Upon request, OSMRE will also hold public hearings in the States of Georgia, Idaho, Massachusetts, Michigan, North Carolina, Oregon, Rhode Island, South Dakota, Tennessee and Washington, where Federal regulatory programs are in effect, at times and on dates to be announced prior to the hearings. OSMRE will accept requests for public hearings until 5:00 p.m. Eastern time on June 29, 1987. Individuals wishing to attend but not testify at any hearing should contact the person identified under "FOR FURTHER INFORMATION CONTACT" beforehand to verify that the hearing will be held.

ADDRESSES:

*Written Comments:* Hand-deliver to the Office of Surface Mining, Administrative Record, Room 5131, 1100 L Street, NW., Washington, D.C.; or mail to the Office of Surface Mining, Administrative Record, Room 5131–L, 1951 Constitution Avenue, Washington, D.C. 20240.

*Public Hearings:* Department of the Interior Auditorium, 18th and C Streets, NW., Washington, DC.; Brooks Towers, 2nd Floor Conference Room, 1020 15th Street, Denver, Colorado; and 2nd flooor Conference Room, 10 Parkway Center, Pittsburg, Pennsylvania. The addresses for any hearings scheduled in the States of Georgia, Idaho, Massachusetts, Michigan, North Carolina, Oregon, Rhode Island, South Dakota, Tennessee and Washington will be announced prior to the hearings.

*Request for public hearings:* Submit orally or in writting to the person and address specified under "FOR FURTHER INFORMATION CONTACT."

FOR FURTHER INFORMATION CONTACT: Andrew I. DeVito, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone: (202) 343–5241 (Commercial or FTS).

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures
II. Background
III. Discussion of the Proposed Rule
IV. Procedural Matters

## I. Public Comment Procedures

*Written Comments*

Written comments submitted on the proposed rule should be specific, should be confined to issues pertinent to the proposed rule, and should explain the reason for any recommended change. Where practical, commenters should submit three copies of their comments (see "ADDRESSES"). Comments received after the close of the comment period (see "DATES") may not be considered or included in the Administrative Record for the final rule.

*Public Hearings*

OSMRE will hold public hearings on the proposed rule upon request only. The times, dates and addresses scheduled for hearings at three locations are specified previously in this notice (see "DATES" and "ADDRESSES"). The times, dates and addresses for the hearings at the remaining locations have not yet been scheduled, but will be announced in the Federal Register at least 21 days prior to any hearings which are held at these locations.

Any person interested in participating at a hearing at a particular location should inform Mr. DeVito (See "FOR FURTHER INFORMATION CONTACT") either orally or in writing of the desired hearing location by 5:00 Eastern Time on June 29, 1987. If no one has contacted Mr. DeVito to express an interest in participating in a hearing at a given location by that date, the hearing will not be held. If only one person expresses an interest, a public meeting rather than a hearing may be held and the results included in the Administrative Record.

If a hearing is held, it will continue until all persons wishing to testify have been heard. To assist the transcriber and ensure an accurate record, OSMRE requests that persons who testify at a hearing give the transcriber a written copy of their testimony. To assist OSMRE in preparing appropriate questions, OSMRE also requests that persons who plan to testify submit to OSMRE at the address previously specified for the submission of written comments (see "ADDRESSES") an advance copy of their testimony.

## II. Background

The purpose of this proposed rule is to conform the information reporting requirements for permit applications with changes in the permitting process recently proposed by OSMRE. On April 5, 1985, OSMRE published a proposed rule (50 FR 13724) which would amend its regulations dealing with the permitting process by: (1) Adding definitions for the terms "ownership" and "control" as those concepts are used in the Surface Mining Control and Reclamation Act of 1977 (the Act), 30 U.S.C. 1201 *et seq.*, and (2) expanding the scope of the compliance findings which regulatory authorities are required to make prior to permit approval. On April 16, 1986 (51 FR 12879) a notice was published which reopened and extended the public comment period for the proposed rule. On May 4, 1987 (52 FR 16275) another notice was published which again reopened and extended the public comment period. The April 16th notice and the May 4th notice each contained a detailed explanation of an option which OSMRE is considering for adoption as the final "Ownership and Control" rule.

The option discussed in the April 16, 1986 notice includes the following provisions:

(1) A definition for "ownership" which includes multiple levels of a corporate family tree. Ownership would be defined as holding the proprietary interest in a sole proprietorship, being a general partner in a partnership, or having a 10% or greater interest in an entity, either directly or *indirectly* through one or more intermediary companies. Under this definition, a 10 percent or greater interest in an entity would constitute ownership regardless of the number of levels "up" or "down" the corporate structure that separated the parent and subsidiary.

(2) A definition for "control" which would include any relationship which gives one person authority to determine the manner in which an applicant, or an operator if other than an applicant,

conducts surface coal mining and reclamation operations. Being an operator would constitute control. Being a chief executive officer or chief operating officer of a corporation would constitute control of that corporation. Being any other officer or a director would create a rebuttable presumption of control of that corporation. Being a director or officer of a corporation would also create a rebuttable presumption of control over other entities owned by that corporation. The rebuttable presumption of control could be overcome by clear and convincing evidence that such director or officer had no authority to determine the manner in which the surface coal mining operation was conducted.

(3) A requirement for a finding by the regulatory authority that any surface coal mining and reclamation operation owned by either the applicant or by anyone who owns or controls the applicant has been conducted in accordance with the requirements of the Act and certain other applicable environmental laws, and that there are no outstanding violations.

(4) A presumption that in the absence of a failure-to-abate cessation order a notice of violation (NOV) would be presumed to be in the process of being corrected to the satisfaction of the agency that has jurisdiction over the violation.

These provisions, or those contained in the May 4th option, if adopted by OSMRE in the final "Ownership and Control" rule, would necessitate certain conforming changes to the information reporting requirements presently found in §§ 778.13 and 778.14.

Because of the time required to propose and adopt a rule it is necessary for OSMRE to propose at this time conforming changes which will be needed when OSMRE adopts the final "Ownership and Control" rule. The proposal of this rule which conforms the information reporting requirements to the April 16th option should not be construed as an indication that OSMRE has decided which option to adopt for the final "Ownership and Control" rule. The proposed information reporting requirements conform to the April 16th option because it is the most expensive. Should OSMRE adopt the provisions of the May 4th option, or some other option which requires the submission of less information than is required by this proposed rule, then the final information reporting requirements in §§ 778.13 and 778.14 will be conformed as necessary to the selected option.

Should the May 4th option be selected rather than the April 16th option, the information reporting requirements may be changed from reporting entities with *indirect* ownership of the applicant of greater than 10 percent to reporting indirect owners of the applicant who own at least 20 percent of the next immediate subsidiary. Under either option, entities directly owning 10 percent or more of the applicant would be listed. For business entities other than the permit applicant, only the names and titles of those officers who by virtue of their positions have authority to control or influence the actions of a subsidiary entity would be required. Comments are requested on these alternative reporting requirements.

It is important to note that the final "Ownership and Control" rule and the proposed information collection requirements in this proposed rule will serve as a basis by which searches in the computer based Applicant Violator System (AVS) will be made for the purposes of permit blocking and the revocation of erroneously issued permits.

## III. Discussion of the Proposed Rule

Existing §§ 778.13 and 778.14 specify the legal, financial and compliance information that must be submitted in a permit application. OSMRE is proposing to modify these sections to require the submission of additional information and the use of a standard form for reporting the information. Also, OSMRE is proposing a new § 773.17(i) as a permit condition which would require that the ownership and control information required by § 778.13 be updated on an annual basis.

### *Section 773.17(i)—Permit condition*

Proposed § 773.17(i) would require a permittee to update and submit to the regulatory authority on an annual basis any changes in the information required by proposed §§ 778.13 (b) and (c). These latter sections would require the submission of the identities of persons owning or controlling the permit applicant, as well as the identity of all current and prior (within the past 5 years) surface coal mining and reclamation operations operated by either the applicant or anyone who owns the applicant. The updated information, which would be submitted to the regulatory authority issuing the permit would allow the regulatory authority to keep current the ownership and control data in the AVS. The requirement to update the information would apply to all permittees. A permittee's failure to update the data could result in permit rescission.

### *Section 778.13—Identification of Interests*

The proposed rule would modify § 778.13 as follows: Section 778.13(b) would require the submission of the name, address, telephone number, and social security or taxpayer identification number of the applicant, the operator (if different from the applicant), the applicant's resident agent who will accept service of process, the person who will pay the abandoned mine land reclamation fee, and any contractor who will conduct the surface coal mining and reclamation operations.

Section 778.13(c)(1) would require the submission of the name, title, address and social security or taxpayer identification number of every person who controls the applicant, including every officer, partner and director of the applicant and the operator, and the name of any other person who performs a function similar to a director of the applicant or the operator, the date of assuming that position, and when appropriate in the annual report required by § 773.17(i) of this chapter the date of leaving that position.

Section 778.13(c)(2) would require the submission of the name, address, social security or taxpayer identification number, and percent of ownership of each person who owns a 10 percent or greater interest in the permit applicant, either directly or indirectly through one or more intermediary companies. If ownership is indirect, the relationship between intermediary companies must be furnished.

Section 778.13(c)(3) would require the submission of the name, title, address and social security or taxpayer identification number of each officer and director of any entity owning a 10 percent or greater interest in the permit applicant, either directly or indirectly through one or more intermediary companies, the date of assuming that position, and when appropriate in the annual report required by § 773.17(i) the date of leaving that position.

Section 778.13(c)(4) would require the submission of the name, address, social security or taxpayer identification number and percentage of ownership of each subsidiary in which the applicant directly or indirectly owns a 10 percent or greater interest. If ownership is indirect, the relationship between intermediary companies must be furnished.

Section 778.13(c)(5) would require the submission of any name, including that of any subsidiary, and social security or taxpayer identification number under which the applicant, partner or anyone

who owns a 10 percent or greater interest in the applicant, either directly or indirectly through one or more intermediary companies, now operates or previously operated a surface coal mining and reclamation operation in the United States within the 5 years preceding the date of the application.

Section 778.13(d) would require a statement of any pending surface coal mining and reclamation operation permit applications in the United States, and of all current and previous coal mining permits in the United States held during the 5 years preceding the date of the application by any person identified in paragraph (c)(5) above, the permit or application numbers or other identifiers, and the identity of the regulatory authority for each operation listed.

The requirement in proposed § 778.13(b) to supply the name of the person (including his social security or taxpayer identification number) who will pay the abandoned mine land reclamation fee is in addition to the requirement to list the operator. Section 402(a) of the Act requires that an operator of a surface coal mining and reclamation operation pay the reclamation fee required by the Act. Experience has shown that often the reclamation fee is paid for the operator by individuals such as accountants, attorneys, trustees or by institutions such as banks. Furnishing the name of the person paying the reclamation fee will assist OSMRE in collecting the money and arranging for audits when necessary. Supplying the name of the person who would actually pay the reclamation fee would in no way alter the legal obligation of other persons ultimately responsible for its payment.

Under proposed § 778.13(j), the information required by §§ 778.13 and 778.14 would have to be submitted on any prescribed form that is issued by OSMRE. In order to facilitate the input of legal, financial and compliance data into the AVS and in order to reduce errors when that data is transferred from a permit application to the computer, OSMRE intends to issue a form that is compatible with the software program being developed for the AVS. Use of the form would be required by all permit applicants when submitting the information required by §§ 778.13 and 778.14 regardless of whether the permit application is filed with OSMRE or a state regulatory authority. OSMRE will obtain approval from the Office of Management and Budget prior to issuing the form.

*Section 778.14—Violation Information*

In addition to the identification of interests as required by proposed § 778.13, proposed § 778.14(c) requires each application to contain a list of all violation notices received by the applicant or any surface coal mining operation owned or controlled by either the applicant or by any person who currently owns or controls the applicant, or who did so during the 3-year period preceding the application date, for a violation of any provision of the Act, or of any law, rule or regulation of the United States, or of any State law, rule or regulation enacted pursuant to Federal law, rule or regulation pertaining to air or water environmental protection, except that *NOV's* under the Act received by any surface coal mining operation owned or controlled by either the applicant or by persons who own or control the applicant may be excluded. The application also would be required to contain the date of issuance of the notice, the name of the person to whom the notice was issued, and the issuing regulatory authority, department or agency. The purpose of this information is to provide the data necessary to make the compliance finding required by section 510(c) of the Act prior to a decision on the issuance of a surface coal mining permit.

The current § 778.14(c) requires a listing of all violation notices including NOV's. Proposed § 778.14(c) would still require pursuant to section 510(c) of the Act that NOV's received by the applicant be listed. However, proposed § 778.14(c) no longer would require that an NOV received by a surface coal mining operation owned or controlled by the applicant or by persons who own or control the applicant be listed. This requirement would be deleted because of the presumption discussed above. That presumption holds that in the absence of a failure-to-abate cessation order an NOV would be presumed to be in the process of being corrected to the satisfaction of the agency that has jurisdiction over the violation. OSMRE has proposed a rule governing the rescission of a permit in situations where an NOV existed at the time of the issuance of the permit and the NOV later ripens into a CO after the permit is issued. See 51 FR 25828.

Proposed § 778.14(c) also clarifies the reporting requirements by specifying that violations must be listed for the applicant or any surface coal mining operation owned or controlled by either the applicant, or by any person who owns or controls the applicant. The current regulations require that violations be listed for the applicant or any subsidiary, affiliate, or persons controlled by or under control with the applicant.

*Effect in Federal Program States*

The proposed rule would apply through cross-referencing to the following Federal program States: Georgia, Idaho, Massachusetts, Michigan, North Carolina, Oregon, Rhode Island, South Dakota, Tennessee, and Washington. The Federal programs for these States appear at 30 CFR Parts 910, 912, 921, 922, 933, 937, 939, 941, 942, and 947, respectively. Comments are specifically solicited as to whether unique conditions exist in any of these States relating to this proposal which should be reflected either as changes to the national rules or as State-specific amendments to any or all of the Federal programs.

## IV. Procedural Matters

*Federal Paperwork Reduction Act*

The information collection requirements in the proposed rule have been submitted to the Office of Management and Budget for approval as required by 44 U.S.C. 3501 *et seq.* The information is needed to meet the requirements of sections 201, 507, and 510 of Pub. L. 95–87, and will be used by OSMRE in reviewing a permit application and rescinding improvidently issued permits. The obligation to respond is mandatory.

*Executive Order 12291*

The Department of the Interior has examined the proposed rule according to the criteria of Executive Order 12291 (February 17, 1981) and has determined that it is not major and does not require a regulatory impact analysis. This determination is based on the findings that the regulatory revisions and additions proposed by this rule would cause very little increase in the costs of operating a mine in a manner that meets the requirements of the Act. Further, there would be no significant impacts on competition, employment, productivity, innovation or on the ability of U.S.-based enterprises to compete with foreign-based enterprises.

*Regulatory Flexibility Act*

The Department of the Interior has also determined, pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, that the proposed rule will not have a significant economic impact on a substantial number of small entities because although the rule would impose new regulatory burdens on small entities, the time and effort required to fulfill the additional data collection requirements would be minimal.

*National Environmental Policy Act*

The proposed rule has been reviewed by OSMRE and it has been determined to be categorically excluded from the National Environmental Policy Act (NEPA) process in accordance with DOI Departmental Manual (516 DM 2, Appendix 1.10) and the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (40 CFR 1507.3).

**List of Subjects**

*30 CFR Part 773*

Administrative practice and procedure, Reporting and recordkeeping requirements, Surface mining, Underground mining.

*30 CFR Part 778*

Reporting and recordkeeping requirements, Surface mining, Underground mining.

Accordingly, it is proposed to amend 30 CFR Parts 773 and 778 as follows:

Dated: May 12, 1987.

J. Steven Griles,

*Assistant Secretary for Land and Minerals Management.*

## PART 773—REQUIREMENTS FOR PERMITS AND PERMIT PROCESSING

1. The authority citation for Part 773 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*, 16 U.S.C. 470 *et seq.*, 16 U.S.C. 1531 *et seq.*, 16 U.S.C. 661 *et seq.*, 16 U.S.C. 703 *et seq.*, 16 U.S.C. 668a *et seq.*, 16 U.S.C. 469 *et seq.*, and 16 U.S.C. 470aa *et seq.*

2. Section 773.17 is amended by adding a new paragraph (i) to read as follows:

**§ 773.17 Permit conditions.**

* * * * *

(i) The permittee shall update and furnish to the regulatory authority on an annual basis the information required by §§ 778.13 (b) and (c) of this chapter.

## PART 778—PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR LEGAL, FINANCIAL, COMPLIANCE AND RELATED INFORMATION

3. The authority citation for Part 778 continues to read as follows:

Authority: Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*

4. In § 778.13, the introductory text and paragraphs (b), (c), and (d) are revised, and paragraphs (i) and (j) are added to read as follows:

**§ 778.13 Identification of interests.**

Except as provided in paragraph (i), each application shall contain the following information:

* * * * *

(b) Name, address, telephone number, and social security or taxpayer identification number of the applicant, the operator (if different from the applicant), the applicant's resident agent who will accept service of process, the person who will pay the abandoned mine land reclamation fees, and any contractor who will conduct the surface coal mining and reclamation operations.

(c) Where applicable—

(1) name, title, address and social security or taxpayer identification number of every person who controls the applicant, including every officer, partner and director of the applicant and the operator, and the name of any other person who performs a function similar to a director of the applicant or the operator, the date of assuming that position, and when appropriate in the annual report required by § 773.17(i) of this chapter the date of leaving that position.

(2) Name, address, social security or taxpayer identification number, and percent of ownership of each person who owns a 10 percent or greater interest in the permit applicant either directly or indirectly through one or more intermediary companies. If ownership is indirect, the relationship between intermediary companies must be furnished.

(3) Name, title, address and social security or taxpayer identification number of each officer and director of any entity owning a 10 percent or greater interest in the permit applicant, either directly or indirectly through one or more intermediary companies, the date of assuming that position, and when appropriate in the annual report required by § 773.17(i) the date of leaving that position.

(4) Name, address, social security or taxpayer identification number and percentage of ownership of each subsidiary in which the applicant directly or indirectly owns a 10 percent or greater interest. If ownership is indirect, the relationship between intermediary companies must be furnished.

(5) Any name, including that of any subsidiary, and social security or taxpayer identification number under which the applicant, partner or anyone who owns a 10 percent or greater interest in the applicant, either directly or indirectly through one or more intermediary companies, now operates or previously operated a surface coal mining and reclamation operation in the United States within the 5 years preceding the date of application.

(d) A statement of any pending surface coal mining and reclamation operation permit applications in the United States, and of all current and previous coal mining permits in the United States held during the 5 years preceding the date of the application by any person identified in paragraph (c)(5) of this section. Such statement shall provide permit or application numbers or other identifiers and the identity of the regulatory authority for each operation listed.

* * * * *

(i) When the taxpayer identification number required by paragraphs (b) and (c)(1)–(5) is a social security number, the submission is not mandatory.

(j) The information required by this section and § 778.14 of this part shall be submitted on any prescribed form that is issued by OSMRE.

5. In § 778.14 paragraph (c) introductory text, and paragraph (c)(1) are revised to read as follows:

**§ 778.14 Violation information.**

An application shall contain the following:

* * * * *

(c) A list of all violation notices received by the applicant or any surface coal mining operation owned or controlled by either the applicant, or by person who owns or controls the applicant during the 3-year period preceding the application date, for a violation of any provision of the Act, or of any law, rule or regulation of the United States, or of any State law, rule or regulation enacted pursuant to Federal law, rule or regulation pertaining to air or water environmental protection, except that notices of violations under the Act received by surface coal mining operations owned or controlled by either the applicant or by persons who own or control the applicant may be excluded. The application shall also contain the following information about each violation notice:

(1) The date of issuance, the name of the person to who the violation notice was issued, and the issuing regulatory authority, department or agency;

* * * * *

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice of Final Rulemaking.

SUMMARY: The Patent and Trademark Office hereby amends its regulations (1) to change the practice in handling unity of invention issues in international applications under the Patent Cooperation Treaty (PCT) and those entering the national stage under 35 U.S.C. 371 and (2) to establish procedures necessary for patent applicants to proceed under Chapter II of the Patent Cooperation Treaty. This rule change is being made because (1) the current rules for handling unity of invention issues in international applications are not consistent with the court decision in *Caterpillar Tractor Co.* v. *Commissioner of Patents and Trademarks*, 231 USPQ 590 (E.D. Va. 1986), and (2) legislation implementing Chapter II of the Patent Cooperation Treaty has recently been enacted. The promulgated rules will result in (1) the treatment of unity of invention issues in international applications consistently with the court decision while retaining the current practice for national applications filed under 35 U.S.C. 111, and (2) procedures adequate for applicants to proceed under Chapter II of the Patent Cooperation Treaty.

EFFECTIVE DATE: July 1, 1987.

FOR FURTHER INFORMATION CONTACT: Louis O. Maassel by telephone at (703) 557-3070 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, DC 20231.

SUPPLEMENTARY INFORMATION: This final rule change relates to (1) questions of unity of invention which may arise in international applications when searched as an International Searching Authority and when examined as an International Preliminary Examining Authority by the United States Patent and Trademark Office (USPTO) and during the national stage in the United States as a Designated Office after entry under 35 U.S.C. 371 pursuant to the Patent Cooperation Treaty (PCT) and (2) procedures to be followed and fees to be paid under Chapter II of the Patent Cooperation Treaty. The rule change will also increase the amount of the international search fees and national fees in international applications in view of increased average effort required by the USPTO because of changes in the rules relating to unity of invention. No fees are being established under 35 U.S.C. 41.

### Background Information

*Unity of Invention*

The May 28, 1986, decision in *Caterpillar Tractor Company* v. *Commissioner of Patents and Trademarks*, 231 USPQ 590 (E.D. Va., 1986) held that the Patent and Trademark Office interpretation of 37 CFR 1.141(b)(2) as applied to unity of invention determinations in international applications was not in accordance with the Patent Cooperation Treaty and its implementing rules. In the Caterpillar international application, the USPTO, acting as an International Searching Authority, had held lack of unity of invention between a set of claims directed to a process for forming a sprocket and a set of claims drawn to an apparatus (die) for forging a sprocket. The court stated that it was an unreasonable interpretation to say that the expression "specifically designed" as found in PCT Rule 13.2(ii) means that the process and apparatus have unity of invention if they can only be used with each other, as set forth in the Manual of Patent Examining Procedure (MPEP) § 806.05(e).

Therefore, when the Patent and Trademark Office considers international applications as an International Searching Authority, as an International Preliminary Examining Authority, and during the national stage as a Designated or Elected Office under 35 U.S.C. 371, PCT Rule 13.1 and 13.2 will be followed when considering unity of invention of claims of different categories without regard to the practice in national applications filed under 35 U.S.C. 111. No change is being made in the current restriction practice in United States national applications filed under 35 U.S.C. 111 outside the PCT. No change in practice is being made in regard to claims of the same category of invention either in PCT international applications or in U.S. national applications. Any such change in U.S. national restriction practice would require a statutory change in the fee levels in order to cover the additional examining effort required in individual patent applications.

The unity of invention procedures set forth in the rules are already being substantially followed by the examiners in the USPTO as a result of the notice signed on August 15, 1986, and published in the Official Gazette on September 9, 1986 at 1070 O.G. 11. The notice of September 9, 1986 and any prior notices or policies relating to unity of invention which are inconsistent with the rules and procedures in this final rules notice are superseded to the extent that they are inconsistent.

The unity of invention practice set forth in PCT Rule 13 will be applied in national stage applications entered under 35 U.S.C. 371 because 35 U.S.C. 372(b)(2) provides that "The Commissioner may cause the question of unity of invention to be reexamined under section 121 of this title, within the scope of the requirements of the treaty and the Regulations". However, continuing applications filed under 35 U.S.C. 111 of international applications under the provisions of 35 U.S.C. 365(c) will be subject to the same restriction practice as other United States national applications filed under 35 U.S.C. 111. However, it is noted that where several inventions have been searched in the parent international application, the examination of such inventions in a continuing national application may not be burdensome and the examiner may consider all the inventions in such an application without making a restriction requirement.

*Implementation of Unity of Invention Practice in International Applications and National Stage Applications Entered Under 35 U.S.C. 371*

(1) The practice established by these rules for international and national stage applications will *not* be applied to national applications filed under 35 U.S.C. 111.

(2) The practice established by these rules will *not* affect the treatment of the claims of any applications (national or international) where the question of lack of unity of invention relates to other than different categories of invention issues.

Therefore, restriction and unity of invention practice involving, for example, Markush type claims, genus-species, intermediate-final product or combination-subcombination situations is *not* affected for any applications by this rule change.

(3) The criteria of § 1.141 would continue to be applicable to U.S. national applications filed under 35 U.S.C. 111 in a manner similar to that in effect prior to the Caterpillar decision and essentially the same as the practice which was in effect for many years prior to the PCT implementation. That is, national restriction practice will continue as set forth in MPEP Chapter 800, as modified in 1046 O.G. 2 for the

practice relating to product, process of making and process of using. The practice in this latter situation is that a three way requirement for restriction can only be made where the process of making is distinct from the product (i.e., the requirements of MPEP 806.05(f) are met). Otherwise, claims to the process of using must be joined with the claims directed to the product and the process of making the product even though a showing of distinctness between the product and process of using the product (MPEP 806.05(h)) could be made. This concept is included in paragraph 1.141(b).

(4) Under the rules, the criteria of PCT Rule 13.2 will be applied when considering unity of invention of claims drawn to different categories of invention in international applications as an International Searching Authority, International Preliminary Examining Authority, and as a Designated or Elected Office in international applications which enter the national stage under 35 U.S.C. 371.

(5) Under the rules, in applying PCT Rule 13.2 to international applications as an International Searching Authority, an International Preliminary Examining Authority and to national stage applications under 35 U.S.C. 371, examiners will consider for unity of invention all of the claims to different categories of invention in the application and will permit retention in the same application for searching and/or examination, claims to the categories which meet the requirements of any one of PCT Rule 13.2(i) to (iii).

Under the rules, the USPTO will also permit in the same international or national stage application the following two combinations:

(1) An independent claim for a given product and an independent claim for a process specially adapted for the manufacture of said product.

(2) An independent claim for a given product and an independent claim for a process of using the said product.

Under the rules, if an application contains a combination of categories of claims which do not fall within any *one* of the combinations of PCT Rule 13.2(i) to (iii) or additional combinations (1) or (2) above, i.e., they claim more or less categories of invention than permitted in any one of PCT Rule 13.2(i) to (iii) or combination (1) or (2) above, unity of invention may not be present.

Further, an independent claim for a use in PCT Rule 13.2(i) and combination (2) above will be construed as being limited to a claim directed to a process of using. In determining unity of invention under PCT Rule 13.2 (i) and (iii) and combination (1) above, under the rules, the examiner will consider the word "specially" which appears before "adapted" to be an emphasis word rather than a limitation. In determining unity of invention under PCT Rule 13.2(ii), the examiner will consider the word "specifically" which appears before "designed" to be an emphasis word rather than a limitation.

Under the rules, if an application includes claims to all the categories of invention set forth in any one of PCT Rule 13.2 (i), (ii), (iii), combinations (1) or (2) above, and no additional categories of invention are present, unity of invention will exist and no additional fees will be required or restriction requirement made.

For example, if an application contained claims to only a process for the manufacture of a product and claims to a use of a product and no product claim is present, there will be lack of unity of invention since the provisions of Rule 13.2(i) do not apply because claims to all categories of invention set forth in PCT Rule 13.2(i) are not included in the application and the process for manufacture of a product is independent of the use of the product since neither is dependent on the other. Also if claims to all three categories of PCT Rule 13.2(i) were present at the time of the first Office action in a national stage application and all the product claims are rejected in the first Office action, a requirement for restriction could also be made, if appropriate, in view of independent inventions being in the application without an allowable linking (product) claim.

Under the rules, where claims to a category of invention in addition to those listed in any one of PCT Rule 13.2 (i), (ii), (iii) or combinations (1) or (2) above are included in an application, unity of invention may be lacking between the claims drawn to the combination of the categories of invention set forth in any *one* of PCT Rule 13.2 (i), (ii) or (iii) or combinations (1) or (2) above, and the claims to the additional category of invention. For example, if an application contains claims to a process for manufacture, claims to an apparatus or means for carrying out the process and claims to a process of using the product manufactured, there could be lack of unity of invention. In such a situation the examiner should group the claims to the process for manufacture and the claims for an apparatus or means for carrying out the process because unity of these two categories exists under PCT Rule 13.2(ii). The claims to the use of the product can be separately grouped if the "use" is shown to be "independent and distinct" of both the "process for manufacture" and the "apparatus or means for carrying out the process" as provided in Chapter 800 of the Manual of Patent Examining Procedure (MPEP).

When the claims presented in an application are directed to several categories of invention under the rules so that more than one paragraph of PCT Rule 13.2 and combinations (1) or (2) above applies, the examiner would inspect the claims to see if the categories of invention set forth in PCT Rule 13.2, paragraphs (i), (ii) and (iii), and then combinations (1) or (2) above are present in the application in that order. For example, if the categories of PCT Rule 13.2(i) are found in the application, the claims to those categories stated in PCT Rule 13.2(i) will be considered as one invention and any claims to different categories of invention will be reviewed to determine if they are "independent and distinct" of *all* the claims covered in PCT Rule 13.2(i) in accordance with the provisions of Chapter 800 of the MPEP.

(6) Under PCT Rule 13.2 and combinations (1) and (2) above, unity will exist where the claims are limited to one invention in each category of invention recited. For example, under PCT Rule 13.2(i), claims are permitted to one product, one process of manufacturing the product and one use of the product. If multiple products, processes of manufacture or uses are claimed, the first invention in the category first mentioned in the claims would be considered as the elected invention under the rules. The first recited invention of each additional category which is related to the first invention as indicated in the previous sentence will be considered elected. Accordingly, for example, if multiple products are claimed, the first recited product will be considered to be constructively elected and if multiple processes adapted for making and/or using the product are claimed, the first recited process will also be constructively elected. Any additional inventions of the same category will be subject to payment of additional fees during the international stage. In a national stage application submitted under 35 U.S.C. 371 any such holding by the examiner will be made in the form of a restriction requirement. Such a restriction requirement will be made on the basis of criteria set forth in MPEP Chapter 800. Applicant will have the right to traverse such a restriction requirement in the response to the Office action.

(7) Inventions of different categories, to have unity of invention, must be related rather than independent

inventions. For example, the product as claimed in PCT Rule 13.2(i) and combinations (1) and (2) above must be capable of being made by the claimed process for manufacture or being used in the claimed process of use. Likewise in PCT Rule 13.2(ii), the apparatus as claimed must be capable of carrying out the claimed process. In PCT Rule 13.2(iii), the claimed process of manufacture must be capable of preparing the claimed product and the claimed apparatus or means must be able to perform the claimed process of manufacture.

(8) Under §§ 1.494 and 1.495, applicants must indicate on all application papers filed for entry under 35 U.S.C. 371 that the filing is being made under 35 U.S.C. 371. Otherwise, the application papers will be treated as having been filed under 35 U.S.C. 111.

*Patent Cooperation Treaty, Chapter II*

The Patent Cooperation Treaty became effective for the United States on January 24, 1978. The United States, however, was one of six countries (out of the 40 countries who have ratified or acceded to the Treaty) which had reservations not to be bound by Chapter II. The document removing the reservation as to Chapter II was deposited with the Director General of the World Intellectual Property Organization on April 1, 1987. Accordingly, Chapter II of the Treaty for the United States of America, Pub. L. 99-616 and these final regulations become effective 3 months later on July 1, 1987.

Chapter I of the Patent Cooperation Treaty provides a standardized application format and a centralized filing procedure for international patent applications. Pursuant to Chapter I, an applicant may submit an international application, designating those member countries in which the applicant desires patent protection. Filing an international application has the same effect as filing a separate application in all designated member states with respect to the filing date. In addition, by filing an international application, the applicant does not have to incur the expenses associated with national patent prosecution in the designated countries until 20 months from the priority date of the international application. During this period, the applicant obtains an international search report citing prior art deemed to be relevant to the claims of the invention contained in the international application. This helps the applicant decide whether to proceed with patent prosecution in the various countries originally designated.

Chapter II of the Patent Cooperation Treaty provides two further benefits for the applicant. First, an additional 10 months is allowed, for a total of 30 months from the priority date of the international application, before the applicant must decide whether to proceed with national patent prosecution in the elected countries. Second, the applicant is provided with an international preliminary examination report. In contrast to the international search report, which provides citations of prior art pertinent to the invention, the international preliminary examination report is a non-binding opinion from an International Preliminary Examining Authority as to whether the invention is novel, involves an inventive step (is non-obvious), and is industrially applicable. A preliminary examination report will be established within 28 months from the priority date. This preliminary examination report, together with the additional 10 months before the decision to proceed with national prosecution is required, places the applicant in a better position to consider commercial factors associated with the invention and to decide whether to pursue patent protection in the various elected countries.

To take advantage of these benefits provided by Chapter II, an applicant must file a "Demand" for a preliminary examination in an appropriate International Preliminary Examining Authority prior to the expiration of the 19th month from the priority date and pay certain fees. The final rules establish the amounts of some of the necessary fees and procedures under Chapter II and also group all the rules unique to international applications in a separate area of the regulations. The rules fall into three groups: (1) those directed to procedures under Chapter I, (2) those directed to procedures under Chapter II, and (3) those directed to entering the national stage under 35 U.S.C. 371.

*Changes From the Proposed Rules*

In § 1.475, a new paragraph (f) has been added which sets forth in the rules the exact wording of PCT Rule 13. PCT Rule 13 was included in the proposed rules as a footnote. The incorporation of the wording of PCT Rule 13 into § 1.475(f) will make it easier to refer to and easier to locate. Sections 1.475, 1.476, 1.487 and 1.499 are also changed to refer to § 1.475(f) rather than footnote 1.

In § 1.480(c), the wording has been clarified by adding a reference to the election of the United States.

Section 1.484(f) has been modified from the proposal to permit more than one interview in those situations where the examiner considers that an additional interview would be helpful.

In § 1.485, paragraph (b) has not been included since the substance thereof is set forth in § 1.484(d).

In § 1.492(a) (2) and (3), "I" has been deleted in order to refer to both § 1.445(a)(2) (i) and (ii).

An additional paragraph (a)(4) has been added to § 1.492 and an additional paragraph (b) has been added to § 1.496 which provide for a substantially reduced national fee and special procedure, respectively, where the application has satisfied the requirements of novelty, inventive step (non-obviousness) and industrial applicability before the United States International Preliminary Examining Authority as to the identical claims which are in the application at the national stage in the Patent and Trademark Office. Amendments during subsequent prosecution will only be permitted in response to an examiner's rejections or objections. Thus, no new claims are permitted. Therefore, most of such cases will require little or no prosecution to satisfy the requirements for patentability. The title of § 1.496 has been broadened in view of the new paragraph (b) and proposed § 1.496 has been redesignated as paragraph (a).

In §§ 1.494 and 1.495, an additional paragraph has been added to indicate the date of abandonment of an international application as to the United States if the requirements of 35 U.S.C. 371(c) are not timely fulfilled.

*Response to Comments Received*

Specific comments were received on several of the proposed rules, particularly those relating to unity of invention and fees. Sixteen letters submitting written comments were received. Oral testimony was presented by five persons at the public hearing conducted on April 6, 1987 resulting in 46 pages of testimony. All of the written and oral comments were considered in adopting the changes set forth herein. Comments suggesting modifications to the proposed rules or requesting clarification thereto appear below with responses thereto.

*Comment.* A question was raised as to whether the deadline for filing a continuing application under 35 U.S.C. 365(c) and 120 was 20 or 22 months under Chapter I and 30 or 32 months under Chapter II.

*Reply.* The Patent and Trademark Office considers the international application to be pending until the 22nd month from the priority date if the United States has been designated and no Demand for International Preliminary

Examination has been filed prior to the expiration of the 19th month from the priority date and until the 32nd month from the priority date if a Demand for International Preliminary Examination which elected the United States of America has been filed prior to the expiration of the 19th month from the priority date, provided that a copy of the international application has been communicated to the Patent and Trademark Office within the 20 or 30 month period, respectively. If a copy of the international application has not been communicated to the Patent and Trademark Office within the 20 or 30 month period respectively, the international application becomes abandoned as to the United States 20 or 30 months from the priority date respectively. These periods have been placed in the rules as paragraph (h) of § 1.494 and paragraph (i) of § 1.495. A continuing application under 35 U.S.C. 365(c) and 120 may be filed anytime during the pendency of the international application.

*Comment.* A comment was received concerning the situation where a continuing application is filed under 35 U.S.C. 365(c) of an international application which claims priority of an earlier filed foreign application as to (1) whether the applicant must specifically claim priority in the continuing application and (2) whether the certified copy of the priority application which may have been communicated to the Patent and Trademark Office by the International Bureau may be relied upon without any need to file a certified copy of the priority application in the continuing application.

*Reply.* As to item (1), it is necessary under the statute for the applicant to claim priority in the continuing application. Otherwise there is no indication that such benefit is desired in the continuation and the information may not be present for printing of any subsequent patent.

As to item (2), the certified copy of the priority application communicated by the International Bureau is placed in a folder and is not assigned a U.S. serial number unless the national stage is entered. Such folders are disposed of if the national stage is not entered. Therefore such certified copies may not be available if needed later in the prosecution of a continuing application. An alternative would be to physically remove the priority documents from the folders and transfer them to the continuing application. The resources required to request transfer, retrieve the folders, make suitable record notations, transfer the certified copies, enter and make of record such copies in the continuing applications is substantial. Accordingly, the priority documents in folders of international applications which have not entered the national stage may not be relied on.

*Comment.* One comment raised the question whether a continuing application filed under 35 U.S.C. 111 and entitled to the benefit of a prior international application designating the United States under 35 U.S.C. 365(c) and 120 would be subject to the PCT unity practice of § 1.499 or the national restriction practice under § 1.141.

*Reply.* A continuing application filed under 35 U.S.C. 111 would be subject to the national restriction practice as set forth in § 1.141 and Chapter 800 of the Manual of Patent Examining Procedure. Only those international applications entering the national stage under 35 U.S.C. 371 and § 1.494 or § 1.495 would be subject to the unity of invention practice set forth in § 1.499.

*Comment.* Five comments were made to the effect that the unity practice set forth in the rules was not consistent with the unity of invention criteria currently under discussion in the WIPO "harmonization" treaty meetings.

*Response.* At the present time there appears to be no agreed upon unity practice in the harmonization meetings. Only a discussion document has been prepared by WIPO. The Patent and Trademark Office is currently making a very intensive study of unity of invention in the United States, Japan and the European Patent Office. The practice which may result from this study and subsequent discussions is also not clear at this time. For these reasons as well as the fee implications of such a change, it is considered preferable to proceed with a clarification of the unity of invention practice which is to be used as part of the regulations for use by patent applicants and examiners at this time and, if modification of the practice is required in the future, appropriate changes in the law and the rules will be made at that time.

*Comment.* Two comments argued that the difference in treatment of unity of invention is contrary to 35 U.S.C. 372(a).

*Reply.* 35 U.S.C. 372(a) states:

> All questions of substance and, within the scope of the requirements of the treaty and Regulations, procedure in an international application designating the United States shall be determined as in the case of national applications regularly filed in the Patent and Trademark Office.

This section is interpreted as relating only to substantive questions of patentability which includes matters such as the definition of prior art. See PCT Article 27(5). If section 372(a) were interpreted to include items other than those relating to substantive questions of patentability, items such as requirements to obtain a filing date would be included. Clearly, an international application must only meet the filing date requirements of PCT Article 11(1) even though a U.S. national application must meet the requirements of 35 U.S.C. 111.

*Comment.* One comment was received stating that the U.S. rules should define prior art for PCT purposes and also the manner of issuing International Preliminary Examination Reports.

*Reply.* Prior art for PCT purposes is already defined in PCT Rule 64 and the procedures are set forth in PCT Rules 66 and 70. To repeat the substance of these PCT rules in the U.S. rules would be duplicative and possibly lead to different interpretations if different wording was used.

*Comment.* One comment inquired whether the International Preliminary Examining Report was binding on a USPTO examiner in the national stage.

*Reply.* An International Preliminary Examination Report is not binding on a USPTO examiner. PCT Article 33(1) clearly states that the "objective of the international preliminary examination is to formulate a preliminary and non-binding opinion." Since the USPTO has had no experience with International Preliminary Examination Reports prepared by foreign offices, as well as foreign offices having no experience with Reports prepared by the USPTO, the degree of reliance on such Reports in the national stage cannot be determined at the present time. Studies underway with the European Patent Office and the Japanese Patent Office regarding inventive step and other matters and experience with Reports from other International Preliminary Examining Authorities may be helpful in further addressing this question in the future.

*Comment.* Two comments were received asking why § 1.141(b) was being changed since there was no change in U.S. restriction practice.

*Reply.* No change is being made in U.S. restriction practice in applications filed under 35 U.S.C. 111. The amendments to § 1.141 basically delete expressions used in the Patent Cooperation Treaty which are not used in U.S. national practice. The criteria deleted from § 1.141(b) still remain in Chapter 800 of the Manual of Patent Examining Procedure.

*Comment.* One comment was made that any interpretation by the PTO of

the PCT Unity language will carry over to the Harmonization Treaty.

*Reply.* The U.S. delegation to the WIPO harmonization meetings has several times requested that guidelines be prepared for consideration with the Unity of Invention Article and Rules. Any interpretation of future treaty wording would be controlled by the guidelines.

*Comment.* Three comments were received that the PTO is attempting to promulgate a variation of PCT Rule 13 which is contrary to the Caterpillar decision because the U.S. rules are not identical in scope with PCT Rule 13.

*Reply.* The U.S. rules relating to Unity of Invention are considered to be in accordance with PCT Rule 13 and the Caterpillar decision. Rules 1.475, 1.487 and 1.499 are not identical with PCT Rule 13.2 because the U.S. rules are somewhat broader because additional combinations are included. The U.S. rules are also consistent with the Caterpillar decision because this decision related only to the interpretation of the expressions in PCT Rule 13.2.

*Comment.* One comment inquired as to the amount of the handling fee.

*Reply.* The amount of the handling fee is set forth in the SCHEDULE OF FEES appearing at the end of the PCT Rules. These fees are stated in Swiss Francs. The current amount for the Handling Fee is 200 Swiss Francs. The amount in U.S. dollars will be established by the Director General based on the current exchange rates as provided in PCT Rule 57.2(c).

*Comment.* One comment proposed that a rule be implemented under which an examiner must complete the first written opinion within two months of the filing of the Demand.

*Reply.* Although the Office will expect an examiner to begin the International Preliminary Examination as early as possible after receipt, delays in issuing the written opinion may occur because the International Preliminary Examination fee was paid later than the filing of the Demand under PCT Rule 58.2, the application contains defects in form or contents or the application lacks unity of invention. Thus, such a rule would not be appropriate.

*Comment.* One comment questioned the need to re-impose restriction (holding of lack of unity of invention) if a linking claim is not allowable.

*Reply.* There is no mandatory requirement that the examiner impose a holding of lack of unity if the linking claim is shown to lack novelty and inventive step. However, if such a possibility did not exist, applicants could present broad generic claims to entire classes of inventions and thereby prevent any subsequent holding of lack of unity by the examiner.

*Comment.* One comment suggested that applicants in national patent applications be allowed to take advantage of the PCT unity criteria by paying a surcharge.

*Reply.* Such a fee is not provided for under 35 U.S.C. 41 and would appear to require legislative action.

*Comment.* Three comments suggested that the increases in the search fees were either unlawful or inconsistent with the spirit of the Patent and Trademark Office Authorization Act passed by Congress in 1986 in view of the freeze imposed thereby.

*Reply.* The Patent and Trademark Office Appropriations Act (Public Law 99-607) at Sec. 3(b) states.

> (b) PATENT FEES.—The Commissioner of Patents and Trademarks may not, during fiscal years 1986, 1987, and 1988, increase fees established under section 41(d) of title 35, United States Code, except for purposes of making adjustments which in the aggregate do not exceed fluctuations during the previous 3 years in the Consumer Price Index, as determined by the Secretary of Labor. The Commissioner also may not establish additional fees under such section during such fiscal years.

The legislative history also makes clear that the prohibition against fee increases relates only to those fees established under section 41(d) and indicates that fees for new types of processing, services, or materials are not prohibited. The prohibition in the appropriation authorization is strictly limited to fees established under 35 U.S.C. 41(d) and does not affect the authority of the Commissioner to set fees under the Patent Cooperation Treaty. Note 35 U.S.C. 376 which authorizes the Commissioner to set fees for both the international and national stages. The new services relating to unity of invention are clearly not within the scope of the appropriation authorization restriction.

*Comment.* Three comments stated that the $100 fee increase for an international search is clearly excessive.

*Reply.* The increase in the search fee is to recover the average estimated additional cost of processing international applications with claims to more inventions than were permitted when the current search fees were established. The increase is established also to provide for an expected higher percentage of international applications containing claims to more than one category of invention. If experience shows these expectations were in error, fees will be adjusted in the future.

*Comment.* One comment stated that the increase in the international search fee was not justified by *Caterpillar Tractor Co. v. Commissioner of Patents and Trademarks*, 231 USPQ 590 (E. D. Va. 1986) which merely clarified an aspect of existing law and did not change it.

*Reply.* The decision in the Caterpillar case indicated that the Office's criteria for unity of invention on which the amount of the search fee was determined were too strict in construing the language of the Treaty and that broader criteria were permitted under the terms of the Treaty. Fees under the Patent Cooperation Treaty were set based on pre-Caterpillar interpretations of PCT Rule 13.2 by the Patent and Trademark Office. Since such broader criteria require a more extensive search than that on which the search fee was previously calculated, an increase in the search fee is necessary to cover the cost of the additional search required under the broader criteria in accordance with the Caterpillar decision.

*Comment.* One comment stated that the increase in the international search fee penalizes an applicant presenting clearly a single invention.

*Reply.* A broadening of the interpretation of unity of invention and the increase in the average amount of work required in searching an international application results in a higher fee being required. A more narrow interpretation of unity of invention permits a lower average fee and would tend to benefit applicants with a clearly single invention. The Caterpillar decision and majority of comments received supported a more liberal interpretation of unity of invention. Testimony at the hearing indicated a preference for spreading any additional costs among all applicants.

*Comment.* One comment was received which suggested that § 1.484(d) be amended by adding a further sentence.

> If, after receipt of any response to the written opinion, the Examiner is of the opinion that some or all of the claims are not patentable, the Examiner shall issue a second written opinion which identifies any patentable subject matter, including any suggestions for claim modification to properly define the invention.

*Reply.* The wording of the proposed sentence is clearly inappropriate since the International Preliminary Examination Report does not make any determination of "patentability." Note PCT Article 35(2). Furthermore, the time limits for issuing an International Preliminary Examination Report are such that there may not be sufficient time in most cases to issue a second

opinion and receive a response thereto. Modifications in the interview practice are a more practical way of assuring a more complete and thorough international preliminary examination.

*Comment.* One comment suggested that § 1.484(f) be amended to read:

An applicant will be permitted *at least* [no more than] one personal [or telephone] interview, which must be conducted *prior to 27 months from the priority date* [during the non-extendable time limit for response by the applicant to the written opinion].

*Reply.* A less restrictive interview policy has been incorporated into § 1.484(f). The period for an interview cannot be delayed until the 27th month from the priority date since this is the time at which the examiners will be required to complete their Reports in order to allow time for review and mailing.

*Comment.* One comment proposed that § 1.485 be amended as follows:

The time limit for response in a written opinion of the International Preliminary Examining Authority may not be extended *to expire beyond 27 months from the priority date, without the permission of the Group Director.*

*Reply.* No need is seen to limit the end of the response period to the end of the 27th month since the period will be set by the examiner when a written opinion is mailed. The time limit cannot be extended (§ 1.484(d)) due to tight time frames for establishing the International Preliminary Examination Report within 28 months from the priority date. The time limits for response to a written opinion are set forth in PCT Rule 66.2(d).

*Comment.* Two written comments and the oral testimony indicated that the fees for entering the national stage should be considerably less after an international search and preliminary examination. The small $40.00 reduction in national stage fees is criticized as too small and a token fee of $40–$50 is stated as being more reasonable.

*Reply.* The fees are based on an adjustment of the U.S. filing fee based on estimated additional work or savings. However, in view of the comments, an additional basic national fee level has been added as § 1.492(a)(4) for those situations where the Patent and Trademark Office has established an International Preliminary Examination Report which indicates that all the claims entering the national stage have satisfied the criteria of PCT Articles 31(1) to (4). Current studies of the benefit of having PCT search reports from the searching authorities indicate an improvement in quality but no overall reduction in search or examining time. The search report from other than international searching authorities, with rare exceptions, does not allow the USPTO examiner to eliminate any part of the national search.

*Comment.* One comment argued that reciprocal treatment should be given to foreign applicants for benefits given U.S. applicants.

*Reply.* Although the European Patent Office offers a 20% reduction of only the search fee portion of its national stage entry fees, the resulting fee of a little under $1000 at current exchange rates is still more than twice the amount of the highest U.S. national fee. In Japan the national fee for requesting examination is currently 26,000 yen (a little under $200 at current exchange rates) where the search report was not prepared by the Japanese Patent Office and 6,000 yen if the search report was prepared by the Japanese Patent Office.

*Comment.* One comment urged that the U.S. rules match the less restrictive EPO rules with regard to the issuance of more than one written opinion and providing additional opportunity for the applicant to communicate with the examiner.

*Reply.* The proposed rules (§ 1.484) have been modified to provide for a less restrictive interview practice. The examiner should permit interview(s) during the time limit for response to the written opinion where such interviews would be useful and time is available to permit issuance of the International Preliminary Examination Report prior to the deadline of 28 months after the priority date.

Although nothing in the rules limit the proceedings to one written opinion, most demands are expected to be filed near the end of the 19th month deadline. Preparation of the first written opinion may be delayed because the fees were not paid at the time of filing the Demand, formal errors are found in the documents or unity of invention is lacking. The time limits for a reply to the first written opinion will normally be set at 2 months, although 3 months may be given where the time limit for reply ends prior to 25 months from the priority date. Response by the 25th month will allow the examiner 2 months to prepare the International Preliminary Examination Report.

However, a Demand may be filed much earlier than 19 months from the priority date and International Preliminary Examination may begin early as provided for in PCT Rule 69.1(b). Where time and other circumstances permit, a second written opinion may be provided, possibly with a one month time limit for reply.

*Comment.* One comment stated that proposed § 1.485(b) is a duplication of § 1.484(d).

*Reply.* Proposed paragraph (b) has been deleted in final rule 1.485.

*Comment.* One comment stated that procedures for the manner of issuing International Preliminary Examination Reports should be set forth in the U.S. rules.

*Reply.* Items already specifically covered in the PCT articles and rules are not needed in U.S. rules. The agreement with WIPO also regulates these matters as do the PCT search and preliminary examination guidelines.

*Comment.* One comment stated that the treatment of the International Preliminary Examination Report (IPER) by the USPTO at the national stage is not clear.

*Reply.* The IPER will be considered along with other relevant information when conducting a national examination for patentability. PCT Article 33(1) indicates that the objective of the International Preliminary Examination Report is to formulate a preliminary and non-binding opinion; it is not binding on any office. Any new questions relating to patentability may be raised.

*Comment.* One comment stated that a dual standard of unity defies logic.

*Reply.* The dual standard is necessary since the fees for patent applications filed under 35 U.S.C. 111 were set based upon an application being limited to one invention as defined at the time the fees were set which differs from the interpretation of unity under PCT required in view of the Caterpillar decision.

*Comment.* One comment stated that if additional PCT international search fees are required they should be made by statutory change.

*Reply.* The Commissioner is authorized by statute (35 U.S.C. 376) to set the national fee for PCT origin applications. Any change in national restriction practice for applications filed under 35 U.S.C. 111 would be made only after statutory change.

*Comment.* One comment indicated that in view of the Caterpillar decision holding the Office interpretation of "specifically designed" to be an unreasonable interpretation, the Office is proposing a double standard.

*Reply.* U.S. national law under 35 U.S.C. 121 does not require a consideration or interpretation of "specifically designed" to be made. This must only be made in PCT cases and those entering the national stage under 35 U.S.C. 371.

**Discussion of Specific Rules**

Section 1.8 is amended to indicate clearly that the certificate of mailing procedures thereunder may not be used for the filing of papers and fees relating to international applications. It should be noted that the provisions of § 1.10 regarding the filing of papers or fees by "Express Mail" apply to all papers and fees to be filed in the Patent and Trademark Office, including those relating to international applications.

Section 1.61 "Filing of applications in the United States of America as a Designated Office" is removed and the substance thereof moved to new § 1.494. Section 1.70 "Oath or declaration under 35 U.S.C. 371(c)(4)" is removed and the substance thereof moved to new § 1.497. These moves result in the rules relating to the international applications entering the national stage being located in a single area of the rules.

Section 1.101 is amended to remove the discussion of the order of examination for international applications entering the national stage, which is covered by new § 1.496.

Section 1.141 is amended to basically return the rule to its wording prior to the 1978 rule change implementing the Patent Cooperation Treaty and will be directed solely to national applications. This will avoid confusion with PCT Rule 13.2 which was interpreted by the court in *Caterpillar Tractor Company* v. *Commissioner of Patents and Trademarks*, supra, to have a different meaning than intended in present § 1.141. It does, however, retain for applicants the ability to claim a "reasonable number" of species rather than only 5, which limit existed prior to the 1978 rule change. Paragraph (b) continues the practice stated in the *Official Gazette* notice of August 1, 1984 published at 1046 O.G. 2. Unity of invention in international applications before the USPTO as an International Searching Authority under Chapter I of the Patent Cooperation Treaty is covered by § 1.475. Unity of Invention before the USPTO as an International Preliminary Examining Authority under Chapter II of the Patent Cooperation Treaty is covered by § 1.487. Unity of invention in international applications entering the national stage under 35 U.S.C. 371 is covered by § 1.499.

Section 1.401 is amended to include the definition of some terms used for Chapter II of the Patent Cooperation Treaty.

Section 1.414 is amended to include reference to the United States Patent and Trademark Office functioning as an Elected Office under Chapter II of the Patent Cooperation Treaty as well as a Designated Office under Chapter I.

Section 1.416 is added to indicate and describe the functioning of the United States Patent and Trademark Office as an International Preliminary Examining Authority under Chapter II of the Patent Cooperation Treaty.

Sections 1.431 and 1.432 are amended, in accordance with PCT Rule 15.4(b)(ii) and amended 35 U.S.C. 361, to indicate that the time limit for payment of the designation fee is one year from the priority date or one month from the date of receipt of the international application if that one month time limit expires after the expiration of one year from the priority date.

Section 1.445 is amended to increase the amount of the international search fees to provide for recovery of the average additional cost of processing applications with claims to more inventions than were permitted under the unity of invention criteria used when the previous international search fee amounts were established. The amounts for national stage fees are removed from § 1.445 and are now set forth in § 1.492.

The international search fee and national fees were previously established based on the effort and cost to the Office of searching and examining a single invention as defined by the United States Patent and Trademark Office prior to the decision in the Caterpillar case. Since additional effort will be required to search and examine an average application under the new rules defining unity of invention, the average international search and national fee must also be increased to cover the additional cost to the Office.

Section 1.475 "Changes in person, name, or address of applicants," is redesignated as § 1.472 to allow the grouping of rules into PCT Chapter I, PCT Chapter II and national stage related rules. No change other than redesignation is made.

A new § 1.475 is added to relate to unity of invention before the International Searching Authority. Paragraph (a) clearly indicates that PCT Rule 13 is to be followed in all such cases and paragraph (b) adds combinations acceptable under unity of invention in addition to those set forth in PCT Rule 13.2. Paragraph (c) relates to the handling of claims to categories in addition to the combinations specified in paragraph (b). Paragraph (d) relates to situations in which more than one invention of the same category of invention is recited in an international application. Paragraph (e) makes clear that inventions of different categories must be related, rather than independent, for unity of invention to exist. Paragraph (f) sets forth PCT Rule 13 for the convenience of patent applicants.

Section 1.481, regarding determination of unity of invention before the International Searching Authority, is redesignated as § 1.476 and amended to delete reference to § 1.141 from paragraph (a).

Section 1.482 is redesignated as § 1.477 and amended to make clear in the title that it deals with protests to findings of lack of unity of invention before the International Searching Authority. The amendment to paragraph (b) corrects an error in referring to another paragraph of the section.

A new § 1.480 is added to deal with the Demand for an international preliminary examination. Paragraph (a) indicates that a Demand is required to be filed to obtain an international preliminary examination and that the preliminary examination fee of § 1.482(a)(1) and the handling fee of § 1.482(b) are due at the time of filing of the Demand. If the fees are not paid at the time of filing of the Demand, the United States Patent and Trademark Office acting as an International Preliminary Examining Authority will provide an opportunity to pay the fees in accordance with PCT Rules 57.4 and 58.2.

Paragraph (b) of § 1.480 specifies that the Demand must be made on a standardized form as required by PCT Rule 53.1 and that such forms are available from the United States Patent and Trademark Office.

Paragraph (c) of § 1.480 specifies that, if the Demand is made prior to the expiration of the 19th month from the priority date, the provisions of PCT Article 39 and § 1.495 shall apply to allow entry into the national stage prior to the expiration of 30 months after the priority date. The final rule has been changed to add reference to the election of the United States. If the Demand is not filed prior to the expiration of the 19th month from the priority date, the provisions of PCT Article 22 and § 1.494 shall apply to allow entry into the national stage prior to the expiration of 20 months after the priority date.

Paragraph (d) of § 1.480 indicates that withdrawal of a proper Demand will not entitle applicant to a refund of the preliminary examination fee even if no claims are found that can or will be searched (PCT Article 34(4)(a)). A Demand that is so informal that it would be considered under the PCT Rules as if it had not been submitted will not be considered a proper Demand under the rule. A change in purpose after the filing of a Demand will not entitle an

applicant to a refund of the preliminary examination fee. PCT Rule 57.8 states that in no case shall the handling fee, or any supplement to the handling fee, be refunded.

A new § 1.482 is added to specify the international preliminary examination fees. Paragraph (a) sets a lower fee for the international preliminary examination where an international search fee has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority. Paragraph (a) also sets a lower additional preliminary examination fee for the preliminary examination of additional inventions found in the international application where a supplemental search fee has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority. Paragraph (b) indicates that the handling fee is prescribed in PCT Rule 57 and any necessary supplement to the handling fee shall be paid directly to the International Bureau in accordance with PCT Rule 57.1(b).

A new § 1.484 is added to describe the conduct of international preliminary examination. The rule describes that, if necessary, a written opinion will be established after consideration of any defects in accordance with PCT Rule 66.2 and after an examination to determine if the claimed invention has novelty, involves an inventive step (is non-obvious) and is industrially applicable. A written opinion prior to the international preliminary examination report would not be necessary if the international application does not contain any defects as mentioned in PCT Rule 66.2 and if all claims are found to be novel, involve an inventive step (non-obvious) and are industrially applicable. The written opinion will set a time limit for applicant to respond in accordance with PCT Rule 66.2(d). The time limit for reply will normally be two months but will be three months where the time limit will expire prior to 25 months from the priority date. The time limit may not be extended due to the tight time constraints under Chapter II of the Patent Cooperation Treaty. An international preliminary examination report will be established and one copy will be submitted to the International Bureau and one copy to applicant. The rule specifies that no international preliminary examination report will be established prior to issuance of an international search report and that no international preliminary examination will be conducted on inventions not previously searched by an International Searching Authority. Paragraph (f) specifies that at least one personal or telephone interview with the examiner will be permitted during the international preliminary examination. Additional interviews are permissible if the examiner determines that it would be helpful. Additional interviews will be governed, in part, by the time remaining before the time for issuance of the international preliminary examination report. The period during which the interview(s) can be held is limited by the non-extendable time limit for response by the applicant to a written opinion. Although nothing in this or any other rule limits the number of written opinions which may be established prior to the International Preliminary Examination Report, in most cases time will limit the number of written opinions to one.

A new § 1.485 is added to deal with amendments by applicant during international preliminary examination. An applicant is permitted by the rule to make amendments at the time of filing of the Demand and within the period set in any written opinion on the application as defined in § 1.484. Amendments under the rule would be required to be made by submitting replacement sheets and a description of how the replacement sheet differs from the replaced sheet. If an amendment cancels an entire sheet, that amendment should be communicated by letter without a replacement sheet. Proposed paragraph (b) is not promulgated because the substance thereof is set forth in § 1.484(d).

New § 1.487 defines what constitutes unity of invention before the International Preliminary Examining Authority. The standards for unity of invention generally parallel those set in § 1.475 regarding proceedings before the International Searching Authority.

New § 1.488 is added to set forth how the International Preliminary Examining Authority will proceed in handling determinations regarding the unity of invention criteria of § 1.487.

New § 1.489 sets forth the procedures to be followed by an applicant who wishes to protest a holding of lack of unity of invention by the International Preliminary Examining Authority. The additional fees would be required to be paid if more than one invention is to be examined, but could be accompanied by a request for refund and a statement setting forth reasons for disagreement with the holding of lack of unity of invention or why the required additional fees are excessive. This rule is in accordance with PCT Rule 68.3(c).

New § 1.491 is added to define the start of the national stage. Section 1.491 is the first rule in a new group of rules relating to applications entering the national stage pursuant to 35 U.S.C. 371.

New § 1.492 is added to set forth the fees and charges for international applications entering the national stage under 35 U.S.C. 371. The basic national fee is set forth in paragraph (a) at four levels to reflect the benefit that the United States Patent and Trademark Office will derive from having previously conducted an international preliminary examination or an international search. In § 1.492(a) (2) and (3), "(i)" has been deleted in order to refer to both § 1.445(a)(2) (i) and (ii). Paragraph (a)(4) which makes reference to § 1.496(b) has been added in view of comments received that indicated that in some instances substantial reliance may be placed upon the International Preliminary Examination Reports by the Patent and Trademark Office. The rule also sets the fee for an independent claim in excess of 3 (paragraph (b)), for presentation of each claim in excess of 20 (paragraph (c)) and for an application containing a multiple dependent claim (paragraph (d)). Paragraphs (e) and (f) include the fees previously contained in § 1.445 and include the alternative times for entering the national stage pursuant to § 1.494 or § 1.495.

New § 1.494 is added to contain substantially the provisions of former § 1.61 in amended form. This section relating to filing application documents in the United States Patent and Trademark Office to enter the national stage has been grouped with other sections relating to the national stage for the convenience of applicants and examiners involved in the prosecution of international applications entering the national stage. The rule applies where no Demand for international preliminary examination has been filed prior to the expiration of the 19th month from the priority date. If such a Demand were filed, § 1.495 would apply.

Section 1.494(f) requires that a specific indication be given by the applicant when entering the national stage that the documents being submitted are being submitted under 35 U.S.C. 371. If no clear indication is found, the documents will be considered to be for a regular national application under 35 U.S.C. 111. Paragraph (g) makes clear that the various time limits set out in the rule, some of which are set by the PCT, may not be extended pursuant to § 1.136 or otherwise. The extension of time provisions, including petition and payment of a fee, set out in § 1.136(a) do not apply to the time limits of the rule or

time limits set by the International Searching Authority or the International Preliminary Examining Authority. New paragraph (h) clarifies when an international application designating the United States becomes abandoned as to the United States.

New § 1.495 is added to deal with filing application documents in the United States Patent and Trademark Office to enter the national stage where a Demand for international preliminary examination has been filed with an International Preliminary Examining Authority prior to the expiration of the 19th month from the priority date. In such a case, an applicant will have 30 months from the priority date to enter the national stage. The rule parallels in many respects § 1.494. New paragraph (i) clarifies when an international application electing the United States becomes abandoned as to the United States.

New § 1.496 is added to specify in paragraph (a) that international applications in the national stage will be taken up for action based on the date when the requirements of 35 U.S.C. 371(c) are met. Paragraph (b) indicates that applications entering the U.S. national stage only with claims which have been found in an International Preliminary Examination Report to have satisfied the criteria for novelty, inventive step (non-obviousness) and industrial applicability as defined in PCT Article 33 (1) to (4) will be taken up for action before other applications. Preliminary amendments may accompany the filing of the national stage application to cancel claims which do not satisfy the criteria. These applications will have paid the lower filing fee set in § 1.492(a)(4) and most will not require extensive prosecution, i.e., objection or rejection before resolving the issue of patentability. Amendments will not be permitted to be made in such applications other than in response to objections as to form or to cancel claims in response to a rejection made by the examiner in the national stage application. Such a rejection could be necessary, for example, where applicant submits information in accordance with the duty of disclosure under 37 CFR 1.56(a).

New § 1.497 is added to contain substantially the wording of removed §1.70. This rule relates to the oath or declaration required to enter the national stage and is grouped with other national stage entry requirements.

New § 1.499 is added to cover unity of invention during the national stage. The provisions of the section are basically parallel to those of §§ 1.475 and 1.487. Paragraph (f) indicates the manner of handling a finding of lack of unity of invention on grounds other than those involving different categories of invention.

### Environmental, Energy, and Other Considerations

The rule change does not have a significant impact on the quality of the human environment or conservation of energy resources.

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

The General Counsel of the Department of Commerce has certified to the Small Business Administration that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354) because considerable savings can potentially be achieved under Chapter II of the Patent Cooperation Treaty because additional time is provided for applicants to decide whether to proceed with the cost of foreign prosecution and savings will in fact be achieved under the unity of invention practice and the provision for reduced fees for small entities entering the national stage in making an application for a United States patent.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The information collection requirement contained in these rules was submitted to the Office of Management and Budget (OMB) at the time of the proposed rulemaking for review under Section 3504(h) of the Paperwork Reduction Act. OMB has approved the information collection requirement and has assigned OMB control number 0651-0021 thereto.

### List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Authority delegations (government agencies), Courts, Inventions and patents, Lawyers.

Notice is hereby given that pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6 and 376(b) and Pub. L. 99-616, the Patent and Trademark Office is amending Title 37 of the Code of Federal Regulations as set forth below.

## PART 1—RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

**Authority:** 35 U.S.C. 6 unless otherwise noted.

2. Section 1.8 is amended by revising paragraph (a)(2)(xi) to read as follows:

**§ 1.8 Certificate of mailing.**

(a) * * *

(2) * * *

(xi) The filing of international applications for patent and all papers and fees relating thereto.

* * * * *

**§ 1.61 [Removed]**

3. Section 1.61 is removed.

**§ 1.70 [Removed]**

4. Section 1.70 is removed.

5. Section 1.101 is amended by revising paragraph (a) to read as follows:

**§ 1.101 Order of examination.**

(a) Applications filed in the Patent and Trademark Office and accepted as complete applications are assigned for examination to the respective examining groups having the classes of inventions to which the applications relate. Applications shall be taken up for examination by the examiner to whom they have been assigned in the order in which they have been filed except for those applications in which examination has been advanced pursuant to § 1.102. See § 1.496 for order of examination of international applications in the national stage.

* * * * *

6. Section 1.141 is revised to read as follows:

**§ 1.141 Different inventions in one national application.**

(a) Two or more independent and distinct inventions may not be claimed in one national application, except that more than one species of an invention, not to exceed a reasonable number, may be specifically claimed in different claims in one national application, provided the application also includes an allowable claim generic to all the

BEST COPY AVAILABLE

claimed species and all the claims to species in excess of one are written in dependent form (§ 1.75) or otherwise include all the limitations of the generic claim.

(b) Where claims to all three categories, product, process of making, and process of use, are included in a national application, a three way requirement for restriction can only be made where the process of making is distinct from the product. If the process of making and the product are not distinct, the process of using may be joined with the claims directed to the product and the process of making the product even though a showing of distinctness between the product and process of using the product can be made.

**Subpart C—International Processing Provisions**

7. The authority for Subpart C is revised to read as follows:

**Authority:** Pub. L. 94–131, 89 Stat. 685; Pub. L. 99–616, 35 U.S.C. 351 through 376.

8. Section 1.401 is amended to redesignate paragraph (g) as paragraph (i) and add new paragraphs (g) and (h) as follows:

**§ 1.401 Definitions of terms under the Patent Cooperation Treaty.**

* * * * *

(g) "Demand," when capitalized, means that document filed with the International Preliminary Examining Authority which requests an international preliminary examination.

(h) "Annexes" means amendments made to the claims, description or the drawings before the International Preliminary Examining Authority.

* * * * *

9. Section 1.414 is revised to read as follows:

**§ 1.414 The United States Patent and Trademark Office as a Designated Office or Elected Office.**

(a) The United States Patent and Trademark Office will act as a Designated Office or Elected Office for international applications in which the United States of America has been designated or elected as a State in which patent protection is desired.

(b) The United States Patent and Trademark Office, when acting as a Designated Office or Elected Office during international processing will be identified by the full title "United States Designated Office" or by the abbreviation "DO/US" or by the full title "United States Elected Office" or by the abbreviation "EO/US".

(c) The major functions of the United States Designated Office or Elected Office in respect to international applications in which the United States of America has been designated or elected, include:

(1) Receiving various notifications throughout the international stage and

(2) Accepting for national stage examination international applications which satisfy the requirements of 35 U.S.C. 371.

10. Under "General Information," a new § 1.416 is added to read as follows:

**§ 1.416 The United States International Preliminary Examining Authority.**

(a) Pursuant to appointment by the Assembly, the United States Patent and Trademark Office will act as an International Preliminary Examining Authority for international applications filed in the United States Receiving Office and in other Receiving Offices as may be agreed upon by the Commissioner, in accordance with agreement between the Patent and Trademark Office and the International Bureau.

(b) The United States Patent and Trademark Office, when acting as an International Preliminary Examining Authority, will be identified by the full title "United States International Preliminary Examining Authority" or by the abbreviation "IPEA/US."

(c) The major functions of the International Preliminary Examining Authority include:

(1) Receiving and checking for defects in the Demand;

(2) Collecting the handling fee for the International Bureau and the preliminary examination fee for the United States International Preliminary Examining Authority;

(3) Informing applicant of receipt of the Demand;

(4) Considering the matter of unity of invention;

(5) Providing an international preliminary examination report which is a non-binding opinion on the questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), and to be industrially applicable; and

(6) Transmitting the international preliminary examination report to applicant and the International Bureau.

11. Section 1.431 is amended by revising paragraph (d)(2) to read as follows:

**§ 1.431 International application requirements.**

* * * * *

(d) * * *

(2) The designation fee, or the amount necessary to cover all the designations made in the request if not paid by the applicant within one year from the priority date or within one month from the date of receipt of the international application if that month expires after the expiration of one year from the priority date.

* * * * *

12. Section 1.432 is amended by revising paragraph (b) to read as follows:

**§ 1.432 Designation of States and payment of designation fees.**

* * * * *

(b) The designation fees may be paid upon filing of the international application, but must be paid before the expiration of one year from the priority date or within one month from the date of receipt of the international application if that month expires after the expiration of one year from the priority date. Failure to timely pay the designation fee for a particular Designated State will result in the withdrawal of that designation. Failure to timely pay at least one designation fee will result in the withdrawal of the international application.

13. Section 1.445 is amended by revising the title and paragraph (a) to read as follows:

**§ 1.445 International application filing, processing and search fees.**

(a) The following fees and charges for international applications are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A transmittal fee (see 35 U.S.C. 361(d) and PCT Rule 14), $170.00.

(2) A search fee (see 35 U.S.C. 361(d) and PCT Rule 16) where:

(i) No corresponding prior United States national application with basic filing fee has been filed, $520.00.

(ii) A corresponding prior United States national application with basic filing fee has been filed, $350.00.

(3) A supplemental search fee when required, per additional invention, $140.00.

**§ 1.475 [Redesignated as § 1.472]**

14. Section 1.475 is redesignated as § 1.472.

15. A new § 1.475 is added following the heading, "Unity of Invention," to read as follows:

**§ 1.475 Unity of invention before the International Searching Authority.**

(a) An international application before the International Searching Authority will be considered to have unity of invention if the claims are in

accordance with PCT Rule 13 (see paragraph (f) of this section).

(b) An international application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the combinations of categories as set forth in PCT Rule 13.2 (see paragraph (f) of this section) or to the combination of—

(1) A product and a process for the manufacture of said product, or

(2) A product and a process of use of said product.

If an application contains claims to more or less than one of the combinations of categories set forth in PCT Rule 13.2 (see paragraph (f) of this section) or a combination set forth in paragraphs (b) (1) or (2) of this section, unity of invention may not be present.

(c) If an international application contains claims to a category of invention in addition to those categories included in any one of the combinations specified in paragraph (b) of this section, lack of unity of invention may be held between the categories included in the combination and the claims to the additional category of invention.

(d) Unity of invention will exist where the claims are limited to one of the combinations of categories set forth in PCT Rule 13.2 (see paragraph (f) of this section) or in a combination set forth in paragraphs (b) (1) or (2) of this section. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the inventions to be searched. Any such holding by the examiner will be made of record as a holding of lack of unity of invention.

(e) The inventions recited by the claims of different categories must be related rather than independent inventions.

(f) The wording of PCT Rule 13 is as follows:

**PCT Rule 13—Unity of Invention**

*13.1 Requirement*

The international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention").

*13.2 Claims of Different Categories*

Rule 13.1 shall be construed as permitting, in particular, one of the following three possibilities:

(i) in addition to an independent claim for a given product, the inclusion in the same international application of an independent claim for a process specially adapted for the manufacture of the said product, and the inclusion in the same international application of an independent claim for a use of the said product, or

(ii) in addition to an independent claim for a given process, the inclusion in the same international application of an independent claim for an apparatus or means specifically designed for carrying out the said process, or

(iii) in addition to an independent claim for a given product, the inclusion in the same international application of an independent claim for a process specially adapted for the manufacture of the product, and the inclusion in the same international application of an independent claim for an apparatus or means specifically designed for carrying out the process.

*13.3 Claims of One and the Same Category*

Subject to Rule 13.1, it shall be permitted to include in the same international application two or more independent claims of the same category (i.e., product, process, apparatus, or use) which cannot readily be covered by a single generic claim.

*13.4 Dependent Claims*

Subject to Rule 13.1, it shall be permitted to include in the same international application a reasonable number of dependent claims, claiming specific forms of the invention claimed in an independent claim, even where the features of any dependent claim could be considered as constituting in themselves an invention.

*13.5 Utility Models*

Any designated State in which the grant of a utility model is sought on the basis of an international application may, instead of Rules 13.1 to 13.4, apply in respect of the matters regulated in those Rules the provisions of its national law concerning utility models once the processing of the international application has started in that State, provided that the applicant shall be allowed at least two months from the expiration of the time limit applicable under Article 22 to adapt his application to the requirements of the said provisions of the national law.

16. Section 1.481 is redesignated as § 1.476 and is amended by revising paragraph (a) to read as follows:

**§ 1.476 Determination of unity of invention before the International Searching Authority.**

(a) Before establishing the international search report, the International Searching Authority will determine whether the international application complies with the requirement of unity of invention as set forth in PCT Rule 13 (see § 1.475(f)) and § 1.475.

* * * * *

17. Section 1.482 is redesignated as § 1.477 and is amended by revising the title and paragraph (b) to read as follows:

**§ 1.477 Protest to lack of unity of invention before the International Searching Authority.**

* * * * *

(b) Protest under paragraph (a) of this section will be examined by the Commissioner or the Commissioner's designee. In the event that the applicant's protest is determined to be justified, the additional fees or a portion thereof will be refunded.

* * * * *

18. A new Section 1.480 is added preceded by a heading to read as follows:

**International Preliminary Examination**

**§ 1.480 Demand for international preliminary examination.**

(a) On the filing of a Demand and payment of the fees for international preliminary examination (§ 1.482), the international application shall be the subject of an international preliminary examination. The preliminary examination fee (§ 1.482(a)(1)) and the handling fee (§ 1.482(b)) shall be due at the time of filing of the Demand.

(b) The Demand shall be made on a standardized printed form. Copies of the printed Demand forms are available from the Patent and Trademark Office. Letters requesting printed forms should be marked "Box PCT".

(c) If the Demand is made prior to the expiration of the 19th month from the priority date and the United States of America is elected, the provisions of § 1.495 shall apply rather than § 1.494.

(d) Withdrawal of a proper Demand will not entitle applicant to a refund of the preliminary examination fee or handling fee.

19. A new Section 1.482 is added to read as follows:

**§ 1.482 International preliminary examination fees.**

(a) The following fees and charges for international preliminary examination are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A preliminary examination fee is due on filing the Demand:

(i) Where an international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority, a preliminary examination fee of, $370.00.

(ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office, a preliminary examination fee of, $570.00.

(2) An additional preliminary examination fee when required, per additional invention:

(i) Where a supplemental search fee as set forth in § 1.445(a)(3) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority, $125.00.

(ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office, $190.00.

(b) The handling fee is due on filing the Demand. Any necessary supplement to the handling fee shall be paid directly to the International Bureau.

(35 U.S.C. 6, 376)

20. A new § 1.484 is added to read as follows:

**§ 1.484 Conduct of international preliminary examination.**

(a) An international preliminary examination will be conducted to formulate a non-binding opinion as to whether the claimed invention has novelty, involves an inventive step (is non-obvious) and is industrially applicable.

(b) No international preliminary examination report will be established prior to issuance of an international search report.

(c) No international preliminary examination will be conducted on inventions not previously searched by an International Searching Authority.

(d) The International Preliminary Examining Authority will establish a written opinion if any defect exists or if the claimed invention lacks novelty, inventive step or industrial applicability and will set a non-extendable time limit in the written opinion for the applicant to respond.

(e) If no written opinion under paragraph (d) of this section is necessary, or after any written opinion and the response thereto or the expiration of the time limit for response to such written opinion, an international preliminary examination report will be established by the International Preliminary Examining Authority. One copy will be submitted to the International Bureau and one copy will be submitted to the applicant.

(f) An applicant will be permitted a personal or telephone interview with the examiner, which must be conducted during the non-extendable time limit for response by the applicant to a written opinion. Additional interviews may be conducted where the examiner determines that such additional interviews may be helpful to advancing the international preliminary examination procedure. A summary of any such personal or telephone interview must be filed by the applicant as a part of the response to the written opinion or, if applicant files no response, be made of record in the file by the examiner.

21. A new § 1.485 is added to read as follows:

**§ 1.485 Amendments by applicant during international preliminary examination.**

The applicant may make amendments at the time of filing of the Demand and within the time limit set by the International Preliminary Examining Authority for response to any written opinion. Any such amendments must—

(1) Be made by submitting a replacement sheet for every sheet of the application which differs from the sheet it replaces unless an entire sheet is cancelled and

(2) Include a description of how the replacement sheet differs from the replaced sheet.

If an amendment cancels an entire sheet of the international application, that amendment shall be communicated in a letter.

22. A new § 1.487 is added to read as follows:

**§ 1.487 Unity of invention before the International Preliminary Examining Authority.**

(a) An international application before the International Preliminary Examining Authority will be considered to have unity of invention if the claims are in accordance with PCT Rule 13 (see § 1.475(f)).

(b) An international application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the combinations of categories as set forth in PCT Rule 13.2 (see § 1.475(f)) or to the combination of—

(1) A product and a process for the manufacture of said product or

(2) A product and a process of use of said product.

If an application contains claims to more or less than one of the combinations of categories of invention set forth in PCT Rule 13.2 (see § 1.475(f)) or a combination set forth in paragraphs (b) (1) or (2) of this section, unity of invention may not be present.

(c) If an international application contains claims to a category of invention in addition to those categories included in any one of the combinations specified in paragraph (b) of this section, lack of unity of invention may be held between the categories included in the combination and the claims to the additional category of invention.

(d) Unity of invention will exist where the claims are limited to one of the combinations of categories set forth in PCT Rule 13.2 (see § 1.475(f)) or a combination set forth in paragraphs (b) (1) or (2) of this section. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the inventions to be examined. Any such holding by the examiner will be made of record as a holding of lack of unity of invention.

(e) The inventions recited by the claims of different categories must be related rather than independent inventions.

23. A new § 1.488 is added to read as follows:

**§ 1.488 Determination of unity of invention before the International Preliminary Examining Authority.**

(a) Before establishing any written opinion or the international preliminary examination report, the International Preliminary Examining Authority will determine whether the international application complies with the requirement of unity of invention as set forth in § 1.487.

(b) If the International Preliminary Examining Authority considers that the international application does not comply with the requirement of unity of invention, it may:

(1) Issue a written opinion and/or an international preliminary examination report, in respect of the entire international application and indicate that unity of invention is lacking and specify the reasons therefor without extending an invitation to restrict or pay additional fees. No international preliminary examination will be conducted on inventions not previously searched by an International Searching Authority.

(2) Invite the applicant to restrict the claims or pay additional fees, pointing out the categories of invention found, within a set time limit which will not be extended. No international preliminary examination will be conducted on inventions not previously searched by an International Searching Authority, or

(3) If applicant fails to restrict the claims or pay additional fees within the time limit set for response, the International Preliminary Examining Authority will issue a written opinion and/or establish an international preliminary examination report on the

main invention and shall indicate the relevant facts in the said report. In case of any doubt as to which invention is the main invention, the invention first mentioned in the claims and previously searched by an International Searching Authority shall be considered the main invention.

(c) Lack of unity of invention may be directly evident before considering the claims in relation to any prior art, or after taking the prior art into consideration, as where a document discovered during the search shows the invention claimed in a generic or linking claim lacks novelty or is clearly obvious, leaving two or more claims joined thereby without a common inventive concept. In such a case the International Preliminary Examining Authority may raise the objection of lack of unity of invention.

24. A new § 1.489 is added to read as follows:

**§ 1.489 Protest to lack of unity of invention before the International Preliminary Examining Authority.**

(a) If the applicant disagrees with the holding of lack of unity of invention by the International Preliminary Examining Authority, additional fees may be paid under protest, accompanied by a request for refund and a statement setting forth reasons for disagreement or why the required additional fees are considered excessive, or both.

(b) Protest under paragraph (a) of this section will be examined by the Commissioner or the Commissioner's designee. In the event that the applicant's protest is determined to be justified, the additional fees or a portion thereof will be refunded.

(c) An applicant who desires that a copy of the protest and the decision thereon accompany the international preliminary examination report when forwarded to the Elected Offices, may notify the International Preliminary Examining Authority to that effect any time prior to the issuance of the international preliminary examination report. Thereafter, such notification should be directed to the International Bureau.

25. A new § 1.491 is added preceded by a new heading to read as follows:

## National Stage

**§ 1.491 Entry into the national stage.**

An international application enters the national stage when the applicant has filed the documents and fees required by 35 U.S.C. 371(c) within the periods set forth in § 1.494 or § 1.495.

26. A new § 1.492 is added to read as follows:

**§ 1.492 National stage fees.**

The following fees and charges for international applications entering the national stage under 35 U.S.C. 371 are established by the Commissioner under 35 U.S.C. 376:

(a) The basic national fee:

(1) Where an international preliminary examination fee as set forth in § 1.482 has been paid on the international application to the United States Patent and Trademark Office:

By a small entity (§ 1.9(f)) ..... $150
By other than a small entity ..... $300

(2) Where no international preliminary examination fee as set forth in § 1.482 has been paid to the United States Patent and Trademark Office, but an international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority:

By small entity (§ 1.9(f)) ..... $170
By other than small entity ..... $340

(3) Where no international preliminary examination fee as set forth in § 1.482 has been paid and no international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office:

By a small entity (§ 1.9(f)) ..... $225
By other than a small entity ..... $450

(4) Where the international preliminary examination fee as set forth in § 1.482 has been paid to the United States Patent and Trademark Office and the international preliminary examination report states that the criteria of novelty, inventive step (non-obviousness), and industrial applicability, as defined in PCT Article 33 (1) to (4) have been satisfied for all the claims presented in the application entering the national stage (see § 1.496(b)):

By a small entity (§ 1.9(f)) ..... $25
By other than a small entity ..... $50

(b) In addition to the basic national fee, for filing or later presentation of each independent claim in excess of 3:

By a small entity (§ 1.9(f)) ..... $17
By other than a small entity ..... $34

(c) In addition to the basic national fee, for filing or later presentation of each claim (whether independent or dependent) in excess of 20 (Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes.):

By a small entity (§ 1.9(f)) ..... $6
By other than a small entity ..... $12

(d) In addition to the basic national fee, if the application contains, or is amended to contain, a multiple dependent claim(s), per application:

By a small entity (§ 1.9(f)) ..... $55
By other than a small entity ..... $110

(If the additional fees required by paragraphs (b), (c) and (d) are not paid on presentation of the claims for which the additional fees are due, they must be paid or the claims cancelled by amendment, prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

(e) Surcharge for filing the basic national fee or oath or declaration later than 20 months from the priority date pursuant to § 1.494(c) or later than 30 months from the priority date pursuant to § 1.495(c):

By a small entity (§ 1.9(f)) ..... $55
By other than a small entity ..... $110

(f) For filing an English translation of an international application later than 20 months after the priority date (§ 1.494(c)) or for filing an English translation of the international application or of any annexes to the international preliminary examination report later than 30 months after the priority date (§ 1.495 (c) and (e)), $26.00.

(35 U.S.C. 3, 376)

27. A new § 1.494 is added to read as follows:

**§ 1.494 Entering the national stage in the United States of America as a Designated Office.**

(a) Where no Demand has been filed with an appropriate International Preliminary Examining Authority by the expiration of 19 months from the priority date (see § 1.495), the applicant must fulfill the requirements of PCT Article 22 and 35 U.S.C. 371 within the time periods set forth in paragraphs (b) or (c) of this section in order to prevent the abandonment of the international application as to the United States of America. International applications for which these requirements are timely fulfilled will enter the national stage and obtain an examination as to the patentability of the invention in the United States of America.

(b) The applicant shall furnish to the United States Patent and Trademark Office not later than the expiration of 20 months from the priority date—

(1) A copy of the international application, unless it has been previously communicated by the International Bureau or unless it was originally filed in the United States Patent and Trademark Office;

(2) A translation of the international application into the English language, if

it was originally filed in another language;

(3) The basic national fee (see § 1.492(a)); and

(4) An oath or declaration of the inventor (see § 1.497).

(c) The applicant may furnish any required English translation of the international application, the basic national fee and the oath or declaration of the inventor after 20 months but not later than the expiration of 22 months from the priority date. The payment of the processing fee set forth in § 1.492(f) is required for acceptance of an English translation later than the expiration of 20 months after the priority date. The payment of the surcharge set forth in § 1.492(e) is required for acceptance of the basic national fee or the oath or declaration of the inventor later than the expiration of 20 months after the priority date.

(d) A copy of any amendments to the claims made under PCT Article 19, and a translation of those amendments into English, if they were made in another language, must be furnished not later than the expiration of 20 months from the priority date. Amendments under PCT Article 19 which are not received by the expiration of 20 months from the priority date will be considered to be cancelled.

(e) Verification of the translation of the international application or any other document pertaining to an international application may be required where it is considered necessary, if the international application or other document was filed in a language other than English.

(f) The documents and fees submitted under paragraphs (b) and (c) of this section must be clearly identified as a submission to enter the national stage under 35 U.S.C. 371, otherwise the submission will be considered as being made under 35 U.S.C. 111.

(g) The time limits set out in paragraphs (b), (c) and (d) of this section may not be extended pursuant to § 1.136 or otherwise.

(h) An international application becomes abandoned as to the United States 20 months from the priority date if a copy of the international application is not communicated to the Patent and Trademark Office prior to 20 months from the priority date where the United States has been designated but not elected prior to 19 months from the priority date. If a copy of the international application is communicated within 20 months to the Patent and Trademark Office, an international application will become abandoned as to the United States 22 months from the priority date if the required English translation(s), fees and oath or declaration under 35 U.S.C. 371(c) are not filed within 22 months from the priority date.

28. A new § 1.495 is added to read as follows:

**1.495 Entering the national stage in the United States of America as an Elected Office.**

(a) Where a Demand has been filed with an appropriate International Preliminary Examining Authority and not withdrawn by the expiration of 19 months from the priority date, the applicant must fulfill the requirements of 35 U.S.C. 371 within the time periods set forth in paragraph (b) or (c) of this section in order to prevent the abandonment of the international application as to the United States of America. International applications for which those requirements are timely fulfilled will enter the national stage and obtain an examination as to the patentability of the invention in the United States of America.

(b) The applicant shall furnish to the United States Patent and Trademark Office not later than the expiration of 30 months from the priority date—

(1) A copy of the international application, unless it has been previously communicated by the International Bureau or unless it was originally filed in the United States Patent and Trademark Office;

(2) A translation of the international application into the English language, if it was originally filed in another language;

(3) The basic national fee (see § 1.492(a)); and

(4) An oath or declaration of the inventor (see § 1.497).

(c) The applicant may furnish any required English translation of the international application, the basic national fee and the oath or declaration of the inventor after 30 months but not later than the expiration of 32 months from the priority date. The payment of the processing fee set forth in § 1.492(f) is required for acceptance of an English translation later than the expiration of 30 months after the priority date. The payment of the surcharge set forth in § 1.492(e) is required for acceptance of the basic national fee or the oath or declaration of the inventor later than the expiration of 30 months after the priority date.

(d) A copy of any amendments to the claims made under PCT Article 19, and a translation of those amendments into English, if they were made in another language, must be furnished not later than the expiration of 30 months from the priority date. Amendments under PCT Article 19 which are not received by the expiration of 30 months from the priority date will be considered to be cancelled.

(e) A translation into English of any annexes to the international preliminary examination report, if the annexes were made in another language, must be furnished not later than the expiration of 30 months from the priority date. Translations of the annexes which are not received by the expiration of 30 months from the priority date may be submitted within 32 months from the priority date accompanied by the processing fee set forth in § 1.492(f). Translations of the annexes which are not timely received will be considered to be cancelled.

(f) Verification of the translation of the international application or any other document pertaining to an international application may be required where it is considered necessary, if the international application or other document was filed in a language other than English.

(g) The documents submitted under paragraphs (b) and (c) of this section must be clearly identified as a submission to enter the national stage under 35 U.S.C. 371, otherwise the submission will be considered as being made under 35 U.S.C. 111.

(h) The time limits set out in paragraphs (b), (c), (d) and (e) of this section may not be extended pursuant to § 1.136 or otherwise.

(i) An international application becomes abandoned as to the United States 30 months from the priority date if a copy of the international application is not communicated to the Patent and Trademark Office prior to 30 months from the priority date and a Demand for International Preliminary Examination which elected the United States of America has been filed prior to the expiration of 19 months from the priority date. If a copy of the international application is communicated within 30 months to the Patent and Trademark Office, an international application will become abandoned as to the United States 32 months from the priority date if the required English translation(s), fees and oath or declaration under 35 U.S.C. 371(c) are not filed within 32 months from the priority date.

29. A new § 1.496 is added to read as follows:

**§ 1.496 Examination of international applications in the national stage.**

(a) International applications which have complied with the requirements of 35 U.S.C. 371(c) will be taken up for action based on the date on which such

requirements were met. However, unless an express request for early processing has been filed under 35 U.S.C. 371(f), no action may be taken prior to one month after entry into the national stage.

(b) A national stage application filed under 35 U.S.C. 371 may have paid therein the basic national fee as set forth in § 1.492(a)(4) if it contains, or is amended to contain, at the time of entry into the national stage, only claims which have been indicated in an international preliminary examination report prepared by the United States Patent and Trademark Office as satisfying the criteria of PCT Article 33(1)–(4) as to novelty, inventive step and industrial applicability. Such national stage applications in which the basic national fee as set forth in § 1.492(a)(4) has been paid may be amended subsequent to the date of entry into the national stage only to the extent necessary to eliminate objections as to form or to cancel rejected claims. Such national stage applications in which the basic national fee as set forth in § 1.492(a)(4) has been paid will be taken up out of order.

30. A new § 1.497 is added to read as follows:

**§ 1.497 Oath or declaration under 35 U.S.C. 371(c)(4).**

(a) When an applicant of an international application, if the inventor, desires to enter the national stage under 35 U.S.C. 371 pursuant to § 1.494 or § 1.495, he or she must file an oath or declaration in accordance with § 1.63.

(b) If the international application was made as provided in § 1.422, 1.423 or 1.425, the applicant shall state his or her relationship to the inventor and, upon information and belief, the facts which the inventor is required by § 1.63 to state.

31. A new § 1.499 is added to read as follows:

**§ 1.499 Unity of invention during the national stage.**

(a) An international application which has entered the national stage by meeting the requirements of 35 U.S.C. 371 will be considered to have unity of invention if the claims are in accordance with PCT Rule 13 (see § 1.475(f)).

(b) An application in the national stage containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the combinations of categories as set forth in PCT Rule 13.2 (see § 1.475(f)) or to the combination of—

(1) A product and a process for the manufacture of said product or

(2) A product and a process of use of said product.

If an application contains claims to more or less than one of the combinations of categories of invention set forth in PCT Rule 13.2 (see § 1.475(f)) or a combination set forth in paragraphs (b)(1) and (2) of this section, unity of invention may not be present.

(c) If an application in the national stage contains claims to a category of invention in addition to those categories included in any one of the combinations specified in paragraph (b) of this section, lack of unity of invention may be held between the categories included in the combination and the claims to the additional category of invention.

(d) Unity of invention will exist in an application in the national stage where the claims are limited to one of the combinations of categories set forth in PCT Rule 13.2 (see § 1.475(f)) or a combination set forth in paragraph (b)(1) or (2) of this section. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the elected invention to be examined. Any such holding of an election by the examiner will be made in the form of a restriction requirement which confirms the election made by the presentation of the claims. Such a restriction requirement would be made on the basis of whether the inventions are independent and distinct. Applicant has the right to traverse such a restriction requirement in the response to the Office action in which the election is indicated.

(e) The inventions recited by the claims of different categories must be related rather than independent inventions.

(f) If the examiner finds that a national stage application lacks unity of invention, the examiner may in an Office action require the applicant in the response to that Office action to elect the invention to which the claims shall be restricted, this official action being called a requirement for restriction. Such requirement may be made before any action on the merits but may be made at any time before the final action at the discretion of the examiner. Review of any such requirement is provided under §§ 1.143 and 1.144.

Dated: April 28, 1987.

Donald J. Quigg,

*Assistant Secretary and Commissioner of Patents and Trademarks.*

## CFR PARTS AFFECTED DURING MAY

At the end of each month, the Office of the Federal Register publishes separately a List of CFR Sections Affected (LSA), which lists parts and sections affected by documents published since the revision date of each title.

**3 CFR**

**Proclamations:**
5453 (Amended by Proc. 5660).....19259
5643.....15935
5644.....16229
5645.....16367
5646.....16805, 17678
5647.....16815
5648.....16817
5649.....16819
5650.....17382
5651.....17915
5652.....17917
5653.....18187
5654.....18189
5655.....18690
5656.....18900
5657.....19122
5658.....19123
5659.....19257
5660.....19259
5661.....19479
5662.....19829

**Executive Orders:**
6269 (Amended by PLO 6642).....16246
12547 (Revoked by EO 12597).....16335
12595.....17383

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC, Chicago, IL, and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

**How To Cite This Publication:** Use the volume number and the page number. Example: 52 FR 12345.

## THE FEDERAL REGISTER
## WHAT IT IS AND HOW TO USE IT

**FOR:** Any person who uses the Federal Register and Code of Federal Regulations.

**WHO:** The Office of the Federal Register.

**WHAT:** Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

**WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

### WASHINGTON, DC

**WHEN:** June 9, at 9 a.m.
**WHERE:** Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
**RESERVATIONS:** Gertrude E. Belton, 202-523-5237

# Rules and Regulations

Federal Register
Vol. 52, No. 100
Friday, May 29, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 272 and 273

[Amdt. 292]

Food Stamp Program: Eligible Alien Status

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule.

SUMMARY: The Immigration Reform and Control Act of 1986, Pub. L. 99–603, enacted on November 6, 1986, establishes a number of new categories of legal aliens. In accordance with the Food Stamp Act of 1977, as amended, some of these categories of legal aliens are eligible to participate in the Food Stamp Program (FSP). This rulemaking amends the current FSP regulations to specify those categories of legalized aliens who gain alien status as a result of the Immigration Reform and Control Act of 1986, and thereby may become eligible to participate in the Food Stamp Program.

DATES: The provisions of this rulemaking are effective retroactive to November 6, 1986, the date of enactment of the Immigration Reform and Control Act of 1986. Under the terms of the amendments made by that Act, and incorporated in this rulemaking, certain categories of aliens will not actually become eligible for food stamp benefits until specified dates in the future as reflected in this rulemaking. Comments must be received on or before July 28, 1987, to be assured of consideration.

ADDRESS: Comments should be addressed to Judith M. Seymour, Certification Rulemaking Section, Eligibility and Monitoring Branch, Program Development Division, Food and Nutrition Service, USDA, Alexandria, Va 22302. All written comments will be open to public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday) at 3101 Park Center Drive, Room 708, Alexandria, Va.

FOR FURTHER INFORMATION CONTACT: Judith M. Seymour at the above address or by telephone at (703) 756–3429. Copies of the Regulatory Impact Analysis summarized in this preamble are available from Ms. Seymour.

SUPPLEMENTARY INFORMATION:

## Classification

### *Executive Order 12291*

This action has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1519–1. It has been determined that this rulemaking is a major action because it is anticipated that the Food Stamp Program's cost will increase by more than $100 million. However, this action will not result in an increase in costs or prices for consumers, individuals, or State and local governments. Additionally, this action will not have a significant effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to complete with foreign-based enterprises in domestic or export markets.

### *Executive Order 12372*

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule and related notice to 7 CFR Part 3015, Subpart V (48 FR 29115), this Program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

### *Regulatory Flexibility Act*

This action has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, 94 Stat. 1164, September 19, 1980). S. Anna Kondratas, Acting Administrator of the Food and Nutrition Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. The changes will affect food stamp applicants and the State and local agencies which administer the Food Stamp Program.

### *Memorandum of Law*

Pursuant to section 4(a) of Executive Order 12291, the Department has determined that this rule is within the authority delegated by law and is consistent with Congressional intent.

### *Paperwork Reduction Act*

This rulemaking does not contain any reporting and/or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

## Regulatory Impact Analysis

### *Need for Action*

This action is required as a result of the Immigration Reform and Control Act of 1986 which establishes new categories of legal aliens. As a result, certain categories of aliens will gain eligible alien status to participate in the Food Stamp Program in accordance with section 6(f) of the Food Stamp Act of 1977, as amended (7 U.S.C. 2015(f)).

### *Benefits*

This action increases the number of potentially eligible food stamp recipients. This action will not affect the food purchasing power of current program participants.

### *Costs*

The Department estimates that this action will increase the cost of the Program by approximately $17 million in Fiscal Year 1987, $148 million in Fiscal Year 1988, $180 million in 1989 and $106 million in 1990.

### *Public Participation*

This rule implements certain amendments to the Immigration and Nationality Act made by the Immigration Reform and Control Act of 1986 related to the eligibility of specified categories of aliens to receive food stamps. It is nondiscretionary in that the provisions are specifically prescribed by law and cannot be affected in substance by public comment. Since this rulemaking merely implements the cited statutory provisions, it constitutes an interpretive rule for which public comment and publication 30 days prior to effective date are not required under 5 U.S.C. 553.

However, since the Department believes that an opportunity for public

comment could result in improved and simplified administration of the rule, it is being published as an interim rule and a 60-day comment period is being provided. All comments received during the comment period will be evaluated and considered when a final rule is published.

**Background**

*Alien Status*

Current Food Stamp Program (FSP) rules at 7 CFR 273.4, which are based on section 6(f) of the Food Stamp Act of 1977, as amended (7 U.S.C. 2015(f)), provide that, in addition to other eligibility requirements specified in Part 273, a person must: (a) reside in the United States; and (b) be either a United States citizen or an alien who meets one of the criteria identified at 7 CFR 273.4(a)(2) through 273.4(a)(7) in order to participate in the Food Stamp Program. The criteria specified in section 6(f) of the Food Stamp Act and current program rules are that a person must be: (1) Lawfully admitted for permanent residence as an immigrant as defined in sections 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act (INA); (2) a continuous resident since entering the United States prior to June 30, 1948 and lawfully admitted for permanent residence as a result of an exercise of discretion by the Attorney General pursuant to section 249 of the INA; (3) qualified for entry pursuant to sections 207 and 208 of the INA; (4) granted asylum pursuant to section 208 of the INA; (5) lawfully present through an exercise of discretion by the Attorney General pursuant to section 212(d)(5) of the INA, or as a result of a grant of parole by the Attorney General; or (6) residing within the United States as a result of the Attorney General's judgment to withhold deportation on the grounds that the alien would otherwise be subject to persecution on account of race, religion or political opinion.

The Immigration Reform and Control Act of 1986 (Pub. L. 99–603), enacted on November 6, 1986, includes numerous provisions which expand the categories of aliens eligible for lawful resident status. Under operation of the Food Stamp Act and Pub. L. 99–603, these modifications to the categories of aliens eligible for lawful status also has a marked effect on alien applicants for FSP benefits. The categories of aliens who may now be eligible for FSP benefits include: (1) Those who have resided continuously in the United States since before January 1, 1972, in accordance with section 249 of the INA; (2) those who have been granted lawful permanent resident status by the Immigration and Naturalization Service (INS) and are aged, blind, or disabled as defined in section 1614(a)(1) of the Social Security Act; (3) those who were granted temporary resident status pursuant to section 245A(a) of the INA at least five years prior to applying for food stamps and who subsequently gained lawful permanent resident status pursuant to section 245A(b)(1) of the INA; (4) those who have resided in the United States and performed agricultural work for specified periods of time prior to May 1, 1986; and (5) additional agricultural workers who may be admitted in fiscal years 1990 through 1993. Each of these categories is discussed in further detail below.

*Continuous Residency Date—7 CFR 273.4(a)(3)*

As previously noted, pursuant to section 6(f) of the Food Stamp Act, current regulations at 7 CFR 273.4(a)(3) allow an alien to participate in the program if the alien has resided continuously in the United States since prior to June 30, 1948 and is considered to be lawfully admitted for permanent residence by the Attorney General pursuant to section 249 of the INA. Section 203 of Pub. L. 99–603 changes the continuous residency date of June 30, 1948 to January 1, 1972.

Accordingly, this rulemaking amends 7 CFR 273.4(a)(3) effective with the date of enactment of Pub. L. 99–603 to reflect the continuous residency date of January 1, 1972.

*Newly Legalized Aliens—7 CFR 273.4(a)*

In accordance with section 201 of Pub. L. 99–603, which amends section 245 of the INA, those aliens who do not qualify for permanent residence as described above, and all other illegal aliens who entered the United States before January 1, 1982 and subsequently resided continuously in the United States, may apply to INS to have their alien status adjusted to that of an alien lawfully admitted for temporary residence. Applications for such an adjustment must be submitted to INS within a 12-month period beginning on May 5, 1987. Aliens lawfully admitted for temporary residence under section 201 of Pub. L. 99–603, known as newly legalized aliens, may apply to INS for an adjustment to permanent resident status beginning with the nineteenth month after the month in which lawful temporary resident status was granted.

Section 245A(h)(1)(A)(iii) of the INA as added by section 201 of Pub. L. 99–603 further specifies that, with certain exceptions, newly legalized aliens who are granted a temporary or subsequent permanent resident status by INS under that section are prohibited from participating in the FSP and certain other types of public assistance programs for a five-year period following the date the alien is granted lawful temporary resident status. Thus, the majority of aliens who gain a lawful resident status under section 201 of Pub. L. 99–603 will not be eligible to participate in the FSP until at least May, 1992.

However, the law provides for two exceptions to the five-year prohibition on participating in the Food Stamp Program or certain other types of public assistance. These exceptions are: (1) Cuban and Haitian entrants (as defined in paragraph (1) or (2)(A) of section 501(c) of Pub. L. 96–422); or (2) an individual who is aged, blind or disabled as defined in section 1614(a)(1) of the Social Security Act (SSA).

In regard to the first exception to the five-year prohibition, Cuban and Haitian entrants are already eligible to participate in the Food Stamp Program in accordance with the Food Stamp Act and current regulations at 7 CFR 273.4(a)(6). Therefore, the eligibility of Cuban and Haitian entrants to participate in the FSP is not affected by the Immigration Reform and Control Act of 1986.

In regard to the second exception, section 201 of Pub. L. 99–603 amends the INA to allow newly legalized aliens who are aged, blind or disabled as defined in section 1614(a)(1) of the SSA to participate in the FSP without reference to the five-year prohibition. However, in accordance with section 6(f) of the Food Stamp Act, these aged, blind, or disabled aliens must be in permanent resident status in order to participate in the FSP. Since section 245A(b)(1) of the INA, as added by Pub. L. 99–603, prohibits newly legalized aliens from gaining permanent resident status before November 7, 1988, such aliens will not be eligible to participate in the FSP before that date.

Accordingly, 7 CFR 273.4 is amended to reflect the circumstances in which aliens who are newly legalized in accordance with Pub. L. 99–603 may participate in the FSP.

*Special Agricultural Workers—7 CFR 273.4(a)*

Section 210(a) of the INA, as added by section 302 of the Immigration Reform and Control Act of 1986, provides that aliens who can prove that they have lived in the United States and performed seasonal agricultural services for the required period of time may be granted lawful temporary resident status. These individuals are known as special

agricultural workers (SAWs) and are further categorized into two groups. The first group, SAW 1, must prove to INS that they have lived in the United States and performed agricultural work for at least 90 days in each of the three (3) twelve month periods preceding May 1, 1986. Aliens in the SAW 1 category may be lawfully admitted for permanent residence by INS after remaining in lawful temporary resident status for one year. The second group, SAW 2, must prove to INS that they have lived in the United States and performed seasonal agricultural work for at least 90 days in the 12 months prior to May 1, 1986. Aliens in the SAW 2 category may be lawfully admitted for permanent residence after remaining in a lawful temporary resident status for two years. Special agricultural workers may begin to submit applications to INS for adjustment to lawful temporary resident status on June 1, 1987. Such applications will be received by INS for 18 months beginning on June 1, 1987.

Although aliens who fall into a SAW category must remain in lawful temporary resident status for one or two years, section 210(a)(5) of the INA specifies that an alien lawfully admitted for temporary residence as a SAW is to be considered to be an alien lawfully admitted for permanent residence except for purposes of the immigration laws. Therefore, persons who are lawfully admitted in either a temporary or permanent resident status as a SAW are eligible to participate in the FSP, if otherwise eligible.

Accordingly, this rulemaking amends 7 CFR 273.4(a) to identify the eligible alien status of aliens who are lawfully admitted for temporary or permanent residence as special agricultural workers.

*Additional Special Agricultural Workers—7 CFR 273.4(a)*

In accordance with section 303 of Pub. L. 99-603, which amends newly added section 210 to the INA, additional special agricultural workers (ASAWs), also referred to as replenishment agricultural workers, may be granted a lawful temporary resident status by INS in fiscal years 1990 to 1993 after the Secretaries of Agriculture and Labor make a joint determination that a shortage of SAW workers exists. Aliens granted lawful temporary resident status as an ASAW must remain in temporary resident status for three years before an adjustment to lawful permanent resident status can be made. As with the SAW 1 and SAW 2 categories, Section 303 of Pub. L. 99-603 specifies that an ASAW worker admitted for temporary residence is to be considered an alien lawfully admitted for permanent residence except for purposes of the immigration laws. Therefore, ASAWs are eligible to participate in the FSP once they are granted lawful temporary resident status if they are otherwise eligible for program benefits.

Therefore, this rulemaking amends 7 CFR 273.4(a) to specify the eligible alien status of aliens categorized as additional special agricultural workers.

*Verification—7 CFR 273.2(f)(1)(ii)*

Current rules at 7 CFR 273.2(f)(1)(ii) specify that prior to certification, the State agency must verify the legal status of each applicant who identifies him or herself as an alien. The current procedures further identify the required INS documentation the alien must present in order to verify his or her alien status (e.g., Form I-151 of Form I-94 with appropriate annotation).

This interim rule requires that FSP applicant aliens legalized under the Immigration Reform and Control Act of 1986 provide verification to the eligibility worker which establishes their alien status. This rule specifies that acceptable verification may consist of documents, such as a notice, letter, or identification card that establishes that the alien has been admitted as a legal alien in one of the categories enumerated in the *Alien Status* section above.

Accordingly, this rulemaking amends 7 CFR 273.2(f)(1)(ii) of the regulations to specify the verification requirements of applicant aliens. For all other eligibility criteria, a State will follow current verification requirements at 7 CFR 273.2(f). However, the Department is concerned that its current verification procedures may not fully address obtaining verification from groups such as alien special agricultural workers who may have resources available to them in their home country. The Department will be publishing a proposed rulemaking next Fall regarding use of the INS Systematic Alien Verification for Entitlements (SAVE) system for verification of alien status. The Department requests that commenters on this interim rule provide the Department with suggestions regarding the adequacy of current verification procedures for this group and how the procedures might be improved through the future rulemaking.

*Technical Revisions*

Current verification procedures specified in 7 CFR 273.2(f)(1)(ii) of the Food Stamp Program regulations require that aliens who are lawfully admitted under 7 CFR 273.4(a)(2) and (3) present either: (1) An INS Form I-151; (2) a "Re-entry Permit" or passport booklet for lawful permanent aliens; or (3) Form I-181-B with the stamped annotation, "Processed for I-551, Temporary Evidence of Lawful Admission for Permanent Residence." We have been advised by INS officials that the Form I-181-B is no longer stamped with this annotation and should no longer be used as acceptable verification. Passport booklets, however, are stamped with this annotation and continue to be acceptable verification of eligible alien status.

Accordingly, this rulemaking amends 7 CFR 273.2(f)(1)(ii)(B) by omitting references to the Form 1-181-B.

Current rules at 7 CFR 273.4(a)(4) and (5) incorrectly refer to the Immigration and Nationality Act as the Immigration and Nationalization Act. Therefore, §§ 273.4(a)(4) and 273.4(a)(5) are amended to correct these references to the Immigration and Nationality Act.

*Implementation*

For aliens who became eligible for food stamps as the result of the change of the continuous residence date, as reflected in § 273.4(a)(3), this rule must be implemented retroactive to November 6, 1986. On December 16, 1986, the Department advised the Regional Administrators of the Food and Nutrition Service to advise their States of the provision and its effective date of November 6, 1986. The dates upon which aliens may become eligible under other provisions of these rules are: November 7, 1988 under § 273.4(a)(8); May 5, 1992 under § 273.4(a)(9); June 1, 1987 under § 273.4(a)(10); and October 1, 1989 through September 30, 1993 under § 273.4(a)(11).

Because these dates vary widely over several years, this rule requires State agencies to advise appropriate staff of the eligibility or ineligibility of applicant aliens who are affected by the enactment of Pub. L. 99-603.

**List of Subjects**

*7 CFR Part 272*

Alaska, Civil rights, Food stamps, Grant programs—social programs, Reports and recordkeeping requirements.

*7 CFR Part 273*

Administrative practice and procedures, Aliens, Claims, Food stamps, Fraud, Grant programs—social programs, Penalties, Reporting and recordkeeping requirements, Social Security, Students.

Accordingly 7 CFR Parts 272 and 273 are amended as follows:

1. The authority citation of Parts 272 and 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2025.

## PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

2. In § 272.1, a new paragraph (g)(88) is added to read as follows:

**§ 272.1 General terms and conditions.**

* * * * *

(g) *Implementation.* * * *

(88) *Amendment No. 292.* (i) The effective date of the provisions of this amendment is retroactive to November 6, 1986.

(ii) The actual dates upon which aliens may become eligible under § 273.4(a) (8), (9), (10), and (11) are specified in those paragraphs. State agencies must inform their staff of the respective dates as they pertain to the eligibility or ineligibility of applicant aliens.

## PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

3. In § 273.2:

a. Paragraph (f)(1)(ii)(A) is amended by removing the reference to "(a)(7)" and adding the reference to "(a)(11)" in its place.

b. Paragraph (f)(1)(ii)(B) is amended by removing the second, third, and fourth sentences.

c. Paragraphs (f)(1)(ii)(D), (f)(1)(ii)(E), (f)(1)(ii)(F) are redesignated as paragraphs (f)(1)(ii)(E), (f)(1)(ii)(F), (f)(1)(ii)(G), respectively, and a new paragraph (f)(1)(ii)(D) is added which reads as follows:

**§ 273.2 Application processing.**

* * * * *

(f) *Verification.* * * *

(1) *Mandatory verification.* * * *

(ii) *Alien status.* * * *

(D) Aliens in the categories specified in § 273.4(a) (8) through (11) shall present documentation such as, but not limited to, a letter, notice of eligibility, or identification card which clearly identifies the alien has been granted legal status in one of those categories.

* * * * *

4. In § 273.4:

a. Paragraph (a)(2) is amended by adding a new sentence at the end of the paragraph which reads, "However, an alien lawfully admitted for permanent residence pursuant to section 245A of the Immigration and Nationality Act must be eligible as specified in paragraphs (a)(8) or (a)(9) of this section."

b. Paragraph (a)(3) is amended by replacing the date June 30, 1948 with January 1, 1972.

c. Paragraph (a)(4) is amended by replacing the word "Nationalization" with "Nationality".

d. Paragraph (a)(5) is amended by replacing the word "Nationalization" with "Nationality".

e. New paragraphs (a)(8), (a)(9), (a)(10), and (a)(11) are added.

The additions read as follows:

**§ 273.4 Citizenship and alien status.**

(a) *Citizens and eligible aliens.* * * *

(8) An alien who is defined as aged, blind or disabled in accordance with section 1614(a)(1) of the Social Security Act and is considered to be lawfully admitted for permanent residence pursuant to section 245A(b)(1) of the Immigration and Nationality Act. Such aliens may obtain lawful permanent resident status under section 245(b)(1) of the Immigration and Nationality Act no earlier than November 7, 1988.

(9) An alien who is granted lawful temporary resident pursuant to section 245A of the Immigration and Nationality Act at least five years prior to applying for food stamps and who subsequently gained lawful permanent resident status pursuant to section 245A of the Immigration and Nationality Act. Such aliens may obtain temporary residence status no earlier than May 5, 1987.

(10) An alien who is, as of June 1, 1987, or thereafter, a special agricultural worker and lawfully admitted for temporary residence in accordance with section 210(a) of the Immigration and Nationality Act.

(11) An alien who is lawfully admitted for temporary residence as an additional special agricultural worker as of October 1, 1989 through September 30, 1993 in accordance with section 210A(a) of the Immigration and Nationality Act.

* * * * *

Dated: May 26, 1987.

## FEDERAL TRADE COMMISSION

**16 CFR Part 801**

### Premerger Notification; Reporting and Waiting Period Requirements

**AGENCY:** Federal Trade Commission.

**ACTION:** Final rule.

**SUMMARY:** This action promulgates amendments to the premerger notification rules that require the parties to certain mergers or acquisitions to file reports with the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice, and to wait a specified period of time before consummating such transactions. The reporting and waiting period requirements are intended to enable these enforcement agencies to determine whether a proposed merger or acquisition might violate the antitrust laws if consummated and, when appropriate, to seek a preliminary injunction in federal court to prevent consummation. During the eight years the rules have been in effect, the Federal Trade Commission, with the concurrence of the Assistant Attorney General for Antitrust, has amended the premerger notification rules several times in order to improve the program's effectiveness and to lessen the burden of complying with the rules. These revisions are intended to improve the program's effectiveness by amending the definition of the term "control" as it applies to partnerships and other entities that do not have outstanding voting securities.

**EFFECTIVE DATE:** July 3, 1987.

**SUPPLEMENTARY INFORMATION:**

**Regulatory Flexibility Act**

These amendments to the Hart-Scott-Rodino premerger notification rules are designed to improve the effectiveness of the premerger notification program. The Commission has determined that none of the amendments is a major rule, as that term is defined in Executive Order 12291. The amendments will not result in: An annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in the domestic market. None of the amendments expands the coverage of the premerger notification rules in a way that would affect small business. Therefore, pursuant to section 605(b) of the Administrative Procedure Act, 5 U.S.C. 605(b), as added by the Regulatory Flexibility Act, Pub. L. 96–354 (September 19, 1980), the Federal Trade Commission certifies that these rules will not have a significant

economic impact on a substantial number of small entities. Section 603 of the Administrative Procedure Act, 5 U.S.C. 603, requiring a final regulatory flexibility analysis of some rules, is therefore inapplicable.

**Paperwork Reduction Act**

The Hart-Scott-Rodino Premerger Notification rules and report form contain information collection requirements as defined by the Paperwork Reduction Act, 44 U.S.C. 3501–3518. Prior to promulgation, these requirements were reviewed and approved by the Office of Management and Budget. The amendments contained in this Notice were approved by OMB on April 29, 1987, for use through March 31, 1990 (OMB Control No. 3084–0005).

**Background**

Section 7A of the Clayton Act ("the act"), 15 U.S.C. 18a, as added by sections 201 and 202 of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain acquisitions of assets or voting securities to give advance notice to the Federal Trade Commission (hereafter referred to as "the Commission") and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice (hereafter referred to as "the Assistant Attorney General"), and to wait certain designated periods before the consummation of such acquisitions. The transactions to which the advance notice requirement is applicable and the length of the waiting period required are set out respectively in subsections (a) and (b) of section 7A. This amendment to the Clayton Act does not change the standards used in determining the legality of mergers and acquisitions under the antitrust laws.

The legislative history suggests several purposes underlying the act. Congress wanted to assure that large acquisitions were subjected to meaningful scrutiny under the antitrust laws prior to consummation. To this end, Congress clearly intended to eliminate the large "midnight merger," which is negotiated in secret and announced just before, or sometimes only after, the closing takes place. Congress also provided an opportunity for the Commission or the Assistant Attorney General (who are sometimes hereafter referred to collectively as the "antitrust agencies" or the "enforcement agencies") to seek a court order enjoining the completion of those transactions that the agencies deem to present significant antitrust problems. Finally, Congress sought to facilitate an effective remedy when a challenge by one of the enforcement agencies proved successful. Thus, the act requires that the antitrust agencies receive prior notification of significant acquisitions, provides certain tools to facilitate a prompt, thorough investigation of the competitive implications of these acquisitions, and assures the enforcement agencies an opportunity to seek a preliminary injunction before the parties to an acquisition are legally free to consummate it, reducing the problem of unscrambling the assets after the transaction has taken place.

Subsection 7A(d)(1) of the act, 15 U.S.C. 18a(d)(1), directs the Commission, with the concurrence of the Assistant Attorney General, in accordance with 5 U.S.C. 553, to require that the notification be in such form and contain such information and documentary material as may be necessary and appropriate to determine whether the proposed transaction may, if consummated, violate the antitrust laws. Subsection 7A(d)(2) of the act, 15 U.S.C. 18a(d)(2), grants the Commission, with the concurrence of the Assistant Attorney General, in accordance with 5 U.S.C. 553, the authority (A) to define the terms used in the act, (B) to exempt additional persons or transactions from the act's notification and waiting period requirements, and (C) to prescribe such other rules as may be necessary and appropriate to carry out the purposes of section 7A.

On December 15, 1976, the Commission issued proposed rules and a proposed Notification and Report Form ("the Form") to implement the act. This proposed rulemaking was published in the Federal Register of December 20, 1976, 41 FR 55488. Because of the volume of public comment, it became clear to the Commission that some substantial revisions would have to be made in the original rules. On July 25, 1977, the Commission determined that additional public comment on the rules would be desirable and approved revised proposed rules and a revised proposed Notification and Report Form. The revised rules and Form were published in the Federal Register of August 1, 1977, 42 FR 39040. Additional changes in the revised rules and Form were made after the close of the comment period. The Commission formally promulgated the final rules and Form, and issued an accompanying Statement of Basis and Purpose on July 10, 1978. The Assistant Attorney General gave his formal concurrence on July 10, 1978. The final rules and Form and the Statement of Basis and Purpose were published in the Federal Register of July 31, 1978, 43 FR 33451, and became effective on September 5, 1978.

The rules are divided into three parts, which appear at 16 CFR Parts 801, 802, and 803. Part 801 defines a number of the terms used in the act and rules, and explains which acquisitions are subject to the reporting and waiting period requirements. Part 802 contains a number of exemptions from these requirements. Part 803 explains the procedures for complying with the act. The Notification and Report Form, which is completed by persons required to file notification, is an appendix to Part 803 of the rules.

Changes of a substantive nature have been made in the premerger notification rules or Form on five occasions since they were first promulgated. The first was an increase in the minimum dollar value exemption contained in § 802.20 of the rules. This amendment was proposed in the Federal Register of August 10, 1979, 44 FR 47099, and was published in final form in the Federal Register of November 21, 1979, 44 FR 60781. The second amendment replaced the requirement that certain revenue data for the year 1972 be provided in the Notification and Report Form with a requirement that comparable data be provided for the year 1977. This change was made because total revenues for the year 1977 broken down by Standard Industrial Classification (SIC) codes became available from the Bureau of the Census. The amendment appeared in the Federal Register of March 5, 1980, 45 FR 14205, and was effective May 3, 1980.

The third set of changes was published by the Federal Trade Commission as proposed rules changes in the Federal Register of July 29, 1981, 46 FR 38710. These revisions were designed to clarify and improve the effectiveness of the rules and of the Notification and Report Form as well as to reduce the burden of filing notification. Several comments on the proposed changes were received during the comment period. Final rules, which adopted some of the suggestions received during the comment period, but which were substantially the same as the proposed rules, were published in the Federal Register of July 29, 1983, 48 FR 34427, and became effective on August 29, 1983. The fourth change, replacing the requirement to provide 1977 revenue data with a requirement to provide 1982 data on the Form, was published in the Federal Register of March 28, 1986, 51 FR 10368.

The fifth set of changes to the rules and the Notification and Report Form was published by the Federal Trade Commission as proposed rule changes in the Federal Register of September 24, 1985, 50 FR 38742. Those thirteen

proposed revisions were designed to reduce the cost to the public of complying with the rules and to improve the program's effectiveness. The Commission decided to adopt nine of the proposals, to reject one proposal and to defer action on the other three. Final rules, which adopted some of the suggestions received from public comments, were published in the Federal Register of March 6, 1987, 52 FR 7066 and became effective on April 10, 1987. These changes included revisions to the Notification and Report Form, found in 16 CFR Part 803 (Appendix). The Form had previously undergone minor revisions on two other occasions.

These amendments to the premerger notification rules grow out of the comments on Proposal 1 of the September 24, 1985, Federal Register notice, the proposed "acquisition vehicle" rules. The underreporting problem that the "acquisition vehicle" approach was designed to solve is extensively discussed in that notice of proposed rulemaking. It explains both how in some circumstances an acquisition made by a partnership is not subject to the reporting and waiting obligations of the act, and how in similar circumstances an acquisition made by a newly-formed corporation that has no controlling owner is not subject to the obligations of the act. The proposed rules would have required both types of transactions to be reported.

Upon reviewing the comments on the "acquisition vehicle" proposal, the Commission concluded that that approach appeared likely to require filings in connection with numerous competitively insignificant transactions and that a less inclusive approach could accomplish the primary objective of the proposal: Covering acquisitions by partnerships that really are controlled by another entity. In addition, it appears that there have been no problems associated with acquisitions by newly-formed corporations. The Commission therefore reconsidered its proposal and developed a new approach that applies only to partnerships and other entities that do not have outstanding voting securities. On March 6, 1987, the Commission proposed in the Federal Register, 52 FR 7095, amendments to its premerger notification rules to implement this approach.

Four comments were received.

4. Sullivan & Cromwell.

**Authority:** The Federal Trade Commission, with the concurrence of the Assistant Attorney General, promulgates these amendments to the premerger notification rules pursuant to section 7A(d) of the Clayton Act, 15 U.S.C. 18a(d), as added by section 201 of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, Pub. L. 94-435, 90 Stat. 1390.

**Statement of Basis and Purpose for the Commission's Revised Premerger Notification Rules**

*Section 801.1(b) Control*

Under previous staff interpretations, acquisitions made by certain partnerships were not reportable under the act although acquisitions by similarly structured corporations were reportable. No report was required even if an acquisition was by a partnership that was owned and operated principally by one person, and even if that person was a competitor of the acquired person. Because that result is inconsistent with the treatment of corporations that are dominated by one person and with the objectives of the act and the rules, the Commission proposed amendments to its rules to alter that special treatment of partnerships. Having considered public comments on its proposals, the Commission now amends the definition of control in § 801.1(b) to provide that persons owning 50 percent or more of partnerships or other entities that do not have outstanding voting securities will control such entities. Those persons will now be required to report acquisitions by the entities they own, just as persons must report acquisitions by corporations if they own 50 percent or more of the outstanding voting securities of those corporations. This proposal imposes no reporting obligation on owners of minority interests.

The Commission is also amending the alternative definition of control, which is based on the contractual power to designate members of an entity's board of directors or analogous body. The change—from the power to designate a majority to the power to designate 50 percent—results in a uniform 50 percent criterion for all three definitions of control in the rules.

**The Purpose of the New Control Definition**

Previously, acquisitions by partnerships and other entities that have no outstanding voting securities were frequently not subject to premerger review as a result of two principles of premerger reporting: One, a formal rule for calculating assets of an entity, 16 CFR 801.11(e), and the other, a Premerger Notification Office informal interpretation that a partnership is its own "ultimate parent entity" (that is, a partnership is not controlled by its partners). Section 801.11(e) directs that an entity without a balance sheet not include, in determining its size, any assets that are contributed to the entity for the purpose of making an acquisition. Thus, for example, assume that a partnership is formed to buy a $1 billion company and the partners contribute $1 billion in cash for the purpose of making the acquisition. If the partnership has no other assets (and no sales), the subsequent acquisition of the $1 billion company by the partnership is not reportable. The partnership does not meet the $10 million minimum asset criterion of section 7A(a)(2) of the act because § 801.11(e) directs the partnership not to count the $1 billion that will be used to pay for the acquisition. The informal interpretation deems the acquisition to have been made by the partnership itself, which has no other assets, rather than by its partners, who may well have other assets. Consequently, the size of the partnership is determined by valuing only the partnership's assets.

Of course, if the partnership were employed in the acquisition "for the purpose of avoiding the obligations to comply with the requirements of the act," its existence would be disregarded and the obligations of the act would be determined by applying the act and the rules to the substance of the transaction. 16 CFR 801.90. For example, some persons might be tempted to make an acquisition through a partnership for the purpose of avoiding reporting or delaying their premerger notifications to the antitrust agencies until they were required by the federal securities laws to announce their acquisition publicly. If a partnership were formed for the purpose of avoiding or delaying reporting, § 801.90 would base the reporting requirement on the substance of the transaction. If, for example, the substance is an acquisition by a single person, notwithstanding the structuring of the transaction in the form of a partnership, that person would be required to comply with the obligations of the act prior to consummating the transaction.

These amendments require controlling partners, rather than partnerships, to report transactions in certain other circumstances. Section 801.1(b)(1)(ii) provides that a partnership or other unincorporated entity is deemed to be controlled by any person who owns 50 percent or more of the entity. Thus, a partner who meets the statutory $10 million minimum size criteria and owns

50 percent or more of the partnership would be required to file the notification for an otherwise reportable acquisition by the partnership. The amendments abolish the overly general presumption that partnerships are always independent entities.

These amendments mean, in the example of the acquisition of the $1 billion company discussed above, that the transaction would be reportable if one of the partners were entitled to fifty percent or more of the partnership's profits (or, upon dissolution, of its assets), and that partner's total assets or annual net sales were $10 million or more. That controlling partner, or its parent, would be the "ultimate parent entity" pursuant to § 801.1(a)(3). It would therefore be deemed to be the person making the acquisition.

This attribution of control to persons owning such large economic interests is appropriate, because, as a general rule, they control these entities in the common sense of that word. The antitrust review should therefore include a comparison of the business holdings of the acquired entity with the business holdings of both the partnership and the controlling partner. By requiring the controlling partner to file, the premerger antitrust review will automatically consider both. While not perfect, this concept, which relies on the entitlement to profits or to assets in the event of dissolution, seems an adequate indicator of control where one person has a right to 50 percent or more of the profits or is entitled to 50 percent or more of the assets upon dissolution. At the very least, it seems unlikely that such an entity would be permitted to continue its existence if it operated in any way that was adverse to the wishes of the 50 percent owner. Consequently, the Commission considers this proposal to be an appropriate supplement to its existing definition of control.

The 50 percent ownership requirement parallels in important respects the treatment of corporations under the existing control rule. Although effective or working control of a corporation can exist as a practical matter with a smaller percentage of shares, § 801.1(b) deems a corporation to be a controlled entity only if one person owns "50 percent or more of the outstanding voting securities" or has a right "presently to designate a majority of the board of directors." While this 50 percent requirement understates actual control of many corporations, the rule is clear and easily determinable.

The rule is arguably overinclusive because one corporation with two 50 percent owners is deemed to have two ultimate parent entities. Nevertheless, this rule correctly reflects the joint control that generally exists in such circumstances. In the Commission's experience, this requirement that both controlling entities file has neither prevented persons from fulfilling the premerger notification requirements nor had a negative impact on business decisions.

The 50 percent ownership criterion serves similar functions for determining control of unincorporated entities. It is an objective and predictable standard. Moreover, the degree of ownership is sufficient to assure in almost all instances that the entities and those deemed to be controlling owners will act in concert to comply with the act's obligations.

In formulating the 50 percent ownership criterion, consideration was given to whether other indicators of control should be included. For example, the Commission might have proposed treating all general partners or the sole general partner of a limited partnership as controlling the partnership. While the Commission did not doubt its authority to attribute control on the basis of this and other criteria, the Commission declined to utilize that authority at this time because it might require many unnecessary filings. For example, limited partnerships with sole general partners are common entities whose investments often have little competitive significance. Moreover, if a rule required sole general partners to file notifications, it could easily be avoided by appointing a second or third general partner. At present, a rule requiring all general partners to file seems unnecessary and therefore unduly burdensome, but the Commission retains the option of promulgating such a rule should underreporting of significant acquisitions occur under the rule promulgated here.

Each of the four comments received addresses whether the amendments as proposed are adequate to remedy the underreporting problem caused by the interpretation that makes some acquisitions by partnerships and certain other entities not subject to reporting requirements. All four support "the concepts underlying these proposals" and consider them to be "a considerable improvement over the present Rules" (See Comment 3). The comments neither suggest that these amendments would not have required all the publicized unreported partnership transactions to have been reported, nor criticize the workability of the amendments. Three of the comments noted that partnerships could be set up in such a manner that no partner would control it under the amendments as proposed. Accordingly, these comments favor some action in addition to the proposed rule, but each makes a different suggestion.

The Commission welcomes the suggestions, which relate to abuses that may occur in the future. For the present, the Commission believes its proposed amendments are sufficient, and that the public interest will be served best by their immediate adoption. The amendments as proposed place acquisitions undertaken by partnerships on equal footing with acquisitions undertaken by corporations, and the Commission is not aware of any problem with the existing definition of control as it pertains to corporations. The Commission is not persuaded of the need to expand the reporting obligation to cover numerous competitively insignificant transactions in anticipation of avoidance devices that may never be used.

However, the Commission is considering whether, in light of its adoption of the "partnership control" rule, it should also revise its rules to require reporting the acquisition of control of a partnership. Currently, the staff interpretation makes acquisition of less than a 100 percent interest in a partnership not reportable, because a partnership interest is deemed to be neither a voting security nor an asset. The Commission is also considering the suggestion of Comment 3 from the American Bar Association Section of Antitrust Law that the economic incentive not to observe premerger reporting obligations might be eliminated by adopting a blanket exemption for all transactions in which an acquiring person would hold less than 5 percent of the voting securities of an issuer. That comment suggests that such acquisitions are unlikely to have antitrust implications.

**Changing the Majority Control Criterion**

Prior to these amendments, an entity was deemed controlled by a person that had the contractual power to designate a majority of the entity's board of directors. That rule reflects the Commission's belief that such a person should be deemed to control the entity whether or not that entity also is deemed to be controlled according to other criteria. Thus, under the existing rules, a single entity may be deemed controlled by one person that holds 50 percent of the outstanding voting securities of the entity and also by another person who has a contractual right to appoint a majority (i.e., more than 50 percent) of that entity's board of directors (or of individuals exercising similar functions). The Commission has

concluded, however, that no purpose was served and some confusion was generated by inferring control by virtue of ability to appoint directors only when one person may appoint *more than* 50 percent of the directors. It has therefore revised this criterion to parallel the other control concepts that are based on 50 percent ownership. Under this amendment, an entity is deemed to be controlled by a person with the right to appoint exactly 50 percent, as well as more than 50 percent, of the entity's directors.

The basis of this decision is illustrated by the following example. Consider a nonprofit joint venture corporation created by two persons that is not deemed to be controlled under § 801.1(b)(1) because it does not issue voting securities, it does not distribute profits and it would disburse assets widely in the event of dissolution. If the power to appoint directors of this venture is split evenly between the two persons that formed the entity, such an entity can be deemed controlled solely as a result of the contractual right to appoint directors. There is no reason to treat the control of this corporation differently from a corporation in which the voting shares are split evenly. Both rights are likely to result in an evenly divided board of directors. Accordingly, the amended rule deems an entity to be controlled by a person that has a contractual right to appoint 50 percent or more of the "directors of a corporation, or in the case of unincorporated entities, of individuals exercising similar functions."

As noted in the discussion above, the Commission has experienced no problems administering its "50 percent or more of the outstanding voting securities" criterion. Even though that requires in appropriate circumstances more than one person to file as the ultimate parent entity of a single issuer, all persons required to file have been able to supply the information required. This experience appears to confirm the Commission's premise that if one person owns 50 percent of an entity it is at least in joint control of the entity. In the case of a person able to appoint 50 percent of a board of directors (or individuals exercising similar functions), it is even clearer that the entity cannot act without that person's assent. The Commission therefore has amended its rules so as to deem a person to control an entity if that person has the contractual right to appoint 50 percent or more of the board of directors (or of individuals exercising similar functions) of the entity.

This amendment similarly modifies a Commission staff informal interpretation of § 801.1(b). The Premerger Notification Office deems a corporation controlled if a person can designate a *majority* of the board as a result of both holding voting securities and having a contractual power to designate directors. In other words, in determining whether an entity is controlled pursuant to § 801.1(b)(2), the staff adds directors elected to the board as a result of holding voting securities to directors designated as a result of a contractual power. Under the amendment, the staff will deem the entity controlled by a person who, as a result of such combined rights, has the power to designate 50 percent or more of the directors.

**Operation of the Control Rules**

Amended § 801.1(b)(1)(ii) deems an entity to be controlled by a person entitled to 50 percent or more of the entity's profits, or by a person entitled, upon dissolution, to 50 percent or more of the entity's assets. This provision does not apply if the entity has outstanding voting securities. The amendment thus creates two systems for determining control: One for entities that have outstanding voting securities, and another for all other entities.

These non-overlapping rules for determining control are each supplemented by the alternative—contractual power to designate—control concept. In other words, § 801.1(b)(1)(i) and § 801.1(b)(1)(ii) are mutually exclusive; an entity cannot be controlled both under paragraph (b)(1)(i) by a person that holds 50 percent of the voting securities issued by the entity and under paragraph (b)(1)(ii) by another person that has a right to 50 percent of the entity's profits. Because the entity had outstanding voting securities, paragraph (b)(1)(ii) does not apply; thus the entity would not be controlled on the basis of a right to profits or to assets upon dissolution. In contrast, under proposed paragraph (b)(2) the entity deemed controlled under (b)(1)(i) as a result of voting securities held by one person would be deemed also controlled under proposed paragraph (b)(2) by another person that had a contractual right to appoint 50 percent or more of the entity's board of directors.

Similarly, an entity that was deemed controlled under paragraph (b)(1)(ii), because a person had a right to 50 percent of its profits or assets, would also be deemed controlled under (b)(2) if another person had the right to appoint at least 50 percent of that entity's board of directors (or analogous body). This overlap would be quite rare, however. As explained above, the Commission staff concluded that partnerships do not possess "individuals exercising similar functions" to directors; therefore, paragraph (b)(2) applies only to other entities that do not have outstanding voting securities.

In addition, the 50 percent or more criteria in paragraphs (b)(1)(i) and (b)(2) means that under each paragraph two persons can be deemed to control an entity; and under paragraph (b)(1)(ii), four persons could conceivably control an entity, as two persons could each be entitled to 50 percent of the entity's profits and two different persons each be entitled to 50 percent of the entity's assets upon dissolution. It is, thus, theoretically possible that as many as six persons could be deemed to control one entity (four under (b)(1)(ii) plus two under (b)(2)). However, as Comment 3 notes, it would be extraordinary for an entity to allocate those incidents of ownership in such different percentages.

As described above, paragraph (b)(1)(ii) is intended to apply only in circumstances in which paragraph (b)(1)(i) does not apply; that is, it applies only to entities that have no outstanding voting securities. Typically, this means paragraph (b)(1)(i) applies to corporations and paragraph (b)(1)(ii) applies to non-corporate entities. It should be noted, however, that some corporations (for example, entities incorporated under not-for-profit statutes that do not issue voting securities) are subject to paragraph (b)(1)(ii). Similarly, some unincorporated entities (for example, joint stock companies) may have outstanding voting securities. For them, control is determined by paragraph (b)(1)(i).

For purposes of these rules, the fact that an entity issues securities that have some voting rights is not sufficient to deem them voting securities. Limited partnerships commonly issue certificates subject to the Securities Act of 1933 to limited partners. These partnership shares may be transferable and may entitle their holders to vote on a variety of matters, but typically the entities would not be subject to paragraph (b)(1)(i). The definition of "voting security" in § 801.1(f)(1) states that the holder of the security must be entitled "to vote for the election of directors of the issuer, or with respect to unincorporated entities, individuals exercising similar functions." Because most unincorporated entities do not have bodies analogous to boards of directors or do not elect the membership of such bodies, the securities are not "voting securities" within the meaning of the rules.

The rights to profits and to assets, upon dissolution, described in paragraph (b)(1)(ii) are ownership rights and not creditor rights. Thus, the right to assets, upon dissolution, means after all debt obligations have been satisfied. The right to profits is calculated after payment of any royalty, franchise fee or other expense based on income. Also, as Comment 3 notes, there may be instances in which profits are shared with employees in lieu of compensation, rather than as a return on investment. These compensation distributions should not be included in calculating the right to profits under paragraph (b)(1)(ii). Where parties are in doubt as to the manner in which they should calculate percentage rights to profits or to assets, upon dissolution, they should seek the advice of the Premerger Notification Office.

As is the case with other control provisions, a person deemed to control an entity under paragraph (b)(1)(ii) has attributed to it all the assets of the controlled entity. See § 801.1(c)(8). Thus if "A" controls pursuant to paragraph (b)(1)(ii) a partnership B (because "A" is entitled to 50 percent of B's profits, or 50 percent of B's assets upon dissolution), "A" must include the value of all of B's assets in determining the total assets of "A." "A" must include all of B's assets to determine whether it meets the minimum size criteria of section 7A(a)(2) of the act, even though "A" does not have a right to the other 50 percent of B's profits or assets. Furthermore, if B is entitled to 50 percent of the profits of partnership C, "A" will be deemed to control C also and also must include all the assets of C in determining the size of "A."

Finally, Comment 3 from the ABA Section of Antitrust Law raises three additional questions about these amendments: First, it asks whether the following transaction is exempt from reporting obligations: A person that controls a partnership acquires assets from the partnership. As a general matter, the Commission agrees it would be logical to exempt such transactions if acquisition of control of the partnership were a reportable event. However, as noted above, under current staff interpretations, acquisition of control is not normally a reportable event. Consequently, the Commission is not prepared now to exempt the asset acquisition. It will consider such an exemption as it considers making the acquisition of control of a partnership a reportable event.

Second, Comment 3 asks how to resolve the apparent conflict between the amended definition of control and the definition in § 801.1(c)(5), which states that the beneficiary of a trust (regardless of the percentage of its profits to which he is entitled) does not hold the assets of the trust. It is the Commission's intention that the control amendments, although adopted more recently, do not supersede the more specific treatment of trust assets mandated by § 801.1(c).

The Section of Antitrust Law also raises concerns that rapid implementation of the amendments might disrupt transactions that are nearing completion. For these reasons the section suggests the effective date of the amendments should be delayed for 60 or even 90 days after promulgation of the amendments. The Commission believes that its 35 day period is adequate to prevent disruption and that a longer period might invite the very abuses these amendments are intended to eliminate.

**List of Subjects in 16 CFR Part 801**

Antitrust.

Accordingly 16 CFR Part 801 is amended as set out below.

**PART 801—COVERAGE RULES**

1. *Authority.* The authority for Part 801 continues to read as follows:

**Authority:** Sec. 7A(d) of the Clayton Act, 15 U.S.C. 18a(d), as added by sec. 201 of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, Pub. L. 94-435, 90 Stat. 1390.

2. Section 801.1 is amended by revising the introductory text of paragraph (b), paragraphs (b) (1) and (2), and by designating the existing example as example (1), and adding new examples (2) through (4), as set forth below.

**§ 801.1 Definitions.**

* * * * *

(b) *Control.* The term "control" (as used in the terms "control(s)," "controlling," "controlled by" and "under common control with") means:

(1) *Either.* (i) Holding 50 percent or more of the outstanding voting securities of an issuer or

(ii) In the case of an entity that has no outstanding voting securities, having the right to 50 percent or more of the profits of the entity, or having the right in the event of dissolution to 50 percent or more of the assets of the entity; or

(2) Having the contractual power presently to designate 50 percent or more of the directors of a corporation, or in the case of unincorporated entities, of individuals exercising similar functions.

Examples 1. * * *

2. A statutory limited partnership agreement provides as follows: The general partner "A" is entitled to 50 percent of the partnership profits, "B" is entitled to 40 percent of the profits and "C" is entitled to 10 percent of the profits. Upon dissolution, "B" is entitled to 75 percent of the partnership assets and "C" is entitled to 25 percent of those assets. All limited and general partners are entitled to vote on the following matters: the dissolution of the partnership, the transfer of assets not in the ordinary course of business, any change in the nature of the business, and the removal of the general partner. The interest of each partner is evidenced by an ownership certificate that is transferable under the terms of the partnership agreement and is subject to the Securities Act of 1933. For purposes of these rules, control of this partnership is determined by subparagraph (1)(ii) of this paragraph. Although partnership interests may be securities and have some voting rights attached to them, they do not entitle the owner of that interest to vote for a corporate "director" or "an individual exercising similar functions" as required by § 801.1(f)(1) below. Thus control of a partnership is not determined on the basis of either subparagraph (1)(i) or (2) of this paragraph. Consequently, "A" is deemed to control the partnership because of its right to 50 percent of the partnership's profits. "B" is also deemed to control the partnership because it is entitled to 75 percent of the partnership's assets upon dissolution.

3. "A" is a nonprofit charitable foundation that has formed a partnership joint venture with "B," a nonprofit university, to establish C, a nonprofit hospital corporation that does not issue voting securities. Pursuant to its charter all surplus revenue from the hospital in excess of expenses and necessary capital investments is to be disbursed evenly to "A" and "B." In the event of dissolution of the hospital corporation, the assets of the hospital are to be contributed to a local charitable medical facility then in need of financial assistance. Notwithstanding the hospital's designation of its disbursement funds as surplus rather than profits to maintain its charitable image, "A" and "B" would each be deemed to control C, pursuant to § 801.1(b)(1)(ii), because each is entitled to 50 percent of the excess of the hospital's revenues over expenditures.

4. "A" is entitled to 50 percent of the profits of partnership B and 50 percent of the profits of partnership C. B and C form a partnership E with "D" in which each entity has a right to one-third of the profits. When E acquires company X, "A" must report the transaction (assuming it is otherwise reportable). Pursuant to § 801.1(b)(1)(ii), E is deemed to be controlled by "A," even though "A" ultimately will receive only one-third of the profits of E. Because B and C are considered as part of "A," the rules attribute all profits to which B and C are entitled (two-thirds of the profits of E in this example) to "A."

By direction of the Commission.

Benjamin I. Berman,

*Acting Secretary.*

[T.D. 87-75]

# Elimination of Various Customs Forms and Certain Information Collection Requirements

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule, Treasury.

SUMMARY: This document amends the Customs Regulations by eliminating Customs forms that are obsolete and eliminating information collection requirements determined to be obsolete or unduly burdensome. The forms being eliminated are unnecessary either because the procedure being documented has been discontinued or because the information sought can be supplied on a different form with no loss of accuracy. The information collection aspects of the document were the subject of two previous Federal Register notices. After announcing the intention to review its regulations and reviewing the comments received in response, Customs published a list of regulations containing information collection requirements proposed for deletion. After further review, most of the information collection requirements as published in the list are being eliminated. These changes merely conform the regulations to existing law or practice. They are nonsubstantive and essentially are procedural.

EFFECTIVE DATE: June 29, 1987.

FOR FURTHER INFORMATION CONTACT: Concerning Customs forms: Skip Simpson, Paperwork Management Branch (202-566-8161); Concerning information collection requirements: Pat Barbare, Office of Inspection and Control (202-566-8157).

SUPPLEMENTARY INFORMATION:

## Background

### *Customs Forms*

As part of a continuing program to keep its regulations current, the Customs Service has determined that various Customs forms should be removed from the Customs Regulations contained in Chapter I, Title 19, Code of Federal Regulations (19 CFR Chapter I). The changes also correct certain references where old forms have been replaced with new ones.

### *Customs Forms Affected*

1. Customs Form 5119-A, Informal Entry, is used by importers to enter low value merchandise. It is presented directly to a Customs cashier for payment of duties and taxes. Customs has revised Customs Form 7501, Entry Summary, so that it can be used for both formal, as well as informal entries. Therefore, Customs Form 7501, can replace Customs Form 5119-A, and the regulations are being amended accordingly. (See §§ 6.7, 10.71, 123.4, 143.24, 143.25, 145.12.)

2. Customs Form 7519, Combined Rewarehouse Entry and Withdrawal for Consumption and Permit, is used by a consignee of merchandise withdrawn from warehouse for transportation who wishes to pay duty and obtain possession of the merchandise immediately upon its arrival at its destination. It has been determined that due to the infrequent use of Customs Form 7519 it can be eliminated, and Customs Form 7501, Entry Summary, can be substituted in its place. (See §§ 10.61, 141.61, 144.42.)

3. Customs Form 7520, Manifest of Baggage Shipped in Bond, is used to send passenger baggage or commercial samples in bond from one Customs port to another, or in some instances from point to point in Mexico or Canada, respectively, through the U.S. It has been determined that Customs Form 7512, Transportation Entry and Manifest of Goods Subject to Customs Inspection and Permit, can be substituted for Customs Form 7520. Therefore, the regulations are being amended to remove reference to Customs Form 7520. (See §§ 6.16, 18.2, 18.13, 123.52, 123.64.)

4. Customs Form 7524, U.S.-Canada In-Transit Baggage Card, is used to facilitate the movement of baggage arriving at a port on the Canadian border for in-transit movement through the U.S. in bond and return to Canada. In response to a survey, the Customs regions that could have a use for this form noted that the form is unnecessary. The regulations are being amended to eliminate reference to Customs Form 7524, and substitute Customs Form 7512-B, United States-Canada Transit Manifest, in its place. (See §§ 123.64, 123.65.)

5. Customs Form 7529, Carrier's Certificate and Release Order, is used by an importer as evidence of the right to make entry of merchandise not released directly to the carrier. It serves as proof to Customs that the importer has paid to the carrier all shipping and related charges. However, since most commercial shipments are released directly to the carrier, Customs Form 7529 has become less important in recent years. For merchandise not released directly to the carrier, § 141.11(a), Customs Regulations (19 CFR 141.11(a)), provides alternative methods of presenting evidence of the right to make entry. Section 141.11(a) is being amended to remove reference to Customs Form 7529.

## Information Collection Requirements

By notice published in the Federal Register on June 10, 1983 (48 FR 26831), Customs announced that it was undertaking a review of its regulations to identify those having a significant economic impact on a substantial number of small entities. The intended goal of this review was to modify Customs procedures to reduce or eliminate regulatory requirements found to be obsolete or unduly burdensome.

After considering the comments received in response to that notice, and further review of the matter, by notice published on December 28, 1985 (50 FR 52799), certain regulations containing information collection requirements were listed and comments were requested on the proposal that these requirements be deleted from the regulations.

## Discussion of Comments

The only public comment received in response to the notice expressed general support for the idea of regulatory reduction, as well as specific support for a reduction in the reporting requirement in § 10.98(e), Customs Regulations (19 CFR 10.98(e)), relating to metals. However, the reporting requirement referred to is one of a few requirements that, on review, Customs has decided to retain. It has been determined that the proof of use needed to liquidate entries of copper-bearing fluxing material is supplied by the reporting requirement contained in § 10.98(e).

The other information collection requirements which had been proposed for deletion, but have been determined to still be necessary are as follows:

*Sections 10.93 through 10.96 Records and declarations for receipt, transfer, and use of bonded wool and hair.*

The information collection requirements contained in these sections must be retained because the temporary suspension of duties on wool and hair has ended. These products have been dutiable since July 1, 1985. Therefore, the information collection requirements must remain in the regulations.

BEST COPY AVAILABLE

*Section 10.134 Declaration of importer of intended use of merchandise imported under actual use provisions of the Tariff Schedules of the United States (19 U.S.C. 1202).*

It was determined that the requirement for this declaration should be retained because it provides a general statement of intent used to monitor compliance with the actual use provisions of the Tariff Schedules. The statement is a valuable tool in investigating cases of possible fraud involving actual use provisions.

*Section 12.99 Declaration by importer or consignee in support of a permitted entry of a switchblade knife.*

It was determined that removing this requirement from the regulations would give the false impression that no exceptions existed to the general prohibition against importation of switchblade knives. To avoid this confusion, the requirement is being left in the regulations.

*Section 54.6 Statement of importer that articles in chief value of metal are to be used in such manner which renders them fit only for recovery of the metal content.*

It was determined that this information collection requirement is still necessary because it relates to the destruction operation associated with semi-conductors being destroyed in a foreign trade zone to salvage the metal content. However, this section is being amended to cross-reference § 10.134, Customs Regulations, whereby a declaration of intended use may be made either through a specific statement or by mere entry for that purpose, provided the district director is satisfied that the merchandise will be so used.

Upon further review, it has been determined to proceed with the deletion of the following information collection requirements from the regulations:

| 19 CFR Section | Description |
|---|---|
| 4.41(a) | Application for permission to enter wrecked cargo. |
| 6.12(g) | Requirement to post a copy of schedule of charges for servicing aircraft at an airport. |
| 10.6(a) | Certificate of foreign shipper that boxes or barrels were made from American shooks or staves. |
| 10.6(b) | Certificate of box maker that boxes or barrels were made from American shooks or staves. |
| 10.9(g), (h) | Certificate of owner, importer, consignee or agent that processed articles entered are a portion of articles exported for processing that are covered by a certificate of registration. |
| 10.10 | Statement of cameraman, shipper, or other person identifying films and stating that they were exposed abroad and are shipped for use as newsreel of current events abroad. |
| 10.35(b) | Declaration by importer of a model of women's wearing apparel that the article will be used solely as a model, etc. |
| 10.35(d) | Requirement to mark for identification purposes imported models of women's wearing apparel. |
| 10.50 | Declaration of American artist residing temporarily abroad in support of duty-free entry of a work of art. |
| 10.53(a), (b) | Declaration in connection with the entry of antiques. |
| 10.54(b) | Certificate of manager or other responsible employee of the Gobelin or other factory or producer establishing the character of the Gobelin or other hand-woven tapestry in support of duty-free entry. |
| 10.56(l) | Declaration of owner or consignee that vegetable oil has been rendered permanently unfit for use as food. |
| 10.56(s) | Requirement as to marking of bolting cloth for milling purposes in support of duty-free entry. |
| 10.64a | Declaration for withdrawal of fuel from a Customs bonded warehouse to be laden as aircraft supplies. |
| 10.66(a)(2), (b) | Declaration of foreign shipper that merchandise was exported from the U.S. for temporary use at an exhibition and is being returned. |
| 10.70(a) | Declaration in connection with the entry of purebred animals for breeding purposes. |
| 10.72 | Declaration in connection with the entry of horses or mules imported solely for slaughter. |
| 10.73 | Certificate of ultimate consignee of cows being imported solely for dairy purposes in support of claim for reduced rate of duty. |
| 10.74(a) | Owners descriptive list of domestic animals driven across boundary for pasturage. |
| 10.74(b) | Declaration in connection with the return of domestic animals previously driven across boundary for pasturage. |
| 10.79 | Declaration of master of fishing vessel in support of duty-free entry of products of American fisheries. |
| 10.82(a)(1) | Certificate of person making withdrawal of salt used in curing fish taken by an American vessel. |
| 10.82(a)(2) | Certificate of master and at least one other person employed on vessel in connection with the withdrawal of salt used for curing fish. |
| 10.82(a)(3) | Certificate of at least two persons employed on shore in curing fish with salt. |
| 10.82(b) | Certificate of person employed on shore curing fish with salt. |
| 10.90(a) | Application of importer for the importation of master records and metal matrices. |
| 10.90(b) | Statement evidencing agreement between importer and manufacturer concerning the use of master records and metal matrices. |
| 10.90(d) | Declaration of importer as to use of master records and metal matrices. |
| 10.108 | Declaration of importer in connection with wheat unfit for human consumption. |
| 10.109(b) | Statement in connection with entry of articles previously imported into U.S. with duty paid, exported under lease, and now being reimported. |
| 10.110 | Certificate for strategic materials acquired by the Commodity Credit Corporation as result of barter or exchange of agricultural commodities or products. |
| 12.99 | Declaration by importer or consignee in support of a permitted entry of a switchblade knife. |
| 19.16 | Various reporting requirements relating to the operation of cigar manufacturing warehouses. |

## Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, it is certified that these amendments will not have a significant economic impact on a substantial number of small entities. Accordingly, they are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

## Executive Order 12291

Because this document will not result in a "major rule" as defined by section 1(b) of E.O. 12291, the regulatory analysis and review prescribed by the E.O. are not required.

## Public Notice Requirement

Inasmuch as the amendments concerning Customs forms merely change the form used to comply with preexisting regulations, and no new regulatory burdens are imposed on the public, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure thereon are unnecessary.

## Drafting Information

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

**Amendments to the Regulations**

Parts 4, 6, 10, 18, 19, 54, 123, 141, 143, 144 and 145, Customs Regulations (19 CFR Parts 4, 6, 10, 18, 19, 54, 123, 141, 143, 144, and 145) are amended as set forth below.

**PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES**

1. The authority citation for Part 4 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624; 46 U.S.C. 3 and 2103.

**§ 4.41 [Amended]**

2. Section 4.41(a) is amended by removing the words "written application for permission to enter the wrecked cargo", and inserting, in their place, "entry on Customs Form 7501".

**PART 6—AIR COMMERCE REGULATIONS**

1. The authority citation for Part 6 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnote. 11), 1624; 49 U.S.C. 1474, 1508.

**§ 6.7 [Amended]**

2. Section 6.7(b)(3)(ii) is amended by removing the number "5119–A" and inserting, in its place, "7501".

**§ 6.12 [Amended]**

3. Section 6.12(g) is amended by removing the last sentence.

**§ 6.16 [Amended]**

4. Section 6.16 is amended by removing the words, "or Customs Form 7520".

**PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.**

1. The authority citation for Part 10 continues to read as follows:

Authority: 19 U.S.C. 66, 1202, 1481, 1484, 1498, 1623, 1624.

2. The heading and text of § 10.6 are revised to read as follows:

**§ 10.6 Shooks and staves; claim for duty exemption.**

An importer, seeking an exemption from duty on account of boxes or barrels made from American shooks or staves, must make such a claim on Customs Form 3311 at the time of filing the entry. Upon receipt, from the district director at the port of exportation of the shooks and staves, of corroboration that the records of exportation do not conflict materially with such a claim, the exemption may be allowed. If the claim for an exemption is disallowed in full or in part, the importer may file a request within 15 days of the date of the district director's notice to him of any disallowance, for referral of the question to the Commissioner of Customs for review.

**§ 10.9 [Amended]**

3. Section 10.9 is amended by removing paragraph (g) and (h) and redesignating paragraphs (i), (j), (k), and (l) as (g), (h), (i), and (j), respectively.

**§ 10.10 [Removed and reserved]**

4. Part 10 is amended by removing § 10.10 and marking it "Reserved". Part 10 is further amended by removing footnote 8 to § 10.10.

**§ 10.35 [Amended]**

5. Section 10.35 is amended by removing paragraphs (b) and (d), and redesignating paragraph (c) as (b).

**§ 10.50 [Removed and reserved]**

6. Part 10 is amended by removing § 10.50 and marking it "Reserved". Part 10 is further amended by removing footnote 45 to § 10.50.

**§ 10.53 [Amended]**

7. Section 10.53 is amended by removing paragraphs (a) and (b) and redesignating paragraphs (c), (d), (e), (f), (g), (h), and (i) as (a), (b), (c), (d), (e), (f), and (g), respectively. Part 10 is further amended by removing footnotes 48 and 50 to § 10.53.

8. In redesignated §§ 10.53 (b) and (c), the phrase, "paragraph (g)" is removed and, "paragraph (e)" is inserted, in its place.

9. In redesignated § 10.53(e)(6), the phrase, "paragraphs (a), (b) and (c)" is removed and, "paragraph (a)" is inserted, in its place.

**§ 10.54 [Amended]**

10. Section 10.54 is amended by removing the "(a)" in front of the first paragraph and by removing paragraph (b).

Part 10 is further amended by removing footnote 51 to § 10.54.

**§ 10.56 [Amended]**

11. Section 10.56(f) is amended by placing a period after the word "denatured" and removing the remainder of the paragraph, including the form.

12. Section 10.58(a) is revised to read as follows and footnote 55 is removed.

**§ 10.58 Bolting cloths; marking.**

(a) As a prerequisite to the free entry of bolting cloth for milling purposes under item 357.25, Tariff Schedules of the United States, the cloth shall be indelibly marked from selvage to selvage at intervals of not more then 4 inches with "bolting cloth expressly for milling purposes" in block letters 3 inches in height. Bolting cloths composed of silk imported expressly for milling purposes shall be considered only such cloths as are suitable for and are used in the act or process of grading, screening, bolting, separating, classifying, or sifting dry materials, or dry materials mixed with water, if the water is merely a carrying medium.

* * * * *

**§ 10.64a [Removed and reserved]**

13. Part 10 is amended by removing § 10.64a and making it "Reserved".

**§ 10.66 [Amended]**

14. Section 10.66 is amended by removing paragraph (a)(2) and by redesignating paragraphs (a)(3) and (a)(4) as (a)(2) and (a)(3), respectively. Part 10 is further amended by removing footnotes 61 and 62 to § 10.66.

15. Section 10.66(b) is amended by removing the last sentence.

**§ 10.70 [Amended]**

16. Section 10.70 is amended by removing paragraph (a), removing footnotes 64 and 65, and by redesignating paragraph (b) as (a) and revising the section heading and first sentence of redesignated paragraph (a) to read as follows:

**§ 10.70 Purebred animals for breeding purposes; certificate.**

(a) In connection with the entry of purebred animals for breeding purposes under item 100.01, Tariff Schedules of the United States, no claim for free entry shall be allowed in liquidation of the entry until the district director has received from the Department of Agriculture a certificate that the animal is purebred of a recognized breed and duly registered in a book of record recognized by the Secretary of Agriculture for that breed. * * *

* * * * *

17. Section 10.70 is further amended by redesignating paragraph (c) as (b).

**§ 10.71 [Amended]**

18. Section 10.71(f) is amended by removing the phrase, "informal entry (Customs Form 5119–A)", and inserting,

in its place, "entry summary (Customs Form 7501)".

§ 10.72 [Removed and reserved]

19. Part 10 is amended by removing § 10.72 and marking it "Reserved." Part 10 is further amended by removing footnote 66 to § 10.72.

§ 10.73 [Removed and reserved]

20. Part 10 is amended by removing § 10.73 and marking it "Reserved." Part 10 is further amended by removing footnote 67 to § 10.73.

21. The heading and text of § 10.74 are revised to read as follows and footnote 68 is removed:

§ 10.74 Animals straying across boundary for passage; offspring.

When domestic animals for which free entry is to be claimed under item 100.03, Tariff Schedules of the United States, have strayed across the boundary line, they may be returned, together with their offspring, without entry if brought back within 30 days; otherwise entry shall be required. The owner of any such animal shall report its return to the nearest Customs office and hold it for such inspection and treatment as may be deemed necessary by a representative of the Animal and Plant Health Inspection Service of the Department of Agriculture. Any such arrival found not to have been so reported or held shall be subject to seizure and forfeiture pursuant to 18 U.S.C. 545.

* * * * *

22. Section 10.78(a) is revised to read as follows:

§ 10.78 Entry.

(a) No entry shall be required for fish or other marine products taken on the high seas by vessels of the U.S. or by residents of the U.S. in undocumented vessels owned in the U.S. when such fish or other products are brought into port by the taking vessel or are transferred at sea to another fishing vessel of the same fleet and brought into port.

* * * * *

§ 10.79 [Removed and reserved]

23. Part 10 is amended by removing § 10.79 and marking it "Reserved."

§ 10.81 [Amended]

24. Section 10.81(b) is amended by removing the number "7519" and inserting, in its place, "7501".

§ 10.82 [Removed and reserved]

25. Part 10 is amended by removing § 10.82 and marking it "Reserved".

26. Section 10.83(a) is revised to read as follows:

§ 10.83 Bond; cancellation; extension.

(a) If it shall appear to the satisfaction of the district director holding the bond referred to in § 10.80, that the entire quantity of salt covered by the bond has been duly accounted for, either by having been used in curing fish or by the payment of duty, the district director may cancel the charges against the bond. The district director may require additional evidence in corroboration of the proof of use produced.

* * * * *

§ 10.90 [Amended]

27. Section 10.90 is amended by removing paragraphs (a), (b), and (d), as well as footnote 81 to paragraph (a), and by redesignating paragraphs (c), (e), (f), and (g), as (a), (b), (c), and (d), respectively.

28. Redesignated § 10.90(d) is amended by removing the phrase, "If and when the application is approved," and changing the word "entries" to "Entries."

§ 10.98 [Amended]

29. Section 10.98(e) is amended by removing the words, "Perth Amboy, N.J.," and inserting, in their place, "the port or ports where the entries are to be liquidated."

§ 10.101 [Amended]

30. Section 10.101 is amended in the following manner:

(a) In paragraph (b), the third sentence, the word "blanket" is removed.

(b) In the heading to paragraph (c), the word "Blanket" is removed, and "carrier's" is changed to "Carrier's".

(c) Paragraph (c) is further amended by removing the last sentence.

§ 10.106 [Removed and reserved]

31. Part 10 is amended by removing § 10.106 and the note immediately following and marking it "Reserved."

§ 10.108 [Amended]

32. Section 10.108 is amended by removing the "(a)" in front of paragraph (a), and by removing paragraph (b). Part 10 is further amended by removing footnote 100 to § 10.108.

§ 10.110 [Removed and reserved]

33. Part 10 is amended by removing § 10.110 and marking it "Reserved." Part 10 is further amended by removing footnote 103 to § 10.110.

## PART 18—TRANSPORTATION IN BOND AND MERCHANDISE IN TRANSIT

1. The authority citation for Part 18 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnote. 11), 1551, 1552, 1553, 1624.

Section 18.13 also issued under 19 U.S.C. 1498(a).

§ 18.2 [Amended]

2. Section 18.2(a)(2)(ii) is amended by removing the words, "or 7520,".

3. Section 18.2(c)(1) is amended by removing from the first sentence, the words "either" and "or 7520".

§ 18.13 [Amended]

4. Section 18.13(b) is revised to read as follows:

§ 18.13 Procedure; manifest

* * * * *

(b) A Customs manifest for baggage shipped in bond, Customs Form 7512, shall be prepared in triplicate for each shipment. The related Customs Form 7512–C (destination) shall be delivered to the carrier to accompany the baggage and shall be delivered by the carrier to the district director at the port of destination as a notice of arrival.

* * * * *

## PART 19—CUSTOMS WAREHOUSES, CONTAINER STATIONS AND CONTROL OF MERCHANDISE THEREIN

1. The authority citation for Part 19 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1624.

§ 19.16 [Removed and Reserved]

2. Part 19 is amended by removing § 19.16 and marking it "Reserved."

## PART 54—CERTAIN IMPORTATIONS TEMPORARILY FREE OF DUTY

1. The authority citation for Part 54 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (Gen. Hdnote. 11, Tariff Schedules of the United States), 1624.

§ 54.5 [Amended]

2. § 54.5(a) is amended by removing the numbers "911.11 and 911.12" and inserting, in their place, "870.50, 870.55 and 870.60".

3. Section 54.6(a) is revised to read as follows:

§ 54.6 Proof of intent; bond; proof of use; liquidation.

(a) There shall be filed in connection with the entry [1] a statement of the importer consistent with the requirements of § 10.134 of this chapter.

* * * * *

4. In footnote 1 to § 54.6(a) and in § 54.6(d), the numbers "911.11 or 911.12" are removed, and the numbers "870.50,

670.55 or 670.60" are inserted, in their place.

## PART 123—CUSTOMS RELATIONS WITH CANADA AND MEXICO

1. The authority citation for Part 123 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (Gen. Hdnote. 11), 1624.

Section 123.4 also issued under 19 U.S.C. 1484, 1498.

Section 123.51 also issued under 19 U.S.C. 1554.

Sections 123.52, 123.64 also issued under 19 U.S.C. 1553.

### § 123.4 [Amended]

2. Section 123.4(b) is amended by removing the number "5119–A" and, inserting, in its place, "7501".

### § 123.52 [Amended]

3. Section 123.52 is amended by removing the number "7520" from paragraphs (e) and (f), and inserting, in both those places, "7512".

### § 123.64 [Amended]

4. Section 123.64 is amended by removing the number "7520" from paragraphs (b) and (c), and inserting, in all three places "7512".

### § 123.64, 123.65 [Amended]

5. Sections 123.64(d)(2) and 123.65(b)(2) are amended by removing the words, "7524, Canada A–21" and inserting, in both places, "7512–B (Canada 8½) or Customs Form 7533–C (Canada A4–½)".

## PART 141—ENTRY OF MERCHANDISE

1. The authority citation for Part 141 continues to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

### § 141.11 [Amended]

2. Section 141.11(a)(4) is amended by removing the words, "on Customs Form 7529,". The section is further amended by removing subparagraph (5) and marking it "Reserved."

### § 141.61 [Amended]

3. Section 141.61(a)(2) is amended by placing a comma after "7505", removing the words, "or 7519," and inserting in their place the words, "or entry summary, Customs Form 7501,". The section is further amended by removing from paragraph (e)(1)(i)(A) the words, "the rewarehouse entry, Customs Form 7519;".

4. Sections 141.61(f)(1)(iv) and 141.61(f)(2)(i) are amended by removing the words "and 7519" and replacing the comma which appears after "7506", in both places, with a period.

### § 141.68 [Amended]

5. Section 141.68(h) is amended in the following manner:

(a) In the first sentence, the words, "or informal "entry" are added immediately after the words, "appraisement entry," and the words "an informal entry, Customs Form 5119–A" are removed.

(b) In the second and third sentences, the words "5119–A or" are removed.

### § 141.111 [Amended]

6. Section 141.111 is amended in the following manner:

(a) In paragraph (b), subparagraph (1) is removed and marked "Reserved."

(b) Paragraph (c) is removed and marked "Reserved."

## PART 143—CONSUMPTION, APPRAISEMENT, AND INFORMAL ENTRIES

1. The authority citation for Part 143 continues to read as follows:

Authority: 19 U.S.C. 66, 1481, 1484, 1498, 1624.

### § 143.23 [Amended]

2. In § 143.23, the introductory text is amended by removing the number "5119–A" and inserting, in its place, "7501".

### § 143.24 [Amended]

3. Section 143.24 is amended in the following manner:

(a) In the section heading, a period is placed after "7501" and the phrase, "and Customs Form 5119–A" is removed.

(b) In the second sentence of the section, "5119–A" is removed and "7501" is inserted, in its place.

### § 143.25 [Amended]

4. Section 143.25 is amended by removing the phrase, "Customs Form 5119–A or, where used,".

## PART 144—WAREHOUSE AND REWAREHOUSE ENTRIES AND WITHDRAWALS

1. The authority citation for Part 144 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1854; 19 U.S.C. 66, 1311, 1312, 1484, 1552, 1553, 1555, 1556, 1557, 1559, 1562, 1563, 1623, 1624, 1646(a); 26 U.S.C. 5214.

### § 144.42 [Amended]

2. Section 144.42(b)(1) is amended by removing the phrase, "7519 (Combined Rewarehouse Entry and Withdrawal for Consumption, and Permit)" and replacing it with "7501 (Consumption Entry)".

3. Sections 144.42(b)(2) and (3) are amended by removing the number "7519" and inserting, in both places, "7501".

## PART 145—MAIL IMPORTATIONS

1. The authority citation for Part 145 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624.

Section 145.4 also issued under 18 U.S.C. 545; 19 U.S.C. 1618.

Section 145.12 also issued under 19 U.S.C. 1315, 1484, 1498.

### § 145.4 [Amended]

2. Section 145.4(c) is amended by removing "5119–A" and inserting, in its place, "7501".

### § 145.12 [Amended]

3. Section 145.12 is amended in the following manner:

(a) In paragraph (b)(1), the words "informal entry (Customs Form 5119–A)" are removed and replaced with, "entry summary (Customs Form 7501)".

(b) In paragraph (c), the number "5119–A" is removed and replaced with, "7501".

(c) In paragraph (e)(1), the words "informal entry, Customs Form 5119–A" are removed and replaced with, "entry summary, Customs Form 7501,".

Michael H. Lane,
*Acting Commissioner of Customs.*
Approved April 23, 1987.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

### 21 CFR Part 177

[Docket No. 87F–0014]

### Indirect Food Additives: Polymers

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the food additive regulations to lower the inherent viscosity specification for poly(tetramethylene terephthalate) copolymers. This action responds to a petition filed by General Electric Co., Plastics Group.

**DATES:** Effective May 29, 1987; objections by June 29, 1987.

**ADDRESS:** Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Vir Anand, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of March 16, 1987 (52 FR 8112), FDA announced that a petition (FAP 7B3983) had been filed by General Electric Co., Plastics Group, Pittsfield, MA 01201, proposing that § 177.1660 *Poly(tetramethylene terephthalate)* (21 CFR 177.1660) be amended in paragraph (c)(1) to lower the inherent viscosity specification from 0.8 to 0.6.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed lowering of the inherent viscosity of poly(tetramethylene terephthalate) copolymers, which represents a lower molecular weight of the polymer, is safe, and that § 177.1660(c)(1) should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has determined under 21 CFR 25.24(a)(9) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Any person who will be adversely affected by this regulation may at any time on or before June 29, 1987, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 177

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, Part 177 is amended as follows:

## PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

1. The authority citation for 21 CFR Part 177 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

§ 177.1660 [Amended]

2. Section 177.1660 *Poly(tetramethylene terephthalate)* is amended in paragraph (c)(1) by revising "0.8" to read "0.6".

Dated: May 18, 1987.

Richard J. Ronk,

*Acting Director, Center for Food Safety and Applied Nutrition.*

## 21 CFR Part 178

[Docket No. 86F–0458]

## Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to add two polymers to the list of substances in which *N,N'*-hexamethylenebis(3,5-di-*tert*-butyl-4-hydroxyhydrocinnamamide) may be safely used as an antioxidant. This action responds to a petition filed by Ciba-Geigy Corp.

DATES: Effective May 29, 1987; objections by June 29, 1987.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary W. Lipien, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of December 23, 1986 (51 FR 45954), FDA announced that a petition (FAP 7B3969) had been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that § 178.2010 (21 CFR 178.2010) be amended to provide for additional uses of *N,N'*-hexamethylenebis(3,5-di-*tert*-butyl-4-hydroxyhydrocinnamamide) as an antioxidant for polymers intended for use in contact with food.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed food additive uses are safe, and that 21 CFR 178.2110(b) should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has previously considered the environmental effects of this rule as announced in the Notice of Filing for FAP 7B3969 (December 23, 1986; 51 FR 45954). No new information or comments have been received that would affect the agency's previous determination that there is no significant impact on the human environment and that an environmental impact statement is not required.

Any person who will be adversely affected by this regulation may at any time on or before June 29, 1987, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing

is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intented to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

**List of Subjects in 21 CFR Part 178**

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, Part 178 is amended as follows:

**PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS**

1. The authority citation for 21 CFR Part 178 continues to read as follows:

**Authority:** Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. In § 178.2010 paragraph (b) is amended in the entry "*N,N'*-Hexamethylenebis(3,5-di-*tert*-butyl-4-hydroxyhydrocinnamamide)" by adding new entries 6 and 7 to read as follows:

**§ 178.2010 Antioxidants and/or stabilizers for polymers.**

BILLING CODE 4160-01-M

---

**DEPARTMENT OF JUSTICE**

**Drug Enforcement Administration**

**21 CFR Part 1308**

## Schedules of Controlled Substances; Placement of Acetyl-Alpha-Methylfentanyl, Alpha-Methylthiofentanyl, Beta-Hydroxyfentanyl, 3-Methylthiofentanyl, Para-Fluorofentanyl and Thiofentanyl into Schedule I

**AGENCY:** Drug Enforcement Administration, Justice.

**ACTION:** Final rule.

**SUMMARY:** This final rule is issued by the Administrator of the Drug Enforcement Administration (DEA) to place the narcotic substances, acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl into Schedule I of the Controlled Substances Act (CSA) (21 U.S.C. 801 *et seq.*). This action is based on findings made by the DEA Administrator, after a review and evaluation of the relevant data by both DEA and the Assistant Secretary for Health, that acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl meet the statutory criteria for inclusion in Schedule I of the CSA. As a result of this final rule, the regulatory controls and criminal sanctions of Schedule I will be applicable to the manufacture, distribution, importation, exportation and possession of the six referenced fentanyl analogs.

**EFFECTIVE DATE:** May 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 633–1366.

**SUPPLEMENTARY INFORMATION:** Acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl are potent analogs of the Schedule II synthetic narcotic analgesic fentanyl. Each of these fentanyl analogs behaves as a typical morphine-like compound in rodent antinociceptive tests. Further, each analog substitutes completely for morphine when administered to morphine dependent withdrawn monkeys. The six fentanyl analogs have been produced in clandestine laboratories, identified in drug evidence submissions and associated with a number of overdose deaths.

Acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl are temporarily controlled in Schedule I of the CSA pursuant to the emergency scheduling provisions of 21 U.S.C. 811(h) (51 FR 4722, 50 FR 43696). The temporary scheduling of para-fluorofentanyl expires on September 10, 1987 (52 FR 7270) and the temporary scheduling of the other five fentanyl analogs expires on May 29, 1987 (51 FR 42834).

On November 28, 1986, in a notice of proposed rulemaking published in the **Federal Register** (51 FR 43025), after a review of the relevant data, the DEA Administrator proposed to place acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl and thiofentanyl into Schedule I of the CSA pursuant to 21 U.S.C. 811(a). Likewise, on March 10, 1987, the DEA Administrator proposed to place para-fluorofentanyl into Schedule I of the CSA (52 FR 7280). Both proposed rules provided for the submission of comments or objections regarding the proposals by any interested parties. DEA received no comments or objections nor were there any requests for hearings.

In both proposed rules, the DEA Administrator stated that before issuing final rules in these matters, he would take into consideration the scientific and medical evaluations and scheduling recommendations of the Secretary of the Department of Health and Human Services in accordance with 21 U.S.C. 811(b). Scientific and medical evaluations and scheduling recommendations have been received from the Assistant Secretary for Health, Department of Health and Human Services for acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl. Based upon the investigations and reviews conducted by DEA and upon the scientific and medical evaluations and recommendations of the Assistant Secretary for Health received in

accordance with 21 U.S.C. 811(b), the DEA Administrator, pursuant to the provisions of 21 U.S.C. 811(a) and (b), finds that:

(1) Acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl each has a potential for abuse;

(2) Acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl each has no currently accepted medical use in treatment in the United States, and

(3) Acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl each lacks accepted safety for use under medical supervision.

The above findings are consistent with the placement of acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthio-fentanyl, para-fluorofentanyl and thiofentanyl into Schedule I of the CSA. The Administrator further finds that acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl and opiates as defined in 21 U.S.C. 802(18) since they have an addiction-forming and an addiction-sustaining liability similar to that of morphine. Consequently, acetyl-alpha-methylfentanyl, alpha-methyl-thiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl are narcotics since the definition of narcotic, as stated in 21 U.S.C. 802(17)(A), includes: "Opium, opiates, derivatives of opium and opiates."

In accordance with 21 U.S.C. 811(h)(5), the emergency scheduling orders for acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl shall be vacated on the effective data of this final rule, placing the above named fentanyl analogs into Schedule I of the CSA pursuant to 21 U.S.C. 811(a).

Since acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl are already under temporary control in Schedule I, all regulations applicable to Schedule I narcotic substances will continue to be effective as of [May 29, 1987]. The current applicable regulations are as follows:

1. *Registration.* Any person who manufactures, distributes, delivers, imports or exports acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl or thiofentanyl, or who engages in research or conducts instructional activities with respect to these substances, or who proposes to engage in such activities, must be registered to conduct such activities in accordance with Parts 1301 and 1311 of Title 21 of the Code of Federal Regulations.

2. *Security.* Acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl must be manufactured, distributed and stored in accordance with §§ 1301.71–1301.76 of Title 21 of the Code of Federal Regulations.

3. *Labeling and Packaging.* All labels and labeling for commercial containers of acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl must comply with the requirements of §§ 1302.03–1302.05, 1302.07 and 132.08 of Title 21 of the Code of Federal Regulations.

4. *Quotas.* All persons required to obtain quotas for acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl or thiofentanyl, shall submit applications pursuant to §§ 1303.12 and 1302.22 of Title 21 of the Code of Federal Regulations.

5. *Inventory.* Every registrant required to keep records and who possesses any quantity of acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl or thiofentanyl shall take an inventory pursuant to §§ 1304.11–1304.19 of Title 21 of the Code of Federal Regulations of all stocks of these substances on hand.

6. *Records.* All registrants required to keep records pursuant to §§ 1304.21–1304.27 of Title 21 of the Code of Federal Regulations shall maintain such records on acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl.

7. *Records.* All registrants required to submit records pursuant to §§ 1304.34–1304.37 of Title 21 of the Code of Federal Regulations shall do so regarding acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl.

8. *Order Forms.* All registrants involved in the distribution of acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl or thiofentanyl must comply with the order form requirements of §§ 1305.01–1305.16 of Title 21 of the Code of Federal Regulations.

9. *Importation and Exportation.* All importation and exportation of acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl shall be in compliance with Part 1312 of Title 21 of the Code of Federal Regulations.

10. *Criminal Liability.* The Administrator, Drug Enforcement Administration, hereby orders that any activity with respect to acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl, or thiofentanyl not authorized by, or in violation of, the Controlled Substances Act or the Controlled Substances Import and Export Act shall be unlawful. Pursuant to 5 U.S.C. 605(b), the Administrator certifies that the placement of acetyl-alpha-methylfentanyl, alpha-methylthiofentanyl, beta-hydroxyfentanyl, 3-methylthiofentanyl, para-fluorofentanyl and thiofentanyl into Schedule I of the Controlled Substances Act will have no impact upon small businesses or other entities whose interests must be considered under the Regulatory Flexibility Act (Pub. L. 96–354). This action involves the control of six substances with no legitimate medical use or manufacture in the United States. In accordance with the provisions of 21 U.S.C. 811(a), this scheduling action is a formal rulemaking "on the record after opportunity for a hearing." Such formal proceedings are conducted pursuant to the provisions of 5 U.S.C. 556 and 557 and, as such, have been exempted from the consultation requirements of Executive Order 12291 (46 FR 13193).

**List of Subjects in 21 CFR Part 1308**

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

Under the authority vested in the Attorney General by section 201(a) of the CSA (21 U.S.C. 811(a)) and delegated to the Administrator of DEA by Department of Justice Regulations (28 CFR 0.100), the Administrator hereby orders that 21 CFR 1308.11 be amended as follows:

PART 1308—[AMENDED]

1. The authority citation for 21 CFR Part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b).

2. In § 1308.11, the introductory text of paragraph (b) is revised to read as follows:

* * * * *

§ 1308.11 Schedule I.

* * * * *

(b) *Opiates.* Unless specifically excepted or unless listed in another schedule, any of the following opiates, including their isomers, esters, ethers, salts, and salts of isomers, esters and ethers, whenever the existence of such isomers, esters, ethers and salts is possible within the specific chemical designation (for purposes of paragraph (b)(34) only, the term isomer includes the optical and geometric isomers):

* * * * *

3. Section 1308.11 is further amended by redesignating paragraphs (b)(1) through (b)(6) as (b)(2) through (b)(7), paragraphs (b)(7) and (b)(8) as (b)(9) and (b)(10), paragraphs (b)(9) through (b)(30) as (b)(12) through (b)(33), paragraphs (b)(31) through (b)(36) as (b)(35) through (b)(40), paragraphs (b)(37) through (b)(46) as (b)(42) through (b)(51) and paragraphs (b)(47) and (b)(48) as (b)(53) and (b)(54) and by adding new paragraphs (b)(1), (b)(8), (b)(11), (b)(34), (b)(41) and (b)(52) as follows:

§ 1308.11 Schedule I

* * * * *

(b) * * *

(1) Acetyl-alpha-methylfentanyl (*N*-[1-(1-methyl-2-phenethyl)-4-piperidinyl]-*N*-phenylacetamide)—9815

* * * * *

(8) Alpha-methylthiofentanyl (*N*-[1-methyl-2-(2-thienyl)ethyl-4-piperidinyl]-*N*-phenylpropanamide)—9832

* * * * *

(11) Beta-hydroxyfentanyl (*N*-[1-(2-hydroxy-2-phenethyl)-4-piperidinyl]-*N*-phenylpropanamide)—9830

* * * * *

(34) 3-methylthiofentanyl (*N*-[(3-methyl-1-(2-thienyl)ethyl-4-piperidinyl]-*N*-phenylpropanamide)—9833

(41) Para-fluorofentanyl (*N*-(4-fluorophenyl)-*N*-[1-(2-phenethyl)-4-piperidinyl] propanamide—9812

* * * * *

(52) Thiofentanyl (*N*-phenyl-*N*-[1-(2-thienyl)ethyl-4-piperidinyl]-propanamide—9835

* * * * *

§ 1308.11 [Amended]

4. Section 1308.11 is further amended by removing paragraphs (g)(1), (g)(2), (g)(4), (g)(6), (g)(8) and (g)(9) and redesignating existing paragraph (g)(3) as (g)(1), existing paragraph (g)(5) as (g)(2), and existing paragraph (g)(7) as (g)(3).

Dated: May 27, 1987.

John C. Lawn,

*Administrator, Drug Enforcement Administration.*

BILLING CODE 4410-09-M

## DEPARTMENT OF LABOR

### Occupational Safety and Health Administration

### 29 CFR Part 1956

### New York State Plan for State and Local Government Employees

**AGENCY:** Department of Labor, Occupational Safety and Health Administration (OSHA).

**ACTION:** Approval of supplements to the New York State public employee only State plan: Change in developmental schedule; change in staffing plan; completion of a developmental step.

**SUMMARY:** This notice approves the supplement revising the approved New York development schedule in 29 CFR 1956.51 (the supplement amends the dates in the developmental schedule for steps (b), (g) and (h) and changes step (1) to reflect New York's intention to implement a public sector consultation program through written procedures rather than promulgation of regulations); approves the supplement for a State initiated change reassigning two positions from Industrial Hygiene Consultation to Industrial Hygiene Enforcement; and, approves completion of a developmental step (adoption of all OSHA standards promulgated as of July 1, 1983 (within three months after plan approval)).

**EFFECTIVE DATE:** May 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** James Foster, Director, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, 200 Constitution Avenue NW., Room N3647, Washington, DC 20210, Telephone (202) 523-8148.

**SUPPLEMENTARY INFORMATION:**

*A. Background*

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Occupational Safety and Health Administration will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and Part 1956.

On June 1, 1984, notice was published in the Federal Register (49 FR 22994), of the initial approval of the New York plan applicable only to public employees and adoption of Subpart F of Part 1956 containing the approval decision and description of the plan, including the developmental schedule in § 1956.51.

*B. Description of Supplements*

1. Developmental Schedule

The State submitted a revised developmental schedule on April 1, 1986 which amends the dates of completion for steps (b) Inspections, Citations; (g) Non-discrimination Procedures; and, (h) Review Procedures; and changes step (1) to reflect New York's intention to implement its public sector consultation program through written procedures rather than promulgation of regulations. (The New York State Labor Department's Division of Safety and Health since 1975 also has had an on-site consultation program in the private sector, administered separately from its public employee State plan under section 7(c)(1) of the Act). Completion of developmental steps (b), (g) and (h), as amended, and implementation and completion of step (1), as amended, will be accomplished within the three year period as provided by OSHA Regulation at 29 CFR 1956.2(b). The State's revision of the dates of completion for the three developmental steps does not diminish its responsibility to complete all developmental steps within the three year period as provided in OSHA Regulation at 29 CFR 1956.2(b). Further, New York's intention to implement an on-site consultation program through written procedures rather than promulgation of regulations provides for the establishment, implementation and administration of an effective voluntary compliance program and does not diminish the State's ability to provide on-site consultation services to public employers as a component of its approved State plan.

2. Change in Staffing Plan

On September 3, 1986, the State submitted a supplement providing for the reassignment of two positions from Industrial Hygiene Consultation to Industrial Hygiene Enforcement. One (1) Industrial Hygiene Consultation position

was changed to an Industrial Hygiene Enforcement position in the Albany District and the other one (1) to an enforcement position in the Buffalo District, both changes to meet the enforcement workload. Neither of these changes diminishes the consultation program's effectiveness in Albany nor the Buffalo Districts. A total of ten (10) Industrial Hygienists is now operating on a full-time basis in the consultation program, and ten (10) in the enforcement program.

3. Completion of a Development Step

By letter dated November 14, 1984, the State submitted a supplement in fulfillment of developmental step § 1956.51(a), providing revisions and additions to its existing public employee occupational safety and health standards to bring them into conformance with Federal OSHA standards as of July 1, 1983, and containing documentation that New York has promulgated safety and health standards identical to all Federal OSHA standards as of July 1, 1983. The State standards were approved in the Federal Register on August 26, 1986 (51 FR 30449).

*C. Public Participation*

Under 29 CFR 1953.2(c) the Assistant Secretary may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable law. The Assistant Secretary finds that the New York supplements are consistent with commitments in the approved State plan, which was previously made available for public comment. Good cause is, therefore, found for approval of these supplements, and further public participation would be unnecessary.

*D. Location of Plan Supplement for Inspection and Copying*

A copy of the plan and its supplements may be inspected and copied during normal business hours at the following locations:

Directorate of Federal-State Operations, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue NW., Room N-3476, Washington, DC 20210

Office of the Regional Administrator, Occupational Safety and Health Administration, U.S. Department of Labor, 1515 Broadway (1 Astor Plaza), Room 3445, New York, New York 10036

State of New York Department of Labor, State Office Building Campus, Building 12, Room 579, Albany, New York 12226

Division of Occupational Safety and Health, State of New York Department of Labor, 1 Main Street, Room 811, Brooklyn, New York 11201

**List of Subjects in 29 CFR Part 1956**

Intergovernmental relations, Law enforcement, Occupational safety and health.

*E. Decision*

After careful consideration and review by the OSHA Regional and National Offices, the New York plan supplements described above are hereby approved under 29 CFR Part 1953. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally.

(Secs. 8, 18, Pub. L. 91-596, 84 Stat. 1608, 29 U.S.C. 657, 667; Secretary of Labor's Order No. 12-71 (36 FR 8754), 8-76 (41 FR 25059), or 9-83 (48 FR 35736), as applicable)

Signed at Washington, DC this 26th day of May, 1987.

**John A. Pendergrass,**

*Assistant Secretary of Labor.*

**PART 1956—[AMENDED]**

Accordingly, Subpart F of 29 CFR Part 1956 is hereby amended as follows:

1. The authority citation for 29 CFR Part 1956 continues to read as follows:

Authority: Secs. 8, 18, Pub. L. 91-596, 84 Stat. 1608, 29 U.S.C. 657, 667; Secretary of Labor's Order No. 12-71 (36 FR 8754), 8-76 (41 FR 25059), or 9-83 (48 FR 35736), as applicable.

2. 29 CFR 1956.51 (b), (g), (h) and (l) are revised to read as follows:

**§ 1956.51 Developmental schedule.**

* * * * *

(b) Promulgate regulations for inspections, citations and abatement, equivalent to 29 CFR Part 1903 (within three years after plan approval).

* * * * *

(g) Develop employee nondiscrimination procedures (within three years after plan approval).

* * * * *

(h) Promulgate procedures for review of contested cases (within three years after plan approval).

* * * * *

(l) Develop on-site consultation procedures for state and local government employers (within three years after plan approval).

* * * * *

**§ 1956.52 [Amended]**

3. Section 1956.52 is amended by adding new paragraph (b) as follows:

* * * * *

(b) In accordance with 29 CFR 1956.51(a) the State of New York has promulgated standards identical to all Federal OSHA standards promulgated as of July 1, 1983. This supplement was approved by the Assistant Secretary on August 26, 1986. (51 FR 30449).

4. A new § 1956.55, *Changes to approved plans*, has been added to read as follows:

**§ 1956.55 Changes to approved plans.**

In accordance with Part 1953, the following New York plan changes were approved by the Assistant Secretary:

(a) The State submitted a staffing pattern change involving the reassignment of two positions from Industrial Hygiene Consultation to Industrial Hygiene Enforcement. The Assistant Secretary approved the supplement on May 26, 1987.

**DEPARTMENT OF DEFENSE**

**Department of the Navy**

**32 CFR Part 763**

**Rules Governing Public Access; Kahoolawe Island and Kaula, HI**

**AGENCY:** Department of the Navy, Department of Defense.

**ACTION:** Final rule.

**SUMMARY:** The Department of the Navy is amending the Rules Governing Public Access, codified in 32 CFR Part 763, to reflect that Kahoolawe Island and Kaula are now under the cognizance of Commander Naval Base, Pearl Harbor, Hawaii, vice Commander Third Fleet.

**EFFECTIVE DATE:** May 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** Staff Judge Advocate, Commander Naval Base, Pearl Harbor, HI 96860-5020, (808) 471-0284.

**SUPPLEMENTARY INFORMATION:** This amendment is made solely to identify the commander having cognizance of Kahoolawe Island and Kaula. It does not originate any requirement of general applicability and future effect for implementing, interpreting, or prescribing law or policy, or practice and procedure requirements constituting authority for prospective actions having substantial and direct impact on the public, or a significant portion of the public. Publishing this amendment for public comment is unnecessary since it would serve no purpose, and significant and legitimate interests of the Department of the Navy and the public

(cost savings) will be served by omitting such publication for public comment.

**PART 763—[AMENDED]**

1. The authority citation for 32 CFR Part 763 continues to read as follows:

**Authority:** 50 U.S.C. 797; DoD Dir. 5200.8 of Aug. 20, 1954; 5 U.S.C. 301; 10 U.S.C. 6011; 32 CFR 700.702; 32 CFR 700.714; E.O. No. 10436, 3 CFR 1949–1953 Comp. p. 930, (1958).

**§§ 763.4 and 763.5 [Amended]**

2. For the reasons set out in the preamble, 32 CFR 763 is amended by removing the words "Commander Third Fleet" and inserting in their place the words "Commander Naval Base" in the following places:

a. 32 CFR 763.4(a)
b. 32 CFR 763.4(b)
c. 32 CFR 763.5(a) introductory text
d. 32 CFR 763.5(a)(1)
e. 32 CFR 763.5(a)(2), lines 1–2
f. 32 CFR 763.5(a)(2), lines 4–5
g. 32 CFR 763.5(b)
h. 32 CFR 763.5(c)

Dated: May 20, 1987.

BILLING CODE 3810-AE-M

---

**Department of the Air Force**

**32 CFR Part 856**

**Aircraft Arresting Systems**

**AGENCY:** Department of the Air Force, Department of Defense.

**ACTION:** Final rule.

**SUMMARY:** The Department of the Air Force has revised Part 856 of Chapter VII, Title 32, of the Code of Federal Regulations, which establishes policy on managing aircraft arresting systems. This revision provides additional information and makes minor changes to update and to clarify the part.

**EFFECTIVE DATE:** June 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** Lt Col Purcell, HQ USAF/LEEV, Washington, DC 20332–5000, telephone (202) 767–6240.

**SUPPLEMENTARY INFORMATION:** The Department of the Air Force published a notice of proposed rulemaking on aircraft arresting systems in the Federal Register on January 9, 1987 (52 FR 803). No comments were received.

The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

**List of Subjects in 32 CFR Part 856**

Aircraft, airports and aviation safety.

Therefore, 32 CFR Part 856 is revised to read as follows:

**PART 856—AIRCRAFT ARRESTING SYSTEMS**

Sec.
856.0 Purpose.
856.1 Concept on the use of aircraft arresting systems.
856.2 Definitions.
856.3 What systems are authorized.
856.4 Authorized use of aircraft arresting systems.
856.5 Pilot responsibilities.
856.6 Use of systems by non-United States government aircraft.
856.7 Installing a system at a joint-use airport.
856.8 Agreements required for operation of the systems.
856.9 Format for letter of agreement with FAA.

**Authority:** Sec. 8012, 70A Stat. 488; 10 U.S.C. 8012.

**§ 856.0 Purpose.**

This part establishes policy on managing aircraft arresting systems. It applies to all locations where arrestment capable aircraft use the runway complex, either routinely or in an emergency situation. It applies to U.S. Air Force Reserve and Air National Guard units.

**§ 856.1 Concept on the use of aircraft arresting systems.**

The Air Force has revised its policy on the use of arresting systems to allow for both operational and emergency arrestments. At some bases, certain aircraft (for example, the F–4) routinely make operational arrestments under certain adverse weather and runway conditions. This procedure reduces accidents and incidents resulting from the loss of directional control or braking action. However, aircraft that do not have tailhooks (for example, the T–38) have structural limitations allowing an arrestment only in an emergency stopping situation. Related policy management and operation of these systems is in the following publications.

(a) AFR 60–11, Aircraft Movement on the Ground.

(b) AFM 86–2, Standard Facility Requirements.

(c) AFM 86–14, Visual Air Navigation Facilities.

(d) AFR 88–16, Standards for Marking Airfields.

**§ 856.2 Definitions.**

(a) *Aircraft arresting system (AAS).* A series of components used to engage an aircraft and absorb the forward momentum of a routine or emergency landing or aborted takeoff. (Each system consists, generally, of energy absorbers and one or more securing or snaring receivers such as hook-cables or pendant-cables attached to a net.)

(1) *Aircraft arresting barrier (BARRIER).* A device not dependent on an aircraft hook, to engage and absorb the forward momentum of an emergency landing or an aborted takeoff.

(2) *Aircraft arresting cable (H/C).* A device used to engage hook-equipped aircraft to absorb the kinetic energy of a landing or aborted takeoff aircraft.

(b) *Aircraft arresting complex.* An airfield layout comprised of one or more aircraft arresting systems of the same or different types. (See § 856.3 for classification of runways).

(c) *Arrestment capable aircraft.* Aircraft which has recognized arrestment procedures in its appropriate Flight Manual.

(d) *Cycle time.* The time measured between the engagement of an aircraft with an arresting system and completely repositioning the arresting system for another engagement. This includes normal inspection and system cooling time according to the appropriate 35E8 series Technical Orders (TO).

(e) *Emergency arresting system (EAS).* Used primarily to prevent damage to aircraft and possible loss of life during an aborted takeoff or a landing emergency.

(f) *Energy absorber.* The mechanism through which the kinetic energy of the aircraft is dissipated. Examples of energy absorbers are weights and rotary hydraulic or friction brakes.

(g) *Hook-cable.* A cable or wire rope which is engaged by the arresting hook of an aircraft during an arrestment.

(h) *Location identification.* An arresting system is identified by stating whether it is located either on the approach end or the departure end of the runway. (That is, a BAK–12 on the approach end of runway 36 is on the south end of the runway.) Always use the term "approach end" or "departure end" in referring to an arresting system which is installed near the end of the runway.

(i) *Mobile aircraft arresting system (MAAS).* A rapidly installed and relocatable arresting system developed for use at air bases in high threat areas where runways may be damaged by enemy attack. The system uses BAK 12 energy absorbers mounted on trailers which can be rapidly anchored in place.

(j) *Operational arresting system (OAS).* Generally a rapid cycle system used to enhance the tactical mission or to avert a possible emergency which may be caused by meteorological conditions, a short runway, or known or suspected aircraft malfunctions. The OAS is used on a daily basis as opposed to the emergency-only use of an EAS.

(k) *Pendant-cable.* A cable or wire rope suspended from the net of an aircraft arresting barrier which engages a structural portion of the aircraft during an arrestment.

(l) *Reset time.* The time required to make the arresting system ready for another engagement after aircraft release.

**§ 856.3 What systems are authorized.**

ANG units are authorized systems in accordance with AFM 88–2. An EAS or an OAS should be installed on each runway used by arrestment compatible aircraft. An additional system (of either type) also should be installed if the installation's primary mission involves the operation of arrestment capable aircraft, or if the runway's closure (because of an inoperative system) would seriously degrade mission capability. When developing an aircraft arresting complex, maximum mission capability should be provided within the limits imposed by cost effectiveness. In evaluating the requirement for installing an arresting system, there are four classes of runways which must be considered:

(a) *Class A runway.* This runway is intended primarily for operating tactical or training aircraft. For example, a fully developed Class A runway could have the following arresting systems:

(1) An arresting barrier at each end, generally located in the overrun, but placed to provide the runout prescribed in AFM 88–2.

(2) A bi-directional emergency arresting system on each end of the runway, placed 950 to 1,500 feet up the runway from the threshold. (This system may also have an OAS capability.)

(3) A bi-directional operational arrestment system placed 1,500 to 2,500 feet up the runway from the threshold. It must be placed at least 1,200 feet from the EAS, and far enough from it to avoid any possible conflict with the runout from the EAS.

(4) An OAS placed at the midpoint of the runway. The installation of this additional system must be specifically approved by HQ USAF.

(b) *Class B runway.* A runway that is a prime alternate for a Class A runway. It should have an EAS or OAS 950 to 1,500 feet from each end of the runway, as well as a backup EAS in the overrun.

(c) *Class C runway.* A runway that requires only a single EAS capability on each end of the runway for either hook or nonhook equipped aircraft.

(d) *Class D runway.* A runway that does not have an arresting system requirement.

**§ 856.4 Authorized use of aircraft arresting systems.**

A deviation from the following policy is authorized only when directed by the installation commander (or designated representative) because of meteorological conditions, safety of flight, or peculiar operational conditions:

(a) Under normal operations and conditions, unidirectional barrier nets or arresting cables are disconnected and, preferably, removed on the approach end of the runway. Aircraft will takeoff and land toward the most compatible arresting system available; however, tailhook-equipped aircraft do not takeoff over a raised remote-controlled net barrier if a more compatible arresting system is available. If there is no remote-control function, or cold weather makes the remote function unreliable, the barrier net is raised manually and left in a cocked position on the departure end of the runway. Bi-directional arresting gear is kept in the ready position on the approach end of the runway, unless directed otherwise and noted in Flight Information Publications (FLIP).

(b) If arrestment capable aircraft are landing with known or suspected radio failure, the departure end barrier net is raised and the hook cable positioned for aircraft engagement. Also, the arresting gear at the approach end is positioned for engagement, unless the aircraft is vulnerable to an inadvertent engagement because of an unguarded tailhook.

(c) During ice and snow removal, barrier net and hook cables may be removed from the runway, but the runway should be returned to operational status as quickly as possible. Runways and overruns should be cleared to allow for an obstacle-free runout of the arresting system, plus the length of the arrested aircraft.

**§ 856.5 Pilot responsibilities.**

Each pilot must understand the capabilities and limitations of each arresting system, and how it may affect his or her aircraft operations. Information on the compatibility of these systems should be included in the Aircraft Flight Manual. In addition, the pilot must:

(a) Determine the status of the arresting system at each base of takeoff and intended landing, as well as any alternate or planned emergency bases, before beginning a flight.

(b) For remote control systems, use the emergency radio phraseology, "barrier, barrier, barrier" or "cable, cable, cable," when emergency conditions require the tower to raise the barrier net or ready a hook-cable for possible engagement.

(c) Know the effect of each aircraft configuration on the probability of a successful engagement. The pilot should also be aware of possible damage caused by an inadvertent engagement, landing on, rolling over, or impacting hook-cables or other associated arresting equipment.

**§ 856.6 Use of systems by non-United States government aircraft.**

In an emergency, the pilot of a non-U.S. government aircraft, on request, may use the aircraft arresting system at an Air Force base or a joint-use airport in the U.S. or overseas.

**§ 856.7 Installing a system at a joint-use airport.**

At a civil airport used jointly by the Air Force and a civil agency, the procedures for installing an arresting system are as follows:

(a) At a civil airport used jointly by the Air National Guard and a civil agency, the procedures for installing an arresting system are in ANGR 88–1, Chapter 2.

(b) The responsible Air Force commander notifies the airport manager that the Air Force needs to install an arresting system.

(c) If the airport manager agrees that the system should be installed, the Air Force commander submits the required plans or sketches to the Federal Aviation Administration (FAA) regional office through the Air Force representative of the FAA region.

(d) If the airport manager or the FAA disagrees with these specifications, the Air Force commander informs the MAJCOM, which can request that HQ USAF/LEEV resolve the disagreement.

(e) If an arresting system is required, but the lease does not authorize, or prohibits the government from placing an additional structure on the leased premises, the Air Force commander submits a request through the MAJCOM to HQ USAF/LEEV for action as prescribed by AFR 87–1, and attaches a brief statement explaining or quoting the lease restriction.

**§ 856.8 Agreements required for operation of the systems.**

(a) *Military rights agreement at an overseas base.* These systems are installed under the military rights agreement with the host government. If a separate agreement is specifically required to install the system, the base commander takes action to obtain it from the host government and coordinates these negotiations with the local U.S. diplomatic representative. If the commander cannot reach an agreement, the MAJCOM is notified. If still unresolved after MAJCOM's efforts, then HQ USAF/LEEV is notified.

(b) *Liability agreements at a joint-use civil airport.* If the Air Force installs an arresting system for the primary use of U.S. military aircraft at a joint-use civil airport, the FAA acts for, and on behalf of, the Air Force in operating this equipment. However:

(1) Any third-party claim presented for damage, injury, or death, resulting from the FAA operation of the system for military aircraft or from the Air Force or Air National Guard maintenance of the system, is the responsibility of the Air Force and is processed under Part 842 of this chapter (as prescribed for any claim against the Air Force).

(2) A separate agreement between the Air Force and the FAA is not required concerning liability for damage arising from the intentional operation of the system by FAA personnel for civil aircraft because such claims are the responsibility of FAA.

(c) *Operational agreement with FAA for a joint-use civil airport.* The MAJCOM has authority to negotiate the written agreement for this use, but may redelegate this authority to the base commander. The agreement must describe FAA functions and responsibilities covering the remote control operation of arresting systems by FAA air traffic controllers (§ 856.9).

**§ 856.9 Format for letter of agreement with FAA.**

The following operational agreement is entered into between the (FAA office and address) and (designated command) for the operation and use of aircraft arresting equipment installed on (designated runway, airport name and address).

(a) *General provisions.* (1) This agreement governs the use of the arresting barrier (BARRIER), and hook-cable arresting systems for military aircraft and in an emergency for civil aircraft at pilot request.

(2) This agreement becomes effective when the tower chief receives notice in writing from the base commander that:

(i) The arresting system has been accepted from the contractor and is commissioned and fully operational, or

(ii) The arresting system is available on a limited basis for emergency use. If the arresting system has not been accepted from the contractor, this notification must be accompanied by a written statement from the contractor authorizing the emergency use of the system, and waiving any claim against the FAA for damage to the system as the result of such use, or

(iii) A NOTAM has been issued specifying condition in paragraph (a)(2)(i) or (ii) of this section. Before receipt of the letter from the base commander, the tower arresting system controls will be de-energized by the military and placarded "INOPERATIVE" by the Chief Controller, and will not be activated by tower personnel under any circumstance.

(3) Automatic aircraft arresting systems can be installed on the runway or in the overrun. The barrier or hook-cable will be raised or lowered by control tower personnel by a remote-control panel in the control tower.

(4) When the arresting systems are in commission or emergency use status as described above, controllers will operate the tower arresting system controls at the request of a pilot of any military aircraft (regardless of the service concerned, type of aircraft, or whether the operation is routine or emergency) and at the request of a civil pilot in an emergency. The tower will also comply with requests for arresting system operations by a mobile control unit, the base operations officer, or a designated representative.

(5) NOTAMS covering operational or outage status of the barrier or hook cable will be originated by the military. During a NOTAMed outage for repair or maintenance, the tower personnel will operate the controls provided that the outage NOTAM contains the statement "available for emergency use" and the tower is provided a copy. Otherwise, tower controls will be de-energized by the military and posted "INOPERATIVE" by the Chief, Controller, and will not be activated by tower personnel under any circumstances.

(6) During the NOTAMed outages owing to failure of tower controls or control lines to the facility, or on notification by tower personnel of malfunction of the arresting system mechanism or remote control system (see paragraph (b)(8) of this section for notice), the military crew at the system site will have full and final responsibility for operating the arresting

device. The arresting system crew will maintain a listening watch on air and ground frequencies and have transmitting and receiving capability with the tower on the ground control frequency keeping personnel informed of the position of the system.

(b) *Operations.* (1) Normally all military aircraft takeoffs and landings are made toward an operational arresting system in the "ready" configuration. It is the pilot's responsibility to request the control tower operator to raise or lower the barrier or hook cable.

(Note.—For normal operations, request to raise the barrier or cable shall be interpreted to mean the runway approach end barrier or cable.) Example: "Duluth Tower, Joy 32 on base gear down and locked raise cable." When the pilot advises the control tower that he or she is ready for takeoff, a request for the barrier or cable to be raised may be made. The departure end cable will also be raised as for normal operations.

(2) When barrier/cable is requested, tower personnel advise the pilot of the indicated barrier/cable position as part of takeoff or landing information. Example: "Joy 32 cleared for takeoff, barrier indicates up."

(3) The barrier/cable operating status may be requested by the pilot at any time.

(4) The barrier/cable controls are in the down position except when the pilots or other authorized personnel request that the barrier/cable be raised.

(5) Tower personnel raise the departure end barrier and both approach and departure end cables for known or suspected radio failure landing by any arrestment capable military aircraft. If there is doubt regarding the ability of an aircraft to engage a system, the system should be activated.

(6) The standard emergency phraseology for the barrier to be raised to the up position is "barrier, barrier, barrier" and for the cable to be raised is "cable, cable, cable."

(7) Tower personnel initiate normal crash procedures when an aircraft engages the barrier/cable if these procedures have not previously been initiated.

(8) When there is a malfunction of the barrier or hook-cable mechanism or remote control system, the tower personnel notify Base Operations immediately.

BILLING CODE 3910-01-M

## NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

### 36 CFR Part 1254

### Use of Privately Owned Microfilm Equipment To Copy Records in the National Archives and Presidential Libraries

**AGENCY:** National Archives and Records Administration.

**ACTION:** Final rule.

**SUMMARY:** The National Archives and Records Administration (NARA) is issuing regulations to govern the use of privately-owned or leased microfilm equipment to copy records in the National Archives and in the Presidential Libraries. The rule is intended to protect and preserve archival records. This rule provides specific criteria for approving requests to use microfilm equipment, and it establishes procedures for microfilming the records. The rule applies to individuals and organizations that wish to microfilm archival records. It also affects Federal agencies that wish to microfilm records after transfer to the National Archives.

**EFFECTIVE DATE:** May 29, 1987. NARA will begin accepting requests to microfilm records under this regulation immediately.

**FOR FURTHER INFORMATION CONTACT:** Adrienne C. Thomas or Nancy Allard at 202-523-3214 (FTS 523-3214).

**SUPPLEMENTARY INFORMATION:** The National Archives and Records Administration (NARA) issued a notice of proposed rulemaking on this subject on October 29, 1986 (51 FR 39547). NARA initiated this rulemaking out of concern for the preservation of its archival records and donated historical materials. As we pointed out in the preamble to the proposed rule, microfilming can be one of serveral methods of preserving records. Researcher use of microfilm or microfiche copies of records minimizes damage to the original records which occurs through repeated handling of the documents. The existence of a microfilm copy also provides insurance against the loss of valuable information should an original record be damaged or destroyed.

We also noted that one of the concerns prompting the proposed rule was the potential for damage to records from improper handling during microfilming by privately owned microfilm equipment. In fact, there have been several observed instances this year where a private microfilmer has damaged documents while filming. Some damage occurred even as the commercial microfilmers specifically demonstrated for the NARA staff their routine document handling techniques.

To ensure that the benefits of private microfilming outweigh the risk to the records, NARA proposed to establish conditions under which privately owned microfilm equipment could be used to film archival records and donated historical materials in the National Archives and Presidental Libraries for microfilm publications. Comments were received from six micropublishers; nine editors of microfilm publication projects; a micropublishing industry association; an organization representing historical associations; two members of Congress, and three components of Federal agencies. All comments have been considered carefully in the promulgation of this final rule.

#### Applicability to Federal Agencies

Two components of the Department of Justice (DOJ) and the Bureau of Land Management (BLM) commented on the applicability of the rule to Federal agencies. DOJ noted that the conditions imposed by the proposed rule would seriously impede DOJ's extensive program of microfilming records for litigation support. BLM suggested allowing the originating agency to borrow the records for microfilming in a Federal agency microphotographic facility.

NARA's mission includes making the records in the Naitonal Archives available to Fedeal agencies who need them to carry out official agency business. We agree that some accommodation must be made for Federal agency needs that will also ensure that the records are not mishandled during filming. Accordingly, we have modified § 1254.90 to handle separately Federal agency microfilming requests. Many of the equipment and microfilming standards and training requirements placed on private

microfilmers will apply also to agencies and/or their contractor personnel; however, this regulations does not set the requirements for Federal agencies. NARA will notify Federal agencies of the requirements for specific microfilming projects on a case-by-case basis.

**Submission of Requests to Microfilm Records by April 1**

Four micropublishers objected to the requirement in § 1254.92(b) that requests must be submitted by the April 1 preceding the start of a fiscal year. Two of the comments pointed out that not all projects will require lengthy NARA evaluation or preparation.

NARA proposed an April 1 submission date for two reasons. First, when a micropublisher wishes to film a body of archival records, NARA must verify records arrangement, screen the records for possible restrictions, remove classification markings, and perform any document conservation action necessary before filming. These activities have required diversion of NARA resources from other scheduled records projects that would benefit the public. We have been especially concerned with the preservation resources being used to prepare records scheduled for microfilming by the micropublishers, regardless of the preservation priority placed on those records in NARA's long-range preservation plan.

Under this rule, we plan to hire temporary employees to perform as much of the preparation work as possible, including simple document conservation. Where more complicated conservation work must be done and the work is not scheduled to be done by NARA for a period of time, we will attempt to contract for the conservation services. The April 1 deadline was established to allow us six-months lead-time to accomplish the hiring and the preparatory work.

Second, the National Archives Building, where most private microfilming is done, has space available for a maximum of 10 microfilm cameras at any one time. With increased microfilming activity by micropublishers, NARA has faced problems scheduling the use of this space. We believe that the space can be more effectively scheduled with a longer lead time between the date when a request is made and the date when filming is to start.

We agree with the commenters that our proposed April 1 deadline was set too far in advance for projects scheduled to begin later in a fiscal year and for small projects which require little preparation. Therefore, we have modified this paragraph to provide that requests should be submitted six months in advance of the proposed starting date of the microfilming project. We have also added the provision that requests submitted with less advance notice will be considered and may be approved if space is available in the area set aside for private microfilming and if the records require minimal preparation for filming. This latter provision should help microfilmers especially at the Presidential Libraries, where requests can normally be accepted with less advance notice. To prevent any single micropublisher from reserving all the camera spaces in a NARA facility for a long period of time, we have also added two restrictions on submission of requests: Requests are limited to a single microfilming project and NARA will not accept additional requests from the same individual or organization to microfilm records at the same NARA facility while NARA is evaluating a pending request to microfilm records at that facility. NARA will establish the number of camera spaces available to a single project based upon the total number of projects approved for filming at that time.

**Copyright Disclaimers and Filming of Uncopyrighted Targets**

Five commenters objected to the provision in § 1254.92(c)(6) that a credit to the National Archives or Presidential Library be placed at the beginning of each roll or fiche and to the requirement in § 1254.92(c)(7) that uncopyrighted targets be used in filming. The commenters claimed unspecified increased costs and inefficiencies under these provisions. All but one commenter stated that the credit with its copyright disclaimer was not needed since the absence of copyright over Federal documents is well established. One micropublisher, on the other hand, claimed the right to copyright the editorial arrangement of the documents.

We have modified these paragraphs in response to the comments. Proposed § 1254.92(c)(6) has been renumbered § 1254.92(c)(5) and modified to require only that the credit must appear at the beginning of a microfilm publication and in any publicity material or descriptions of the publication. Proposed § 1254.92(c)(7) is now § 1254.92(c)(6) and has been modified to allow the use of copyrighted targets and other editorial materials when the National Archives and Records Administration is given a royalty-free worldwide license to sell the publication after seven years, or earlier if there is no commercial distributor.

**Evaluating Requests**

Section 1254.94(a) states that NARA will evaluate requests on the basis of the extent to which projects would further NARA efforts to preserve and make available historically valuable records. Three commenters found this criteria to be too vague. One of the commenters stated that any project that does not pose a threat to preservation of the records should be allowed.

We have decided to retain this provision. Where we are faced with the probability that we will receive more technically acceptable requests then we have staff and space to accommodate, some evaluative criteria are needed to determine which proposals should be approved. Under these circumstances, a proposal to film a heavily used group of records should be given priority over a proposal to film rarely requested records because the former proposal will better enhance the preservation of the records by enabling NARA to replace heavy reference use of the original records with use of the film in NARA research rooms and sale of the microfilm publication by the micropublisher. If space and staff constraints are not a problem, we do not expect to use this criteria in reaching our decision on a proposal.

**Approving Only Requests to Microfilm a Complete Body of Records**

This policy, stated in § 1254.94(b), generated strong opposition from three micropublishers and three editors of microfilm projects which use selective filming. NARA proposed this policy to enhance the preservation of the records being filmed. As we noted in this preamble and in the preamble to the notice of proposed rulemaking, the use of microfilm copies of records prevents damage to the original records resulting from repeated handling, thereby helping to preserve the original records. We are not able to retire records from reference use, however, if a complete copy of the records is not available.

The potential risk to the records during the microfilming process is justifiable only if future wear on the records can be avoided. Therefore, the final rule does not modify the requirement that only complete bodies of records will be approved for microfilming by private parties.

This policy does not prevent micropublishers from continuing to prepare selective microfilm publications. The micropublisher may apply under this regulation to film a complete body of records, provide NARA a copy of the film, and then select images from the

film to be used in the selective publication; the added filming costs could be offset by the ability of the micropublisher to send the film to an editor for selection rather than paying travel expenses to bring the editor to a NARA facility to select the records. If the micropublisher chooses to film a complete body of records and then create a selective micropublication, NARA will require that any descriptive material on the publication clearly states that only a selection of records is reproduced in the publication. Alternatively, the micropublisher may choose to photocopy the selected records and film the photocopies, a practice followed at the Library of Congress where private microfilming is prohibited. The NARA lab can also film the documents on a reimbursable basis, following the fee schedule in 36 CFR Part 1258. Under these latter alternatives, the micropublisher would follow the general NARA procedures for access to the records found elsewhere in Part 1254 instead of this regulation.

**Providing to NARA a Duplicate Negative Containing No Splices**

Two commenters objected to the requirement in § 1254.94(d) to provide NARA a splice-free silver halide duplicate negative, citing additional production costs. We believe that the cost burden was caused by the requirement in the proposed rule that NARA's copy contain no editorial or other copyrighted material produced by the micropublisher. In order to provide NARA's copy, the micropublisher would have to prepare a special camera negative. As we have modified this final rule to allow the requester to film copyrightable material if NARA is granted a royalty-free license, the micropublisher will be able to make NARA's duplicate negative from the original camera negative that will be used for the microfilm publication. We have retained the requirement that NARA's copy be splice-free since that copy will become our microfilm master from which our duplicate preservation and research copies will be made.

**Sale of Microfilm by NARA**

The proposal that NARA could sell copies of the microfilm after two years raised strong disagreement. The commenters expressed concern that NARA would be unfairly competing with the micropublishers because NARA would be selling its copies at a much lower price before the micropublisher could recover development and marketing costs. All but two micropublishers stated that NARA should not sell privately produced microfilm for at least five years. One micropublisher recommended at least a ten-year waiting period while the other objected to any NARA sales, except if the micropublisher goes out of business. Two other commenters also felt the two year period was too short; one of these recommended a seven year delay.

When we proposed the two year period, we were unfamiliar with the length of time needed by private micropublishers to recover their costs. Our concern was that the privately produced microfilm might become unavailable to the public after the micropublisher's initial marketing effort. There is no intent to compete unfairly with the private sector on the sale of their microfilm publications. We have, therefore, modified § 1254.94(d) to provide that NARA may sell copies of privately produced microfilm publications seven years after filming at NARA is completed, or earlier if there is no commercial distribution.

**Disapproval of Requests to Microfilm Records Which Have Previously Been Microfilmed**

Section 1254.94(f)(1) states that NARA normally will not approve requests to microfilm records which have previously been microfilmed and made available to the public. Two commenters suggested that this provision not apply when the existing microfilm is substandard. The National Archives has had a high quality microfilm publication program for over 40 years. Some NARA microfilm does not meet industry standards because the quality of the original documents precludes a perfect microform image or because the original microfilm made outside NARA was not of archival quality. As industry standards evolve with new technological advances, it is possible that microfilm which meets the standards in existence today will be judged "substandard" in the future. We do not think it appropriate to exempt all records for which film is below the prevailing industry standards, as one of the commenters recommended. The use of the words "normally not approve" indicates that there may be exceptions to this policy. NARA may grant exceptions in cases where NARA agrees that refilming the records is likely to produce a better image. In such cases, NARA will continue to sell its own publication after the records are refilmed. Therefore, we have not modified this section.

**Disapproval of Requests for Records Which Have Been Approved for Filming by Another Party**

One micropublisher questioned what would happen if NARA received requests from two parties to film the same records during the same year. The commenter recommended that a "first-come, first-served" policy be followed in such cases. Since we are dropping the April 1 deadline for submission of requests, we have essentially adopted a "first-come, first-served" policy. It is unlikely that we would receive a second request to film a body of records while we are evaluating the first request. If we did, however, we reserve the right to approve the second request if that request is superior to the first request; e.g., the second requester has a better record of microfilming in accordance with NARA specifications.

**Disapproval of Requests for Records Which NARA Plans to Film or Which Relate Closely to Other Records Previously Filmed or Approved for Filming by NARA**

One commenter stated that these provisions were too vague and open-ended, and other commenters informally asked NARA to define the term "closely related records." As NARA uses this term in the regulation, closely related records are series which are frequently used together and which should have a common microfilming format or share a common index in order to make the records most usable for the researcher. An example of closely related records are Southern Claims Commission Records, where approved claims are filed in one series and disallowed claims are filed in another series. Both series must be used by genealogists searching for individual applications. Requests to microfilm records of individual diplomatic posts, on the other hand, would not be denied under this provision because each series is frequently used without reference to another series.

We have modified § 1254.94(f)(3) to allow exceptions to this provision at the discretion of NARA.

**Disapproval of Requests for Records With High Research Demand Which Would Have to be Closed for An Extended Period of Time for Filming**

We agree with the commenters who noted that records having a high research demand are the ones that should be filmed. Our concern is the need to close records to researchers while the records are being prepared for microfilming and during the filming process. Depending on the size of the

body of records and the proposed microfilming schedule of the requester, the records could be closed to research for several weeks or months during NARA's peak research periods. We have retained the criterion, but have added a sentence to alert requesters that NARA is willing to work with them to develop filming schedules that avoid the need to close records for a long period. NARA may suggest, for example, that filming be done during a slow research period or that the filming schedule be broken into small segments.

**Disapproval of Requests to Film Oversize Records, Bound Volumes, and Other Formats Requiring Special Equipment**

One commenter stated that these categories of records should not automatically be denied for filming. Determinations should be made on the basis of filming the records safely, given actual equipment available and handling required for a defined set of records. We agree and have adopted the comment in § 1254.94(g)(6). Requesters are cautioned that the space available for use by micropublishers in NARA facilities may be inadequate for equipment acceptable for filming oversize records.

**Disapproval of Requests to Microfilm in NARA Facilities Where No Space Is Available**

One commenter termed this provision needlessly restrictive while another indicted that it would affect the commenter's microfilming plans. Section 1254.94(i) was included in the proposed rule to address the space problems which NARA has in some of its field locations. Space for private microfilming is very limited or not available in some of the National Archives Field Branches. We are not willing to move the records to another NARA facility for private microfilming because of the physical security difficulties which a temporary move would cause. Consequently, we have made no change to this paragraph.

We have added a new paragraph § 1254.94(j), which states that Federal agency microfilming takes precedence over private microfilming when there is insufficient space to accommodate both at the same time. The Department of Justice, for example, often needs to microfilm records for court cases. If an agency has a need to microfilm records while all space is occupied by private microfilmers, a private microfilmer may be required to suspend microfilming temporarily. NARA's first statutory mission is to serve the needs of Federal agencies in carrying out the Government's business.

**Fees for Microfilm Preparation**

Several questions were raised concerning § 1254.96. One nonprofit organization asked whether they might use their own volunteers for some of the microfilm preparation work in lieu of being assessed a fee. While NARA has the authority to accept voluntary services and there may be instances where some of the preparation could be done by volunteers, we do not believe it is appropriate to address the issue in the regulation.

Two micropublishers requested that a schedule of fees be provided with the rule. No schedule was provided in the proposed rule since the fees for microfilm preparation will depend on the work which must be done to a specific body of records. We have not provided a formal fee schedule in this final rule for the same reason. We have modified § 1254.96(a) to specify that fees will be based on direct salary costs (including benefits) and supplies when NARA staff is used or on the cost to NARA when a contractor performs the work. Section 1254.96(b) has been modified to indicate that the fees will be itemized when provided to the requester.

The arrangement of records will be verified or corrected by an archives technician (hourly salary rate including 16% benefits ranges from $8.24 to $14.69 per hour). Screening records for possible restrictions on use requires an archivist (hourly salary rate including 16% benefits ranges from $15.10 to $23.53). Depending on the document fastener and the fragility of the document, removal of document fasteners may be performed by an archives technician (hourly salary rate including 16% benefits range from $9.16 to $11.94) or by a conservator aide or a professional conservator (hourly salary rate including 16% benefits ranges from $8.27 to $19.39). Similarly, document conservation actions may be performed by staff from the GS–5 to GS–12 level (hourly salary rate including 16% benefits ranges from $8.27 to $19.39), or by contract with a conservation center.

**Equipment Standards**

We have modified § 1254.98 to allow the use of specialized equipment with the approval of the Office of the National Archives.

**Inspection of Film at Scheduled Intervals**

One micropublisher objected to NARA inspection of the microfilm at scheduled intervals since the micropublisher does its own inspection and quality control. Three other micropublishers and the micropublishing industry association were not troubled by the concept of NARA inspection by recommended a less frequent inspection. We have retained the requirement for NARA inspection since NARA must ensure that its microfilming standards have been met. We have modified § 1254.100(k) to adopt the proposed industry inspection schedule. We have also specified that film must be delivered to NARA within five calendar days after processing to ensure that we can test the film for proper processing.

**Other**

Several commenters stated that the proposed rule would have a significant impact on their small businesses. We believe that the final rule has been modified to accommodate the concerns raised in their comments. Accordingly, as required by the Regulatory Flexibility Act, it is hereby certified that this rule will not have a significant impact on small business entities This rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981.

**List of Subjects in 36 CFR Part 1254**

Archives and Records.

For the reasons set forth in the preamble, Chapter XII of Title 36 of the Code of Federal Regulations is amended as follows:

## PART 1254—AVAILABILITY OF RECORDS AND DONATED HISTORICAL MATERIALS

1. The authority citation for Part 1254 continues to read as follows:

**Authority:** 44 U.S.C. 2101–2118.

2. Section 1254.70 is revised to read as follows:

**§ 1254.70 NARA copying services.**

(a) The copying of records will be done by personnel of the National Archives and Records Administration with equipment belonging to NARA. NARA reserves the right to make a duplicate, at NARA expense, of any material copied. Such duplicates may be used by NARA to make additional copies for others.

(b) In order to preserve the original records, records which are available on microfilm will not be copied by other means as long as a legible copy (electrostatic, photographic, or microfilm) can be made from the microfilm.

3. Subpart F is added to read as follows:

## Subpart F—Microfilming Archival Records

Sec.
1254.90 General.
1254.92 Requests to microfilm records.
1254.94 Criteria for granting the requests.
1254.96 Microfilm preparation.
1254.98 Equipment standards.
1254.100 Microfilming procedures.
1254.102 Rescinding permission.

## Subpart F—Microfilming Archival Records

### § 1254.90 General.

(a) This subpart establishes rules and procedures governing the use of privately owned microfilm equipment to film archival records and donated historical materials in the National Archives Building, the Pickett Street facility, the Washington National Records Center, the National Archives Field Branches, and the Presidential Libraries.

(b) Persons or organizations wishing to microfilm Federal agency records in the custody of a Federal Records Center should contact the director of the Center about procedures for obtaining permission to film those records.

(c) Federal agencies needing to microfilm archival records in support of the agency's mission must contact the Assistant Archivist for the National Archives, as soon as possible after the need is identified, for information concerning standards and procedures for microfilming archival records.

### § 1254.92 Requests to microfilm records.

(a) Requests to microfilm archival records or donated historical materials in the National Archives Building, the Washington National Records Center, the Pickett Street facility, or the National Archives Field Branches must be made in writing to the Assistant Archivist for the National Archives (NM), NARA, Washington DC 20408. Requests to microfilm records or donated historical materials in a Presidential Library must be made in writing to the Assistant Archivist for Presidential Libraries (NL), NARA, Washington DC 20408.

(b) Request to use privately owned microfilm equipment should be submitted six months in advance of the proposed starting date of the microfilming project. Requests submitted with less advance notice will be considered and may be approved if space is available for the cameras in the area set aside for private microfilming and if the records require minimal preparation for filming. Only one microfilming project may be included in a request. NARA will not accept additional requests from an individual or organization to microfilm records in a NARA facility while NARA is evaluating an earlier request from that individual or organization to microfilm records at that facility. NARA will establish the number of camera spaces available to a single project based upon the total number of projects approved for filming at that time.

(c) The request must include:

(1) A description of the records to be copied which includes the following elements:

(i) Agency of origin or, for donated historical materials, title of the collection,

(ii) Title of series or file segment;

(iii) Date span; and

(iv) Estimated volume in number of pages or cubic feet.

(2) The estimated amount of time (work-days) that the microfilm copying project will take; the date that the requester would like to begin the project; and the number of persons who would require training (see § 1254.100(b)).

(3) The number and a description of the equipment that will be used for copying including:

(i) The name of the manufacturer and model number; and

(ii) The type of light source to be employed (fluorescent, tungsten, or electronic flash) and if electronic flash (i.e., strobe) or fluorescent, whether the light source is filtered to omit ultraviolet radiation.

(4) A statement of the procedures which will be followed to ensure that all pages are copied, that the images on the microfilm are legible, and that the microfilm is properly processed. At a minimum, the procedures should meet the requirements specified in Part 1230 of this Chapter regarding the microfilming of permanent records.

(5) The requester must agree to credit the National Archives or the particular Presidential Library having custody of the original documents. The credit must appear at the beginning of a microfilm publication and in any publicity material or descriptions of the publication.

(i) If the original documents are Federal records, the requester must agree to include on the film this statement: "The documents reproduced in this publication are among the records of the (name or agency) in the custody of the National Archives of the United States. No copyright is claimed in these official U.S. Government records."

(ii) If the original documents are donated historical materials, the requester must agree to include on the film this statement: "The documents reproduced in this publication are donated historical materials from (name of donor) in the custody of the (name of Presidential Library or National Archives). The donor has dedicated his/her literary rights to the public."

(6) If the person or organization producing the film plans to copyright the microfilm publication, the National Archives and Records Administration must be given a royalty-free worldwide license to sell the publication seven years after filming at the NARA facility is completed, or earlier if there is no commercial distributor.

### § 1254.94 Criteria for granting the requests.

(a) NARA will evaluate the requests on the basis of the extent to which completion of a proposed project would further NARA's efforts to preserve and to make available to the public the historically valuable records of the Government.

(b) NARA will approve only requests to microfilm a complete body of records, such as an entire series or a major continous segment of a very large series which is reasonably divisible. Microfilming a complete body of records means that all documents within the file unit(s) to be microfilmed will be consecutively copied, from the first to the last page, not skipping any pages in between except for pages that are exact duplicates or blank pages that are not included in a pagination scheme.

(c) NARA will normally approve only requests which include assurances that the project will adhere to the specifications in Part 1230 of this Chapter which concern microfilm stock standards, index placement, and microfilm processing for permanent records.

(d) NARA will approve only requests which specify that NARA will receive a first generation silver halide duplicate negative containing no splices made from the original camera negative of the microform record created in accordance with Part 1230 of this Chapter.

(1) NARA may use this duplicate negative microform to make duplicate preservation and reference copies. The copies may be made available for NARA and public use in NARA facilities and programs.

(2) NARA may also sell copies of the microform seven years after filming at the NARA facility is completed, or earlier if there is no commerical distributor. NARA may choose to add its own editorial material to the microform copies which NARA distributes or sells.

(e) NARA will not approve any request that does not include all of the information required by § 1254.92.

(f) NARA will normally not approve requests to microfilm records:

(1) Which have previously been microfilmed and made available to the public;

(2) Which have been approved for microfilming by another party; or

(3) Which NARA plans to film as a NARA microfilm publication or which relate closely to other records previously microfilmed or approved for microfilming by NARA. Exceptions to this provision may be granted at the discretion of NARA.

(g) NARA will normally not approve requests to microfilm the following categories of records:

(1) Records which include documents with general or specific restrictions on access that preclude their reproduction;

(2) Records which include documents which are known to be protected by copyright;

(3) Records of high intrinsic value which may be handled only by authorized NARA personnel;

(4) Records in vulnerable physical condition;

(5) Records having a high research demand and which would have to be denied to others for an extended period of time during the microfilming process. Where possible, NARA will assist requesters in developing filming schedules that avoid the need to close records for a lengthy period of time; and

(6) Oversize records, bound volumes, and other formats that would be subject to excessive stress and possible damage from special equipment planned to be used by the requester, as well as records fastened with grommets, heavy duty staples, miscellaneous fasteners, or wafers and other adhesives that cannot be removed without tearing or breaking documents.

(h) NARA will normally not approve requests from persons or organizations who have failed to produce usable microfilm or to honor commitments made in previous requests, or who have had a previous permission to microfilm records rescinded because of their conduct.

(i) NARA will not approve requests to microfilm records in NARA facilities in which there is insufficient space available for private microfilming. NARA will not move records from a facility lacking space for private microfilming to another NARA facility for that purpose.

(j) Federal agencies microfilming records in support of the agency's mission may use the space set aside for private microfilming. Agency microfilming takes precedence over private microfilming when there is insufficient space to accommodate both at the same time.

**§ 1254.96 Microfilm preparation.**

(a) As part of its evluation of a request to microfilm records, NARA will determine the amount of microfilm preparation that NARA must do before the records can be microfilmed and the estimated cost of such preparation. The fees for microfilm preparation will be based on direct salary costs (including benefits) and supply costs when NARA staff performs the work. When the work is performed by a NARA contractor, the fees will be the cost to NARA. Microfilm preparation includes:

(1) Verifying or correcting the arrangement of records after withdrawn items are inviewed and refiled when appropriate;

(2) Screening the records for possible restrictions on use;

(3) Declassifying security classified records;

(4) Removing document fasteners from documents when the fasteners can be removed without damage to the documents; and

(5) Taking any document conservation actions that must be accomplished in order to film the records, such as document flattening or mending.

(b) NARA will provide the requester detailed information on the fees for microfilm preparation in the letter of approval. Payment of fees will be made in accordance with § 1258.14 of this Chapter. When a body of records will require extensive microfilm preparation, a different payment schedule may be established at the discretion of NARA.

**§ 1254.98 Equipment standards.**

(a) Equipment must be designed for the microfilming of documents in roll form or standard fiche form and be operable from a table top. Only planetary type camera equipment may be used. Automatic feed devices may not be used. Book cradles or other specialized equipment designed for use with bound volumes, oversized records, or other formats will be approved by the Office of the National Archives on a case-by-case basis.

(b) The power consumption of the equipment normally must not exceed 1.2 kilowatts. Power normally available is 115 volts, 60 hz. Requests for electricity exceeding that normally available must be made at least 90 days in advance.

(c) Equipment having clamps or other devices to exert pressure upon or to affix the record to any surface in a way that might damage the record may not be used.

(d) The equipment must not use a heat generating light source in close enough proximity to the records to result in their physicial distortion or degradation. All sources or ultraviolet light must be filtered.

**§ 1254.100 Microfilming procedures.**

(a) Equipment used must conform to the equipment standards in § 1254.98.

(b) Records must be handled in accordance with the training and instructions provided by NARA personnel so that documents are not damaged during copying and so that their original order is maintained. Only persons who have attended NARA training will be permitted to handle the records or supervise microfilming operations. Training will be offered only in Washington, DC.

(c) Records from only one file unit may be microfilmed at a time.

(d) Records may not be left unattended on the copying equipment or elsewhere.

(e) Under normal microfilming conditions, actual copying time per sheet must not exceed 30 seconds.

(f) Any lights used with the camera must be turned off when the camera is not in actual operation.

(g) Microfilm equipment may be operated only in the presence of the research room attendant or a designated NARA employee.

(h) The equipment normally should be in use each working day that it is in a NARA facility. The director of the NARA facility (as defined in § 1252.2 of this Chapter) will decide when equipment must be removed because of lack of regular use. The equipment must be promptly removed upon request of the facility director.

(i) NARA assumes no responsibility for loss or damage to microfilm equipment or supplies left unattended.

(j) NARA will inspect the microform output at scheduled intervals during the project to verify that the processed film meets the microfilm preparation and filming standards required by Part 1230 of this Chapter. To enable NARA to properly inspect the film, NARA must receive the film within 5 days after it has been processed. The person or organization producing the microfilm will provide NARA with a silver halide duplicate negative of the filmed records (see § 1254.94(d)) according to the schedule shown in (k). If the processed film does not meet the standards, NARA may require that the records be refilmed.

(k) When 10,000 or fewer images are filmed, the person or organization producing the microfilm will provide

NARA with a silver halide duplicate negative upon completion of the project. When the project involves more than 10,000 images, a silver halide duplicate negative of the first completed roll or segment of the project reproducing this image count will be provided to NARA for evaluation; subsequent completed segments of the project, in quantities approximating 100,000 or fewer images, will be provided to NARA within 30 days after filming unless NARA approved other arrangements.

**§ 1254.102 Rescinding permission.**

NARA may, at any time, rescind permission to microfilm records:

(a) If the person or organization fails to comply with the microfilming procedures in § 1254.100;

(b) If inspection of the processed microfilm reveals persistent problems with the quality of the filming or processing;

(c) If the person or organization fails to proceed with the microfilming or project as indicated in the request, or

(d) If the microfilming project is having an unanticipated adverse effect on the condition of the records or the space set aside in the NARA facility for microfilming.

Dated: May 5, 1987.

BILLING CODE 7515-01-M

## ENVIRONMENTAL PROTECTION AGENCY

## 40 CFR Parts 704, 710, 712, 716, and 717

**[OPTS-84025; FRL-3210-3]**

## Reporting and Recordkeeping Requirements; Technical Amendment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; technical amendment.

**SUMMARY:** EPA is revising the mailing address sections for Toxic Substances Control Act (TSCA) section 8 information submissions. This document revises the adddress to insert the correct one. The revision will help assure that TSCA submissions are properly sent to EPA headquarters.

**DATE:** This final rule is effective on May 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** Edward A. Klein, Director, TSCA Assistance Office (TS-799), Environmental Protection Agency, Rm. E-543, 401 M St. SW., Washington, DC 20460, Telephone: (202) 554-1404.

**SUPPLEMENTARY INFORMATION:** This document revises the address for submissions under the section 8(a) Preliminary Assessment Information Rule and sections 8(a), 8(c), and 8(d) of TSCA by inserting the current one. Other addresses published previously for these submissions should no longer be used. EPA is also giving notice of the address to which responses to the final Comprehensive Assessment Information Rule should be sent. Because these are non-substantive changes, notice and public comment are unnecessary.

This **Federal Register** notice also serves to notify persons of a change in the mailing address for submissions under section 8(e) of TSCA. The address given in the previous policy statement ("Statement of Interpretation and Enforcement Policy; Notification of Substantial Risk," 43 FR 11110; March 16, 1978) should no longer be used. Section 8(e) submissions should be sent to: Document Processing Center (TS-790), Office of Toxic Substances, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. ATTN: 8(e) Coordinator.

**Lists of Subjects in 40 CFR Parts 704, 710, 712, 716, and 717**

Chemicals, Environmental protection, Hazardous substances, Health and safety, Recordkeeping and reporting requirements, Significant adverse reactions.

Dated: May 18, 1987.

Charles L. Elkins,

*Director, Office of Toxic Substances.*

Therefore, 40 CFR Chapter I is amended as follows:

1. In Part 704:

a. The authority citation for Part 704 continues to read as follows:

**Authority:** 15 U.S.C. 2607(a).

b. By adding a new § 704.9 to read as follows:

**§ 704.9 Where to send reports.**

Reports must be submitted by certified mail to: Document Processing Center (TS-790), Office of Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. ATTN: 8(a) Notification.

**§ 704.33 [Amended]**

c. In § 704.33 paragraph (h) is removed.

**§ 704.83 [Amended]**

d. In § 704.83 paragraph (g) is removed.

**§ 704.85 [Amended]**

e. In § 704.85 paragraph (e) is removed.

**§ 704.142 [Amended]**

f. In § 704.142 paragraph (h) is removed.

**§ 704.175 [Amended]**

g. In § 704.175 paragraph (f) is removed.

2. In Part 710:

a. The authority citation for Part 710 continues to read as follows:

**Authority:** 15 U.S.C. 2607(a).

b. Section 710.39 is amended by revising paragraph (b) to read as follows:

**§ 710.39 Reporting form and instructions for submitting information.**

* * * * *

(b) Complete instructions for completing the reporting form and preparing a computer tape report are given in the EPA publication entitled "Instructions for Reporting for the Partial Updating of the TSCA Chemical Inventory Data Base." Reporting forms and instruction booklets may be obtained from the following address: Document Processing Center (TS-790), Office of Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. ATTN: Inventory Update Rule. Telephone: (202) 382-3698 or (202) 755-4880.

* * * * *

3. In Part 712:

a. The authority citation for Part 712 continues to read as follows:

**Authority:** 15 U.S.C. 2607(a).

b. Section 712.28 is amended by revising paragraph (c) to read as follows:

**§ 712.28 Form and instructions.**

* * * * *

(c) Forms must be sent (preferably by certified mail) to: Document Processing Center (TS-790), Office of Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. ATTN: 8(a) PAIR Reporting.

* * * * *

4. In Part 716:

a. The authority citation for Part 716 continues to read as follows:

Authority: 15 U.S.C. 2607(a).

b. Section 716.20 is amended by revising paragraph (c) to read as follows:

§ 716.20 Submission of copies of studies.

* * * * *

(c) Copies of health and safety studies and the accompanying cover letters must be submitted, preferably by certified mail, to: Document Processing Center (TS–790), Office of Toxic Substances, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. ATTN: 8(d) Health and Safety Reporting Rule (Notification/Reporting).

c. Section 716.35 is amended by revising paragraph (c) to read as follows:

§ 716.35 Submission of lists of studies.

* * * * *

(c) Lists of health and safety studies should be submitted, preferably by certified mail, to: Document Processing Center (TS–790), Office of Toxic Substances, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. ATTN: 8(d) Health and Safety Reporting Rule (Notification/Reporting).

5. In Part 717:

a. The authority citation for Part 717 continues to read as follows:

Authority: 15 U.S.C. 2607(a).

b. Section 717.17 is amended by revising paragraph (c) to read as follows:

§ 717.17 Inspection and reporting requirements.

* * * * *

(c) *How to report.* When required to report, firms must submit copies of records (preferably by certified mail) to: Document Processing Center (TS–790), Office of Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. ATTN: 8(c) Allegations.

[FR Doc. 87–12276 Filed 5–28–87; 8:45 am]

BILLING CODE 6560–50–M

## FEDERAL EMERGENCY MANAGEMENT AGENCY

### 44 CFR Part 64

[Docket No. FEMA 6752]

### List of Communities Eligible for the Sale of Flood Insurance; Michigan et al.

**AGENCY:** Federal Emergency Management Agency.

**ACTION:** Final Rule.

**SUMMARY:** This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

**EFFECTIVE DATES:** The dates listed in the fourth column of the table.

**ADDRESSES:** Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 457, Lanham, Maryland 20706, Phone: (800) 638–7418.

**FOR FURTHER INFORMATION CONTACT:** Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646–2717, Federal Center Plaza, 500 C Street, Southwest, Room 416, Washington, DC 20472.

**SUPPLEMENTARY INFORMATION:** The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from futher flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance."

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

### List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

### PART 64—[AMENDED]

The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et. seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

| State and location | Community No. | Effective dates of authorization/cancellation of sale of flood insurance in community | Special flood hazard areas identified |
|---|---|---|---|
| Michigan: | | | |
| Evangeline, township of Charlevoix County | 260800—New | Apr. 13, 1987, Emerg | |

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 2

[Gen. Docket No. 85-395]

### Subscription Television; Change in Classification; Correction

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule; correction.

**SUMMARY:** This document corrects an error which appeared in the March 2, 1987 Federal Register (52 FR 6152).

**FOR FURTHER INFORMATION CONTACT:** Martin Blumenthal (202) 254-6530.

**SUPPLEMENTARY INFORMATION:** Section 2.106 was amended by adding a new footnote NG148. We are correcting that footnote to read NG149. A later action, published March 11, 1987, (52 FR 7417) also added NG148. This is correct, however as this action was assigned the footnote officially released *before* the March 2 action.

Federal Communications Commission.
William J. Tricarico,
*Secretary.*

[FR Doc. 87-12052 Filed 5-28-87; 8:45 am]
BILLING CODE 6712-01-M

### 47 CFR Part 22

### Reinstatement of Positions of the Public Mobile Services Rules

**AGENCY:** Federal Communications Commission (FCC).

**ACTION:** Final rule.

**SUMMARY:** A Commission's order eliminating §§ 22.13(f), 22.43(b)(2) and 22.44(c) of the FCC's rules, 47 CFR 22.13(f), 22.43(b)(2), and 22.44(c) (1985), was stayed and subsequently vacated by the U.S. Court of Appeals for the District of Columbia Circuit. As a result these rule sections are still in effect. However, they were eliminated from the Code of Federal Regulations. This Order reinstates these rule sections in the CFR.

**EFFECTIVE DATE:** May 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** Carmen Borkowski, Mobile Services Division, Common Carrier Bureau; Tele: (202) 632-6450.

List of Subjects in 47 CFR Part 22

Communications common carriers, Radio.

Albert Halprin,
*Chief, Common Carrier Bureau.*

**PART 22—[AMENDED]**

1. The authority citation for Part 22 continues to read:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended (47 U.S.C. 154, 303).

2. Section 22.13 is amended by adding paragraph (f) to read as follows:

**§ 22.13 General application requirements.**

* * * * *

(f) *State certification*—(1) *General rule.* Licensees are required to comply with all applicable state certification requirements. Applicants may, but are not required to include evidence of state certification when filing FCC Form 401 or 489. The licensee under this part must complete construction in accordance with section 22.43 of the rules. A licensee must have all requisite state authority and be in operation within a year of the license grant or the license will automatically expire and must be submitted for cancellation.

(2) Denial of state certification. A pending application will be returned as unacceptable for filing where the applicant is denied state certification necessary to construct and/or operate the proposed facilities, and the state appeal process has been exhausted. Such applications will not be retained on file while the applicant pursues subsequent state applications. Where an applicant has been denied the necessary state certification and has exhausted the state appeal process, the applicant shall not resubmit its application to the Commission until after obtaining state certification.

(3) Applicant's duty to inform. The application shall include in Form 401 information regarding any adverse action which has been taken regarding the state certification application. The applicant shall promptly and fully advise the Commission of any adverse action regarding state certification taken while the application is pending.

3. Section 22.43 is amended by adding paragraph (b)(2) to read as follows:

**§ 22.43 Period of construction.**

(b) * * * * *

(2) *State certification.* No extension will be granted when state certification has been denied and all state appeals have been exhausted. If an applicant requests an extension due to lack of state certification, one 6-month extension may be granted when state law permits construction before certification is obtained. No more than two 6-month extensions may be granted when state law prohibits construction before certification is obtained. Lack of state certification must be due to a cause beyond applicant's control, and extensions will not be granted if there is lack of diligence in pursuing state certification. If the licensee files for state certification within 90 days of the license grant, a presumption of due diligence is created.

* * * * *

4. Section 22.44 is amended by adding paragraph (c) to read as follows:

**§ 22.44 Termination of authorization**

(c) *State certification.* Where the holder of an authorization is denied state certification and the state appeal process is exhausted before the end of the one year period, the license will be forfeited. If the licensee regains state certification before the end of the one year period, a request for reinstatement may be considered.

[FR Doc. 87-12051 Filed 5-28-87; 8:45 am]
BILLING CODE 6712-01-M

## INTERSTATE COMMERCE COMMISSION

### 49 CFR Part 1043

[Ex Parte No. MC-183]

### Clarification of Insurance Regulation

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Final rules and clarification form.

**SUMMARY:** The Commission is issuing a final rule to correct an inadvertent error in an earlier proceeding concerning the regulations under § 1043.4, Title 49 of the Code of Federal Regulations. The correction will permit property brokers to file security other than a prescribed broker's surety bond as evidence of financial responsibility. The Commission is also correcting the language of the prescribed surety bond Form BMC-84 (Rev. 1977) to clarify that both shippers and motor carriers are entitled to the protection of the bond, and to reflect current statutory citations resulting from recodification of the Interstate Commerce Act. The current Form BMC 84 (Rev. 1977) will be accepted until the new revised Form BMC-84 forms are printed by the industry. Because of the proximity of the expiration date of OMB approval of Form BMC-84 (September 30, 1987) and the expense to insurers of printing too

few forms or having obsolete stock on their hands so soon after printing, we are specifically authorizing Form BMC–84 to be printed and used, as modified and clarified in this proceeding, without showing an expiration date until it has been submitted to OMB and approved for a longer period.

As these are merely minor changes to correct a previous ministerial error and to clarify the Commission's interpretation of the intended statutory coverage of motor carriers, as well as shippers under the prescribed surety bond, comments are not required. 5 U.S.C. 553(b)(A)(B).

**EFFECTIVE DATE:** May 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** John W. Fristoe (202) 275–7844 or Heber P. Hardy (202) 275–7148.

**SUPPLEMENTARY INFORMATION:** Additional information is contained in the Commission decision. To obtain a copy of the full decision, write to T.S. Infosystems, Inc., Room 2229, c/o Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (DC Metropolitan Area).

Energy and environmental considerations: This action will not significantly affect either the quality of the human environment or conservation of energy resources.

**Regulatory Flexibility Analysis**

The Commission certifies that clarification and correction of these final rules will not have a significant impact on a substantial number of small entities. They do not require small entities to do anything substantially different in filing evidence of required coverage under 49 CFR 1043.4 than already is required. To the extent these rules provide greater flexibility for property brokers to comply with our requirements and clarify what parties are protected under a surety bond, this proceeding may have a beneficial impact on a substantial number of property brokers, shippers, and motor carriers.

**List of Subjects in 49 CFR Part 1043**

Insurance, Motor carriers, and Surety bonds.

Decided: April 9, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

**Noreta R. McGee,**

*Secretary.*

**Final Rules**

For the reasons set forth in the preamble, 49 CFR Part 1043 is amended as follows:

**PART 1043—SURETY BONDS AND POLICIES OF INSURANCE**

1. The authority citation for Part 1043 continues to read as follows:

**Authority: 49 U.S.C. 10101, 10321, 11701, 10927; 5 U.S.C. 553.**

2. Section 1043.4 is revised to read as follows:

**§ 1043.4 Property broker surety bonds or other security.**

A property broker must have a surety bond or other security in effect for $10,000. The Commission will not issue a property broker license until a surety bond or other security for the full limits of liability prescribed herein is in effect. The broker license shall remain in effect only as long as a surety bond or other security remains in effect and shall ensure the financial responsibility of the broker.

**Clarification of Form**

The Commission's prescribed Broker's Surety Bond, Form BMC 84 (Rev. 1977), is clarified and modified as follows:

1. The heading title is modified by deleting the words "Section 211(c) *of the Interstate Commerce Act*" and substituting the citation "49 U.S.C. 10927."

2. The second *whereas* Clause is modified by deleting the words "Section 211" and substituting the citation "49 U.S.C. 10927(b)."

3. The first *whereas* Clause and the paragraph following the second *whereas* Clause are modified by deleting the words "Part II of" in each place where those words precede the words "The Interstate Commerce Act" or the words "said Act."

4. The language in the three paragraphs, beginning with the first *whereas* Clause, is clarified by deleting the word "travelers" in each place where it appears and substituting the words "motor carriers."

5. The identification of Form BMC 84 (Rev. 1977) should be modified, upon reprint, to read "BMC 84 (Rev. 1987)."

[FR Doc. 87–12285 Filed 5–28–87; 8:45 am]
BILLING CODE 7035–01–M

# Proposed Rules

Federal Register
Vol. 52, No. 103
Friday, May 29, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## NUCLEAR REGULATORY COMMISSION

### 10 CFR Part 2

### Informal Hearing Procedures for Materials Licensing Adjudications

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Proposed rule.

**SUMMARY:** The Nuclear Regulatory Commission is proposing to amend its regulations to provide rules of procedure for the conduct of informal adjudicatory hearings in materials licensing proceedings. The Atomic Energy Act of 1954 requires that the NRC, in any proceeding for the granting, suspending, revoking, or amending of an NRC license, including a license involving source, byproduct, and special nuclear materials, afford an interested person, upon request, a "hearing." The Commission previously has determined that the "hearing" provided for a materials licensing proceeding need not encompass all the procedures in NRC regulations that govern formal adjudications for the licensing of production and utilization facilities. Rather, the Commission has determined that, in most instances, an informal hearing with an opportunity to present written views is sufficient to fulfill this requirement. This proposed rule prescribed the procedures that would govern these informal proceedings.

**DATES:** Comment period expires July 28, 1987. Comments received after this date will be considered if it is practicable to do so, but assurance of consideration can be given only for comments filed on or before that date.

**ADDRESSES:** Submit written comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, ATTN: Docketing and Service Branch. Hand deliver comments to: Room 1121, 1717 H Street, NW., Washington, DC, between 8:15 a.m. and 5:00 p.m.

Examine comments received at: The NRC Public Document Room, 1717 H Street NW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Paul Bollwerk, Attorney, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (202) 634–3224.

**SUPPLEMENTARY INFORMATION:** Section 189a of the Atomic Energy Act of 1954 (AEA) (42 U.S.C. 2239(a)) provides that in any proceeding for the granting, suspending, revoking, or amending of any license, the agency shall grant a hearing upon the request of any person whose interest may be affected by the proceeding. Among the licenses issued by the agency are those for byproduct material (AEA sections 81–84, 42 U.S.C. 2111 through 2114, 10 CFR Parts 30 through 35), source material (AEA sections 61–69, 42 U.S.C. 2091–2099, 10 CFR Part 40), and special nuclear material (AEA sections 51–58, 42 U.S.C. 2071 through 2078, 10 CFR Part 70). In a February 1982 decision, the Commission declared that, with regard to materials licenses, the agency was not required to afford a formal, trial-type adjudicatory hearing under the Administrative Procedure Act (5 U.S.C. 554, 556, 557). *Kerr-McGee Corp.* (West Chicago Rare Earths Facility), CLI–82–2, 15 NRC 232 (1982). Rather, the Commission found that it was sufficient to afford an informal hearing in which the parties are given an opportunity to present to the hearing officer their written views and whatever documentary evidence they wish. The Commission's interpretation of the type of hearing it need provide in connection with materials licensing actions was upheld by the United States Court of Appeals for the Seventh Circuit. *City of West Chicago* v. *NRC*, 701 F.2d 632 (7th Cir. 1983).

In order to specify the particular procedures that will be applicable in such informal proceedings, the Commission now proposes to add a new Subpart L to Part 2 of its rules in Title 10 of the Code of Federal Regulations. The chief differences from the Subpart G "Rules of General Applicability" for formal adjudications are discussed below.

#### Time for Filing a Hearing Petition

Under proposed § 2.1205(c), "interested persons" (other than an applicant or licensee) wishing to request a hearing on a materials licensing action would be required to file a petition for a hearing within thirty days of the agency's publication in the **Federal Register** of a notice of the receipt of an application or a notice of agency action relative to an application for a materials license. Thus, the publication of an initial **Federal Register** notice regarding a materials license application generally will trigger the time for filing a hearing petition.

Under current Commission practice, however, a **Federal Register** notice is not published with respect to each proposed or completed materials licensing action that may be subject to a hearing request. While the AEA specifically requires that "interested persons" be afforded a hearing upon request, it does not impose any requirement that the Commission publish a **Federal Register** notice with respect to each of the thousands of material licensing applications it receives annually. Because of the large number of materials licensing actions involved, the administrative and resource burden of a self-imposed requirement to provide notice in all instances, and the relative insignificance of many of the licensing actions involved, it has been the Commission's practice to provide a published notice only in significant cases. The Commission will retain this practice. If no notice is published, however, a petition is timely if it is filed within thirty days after the petitioner receives actual notice of the action or proposed action complained of, or within one year after completion of the agency action, whichever first occurs. Further, the proposed rule indicates that a hearing petition filed more than one year after completion of the agency's action will be granted upon a showing of "exceptional circumstances" that precluded the petitioner from discovering the agency action and petitioning for a hearing earlier.

The requirements in § 2.1205 for the filing of hearing petitions would not change the requirements in § 2.103(b) for the time for filing applicant hearing petitions following a notice of denial or a notice of proposed denial.

#### Provision for Hearings Subsequent to Grant of a License

While section 189a of the Atomic Energy Act (42 U.S.C. 2239(a)) has provisions that govern whether a hearing must be provided upon request

prior to staff action with regard to reactor construction permits and operating licenses, the Act says nothing specific about whether such a hearing requested by an interested person must be completed prior to agency action granting or denying a materials license. The proposed rule therefore does not preclude, and in fact contemplates, the grant of a license by the NRC staff prior to any initial decision in any proceeding convened as a result of a hearing request.

Of course, the lack of any statutory directive will not relieve the agency of any obligation constitutional due process may impose. Due process generally requires that if a constitutionally protected right to a hearing exists,[1] opportunity for that hearing must be afforded before agency action becomes effective. *E.g., Opp Cotton Mills* v. *Administrator*, 312 U.S. 126, 152–53 (1941). It also has been recognized, however, that in particular circumstances a balancing of the private and governmental interest involved may allow government action to precede any hearing. *See, e.g., Cleveland Board of Education* v. *Loudermill*, 470 U.S. 532, 542 n.7 (1985); *Hewitt* v. *Helms*, 459 U.S. 460, 476 n.8 (1983); *Parratt* v. *Taylor*, 451 U.S. 527, 540–41 (1981); *Barry* v. *Barchi*, 443 U.S. 55, 64 (1979). A weighting of those interests here has led the agency to conclude that a prelicensing hearing is not necessarily required.

The private rights involved in this instance are two-fold: The right of the applicant to a reasonably prompt administrative assessment of and determination about its application so it can go forth with its planned activities and the right of other "interested persons" to challenge the requested licensing action on the basis of their specific concerns about anticipated harm to radiological health and safety or the environment. Into this balance also must be weighted the governmental interest in avoiding delay in the administrative process that will be caused by halting all action on the application pending notice of opportunity for hearing and any hearing. The importance of this factor is heightened by the fact that the agency reviews and processes literally thousands of materials license applications each year. *Kerr McGee Corp.*, 15 NRC at 261. Finally, it is significant that the materials involved in the vast majority of cases, when compared to power reactors, involve substantially less hazard. *Id.* at 262.

Taking these factors into account, the Commission believes that an appropriate balance is struck by its present practice of not requiring that completion of any requested hearing be a prerequisite to every licensing action by the agency while providing that any "interested person" who believes the effectiveness of the licensing action will be harmful to his or her interests can request a stay from the presiding officer. Section 2.1263 of the proposed rule outlines the procedure for making such requests.

### Designation of a Single Hearing Officer

Unlike reactor licensing proceedings in which a three-member board is established to conduct any hearing, for most materials licensing proceedings only a single hearing officer would be appointed by the Chairman of the Atomic Safety and Licensing Board Panel (ASLBP) from the panel's membership to rule on a petition for hearing and, if a hearing is granted, preside over the adjudication. The exception to this rule is for proceedings on Part 70 licenses to receive new fuel at reactor facilities that are subject to an ongoing proceeding for an operating license under Part 50. In such instances, the three-member licensing board conducting the Part 50 proceeding also will consider the Part 70 application in accordance with the informal procedures in proposed Subpart L unless the board certifies to the Commission that the matters presented for adjudication are substantially the same as those being litigated in the operating license proceeding. Upon certification, the Part 70 issues can be adjudicated using the formal hearing procedures in 10 CFR Part 2, Subpart G.

### Requirements for Standing

Under the proposed § 2.1205, the focus of an initial request for hearing or a petition to intervene is to be the issue of standing. In turn, the presiding officer's determination about whether the petitioner for a hearing has standing would be in accordance with the Commission's existing practice and would include a consideration of the factors set forth at 10 CFR 2.714(d). Nonetheless, the "distance standard" established by NRC case law for standing in nuclear reactor licensing proceedings, whereby persons residing within fifty miles of a facility generally are considered to have standing, *see, e.g., Tennessee Valley Authority* (Watts Bar Nuclear Plant, Units 1 and 2), ALAB–413, 5 NRC 1418, 1421 n.7 (1977), is not applicable in materials licensing proceedings. Instead, the interest of the petitioner must be assessed in terms of the particular licensed facility or activity at issue in the materials licensing proceeding.

### Hearing File

Following a presiding officer's determination to grant a hearing request because the requestor has standing, § 2.1231 requires that the NRC staff assemble and make available to the presiding officer and the parties a hearing file of materials relevant to the licensing proceeding. The file would include the application and any amendment thereto, as well as any environmental assessment or impact statement and any NRC report or any correspondence between the NRC and the applicant relating to the application. The hearing file also would be placed by the staff in the NRC's public document room (PDR) and in any appropriate local PDR. If a local PDR did not exist, as it does not for the overwhelming majority of materials licenses, then the applicant would be responsible for making the hearing file provided by the NRC staff publicly available during regular business hours in the vicinity of the principal location where the nuclear material that is the subject of the application will be possessed. This could be done by the applicant in a number of different ways, including making the file available at a local public library.

Although the proposed rule provides that no discovery by the parties is allowed in informal proceedings, creation of the hearing file is intended to give all parties in such proceedings access to the central documentation relating to the application for use in preparing written and oral presentations. Moreover, as proposed § 2.1231(c) indicates, the NRC staff is given the continuing duty of keeping the hearing file for a proceeding current by supplementing it with appropriate documents that are generated after the file is established initially. Further, any issue that arises over the appropriate documents to be included in the file is to be resolved by the presiding officer.

---

[1] The due process right of a license applicant or a licensee to a hearing with regard to its request for licensing action has been recognized, *e.g., Buttrey* v. *United States*, 690 F. 2d 1170, 1177–78 (5th Cir. 1982), *cert. denied*, 461 U.S. 927 (1983); *Gallagher & Ascher Co.* v. *Simon*, 687 F.2d 1067, 1077 & n. 12 (7th Cir. 1982); whether other "interested persons" have such a due process right is less apparent. *City of West Chicago* v. *NRC*, 701 F.2d 632, 645 (7th Cir. 1983). It also should be noted that in cases involving renewal of a license, the Administrative Procedure Act, 5 U.S.C. 558(c), and 10 CFR 2.109 provide that the existing license will remain in effect, whether or not the staff or an intervenor opposes license renewal, pending a final determination of the renewal application.

**Written Presentations and Discretion To Hold Oral Presentations**

Under the proposed rule, after a hearing file is established the parties would be given an opportunity to make written presentations. These presentations are to be made under oath or affirmation. Those filed by an applicant challenging a proposed denial or a denial of its licensing request must describe with particularity any deficiency or omission in the staff's action. Similarly, the written presentation of intervenors challenging an application for licensing action must describe in detail any deficiency or omission in the application. Each written presentation also must be supported by all documentation or information that supports or illustrates each deficiency or omission complained of. Subsequent attempts to present or to rely upon other documentation or information would require the permission of the presiding officer. In addition to receiving the parties' filings, the presiding officer could require that the parties answer his or her written questions.

If it appears to the presiding officer, in his or her discretion, that it is necessary for the creation of an adequate record for decision, oral presentations to the presiding officer by the parties or oral questioning of witnesses concerning the factual and legal issues presented by the licensing action are allowed. An oral presentation by the parties would be appropriate in instances when the presiding officer is convinced that such a presentation is the most expeditious way to clarify or resolve specific ambiguities or controversies arising from the written presentations. Although such presentations generally would be similar to the nontestimonial oral arguments held with respect to motions in formal adjudiciatory proceedings, in the event a party wished to make any additional factual presentations for the record, under § 2.1233(b) the presentor would be required to be under oath. Oral questioning of affiants or of principals or employees of the applicant or licensee, also under oath, might be allowed in addition to or in lieu of an oral presentation in instances when the veracity or demeanor of such individuals is at issue and is critical to resolving an important matter in controversy. Normally such questioning would be done by the presiding officer on the basis of his or her concerns and any questions of the parties the presiding officer finds appropriate. The proposed rule also contemplates that oral questioning could be done by the parties themselves, but only after the specific questions or the line of questions for the witness has been approved by the presiding officer. Free-ranging cross-examination would not be allowed. The Commission contemplates that oral presentations or oral questioning would not be necessary in the vast majority of cases.

Thereafter, on the basis of the hearing file, any information presented under oath in written or oral presentations, and any facts that might be officially noticed, the presiding officer would make an initial decision. This decision would be subject to review by an Atomic Safety and Licensing Appeal Board under the same procedures as exist for the appeal of initial decisions in formal adjudications under Subpart G of 10 CFR Part 2.

In the event that the presiding officer, on his own or at the request of any party, reaches the conclusion that a full and fair airing of the issues in the proceeding requires that additional procedures should be used, such as discovery or allowing the parties to cross-examine witnesses, or that the prodceeding should be conducted entirely in accordance with Subpart G in formal procedures, § 2.1209(j) authorizes the presiding officer to request authority to use the additional procedures or to have the Commission convene a formal adjudication. The Commission contemplates that this will not be appropriate in the vast majority of cases. *See generally Sequoyah Fuels Corporation* (Sequoyah $UF_6$ to $UF_4$ Facility), CLI–86–17, 24 NRC 489 (1986).

**Role of The NRC Staff**

Another important change in procedure proposed in these rules of procedure is the role provided for the NRC staff. In formal hearings under Subpart G of 10 CFR Part 2, the staff is a party to the proceeding. Under the proposed rule, in instances other than an applicant- or licensee-initiated hearing following a denial or proposed denial of an application, the staff need not assume such a role. Instead, it may decline to participate as a party in the proceeding. However, if the staff subsequently determined it wished to assume party status or the presiding officer decided it should participate as a party, under proposed § 2.1213 the presiding officer could afford or impose party status.

**Restrictions on Private Communications with Adjudicators**

Despite the lack of any statutory requirement that the Commission apply the *ex parte* and separation of functions prohibitions of the Administrative Procedure Act (5 U.S.C. 554(d), 557(d)) to informal adjudications, these prohibitions can in some circumstances have due process implications. *See Bethlehem Steel Corp.* v. *EPA*, 638 F.2d 994, 1008–10 (7th Cir.), *cert. denied*, 447 U.S. 921 (1980); *United States Lines* v. *FMC*, 584 F.2d 519, 536–42 (D.C. Cir. 1978). The crux of judicial concern in this regard is that the decision resulting from the adjudication should not be based upon information about which the parties have not had notice and a chance to provide their views. *Bethlehem Steel Corp.*, 638 F.2d at 1009–10; *United States Lines*, 584 F.2d at 540–41. Proposed § 2.1215(c) addresses this concern by providing that an initial decision can only be based upon information with respect to which all parties have had notice and an opportunity to comment.

**Separate Views of Commissioner Asselstine**

I do not support publication of this rule for one very simple reason. The rule contains no provision requiring that the Commission provide notice of licensing actions. Interested persons have a statutory right to a hearing on materials licensing actions. Yet, the NRC does not intend to provide notice of an opportunity for a hearing in any save a very few major actions. Absent notice there is little chance that anyone will learn that a licensing action is planned, let alone that they might have a right to a hearing on that action. A statutory right to a hearing is of little benefit if no one knows about it.

**Environmental Impact; Categorical Exclusion**

The NRC has determined that this proposed regulation is the type of action described in categorical exclusion 10 CFR 51.22(c)(1). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this proposed regulation.

**Paperwork Reduction Review**

This proposed rule contains no information collection requirements and therefore is not subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

**Regulatory Analysis**

The Atomic Energy Act affords interested persons the right to a hearing regarding a materials licensing proceeding. As the Commission previously indicated in its decision in *Kerr McGee Corp.*, 15 NRC at 241, the use of informal procedures involves less cost and delay for the parties and the

Commission than the use of formal, trial-type procedures, the only other procedural alternative. Also, procedures must be in place to allow for the orderly conduct of those adjudications. Codifying the informal hearing procedures for materials licensing proceedings is preferable to the only other alternative, which is the present practice of setting forth the procedures to be followed on a case-by-case basis. By codifying the procedures, the Commission will avoid the expenditure of time and resources necessary to prepare the individual orders that previously have been used to designate those procedures. It thus is apparent that this proposed rule is the preferred alternative and the cost entailed in its promulgation and application is necessary and appropriate. The foregoing discussion constitutes the regulatory analysis for this proposed rule.

**Backfit Analysis**

This proposed rule does not modify or add to systems, structures, components, or design of a facility; the design approval or manufacturing license for a nuclear reactor facility; or the procedures or organization required to design, construct, or operate a facility. Accordingly, no backfit analysis pursuant to 10 CFR 50.109(c) is required for this proposed rule.

**Regulatory Flexibility Certification**

The proposed rule will not have a significant economic impact upon a substantial number of small entities. Many materials licensees or intervenors fall within the definition of small businesses found in section 34 of the Small Business Act, 15 U.S.C. 632, or the Small Business Size Standards set out in regulations issued by the Small Business Administration at 13 CFR Part 121, or the NRC's size standards published December 9, 1985 (50 FR 50241). While the proposed rules, if adopted, would reduce the burden on licensees or intervenors because of the informal nature of the hearing, the requirement that they submit filings and documentary information detailing contested legal and factual issues is still required. Some cost reduction in comparison to the cost of participating in a formal adjudicatory hearing can be anticipated, although that reduction as a whole may not be significant. Further, the use of informal procedures will not increase significantly the burden upon licensees to respond to hearing requests. Since the Commission's determination in 1982 that use of such procedures was appropriate, it has received, on average, fewer than five hearing requests per year regarding materials licensing applications. Thus, in accordance with the Regulatory Flexibility Act, 5 U.S.C. 605(b), the NRC hereby certifies that this rule, if promulgated, will not have a significant economic impact upon a substantial number of small entities.

**List of Subjects in 10 CFR Part 2**

Administrative practice and procedure, Antitrust, Byproduct material, Classified information, Environmental protection, Nuclear materials, Nuclear power plants and reactors, Penalty, Sex discrimination, Source material, Special nuclear material, Waste treatment and disposal.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is proposing to adopt the following amendments to 10 CFR Part 2:

## PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

1. The authority citation for Part 2 is revised to read as follows:

Authority: Secs. 161, 181, 68 Stat. 948, 953, as amended (42 U.S.C. 2201, 2231); sec. 191, as amended, Pub. L. 87-615, 76 Stat. 409 (42 U.S.C. 2241); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); 5 U.S.C. 552.

Section 2.101 also issued under secs. 53, 62, 63, 81, 103, 104, 105, 68 Stat. 930, 932, 935, 936, 937, 938, as amended (42 U.S.C. 2073, 2092, 2093, 2111, 2133, 2134, 2135); sec. 102, Pub. L. 91-190, 83 Stat. 853, as amended (42 U.S.C. 4332); sec. 301, 88 Stat. 1248 (42 U.S.C. 5871).

Sections 2.102, 2.103, 2.104, 2.105, 2.721 also issued under secs. 102, 103, 104, 105, 183, 189, 68 Stat. 936, 937, 938, 954, 955, as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2233, 2239).

Section 2.105 also issued under Pub. L. 97-415, 96 Stat. 2073 (42 U.S.C. 2239).

Sections 2.200 through 2.206 also issued under secs. 186, 234, 68 Stat. 955, 83 Stat. 444, as amended (42 U.S.C. 2236, 2282); sec. 206, 88 Stat. 1246 (42 U.S.C. 5846).

Sections 2.300 through 2.309 also issued under Pub. L. 97-415, 96 Stat. 2071 (42 U.S.C. 2133).

Sections 2.600 through 2.606 also issued under sec. 102, Pub. L. 91-190, 83 Stat. 853 as amended (42 U.S.C. 4332).

Sections 2.700a, 2.719 also issued under 5 U.S.C. 554.

Sections 2.754, 2.760, 2.770 also issued under 5 U.S.C. 557.

Section 2.790 also issued under sec. 103, 68 Stat. 936, as amended (42 U.S.C. 2133) and 5 U.S.C. 552.

Sections 2.800 and 2.808 also issued under 5 U.S.C. 553.

Section 2.809 also issued under 5 U.S.C. 553 and sec. 29, Pub. L. 85-256, 71 Stat. 579, as amended (42 U.S.C. 2039).

Appendix A also issued under sec. 6, Pub. L. 91-580, 84 Stat. 1473 (42 U.S.C. 2135).

2. Subpart L of Part 2 is added to read as follows:

**Subpart L—Informal Hearing Procedures for Adjudications in Materials Licensing Proceedings**

Sec.
2.1201 Scope of subpart.
2.1203 Docket; filing; service.
2.1205 Request for a hearing; petition for leave to intervene.
2.1207 Designation of presiding officer.
2.1209 Power of presiding officer.
2.1211 Participation by a person not a party.
2.1213 Role of the NRC staff.
2.1215 Appearance and practice.

**Hearings**

2.1231 Hearing file; prohibition on discovery.
2.1233 Written presentations; written questions.
2.1235 Oral presentations; oral questions.
2.1237 Consideration of Commission rules and regulations in informal adjudications.
2.1239 Settlement of materials licensing proceedings.

**Initial Decision, Commission Review, and Final Decision**

2.1251 Initial decision and its effect.
2.1253 Appeals from initial decisions.
2.1255 Review by the Atomic Safety and Licensing Appeal Board.
2.1257 Review of decisions and actions of an Atomic Safety and Licensing Appeal Board.
2.1259 Final decision; petition for reconsideration.
2.1261 Authority of the Secretary to rule on procedural matters.
2.1263 Stays of NRC staff licensing actions and decisions of a presiding officer, an Atomic Safety and Licensing Appeal Board or the Commission, pending hearing or review.

### Subpart L—Informal Hearing Procedures for Adjudications in Materials Licensing Proceedings

**§ 2.1201 Scope of subpart**

The general rules in this subpart govern procedure in any adjudication initiated by a request for a hearing in a proceeding for the grant, transfer, renewal, or licensee-initiated amendment of a materials license subject to Parts 30, 32 through 35, 40, or 70 of this chapter. Any adjudication regarding a materials license subject to Parts 30, 32 through 35, 40, or 70 that is initiated by a notice of hearing issued under § 2.104, a notice of proposed action under § 2.105, or a request for hearing under Subpart B of 10 CFR Part 2 on an order to show cause, an order for modification of license, or a civil penalty, is to be conducted in accordance with the procedures set forth in Subpart G of 10 CFR Part 2.

**§ 2.1203 Docket; filing; service.**

(a) The Secretary shall maintain a docket for each adjudication subject to this subpart, commencing with the filing of a request for a hearing. All papers, including any request for a hearing, petition for leave to intervene, correspondence, exhibits, decisions, and orders, submitted or issued in the proceeding; the hearing file compiled in accordance with § 2.1231; and the transcripts of any oral presentations or oral questioning made in accordance with § 1235 must be filed with the Office of the Secretary and must be included in the docket.

(b) Documents will be considered filed with the Office of the Secretary in adjudications subject to this subpart either—

(1) By delivery to the Docketing and Service Branch of the Office of the Secretary at Room 1121, 1717 H. Street NW., Washington, DC, or

(2) By mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, *Attention:* Docketing and Service Branch.

Filing by mail or telegram will be complete as of the time of deposit in the mail or with the telegraph company.

(c) Computation of time shall be done in accordance with § 2.710.

(d) A request for a hearing or a petition for leave to intervene must be served in accordance with § 2.1205 (e) and (j). All other documents offered for filing are to be served as the presiding officer, the Atomic Safety and Licensing Appeal Board, or the Commission shall direct.

**§ 2.1205 Request for a hearing; petition for leave to intervene.**

(a) Any person whose interest may be affected by a proceeding for the grant, transfer, renewal, or licensee-initiated amendment of a materials license subject to this subpart may file a request for a hearing.

(b) An applicant for a license, a license amendment, a license transfer, or a license renewal who is issued a notice of proposed denial or a notice of denial must in all cases file a request for a hearing within the time specified in § 2.103.

(c) The request for a hearing of a person other than an applicant must be filed (1) within thirty (30) days of the agency's publication in the **Federal Register** of a notice of the receipt of, or action relative to, an application, or (2) if no such notice is published, within thirty (30) days after the requestor receives actual notice of a pending application or agency action granting an application or within one (1) year after agency action granting an application, whichever first occurs. A request for a hearing filed more than (1) year after effective completion of the agency action will be granted only upon a showing of exceptional circumstances for the late filing.

(d) The request for a hearing filed by a person other than an applicant must describe in detail—

(1) The interest of the requestor in the proceeding;

(2) How that interest may be affected by the results of the proceeding, including the reasons why the requestor should be permitted a hearing, with particular reference to the factors of paragraph (g) of this section; and

(3) The specific aspect or aspects of the subject matter of the proceeding about which the requestor wishes to be heard.

(e) Each request for a hearing must be served, by delivering it personally or by mail to—

(1) The applicant (unless the requestor is the applicant); and

(2) The NRC staff, by delivery to the Executive Director for Operations, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

(f) Within ten (10) days of service of a request for a hearing filed under paragraph (c) of this section, the applicant may file an answer. The NRC staff may file an answer to such a request for a hearing within ten (10) days of the designation of the presiding officer.

(g) In ruling on a request for a hearing filed under paragraph (c) of this section, the presiding officer shall determine that the requestor meets the judicial standard for standing and shall consider, among other factors—

(1) The nature of the requestor's right under the Act to be made a party to the proceeding;

(2) The nature and extent of the requestor's property, financial, or other interest in the proceeding; and

(3) The possible effect of any order that may be entered in the proceeding upon the requestor's interest.

(h) If a hearing request filed under paragraph (b) of this section is granted, the applicant and the NRC staff shall be parties to the proceeding. If a hearing request filed under paragraph (c) of this section is granted, the requestor shall be a party to the proceeding along with the applicant and the NRC staff, if the staff chooses to participate as a party in accordance with § 2.1213.

(i) If a request for a hearing is granted and no notice of opportunity for a hearing previously has been published in the **Federal Register**, a notice of hearing must be published in the Federal Register that must state—

(1) The time, place, and nature of the hearing;

(2) The authority under which the hearing is to be held;

(3) The matters of fact and law to be considered; and

(4) The time within which any other person whose interest may be affected by the proceeding may petition for leave to intervene, as specified in paragraph (j) of this section.

(j) Any petition for leave to intervene, which must be filed within thirty (30) days of the date of publication of the notice of hearing, must set forth the information required under paragraph (d) of this section. A petition for leave to intervene must be served upon the applicant and upon the NRC staff, by delivering it personally or by mail to the Executive Director for Operations, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Within ten (10) days of service of a petition for leave to intervene, the NRC staff and the applicant may file an answer. Thereafter, the petition for leave to intervene must be ruled upon by the presiding officer, taking into account the factors set forth in paragraph (g) of this section. If the petition is granted, the petitioner shall be considered a party to the proceeding.

(k) A nontimely petition for leave to intervene will not be entertained absent a finding by the Commission or the presiding officer that the petition should be granted based upon a balancing of the factors set forth in § 2.714(a)(1) (i) through (v), in addition to those set forth in paragraph (g) of this section.

(l) The filing or granting of a request for a hearing or a petition for leave to intervene need not delay NRC staff action regarding an application for a materials licensing action covered by this subpart.

(m) An order granting a request for a hearing or a petition for leave to intervene may condition or limit participation in the interest of avoiding repetitive factual presentations and argument.

(n) In the event the presiding officer wholly denies a request for a hearing or a petition for leave to intervene, that action is appealable within ten (10) days of service of the order on the question whether the request for a hearing or the petition for leave to intervene should have been granted in whole or in part. If a request for a hearing or a petition for leave to intervene is granted, parties other than the requestor or petitioner may appeal that action within ten (10) days of service of the order on the

question whether the request for a hearing or the petition for leave to intervene should have been wholly denied. An appeal may be taken by filing and serving upon all parties a statement that succinctly sets out, with supporting argument, the errors alleged. The appeal may be supported or opposed by any party by filing a counter statement within fifteen (15) days of the service of the appeal brief.

**§ 2.1207 Designation of presiding officer.**

(a) Unless otherwise ordered by the Commission or as provided in paragraph (b) of this section, within ten (10) days of filing of a request for a hearing relating to a materials license proceeding covered by this subpart, the Chairman of the Atomic Safety and Licensing Board Panel shall issue an order designating a single member of the panel to rule on the request for a hearing and, if necessary, to serve as the presiding officer to conduct the hearing.

(b) For any request for hearing relating to an application under 10 CFR Part 70 to receive and store unirradiated fuel at the site of a production or utilization facility that also is the subject of a proceeding under the Subpart G of this part for the issuance of an operating license, the Chairman of the Atomic Safety and Licensing Board Panel shall issue an order designating a Licensing Board conducting the operating license proceeding to rule on the request for a hearing and, if necessary, to conduct the hearing in accordance with this subpart. Upon certification to the Commission by the Licensing Board designated to conduct the hearing that the matters presented for adjudication by the parties with respect to the Part 70 application are substantially the same as those being heard in the pending proceeding under 10 CFR Part 50, the Licensing Board may conduct the hearing in accordance with the procedures in Subpart G.

**§ 2.1209 Power of presiding officer.**

A presiding officer has the duty to conduct a fair and impartial hearing according to law, to take appropriate action to avoid delay, and to maintain order. The presiding officer has all powers necessary to those ends, including the power to—

(a) Regulate the course of the hearing and the conduct of the participants;

(b) Dispose of procedural requests or similar matters;

(c) Hold conferences before or during the hearing for settlement, simplification of the issues, or any other proper purpose;

(d) Certify questions to the Atomic Safety and Licensing Appeal Board for determination, either in the presiding officer's discretion or on direction of the Commission or the Atomic Safety and Licensing Appeal Board;

(e) Reopen a proceeding for the reception of further information at any time prior to initial decision;

(f) Administer oaths and affirmations;

(g) Issue initial decisions;

(h) Issue subpoenas requiring the attendance and testimony of witnesses at the hearing or the production of documents for the hearing;

(i) Receive written or oral evidence and take official notice of any fact in accordance with § 2.743(i);

(j) Recommend to the Commission that procedures other than those authorized under this subpart be used in a particular proceeding; and

(k) Take any other action consistent with the Act and this chapter.

**§ 2.1211 Participation by a person not a party.**

(a) The presiding officer may permit a person who is not a party to make a limited appearance in order to state his or her views on the issues. Limited appearances may be in writing or oral, at the discretion of the presiding officer, and are governed by rules adopted by the presiding officer. A limited appearance statement is not be considered part of the decisional record under § 2.1251(c).

(b) Upon request, the presiding officer shall afford the representative of an interested State, county, municipality, or an agency thereof, a reasonable opportunity to participate in a proceeding conducted under this Subpart, including an opportunity to make written and oral presentations in accordance with §§ 2.1233, 2.1235, without requiring the representative to take a position with respect to the issues. Participants under this subsection may notice an appeal of an initial decision in accordance with § 2.1253 with respect to any issue on which they participate.

**§ 2.1213 Role of the NRC staff.**

If a hearing request is filed under § 2.1205(b), the NRC staff shall be party to the proceeding. If a hearing request is filed under § 2.1205(c), within ten (10) days of the designation of a presiding officer pursuant to § 2.1207 the NRC staff shall notify the presiding officer whether or not the staff desires to participate as a party to the adjudication. Thereafter, upon a determination by the presiding officer that the resolution of any issue in the proceeding would be aided materially by staff's participation in the proceeding as a party, the presiding officer may order or permit the NRC staff to participate as a party with respect to that particular issue.

**§ 2.1215 Appearance and practice.**

(a) Representation by an attorney-at-law is not necessary in order for an individual, an organization, or a § 2.1211(b) participant to appear in an adjudication conducted under this subpart. If the representative of an organization is not an attorney-at-law, he or she must be a member or officer of the organization represented. Upon request of the presiding officer, an individual acting as a representative shall provide appropriate information establishing the basis of his or her authority to act in a representational capacity.

(b) Any action to reprimand, censure, or suspend a party, a § 2.1211(b) participant, or the representative of a party or a § 2.1211(b) participant must be in accordance with the procedures in § 2.713(c).

**Hearings**

**§ 2.1231 Hearing file; prohibition on discovery.**

(a) Within thirty (30) days of the presiding officer's entry of an order granting a request for a hearing, the NRC staff shall file and make available to the presiding officer, the applicant, and any other party to the proceeding a hearing file. Thereafter, within ten (10) days of the date a petition for leave to intervene or a request to participate under § 2.1211(b) is granted, the NRC staff shall make the hearing file available to the petitioner or the participant. The hearing file also shall be made available for public inspection and copying during regular business hours at the NRC Public Document Room in Washington, DC, and at any appropriate local public document room. In the event no appropriate local public document room exists, the applicant must make the hearing file available for public inspection and copying during regular business hours at a location in the vicinity of the principal location where the nuclear material that is the subject of the application will be possessed.

(b) The hearing file will consist of the application and any amendment thereto, any NRC environmental impact statement or assessment relating to the application, and any NRC report or any correspondence between the applicant and the NRC that is relevant to the application. The presiding officer will rule upon any issue regarding the

appropriate materials for the hearing file.

(c) The NRC staff has a continuing duty to keep the hearing file up to date with respect to the materials set forth in paragraph (b) of this section.

(d) A party may not seek discovery from any other party, § 2.1211(b) participant, or the NRC or its personnel, whether by document production, deposition, interrogatories, or otherwise.

**§ 2.1233 Written presentations; written questions.**

(a) At such time or times and in such sequence as the presiding officer may establish after publication of a notice of hearing in accordance with § 2.1205(i) and after the NRC staff has made the hearing file available in accordance with § 2.1231, the parties shall submit, under oath or affirmation, written presentations of their arguments and documentary data, informational material, and other supporting written evidence. The presiding officer also may, on his or her initiative, submit written questions to the parties to be answered in writing, under oath or affirmation, and supported by appropriate documentary data, informational material, or other written evidence.

(b) In a hearing initiated under § 2.1205(b), the initial written presentation of the applicant that is issued a notice of proposed denial or a notice of denial must describe in detail any deficiency or omission in the agency's denial or proposed denial of its application and what relief is sought with respect to each deficiency or omission.

(c) In a hearing initiated under § 2.1205(c), the initial written presentation of a party that requested a hearing or petitioned for leave to intervene must describe in detail any deficiency or omission in the license application with references to any particular section or portion of the application considered deficient, give a detailed statement of reasons why any particular section or portion is deficient or why an omission is material, and describe in detail what relief is sought with respect to each deficiency or omission.

(d) A party making an initial written presentation under this section must submit with its presentation or identify by reference to a generally available publication or source, such as the hearing file, all documentary data, informational material, or other written evidence upon which it relies to support or illustrate each omission or deficiency complained of. Thereafter, additional documentary data, informational material, or other written evidence can be submitted or referenced by any party, other than the NRC staff, or any § 2.1221(b) participant in a written presentation or in response to a written question only as the presiding officer, in his or her discretion, permits.

(e) Strict rules of evidence will not apply to written submission under this section, but the presiding officer may, on motion or on the presiding officer's own initiative, strike any portion of a written presentation or a response to a written question that is cumulative, irrelevant, immaterial, or unreliable.

**§ 2.1235 Oral presentations; oral questions.**

(a) Upon a determination that it is necessary for the creation of an adequate record for decision, in his or her discretion the presiding officer may allow or require oral presentations by the parties or pose questions orally to witnesses. The presiding officer may impose appropriate time limits on oral presentations and may entertain and pose questions to witnesses proposed by any party or allow a sponsoring party to pose any particular question or line of questions the presiding officer finds are appropriate.

(b) Oral presentations and responses to oral questioning to be relied upon as oral evidence must be given under oath or affirmation. All oral presentations or oral questioning must be stenographically reported and, unless the presiding officer orders otherwise, must be public.

(c) Strict rules of evidence will not apply to oral submissions under this section, but the presiding officer may, on motion or on the presiding officer's own initiative, strike any portion of an oral presentation or a response to oral questioning that is cumulative, irrelevant, immaterial or unreliable.

**§ 2.1237 Consideration of Commission rules and regulations in informal adjudications.**

(a) Except as provided in paragraph (b) of this section, any regulation of the Commission issued in its program for the licensing and regulation of production and utilization facilities, source material, special nuclear material, or byproduct material may not be challenged in any adjudication subject to this subpart.

(b) A party to an adjudication subject to this subpart may petition that the application of a Commission regulation specified in paragraph (a) of this section be waived or an exception made for the particular proceeding. The sole ground for such a request for waiver or exception must be that special circumstances exist such that application of the regulation to the subject matter of the proceeding would not serve the purposes for which the regulation was adopted. In the absence of a prima facie showing of special circumstances, the presiding officer may not further consider the matter. If the presiding officer determines that a prima facie showing has made, he or she shall certify directly to the Commission itself for determination the matter of whether special circumstances support a waiver or an exception. The Commission's determination shall be made after such further proceedings as the Commission deems appropriate.

**§ 2.1239 Settlement of materials licensing proceedings.**

The fair and reasonable settlement of proceedings subject to this subpart is encouraged. A settlement must be approved by the presiding officer or Atomic Safety and Licensing Appeal Board, as appropriate, in order to be binding in the proceeding.

**Initial Decision, Commission Review, and Final Decision**

**§ 2.1251 Initial decision and its effect.**

(a) Unless the Commission directs that the record be certified to it in accordance with paragraph (b) of this section, the presiding officer shall render an initial decision after completion of an informal hearing under this subpart. That initial decision constitutes the final action of the Commission forty-five (45) days after the date of issuance, unless an appeal is taken in accordance with § 2.1253.

(b) The Commission may direct that the presiding officer certify the record to it without an initial decision and may omit an initial decision and prepare a final decision upon a finding that due and timely execution of its functions so requires.

(c) An initial decision must be in writing and must be based only upon information in the record or facts officially noticed. The record must include all information submitted in the proceeding with respect to which all parties have been given reasonable prior notice and an opportunity to comment. The initial decisioin will include—

(1) Findings, conclusions, and rulings, with the reasons or basis for them, on all material issues of fact, law, or discretion presented on the record;

(2) The appropriate ruling, order, or denial of relief with its effective date; and

(3) The time within which appeals to the decision and a brief in support of those appeals may be filed, the time

within which briefs in support of or in opposition to appeals filed by another party may be filed, and the date when the decision becomes final in the absence of an appeal.

(d) Matters not put into controversy by the parties may not be examined and decided by the presiding officer or the Atomic Safety and Licensing Appeal Board. If the presiding officer or the Appeal Board believes that a serious safety, environmental, or common defense and security matter exists that has not been placed in controversy, the presiding officer or the Appeal Board promptly shall advise the Commission of the basis for that view, and the Commission may take appropriate action.

**§ 2.1253 Appeals from initial decisions.**

Parties and § 2.1211(b) participants may appeal from an initial decision under this subpart in accordance with the procedures set out in §§ 2.762 and 2.763.

**§ 2.1255 Review by the Atomic Safety and Licensing Appeal Board.**

The Commission authorizes the Atomic Safety and Licensing Appeal Board to exercise the authority and carry out the review functions to be performed under §§ 2.1205(n), 2.1209(d), and 2.1253.

**§ 2.1257 Review of decisions and actions of an Atomic Safety and Licensing Appeal Board.**

The Commission will not entertain any petition for review of decision or action of an Atomic Safety and Licensing Appeal Board under this subpart. Commission review is available only on the Commission s own motion issued within forty (40) days after the date of a decision or action by the Appeal Board under § 2.1255. Commission review will be conducted in accordance with such procedures as the Commission deems appropriate. Absent Commission review, the decision of the Appeal Board constitutes the final action of the Commission.

**§ 2.1259 Final decision; petition for reconsideration.**

(a) Commission or Atomic Safety and Licensing Appeal Board action to render a final decison must be in accordance with § 2.770.

(b) The provisions of § 2.771 govern the filing of petitions for reconsideration.

**§ 2.1261 Authority of the Secretary to rule on procedural matters.**

The Secretary or the Assistant Secretary may rule on procedural matters relating to proceedings conducted by the Commission itself under this subpart to the same extent they can do so under § 2.772 for proceedings under Subpart G.

**§ 2.1263 Stays of NRC staff licensing actions and decisions of a presiding officer, an Atomic Safety and Licensing Appeal Board or the Commission, pending hearing or review.**

Applications for a stay of any decision or action of the Commission, a presiding officer, or an Atomic Safety and Licensing Appeal Board or any action by the NRC staff in issuing a license in accordance with § 2.1205(l) are governed by § 2.788, except that any request for a stay of staff licensing action pending completion of an adjudication under this subpart must be filed at the time a request for a hearing or petition to intervene is filed or within ten (10) days of the staff's action, whichever is later.

Dated at Washington, DC, this 21st day of May, 1987.

For the Nuclear Regulatory Commission.
Samuel J. Chilk,
*Secretary of the Commission.*

## FEDERAL TRADE COMMISSION

**16 CFR Part 13**

**[Docket 9154]**

**Volkswagen of America, Inc., et al.; Proposed Consent Agreement With Analysis To Aid Public Comment; Correction**

**AGENCY:** Federal Trade Commission.

**ACTION:** Proposed consent agreement; correction.

**SUMMARY:** This document corrects a Commission document previously published in the **Federal Register** on Wednesday, May 13, 1987, 52 FR 17960. The proposed consent agreement did not include the full text of Attachment B to the proposed order. A portion of the last paragraph of that section was not included (see 52 FR 17972). This notice contains the full text of Attachment B.

**DATE:** Comments will be received until June 16, 1987.

**ADDRESS:** Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, DC 20580.

**FOR FURTHER INFORMATION CONTACT:** FTC/H-238A, Robert M. Doyle, Washington, DC 20580. (202) 326-3114.

**SUPPLEMENTARY INFORMATION:**

**List of Subjects in 16 CFR Part 13**

Arbitration, Automobiles, Trade practices.

Attachment B, which was published at 52 FR 17971-17972, is set forth in full, below:

**Attachment B—Background Statement; Engine Damage from Lack of Oil**

**Notice: Please read the attached "Oil Usage" Background Statement, if this case also involves a claim of excessive oil usage or consumption. It may contain useful facts for this case.**

*Background*

This case may involve an owner's complaint about engine damage from lack of oil in a gasoline-fueled 1974-1979 [Volkswagen] water-cooled engine [Audi Fox or 5000].

Since 1981, the Federal Trade Commission (FTC) and [Volkswagen (VW)] [Volkswagen of America, Inc., the importer of Audi vehicles (Audi)] have been involved in an administrative lawsuit which includes allegations of excessive oil consumption and engine damage from lack of oil in 1974 to 1979 [VW cars with water-cooled gasoline engines] [Audi Fox and 5000 vehicles]. The FTC has alleged that [VW] [Audi] failed to tell consumers about an "abnormally high" number of engines damaged from lack of oil in these vehicles. [VW] [Audi] has denied this claim and has stated that it has at all times provided owners with more than sufficient information to operate and maintain their vehicles safely and economically. [VW] [Audi] and the FTC have now agreed to settle this dispute without further litigation.

As part of their settlement of this dispute, [VW] [Audi] and the FTC have agreed to allow such complaints to be submitted to mediation and arbitration. They have prepared this statement and the attached statement to give consumers, mediators and arbitrators potentially useful background facts. Some of these facts may not be widely known.

*Engine Damage From Lack of Oil*

Like other automobile engines, the [Volkswagen water-cooled] [Audi] engine will be severely damaged if it is run without sufficient lubricating oil circulating within the engine. Engine components which can be damaged in this manner include connecting rods, crankshaft, bearings and the engine block itself.

Whether a particular automobile engine is damaged from lack of oil depends on three factors: the engine's rate of oil consumption, its effective

crankcase capacity, and the intervals at which its oil level is checked and replenished.

Over the life of the engine (100,000 miles or more), the amount of oil consumed by individual 1974–1979 [VW] [Audi] vehicles has varied widely at various times from less than one quart per 7,500 miles (the oil change interval), to more than one quart per 400 miles ([VW's] [Audi's] maximum usage figure (345 miles for the 5000), which was published in 1977–1979 model year vehicle owner's literature).

[Starting with a full crankcase, Rabbit and Scirocco engines can consume approximately three quarts of oil (Dasher—2.5 quarts) without checking and refilling the oil before engine damage becomes an immediate risk. The maximum cruising range of these vehicles per tankful of gasoline, based on EPA mileage estimates, is approximately 275 miles.]

[Starting with a full crankcase, the Audi vehicles can consume approximately the following amounts of oil without checking and refilling the oil before engine damage becomes an immediate risk:

| | |
|---|---|
| Fox | 2.5 quarts. |
| 5000 | 4.1 quarts. |

The approximate maximum distance which these vehicles can be driven per tankful of gasoline, based on EPA mileage estimates, is as follows:

| | |
|---|---|
| Fox | 335 miles. |
| 5000 (1978) | 290 miles. |
| 5000 (1979) | 380 miles. |

During the period 1974–1979 and thereafter, [Volkswagen] [Audi] received reports that a number of engines in its vehicles had been damaged from insufficient oil.

Between 1974 and 1979, [Volkswagen] [Audi] modified the recommendations in its owner's literature that operators of its vehicles check the oil level at periodic intervals as follows:

—1974–76 owner's manuals stated "the engine oil level should be checked from time to time";

—1977–78 owner's manuals stated: "make it a habit to have the engine oil level checked with every second fuel filling";

—1979 owner's manuals stated: "make it a habit to have the engine oil level checked with every fuel filling";

—1978–1979 Warranty and Maintenance booklets repeated the above advice on oil checking intervals and included statements as to the consequences of lack of sufficient engine oil.

[Volkswagen only: Volkswagen sent a letter to owners of 1975–1979 Rabbits and Sciroccos (Dasher owners did not receive this letter) to remind them to check the oil level with every fuel filling. The letter was sent to owners of standard transmission cars in approximately August 1979 and to owners of automatic transmission cars in approximately June 1980. Dealers were also told in August 1979 to attach a sticker reading "Check Engine Oil" around the fuel filler neck under the gas cap of each vehicle they serviced.]

The FTC claims that the information contained in the owner's manuals, [and] maintenance booklets [,] [, letter to consumers, and sticker] was insufficient to alert owners to the risk of serious engine damage from lack of oil. The FTC says that oil consumption in 1974–1979 water-cooled gasoline engines could unexpectedly increase because of deteriorating valve stem seals, and that [VW] [Audi] did not inform owners of this fact. The FTC also says that such an oil consumption increase, if undetected, could lead to severe engine damage from lack of oil, and the FTC claims that [VW] [Audi] did not tell consumers of these facts as well.

[VW] [Audi] says that the information and recommendations in its owner's literature [and communications] were significantly more detailed than those of any other manufacturer and were more than sufficient to prevent any engine damage. [VW] [Audi] denies that oil consumption or valve stem seal performance in its engines was in any way abnormal. [VW] [Audi] says that lubrication-related engine failures were not caused by oil consumption, but by insufficient oil level maintenance, compounded by a large increase in self-service gas stations in the 1970's.

The oil pressure warning light in automobiles is not specifically designed to measure oil level. Therefore, under some operating conditions, the engine may be damaged from low oil level before the oil pressure drops sufficiently to activate the dashboard light.

During the late 1970's, [Volkswagen] [Audi] received reports that some customers who complained of engine damage from lack of oil may have in fact been relying on their dashboard warning lights, rather than their oil dipsticks, to monitor the crankcase oil levels in their cars.

Prior to 1979, all [VW] [Audi] owner's manuals stated that, if the oil pressure warning light comes on while driving, the driver should stop at once, turn the engine off, check the oil level and replenish, if necessary, and not operate the vehicle if the warning light remains on while the engine is restarted. In the 1979 model year, Volkswagen first included additional language, which had not previously appeared in its owner's manuals. This new language stated specifically that the oil pressure warning light is not an oil level indicator and that the dipstick is the proper means of checking the oil level.

*[Volkswagen's] [Audi's] Warranty*

[Volkswagen] [Audi] provides a limited warranty with each new [Volkswagen] [Audi] vehicle sold by one of its dealers. The warranty generally covers any repair and adjustment needed to correct defects in materials and workmanship within the warranty period. However, complaints may occur after the warranty, including complaints of engine damage from lack of oil. A manufacturer's warranty is not necessarily the manufacturer's only responsibility, and should not determine the outcome of this case.

Emily H. Rock,

*Secretary.*

BILLING CODE 6750-01-M

## UNITED STATES INFORMATION AGENCY

## 22 CFR Part 514

[Rulemaking No. 3—Citizenship of Responsible Officers and Sponsorship]

## Exchange Visitor Program; Citizenship of Responsible Officers and Sponsors

**AGENCY:** United States Information Agency.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The United States Information Agency proposes to amend Title 22, Code of Federal Regulations, Part 514 to provide that responsible Officers of designated sponsors be citizens of the United States and that designated sponsors be United States organizations and corporations.

**DATES:** Comments on the proposed rule will be accepted until July 28, 1987. All written communications received on or before the closing date will be considered by the Agency before taking action on a final rule.

**ADDRESS:** Interested persons should submit relevent views or arguments to Merry Lymn, Attorney Advisory, Room 700, United States Information Agency, 301 4th Street SW., Washington, DC 20547, (202) 485–7976.

**FOR FURTHER INFORMATION CONTACT:** Merry Lymn, Attorney Advisor, Room 700, United States Information Agency, 301 4th Street SW., Washington, DC 20547, (202) 485–7976.

**SUPPLEMENTARY INFORMATION:** Three new immigration bills became law in November, 1986: The Immigration Reform and Control Act of 1986, Pub. L. 99–603; The Immigration Marriage Fraud Amendments of 1986, Pub. L. 99–639; and

the Immigration and Nationality Act Amendments of 1986, Pub. L. 99-653.

(The State Department Efficiency Bill).

In light of the concern with immigration procedures, the United States Information Agency is in the process of reviewing the regulations governing the issuance of J-1 visas found at 22 CFR 514. In the course of review, the Agency has discovered that there is no written requirement that Responsible Officers be United States citizens. However, it has been the practice of the Exchange Visitor Facilitative Staff for the past five years to restrict designations to United States citizens. The agency believes that the person signing the Certificate of Eligibility Form IAP-66, as an agent of the United States Government, will better protect its interests, and will have a better understanding of the purposes of the exchange visitor program if he/she is a United States citizen. Likewise United States exchange organizations and corporations will better protect U.S. interests than foreign organizations and corporations.

Accordingly, the Agency proposes to modify the regulations by adding a requirement that the Responsible Officers be United States citizens and that all organizations other than international agencies be incorporated under the laws of the United States. Comments are sought from the Department of the State Consular Affairs and the Immigration and Naturalization Service as well as from the public.

The Agency has determined that this proposed rule is "non-major" under criteria set forth in Executive Order 12291. The rule not have an annual effect on the economy of $100 million or more; nor will it result in a major increase in costs or prices for consumers, individual industries, Federal, State or Local government agencies, or geographic regions. Furthermore, competition, employment investment, productivity, innovation, and the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets will not be adversely affected.

**List of Subjects in 22 CFR Part 514**

Cultural exchange programs.

The United States Information Agency proposes to amend the Regulations in Chapter V Part 514 of Title 22, Code of Federal Regulations as set forth below.

**PART 514—[AMENDED]**

1. The authority citation for 22 CFR Part 514 is revised as follows:

**Authority:** U.S. Information and Educational Exchange Act of 1948, as amended, Pub. L. 80-402, as amended (22 U.S.C. 1431-1443); Mutual Educational and Cultural Exchange Act of 1961, as amended, Pub. L. 87-256, 75 Stat. 527, 534, 535 (8 U.S.C. 1101, 1104, 1182, 1258 and 22 U.S.C. 2451-2460); Pub. L. 97-241, 96 Stat. 291; 66 Stat. 166, 182, 184, 204 (8 U.S.C. 1101(a)(15)(j), 1182(e), 1182(j), 1258); Pub. L. 91-225, 84 Stat. 116, 117, (8 U.S.C. 1101, 1182); Pub. L. 97-116, 96 Stat. 1611, 1612, 1613 (8 U.S.C. 1101, 1182); Reorg. Plan No. 2 of 1977; E.O. 12048 of March 27, 1978; USIA Delegation Order No. 85-5 (50 FR 27393).

2. Section 514.1 is amended by revising the definitions of "Responsible Officer" and "Spondor" as set forth below.

**§ 514.1 Definitions.**

* * * * *

"Responsible Officer" means the official of an organization sponsoring an Exchange-Visitor Program who has been listed with the Agency as being responsible for administering the program and carrying out the obligations which the organization assumes in undertaking to sponsor a program (see § 514.14). The designation of an Alternate Responsible Officers is permitted and encouraged. The Responsible Officer and all Alternate Responsible Officers must be United States citizens.

"Sponsor" means any reputable U.S. agency or organization or recognized international agency or organization having U.S. membership and offices which makes application as hereinafter prescribed to the Director for designation of a program under its sponsorship as an Exchange-Visitor Program and whose application is approved. Other corporations or organizations which are not incorporated under United States law may not be designated as a sponsor.

BILLING CODE 8230-01-M

---

**DEPARTMENT OF DEFENSE**

**Office of the Secretary**

**32 CFR Part 199**

**[DoD 6010.8-R, Amdt.]**

**Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Active Duty Dependents Dental Plan**

**AGENCY:** Office of the Secretary, DoD.

**ACTION:** Proposed amendment to rule.

**SUMMARY:** This proposed rule would amend Part 199 of Title 32, the Regulation which implements CHAMPUS programs, by adding a new section to implement Chapter 55, Title 10, section 1076a U.S.C., which authorizes the Active Duty Dependent Dental Plan. The proposed rule defines the benefits and eligibility requirements, provides for insurance or prepayment contracting for benefit administration and payment, provides for Government and uniformed Services member sharing in the cost of premiums for the insurance or prepayment contract, defines authorized providers, provides for benefit communications and implementation, establishes alternative delivery systems criteria and requirements, and provides an appeals procedure. Eligibility for the Program is limited to dependents of active duty members of the Uniformed Services residing in the 50 United States, District of Columbia, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands.

Benefits of the program are limited to diagnostic services, oral examinations, scaling deposits from teeth, polishing of teeth, topical application of fluoride to teeth, space maintenance, minor palliative emergency services, amalgam and composite restorations, stainless steel crowns for primary teeth, and dental appliance repairs, Benefits are further limited by the limitations and exclusions established for these benefits by the Director, OCHAMPUS or designee to assure quality of care and appropriate cost constraints. Authorized providers are dentists and dental hygienists practicing within the scope of their licenses.

**DATES:** Written comments must be received on or before July 13, 1987.

**ADDRESS:** Office of Civilian Health and Medical Program of the Uniform Services (OCHAMPUS), Policy Division, Aurora, CO 80045-6900.

**FOR FURTHER INFORMATION CONTACT:** Joseph C. Rhea, Policy Division, OCHAMPUS, telephone (303) 361-3278.

**SUPPLEMENTARY INFORMATION:** Chapter 55, title 10, section 1076a U.S.C. provides that "the Secretary of Defense may establish dental benefit plans for spouses and children (as described in section 1072(2)(D) of this title) of members of the uniformed services who are on active duty for a period of more than 30 days." This provision further requires that enrollment of participants be voluntary "and include provisions for premium-sharing between the Department of Defense and members

enrolling in the program." The law also specifies that the "member's share of the premium shall be paid by deductions from the basic pay of the member."

Eligibility is further limited by Congressional guidance to dependents of active duty members residing within the continental United States. We believe that a reasonable interpretation of this limitation should include the 50 states and the District of Columbia for reasons of equity among active duty dependents residing within the United States. In addition, active duty members' dependents residing in Puerto Rico have been included because of its Commonwealth status and the consistency of requirements for the practice of dentistry in that Commonwealth with the requirements of the 50 states and the District of Columbia. Finally, the U.S. Virgin Islands have been included because of its proximity to the Commonwealth of Pureto Rico, conformance of dental practice with the requirements of the United States, and the lack of Uniformed Services dental facilities in the Virgin Islands.

Two categories of dental benefits are provided:

"(1) Diagnostic, oral examination, and preventive services and palliative emergency care: and (2) basic restorative services of amalgam and composite restorations and stainless steel crowns for primary teeth, and dental appliance repairs."

The procedure coding and nomenclature for dental services established by the American Dental Association and commonly used by dental insurance and prepayment plans provides an appropriate basis for identifying the services which are proposed for inclusion in the benefit structure within the constraints of the intent of section 1076a and the level of appropriations provided for the dental plan. To assure quality of care and reasonable cost constraints within level of benefits, we believe it is necessary to permit the dental insurer or dental plan to use its expertise in proposing specific limitations and exclusions on the benefit plan to the Director, OCHAMPUS or designee for approval prior to implementation of the benefits.

Voluntary enrollment is provided for initially by permitting active duty members to decline enrollment of their dependents during a period of 90 days prior to the start of benefits on August 1, 1987. Active duty members may also disenroll their dependents when they transfer to a different duty station in a different locality from that in which they enrolled if dental care is provided to the member's dependents at a uniformed services dental facility or by another dental plan provided through the spouse's employment. Provisions are made for termination of benefits in instances required by military justice decisions. In all other cases, enrollment is for a minimum period of two years. Members who have declined enrollment may elect to enroll their dependents at any time for the minimum of two years subject to the exceptions identified above.

Provisions have been included to assure access to participating providers. Participating providers will be paid directly by the insurers and are paid at a percentile level of statewide and regional prevailing fees above nonparticipating providers adequate to produce an effective financial incentive for participation. Lists of participating providers will also be made available at most uniformed services installations to assist beneficiaries in selecting their civilian dentists. Nonparticipating providers will be paid at not less than the 50th percentile of the statewide or regional prevailing fees.

The Director, OCHAMPUS or designee may establish or use existing alterntive delivery systems for dental care, such as preferred provider organizations or similar provider-based or subcontractor-based agreements. If the alternative delivery system uses a discounted fee arrangement, the discount negotiated by the alternative delivery organization for all dental services must be made available to beneficiaries of this program. This provision helps attract beneficiaries to these organizations, which have additional criteria applied to assure quality of care and beneficiary satisfaction, and helps the Government assure beneficiaries of reasonable prices for all their dental services.

Some state laws require that dental alternative delivery systems be provided with beneficiaries having a choice between them and providers who elect not to participate in these arangements. Where this is the case, the use of alternative delivery systems by this program will generally comply with the state requirement.

In localities in other states, the insurer may elect to provide the same choice, or to establish the alternative delivery system with sufficient providers electing to participate to assure good quality and convenient access for beneficiaries, and to recognize only those providers in the alternative delivery system as authorized providers for payment under the program. Where only the alternative delivery system is to be recognized for payment under the program, those beneficaries who had established a patient relationship with a dentist prior to the decision to use the alternative delivery system could continue to receive benefit payments for services rendered by that dentist even if the dentist decided not to participate in the alternative delivery system. Use of an alternative delvery system is at the option of the insurer subject to approval by the government based on its evaluation that the proposed alternative delivery system meets the criteria established in the contract for beneficiary access, adequate capacity, and reduced cost.

To assist the beneficiary, provider, insurer, and the Government in communications regarding the program, the Director, OCHAMPUS or designee will develop and distribute a dental benefits brochure. This brochure will be used by all parties as the principal source of information concerning program benefits. In addition, it will be used by the insurer as the primary reference or policy in accordance with the law and regulation in the adjudication of claims.

Appeals provisions are provided where the member or beneficiary believes benefits of the program have been denied to the beneficiary by the insurer, and where the provider has been initially denied or subsequently removed by the insurer as an authorized provider. The appeals provisions provide for a reconsideration and decision by the insurer concerning a benficiary's or provider's complaint prior to initiation of an appeal. The reconsideration decision is final if the issue is (1) a benefit denial in the amount of less than $50, or (2) a request for formal review has not been received by OCHAMPUS within 60 days of the date of the notice of reconsideration determination containing the offer of appeal rights. In all other cases, the appealing party may request a formal review of the matter by OCHAMPUS, expcept that a requirement of law or regulation, or benefit exclusion and limitation approved in compliance with law and regulation shall be denied as a matter for formal review.

In summary, this proposed amendment to the part implements a new dental benefit program for dependents of active duty members of the uniformed services. The amendment proposes to implement the program by contracting with a dental insurer or dental prepayment organization to provide a premium-based benefit program in accordance with section 1076a of Chapter 55, Title 10 U.S.C. The proposed amendment provides for an insurance, service, or prepayment plan

which functions in a manner consistent with the law and the practices and benefits of dental care plans purchased by private sector employers. We believe the result of the provisions of this amendment will assure good service to its beneficiaries and minimum intrusion by the government into the available arrangements for effective and high quality delivery of the dental plan benefits.

The amendment is being published for proposed rulemaking at the same time as it is being coordinated with the Department of Defense, Department of Health and Human Services, Department of Transportation, and with other interested agencies in order that consideration of both internal and external comments and publication of the final rulemaking document can be expedited.

**List of Subjects in 32 CFR Part 199**

Dental insurance, Military personnel.

**PART 199—[AMENDED]**

Accordingly, it is proposed to amend 32 CFR Part 199 as follows:

1. The authority citation for Part 199 is revised to read as follows:

**Authority:** 10 U.S.C. 1076a, 1079, 1086; 5 U.S.C. 301.

2. Section 199.13 is added to read as follows:

**§ 199.13 Active duty dependents dental plan.**

(a) *General provisions—(1)* Purpose. This section prescribes guidelines and policies for the delivery and administration of the Active Duty Dependents Dental Plan of the Uniformed Services for the Army, the Navy, the Air Force, the Marine Corps, the Coast Guard, the Commissioned Corps of the U.S. Public Health Service (USPHS), and the Commissioned Corps of the National Oceanic and Atmospheric Administration (NOAA).

(2) *Applicability*—(i) *Geographic.* This section is applicable geographically within the 50 States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands.

(ii) *Agency.* The Provisions of this section apply throughout the Department of Defense (DoD), the Coast Guard, the Commissioned Corps of the USPHS, and the Commissioned Corps of the NOAA.

(3) *Authority and responsibility*—(i) *Legislative authority*—(A) *Joint regulations.* 10 U.S.C. Chapter 55, 1076a authorizes the Secretary of Defense, in consultation with the Secretary of Health and Human Services and the Secretary of Transportation, to prescribe regulations for the administration of the Active Duty Dependents Dental Plan.

(B) *Administration.* 10 U.S.C. Chapter 55 also authorizes the Secretary of Defense to administer the Active Duty Dependents Dental Plan for the Army, Navy, Air Force, and Marine Corps under DoD jurisdiction, the Secretary of Transportation to administer the Active Duty Dependents Dental Plan for the Coast Guard, when the Coast Guard is not operating as a service in the Navy, and the Secretary of Health and Human Services to administer the Active Duty Dependents Dental Plan for the Commissioned Corps of the NOAA and the USPHS.

(ii) *Organizational delegations and assignments.*—(A) *Assistant Secretary of Defense (Health Affairs) (ASD(HA)).* The Secretary of Defense, by 32 CFR Part 367, delegated authority to the ASD(HA) to provide policy guidance, management control, and coordination as required for all DoD health and medical resources and functional areas including health benefit programs. Implementing authority is contained in 32 CFR Part 367. For additional implementing authority see § 199.1 (c) of this part.

(B) *Evidence of eligibility.* The Department of Defense, through the Defense Enrollment Eligibility Reporting System (DEERS), is responsible for establishing and maintaining a listing of persons eligible to receive benefits under the Active Duty Dependents Dental Plan.

(4) *Active duty dependents dental benefits plan.* This is a program of dental benefits provided by the U.S. Government under public law to specified categories of individuals who are qualified for these benefits by virtue of their relationship to one of the seven Uniformed Services, and their voluntary decision to accept enrollment in the program and cost share with the Government in the premium cost of the benefits. The Dependents Dental Plan is an insurance, service, or prepayment plan involving a contract guaranteeing the indemnification or payment of the enrolled member's dependents against a specified loss in return for a premium paid. Where state regulations, charter requirements, or other provisions of state and local regulation governing dental insurance and prepayment programs conflict with Federal law and regulation governing this Program, Federal law and regulation shall govern. Otherwise, this Program shall comply with state and local regulatory requirements.

(5) *Plan funds*—(i) *Funding sources.* The funds used by the Active Duty Dependents Dental Plan are appropriated funds furnished by the Congress through the annual appropriation acts for the Department of Defense and the DHHS and funds collected by the Uniformed Services monthly through payroll deductions as premium shares from enrolled members.

(ii) *Disposition of funds.* Plan funds are paid by the Government as premiums to an insurer, service, or prepaid dental care organization under a contract negotiated by the Director, OCHAMPUS, or a designee, under the provisions of the Federal Acquisition Regulation (FAR).

(iii) *Plan.* The Director, OCHAMPUS or designee provides an insurance policy, service plan, or prepaid contract of benefits in accordance with those prescribed by law and regulation; as interpreted and adjudicated in accord with the policy, service plan, or contract and a dental benefits brochure; and as prescribed by requirements of the dental plan organization's contract with the government.

(iv) *Contracting out.* The method of delivery of the Active Duty Dependents Dental Benefit Plan is through a competitively procured contract. The Director, OCHAMPUS, or a designee is responsible for negotiating, under provisions of the FAR, a contract for dental benefits insurance or prepayment which includes responsibility for (A) development, publication, and enforcement of benefit policy, exclusions, and limitations in compliance with the law, regulations, and the contract provisions; (B) adjudicating and processing claims; and conducting related supporting activities, such as eligibility verification, provider relations, and beneficiary communications.

(6) *Role of Health Benefits Advisor (HBA).* The HBA is appointed (generally by the commander of a Uniformed Services medical treatment facility) to serve as an advisor to patients and staff in matters involving the Active Duty Dependents Dental Plan. The HBA may assist beneficiaries or sponsors in applying for benefits, in the preparation of claims, and in their relations with OCHAMPUS and the dental plan insurer. However, the HBA is not responsible for the plan's policies and procedures and has not authority to make benefits determinations or obligate the plan's funds. Advice given to beneficiaries as to determination of benefits or level of payment is not binding on OCHAMPUS or the insurer.

(7) *Disclosure of information to the public.* Records and information acquired in the administration of the

Active Duty Dependents Dental Plan are records of the Department of Defense and may be disclosed in accordance with 32 CFR Parts 286 and 286a, constituting the applicable DoD Directives and DoD Regulations implementing the Freedom of Information and the Privacy Acts.

(8) *Equality of benefits.* All claims submitted for benefits under the Active Duty Dependents Dental Plan shall be adjudicated in a consistent, fair, and equitable manner, without regard to the rank of the sponsor.

(9) *Coordination of benefits.* The dental plan insurer shall conduct coordination of benefits for the Active Duty Dependents Dental Plan in accordance with generally accepted business practices.

(10) *Information on participating providers.* The Director, OCHAMPUS or designee, shall develop and make available to Uniformed Services Health Benefits Advisors and military installation personnel centers copies of lists of participating providers and providers accepting assignment for all localities with significant numbers of dependents of active duty members. In addition, the Director, OCHAMPUS or designee, shall respond to inquiries regarding availability of participating providers in areas not covered by the lists of participating providers.

(b) *Definitions.* For most definitions applicable to the provisions of this section, refer to § 199.2. The following definitions apply to this section.

*Assignment.* Acceptance by a nonparticipating provider of payment directly from the insurer while reserving the right to charge the beneficiary or sponsor for any remaining amount of the fees for services which exceeds the prevailing fee allowance of the insurer.

*Authorized Provider.* A dentist or dental hygienist specifically authorized to provide benefits under the Active Duty Dependents Dental Plan in paragraph (f) of this section.

*Beneficiary.* A dependent of an active duty member who has been enrolled in the Active Duty Dependents Dental Plan, and has been determined to be eligible for benefits, as set forth in paragraph (c) of this section.

*Beneficiary Liability.* The legal obligation of a beneficiary, his or her estate, or responsible family member to pay for the costs of dental care of treatment received. Specifically, for the purposes of services and supplies covered by the Active Duty Dependents Dental Plan, beneficiary liability includes cost-sharing amounts for restorative services, and, any amount above the prevailing fee determination by the insurer for either preventive or restorative services where the provider selected by the beneficiary is not a participating provider or a provider within an approved alternative delivery system. Beneficiary liability also includes any expenses for services and supplies not covered by the Active Duty Dependents Dental Benefit Plan, less any discount provided as a part of the insurer's agreement with an approved alternative delivery system.

*By report.* Dental procedures which are authorized as benefits only in unusual circumstances requiring justification of exceptional conditions related to otherwise authorized procedures. For example, a house call might be justified based on an enrolled dependent's severe handicap which prevents visits in the dentist's office for traditional prophylaxis. Alternatively, additional drugs might be required separately from an otherwise authorized procedure because of an emergent reaction caused by drug interaction during the performance of a restoration procedure. These services are further defined in paragraph (e) of this section.

*Cost-Share.* The amount of money for which the beneficiary (or sponsor) is responsible in connection with otherwise covered dental services (other than disallowed amounts) as set forth in paragraphs (d) (6) and (e) of this section. Cost-sharing may also be referred to as "co-payment."

*Defense Enrollment Eligibility Reporting System (DEERS).* The automated system that is composed of two phases:

(1) Enrolling all active duty and retired service members, their dependents, and the dependents of deceased service members, and

(2) Verifying their eligibility for health care benefits in the direct care facilities and through the Active Duty Dependents Dental Plan.

*Dental hygienist.* Practitioner in rendering complete oral prophylaxis services, applying medication, performing dental radiography, and providing dental education services with an associate degree or bachelor's degree in the field, and licensed by an appropriate authority. Most, but not all, state laws require services to be performed under the supervision of a dentist.

*Dentist.* Doctor of Dental Medicine (D.M.D.) or Doctor of Dental Surgery (D.D.S.) who is licensed to practice dentistry by an appropriate authority.

*Diagnostic services.* Cateogory of dental services including (1) clinical oral examinations, (2) rediographic examinations, and (3) diagnostic laboratory tests and examinations provided in connection with other dental procedures authorized as benefits of the Active Duty Dependents Dental Plan and further defined in paragraph (e) of this section.

*Emergency palliative services.* Minor procedures performed for the immediate relief of pain and discomfort as further defined in paragraph (e) of this section. This definition excludes those procedures other than minor palliative services which may result in the relief of pain and discomfort, but constitute the usual initial stage or conclusive treatment in procedures not otherwise defined as benefits of the Active Duty Dependent Dental Plan.

*Initial Determination.* A formal written decision on an Active Duty Dependents Dental Plan claim, a request by a provider for approval as an authorized provider, or a decision disqualifying or excluding a provider as an authorized provider under the Active Duty Dependent Dental Plan. Rejection of a claim or a request for benefit or provider authorization for failure to comply with administrative requirements, including failure to submit reasonably requested information, is not an initial determination. Responses to general or specific inquiries regarding Active Duty Dependent Dental Plan benefits are not initial determinations.

*Laboratory and Pathological Services.* Laboratory and pathological examinations (including machine diagnostic tests that produce hard-copy results) ordered by a dentist when necessary to, and rendered in connection with other covered dental services.

Note.—Claims for enrolled Active Duty Dependent Dental Plan beneficiaries whose sponsor is classified as MIA are processed as dependents of an active duty service member.

*Nonparticipating provider.* A dentist or dental hygienist that furnished dental services to an Active Duty Dependents Dental Plan beneficiary, but who has not agreed to participate or to accept the insurer's fee allowances and applicable cost share as the total charge for the services. A nonparticipating provider looks to the beneficiary or sponsor for final responsibility for payment of his or her charge, but may accept payment (assignment of benefits) directly from the insurer or assist the beneficiary in filing the claim for reimbursement by the contractor. Where the nonparticipating provider does not accept payment directly from the insurer, the insurer pays the beneficiary or sponsor, not the provider.

*Participating Provider.* A dentist or dental hygienist who has agreed to accept the insurer's prevailing fee

allowances or other fee arrangements as the total charge (even though less than the actual billed amount), including provision for payment to the provider by the beneficiary (or sponsor) of the twenty percent cost-share for restorative services by the beneficiary (or sponsor).

*Party to a Hearing.* An appealing party or parties, the insurer, and OCHAMPUS.

*Party to the Initial Determination.* Includes the Active Duty Dependents Dental Plan, a beneficiary of the Active Duty Dependents Dental Plan and a participating provider of services whose interests have been adjudicated by the initial determination. In addition, a provider who has been denied approval as an authorized Active Duty Dependents Dental Plan provider is a party to that initial determination, as is a provider who is disqualified or excluded as an authorized provider, unless the provider is excluded under another federal or federally funded program. See paragraph (h) of this section for additional information concerning parties not entitled to administrative review under the Active Duty Dependents Dental Plan appeals procedures.

*Preventive Services.* Traditional prophylaxis including scaling deposits from teeth, polishing teeth, and topical application of fluoride to teeth as further defined in paragraph (e) of this section.

*Provider.* A dentist or dental hygienist as specified in paragraph (f) of this section.

*Representative.* Any person who has been appointed by a party to the intitial determination as counsel or advisor and who is otherwise eligible to serve as the counsel or advisor of the party to the initial determination, particularly in connection with a hearing.

*Restorative services.* Restoration of teeth including those procedures commonly described as amalgam restorations, resin restorations, pin retention, and stainless steel crowns for primary teeth as further defined in paragraph (e) of this section.

(c) *Enrollment and eligibility*—(1) *General.* Sections 1076a and 1072(2)(D) of 10 U.S.C., Chapter 55 set forth those persons who are eligible for voluntary enrollment in the Active Duty Dependents Dental Benefit Plan. A determination that a person is eligible for voluntary enrollment does not entitle such person automatically to benefit payments. The active duty member must enroll his or her dependents as defined in this section, and other sections of this part set forth additional requirements that must be met before eligibility for the plan is extended.

(2) *Persons eligible—Dependent.* A person who bears one of the following relationships to an active duty member (under a call or order that does not specify a period of 30 days or less).

(i) *Spouse.* A lawful husband or wife, regardless of whether or not dependent upon the active duty member.

(ii) *Child.* To be eligible, the child must be unmarried and a member of one of the classes set forth in paragraph (c)(2)(i)(B)(*1*) of this section and also meet the requirements of paragraph (c)(2)(i)(B)(*2*) of this section.

(A) A legitimate child.

(B) An adopted child whose adoption has been completed legally.

(3) A legitimate stepchild.

(4) An illegitimate child of a male member whose paternity has been determined judicially, or an illegitimate child of record of a female member who has been directed judically to support the child.

(5) An illegitimate child of a male active duty member whose paternity has not been determined judicially, or an illegitimate child of record of a female active duty member who (i) resides with or in a home provided by the member and (ii) is and continues to be dependent upon the member for over 50 percent of his or her support.

(6) An illegitimate child of the spouse of an active duty member (that is, the active duty member's stepchild) who (i) resides with or in a home provided by the active duty member or the parent who is the spouse of the member and (ii) is and continues to be dependent upon the member for over 50 percent of his or her support.

(7) In addition to meeting one of the criteria in paragraph (c) (1) through (6) of this section, the child:

(i) Must not be married.

(ii) Must be in one of the following three age groups:

(A) Not passed his or her 21st birthday.

(B) Passed his or her 21st birthday, but incapable of self-support because of a mental or physical incapacity that existed before his or her 21st birthday and dependent on the member for over 50 percent of his or her support. Such incapacity must be continuous. If the incapacity significantly improves or ceases at any time after age 21, even if such incapacity recurs subsequently, eligibility cannot be reinstated on the basis of the incapacity. If the child was not handicapped mentally or physically at his or her 21st birthday, but becomes so incapacitated after that time, no eligibility exists on the basis of the incapacity.

(C) Passed his or her 21st birthday, but not his or her 23rd birthday, dependent upon the member for over 50 percent of his or her support, and pursuing a full-time course of education in an institution of higher learning approved by the Secretary of Defense or the Department of Education (as appropriate) or by a state agency under 38 U.S.C., Chapter 34 and 35).

Note.—Courses of education offered by institutions listed in the "Education Directory, Part 3, Higher Education" or "Accredited Higher Institutions," issued periodically by the Department of Education meet the criteria approved by the Secretary of Defense or the Department of Education, (refer to § 199.3(b)(2)(iv)(C)(*1*) of this section). For determination of approval of courses offered by a foreign institution, by an institution not listed in either of the above directories, or by an institution not approved by a state agency pursuant to Chapter 34 and 35 of 38 U.S.C., a statement may be obtained from the Department of Education, Washington, DC 20202.

(3) *Enrollment.*—(i) *Initial enrollment.* Eligible dependents of members on active duty status as of August 1, 1987 are automatically enrolled in the Active Duty Dependents Dental Benefit Plan, except where any of the following conditions apply: (A) Active duty member is serving an initial enlistment term with less than two years of active duty remaining, except that such members' dependents may be enrolled during the initial enrollment period for benefits beginning August 1, 1987 provided that the member has at least six months remaining in the initial enlistment term. Enrollment of dependents must be for a period of two years, and the active duty member serving an initial enlistment period with less than two years remaining (subject to the initial enrollment exception) does not qualify for enrollment of his or her dependents until a contractual commitment exists for a reenlistment period meeting the two-year minimum enrollment for dental benefits.

(B) Active duty member has completed an election to disenroll his or her dependents form the Active Duty Dependents Dental Plan.

(C) Active duty member has only one dependent who is under four years of age as of August 1, 1987, and the member does not complete an election to enroll the child.

(ii) *Subsequent enrollment.* Eligible active duty members may elect to enroll their dependents for a period of not less than two years, except where any of the conditions in paragraph (c)(3)(i) of this section apply.

(iii) *Inclusive family enrollment.* All eligible dependents of the active duty member must be enrolled if any are enrolled, except that a member may

elect to enroll only those dependents who are remotely located from the member (e.g., a child living with a divorced spouse or a child in college).

(4) *Beginning dates of eligibility*—(i) *Initial enrollment.* The beginning date of eligibility for benefits is August 1, 1987.

(ii) *Subsequent enrollment.* The beginning date of eligibility for benefits is the first day of the month following the month in which the election of enrollment is completed, signed, and received by the active duty member's Service representative, except that the date of eligibility shall not be earlier than September 1, 1987.

(5) *Changes in and termination of enrollment*—(i) *Changes in status of active duty member.* When an active duty member's period of active duty ends for any reason, his or her dependents lose their eligibility as of 12:01 a.m. of the first day of the month following the month in which the active duty ends.

(ii) *Desertion status of active duty member.* Eligibility for the Active Duty Dependent Dental Plan benefits ceases as of 12:01 a.m. of the day following the day a member is placed in desertion status. The member's dependents regain eligibility when the member is returned to military control and base pay is restored. Enrollment is restored for the dependents of the active duty member who has been in desertion status of less than six months by payment of back premiums due, and claims for sevices rendered during the retroactive period status greater than six months are not eligible to be enrolled until one year following the day the member was placed in desertion status. A member serving a sentence of confinement in conjunction with a sentence of a punitive discharge is still considered on active duty until such time as the discharge is executed.

(iii) *Changes in status of dependent*—(A) *Divorce.* A spouse separated from an active duty member by a final divorce decree loses all eligibility based on his or her formal marital relationship as of 12:01 a.m. of the day following the day the divorce becomes final. The eligibility of the member's own children (including adopted and eligible illegitimate children) is unaffected by the divorce. An unadopted stepchild, however, loses eligibility with the termination of the marriage, also as of 12:01 a.m. the day following the day the divorce becomes final.

(B) *Annulment.* A spouse whose marriage to an active duty member is dissolved by annulment loses eligibility as of 12:01 a.m. of the day following the date of court grants the annulment order. The fact that the annulment legally declares the entire marriage void from its inception does not affect the termination date of eligibility. When there are children, the eligibility of the member's own children (including adopted and eligible illegitimate children) is unaffected by the annulment. An unadopted stepchild, however, loses eligibility with the annulment of the marriage, also as of 12:01 a.m. of the day following the day the court grants the annulment order.

(c) *Adoption.* A child of an active duty member who is adopted by a person, other than a person whose dependents are eligible for the Active Duty Dependents Dental Plan benefits while the active duty member is living, thereby severing the legal relationship between the child and the sponsor, loses eligibility as of 12:01 a.m. of the day following the day the adoption becomes final.

(D) *Marriage of child.* A child of an active duty member who marries a person whose dependents are not eligible for the Active Duty Dependents Dental Plan, loses eligibility as of 12:01 a.m. on the day following the day of the marriage. However, should the marriage be terminated by death, divorce, or annulment before the child is 21 years old, the child again becomes eligible for enrollment as a dependent as of 12:01 a.m. of the day following the day of the occurrence that terminates the marriage and continues up to age 21 if the child does not remarry before that time. If the marriage terminates after the child's 21st birthday, there is no reinstatement of eligibility.

(E) *Disabling illness or injury of child age 21 or 22 who has eligibility based on his or her student status.* A child 21 or 22 years old who is pursuing a full-time course of higher education and who, either during the school year or between semesters, suffers a disabling illness or injury with resultant inability to resume attendance at the institution remains eligible for dental benefits for 6 months after the disability is removed or until the student passes his or her 23rd birthday, whichever occurs first. However, if recovery occurs before the 23rd birthday and there is resumption of a full-time course of higher education, dental benefits can be continued until the 23rd birthday. The normal vacation periods during an established school year do not change the eligibility status of a dependent child 21 or 22 years old in full-time student status. Unless an incapacitating condition existed before, and at the time of, a dependent child's 21st birthday, a dependent child 21 or 22 years old in student status does not have eligibility related to mental or physical incapacity as described in § 199.3(b)(2)(iv)(C)(2) of this section.

(iii) *Option to disenroll as a result of a change in active duty station.* When an active duty member makes a change in duty station resulting in a move of his or her dependents to a new locality, the member may elect to disenroll from the Plan if dental care for these benefits is available from a local military dental clinic available to the member's dependents.

(iv) *Option to disenroll as a result of electing other dental insurance coverage.* When an active duty member's dependents become enrolled in another dental insurance plan, the member may elect to disenroll from the Active Duty Dependents Dental Plan. Proof of other dental insurance coverage must be provided to the appropriate Service representative prior to approval of disenrollment.

(v) *Option to disenroll after an initial two-year enrollment.* When an active duty member's enrollment of his or her dependents has been in effect for a continuous period of two years, the member may disenroll his or her dependents at any time. Subsequently, the member may enroll his or her dependents for another minimum period of two years.

(6) *Eligibility determination and enrollment*—(i) *Eligibility determination and enrollment responsibility of Uniformed Services.* Determination of a person's eligibility and processing of enrollment in the Active Duty Dependents Dental Benefit Plan is the responsibility of the active duty member's Uniformed Service. For the purpose of program integrity, the appropriate Uniformed Service shall, upon request of the Director, OCHAMPUS, review the eligibility of a specific person when there is reason to question the eligibility status. In such cases, a report on the result of the review and any action taken will be submitted to the Director, OCHAMPUS, or a designee.

(ii) *Procedures for determination of eligibility.* Uniformed Services identification cards do not distinguish eligibility for the Active Duty Dependents Dental Plan. Procedures for the determination of eligibility are identified in § 199.3(f)(2) of this part, except that Uniformed Services identification cards do not provide evidence of eligibility for the dental plan.

(7) *Evidence of eligibility required.* Eligibility and enrollment in the Active Duty Dependents Dental Plan will be verified through the DEERS (DoD

BEST COPY AVAILABLE

1341.1–M,[1] "Defense Enrollment Eligibility Reporting System (DEERS) Program Manual," May 1982).

(i) *Acceptable evidence of eligibility and enrollment.* Eligibility information established and maintained in the DEERS files is the only acceptable evidence of eligibility.

(ii) *Responsibility for obtaining evidence of eligibility.* It is the responsibility of the active duty member, or Active Duty Dependent Dental Plan beneficiary, parent, or legal representative, when appropriate, to enroll and provide adequate evidence for entry into the DEERS file to establish eligibility for the Active Duty Dependents Dental Plan, and to ensure that all changes in status that may affect enrollment and eligibility are reported immediately to the appropriate Uniformed Service for action. Ineligibility for benefits is presumed in the absence of prescribed enrollment and eligibility evidence in the DEERS file.

(d) *Premium sharing*—(1) *General.* Active duty members enrolling their dependents in the Active Duty Dependents Dental Plan shall be required to pay a share of the premium cost for their dependents.

(2) *Premium classifications.* Premium classifications are established by the Secretary of Defense, or designee, and provide for a minimum of two classifications, single and family.

(3) *Premium amounts.* The premium amounts to be paid for the Active Duty Dependents Dental Plan are established by the Secretary of Defense or designee.

(4) *Proportion of member's premium share.* The proportion of premium share to be paid by the member is established by the Secretary of Defense or designee, at not more than 40 percent of the total premium.

(5) *Pay deduction.* The member's premium share shall be deducted from the basic pay of the member.

(e) *Plan benefits*—(1) *General*—(i) *Scope of benefits.* The Active Duty Dependents Dental Plan provides coverage for certain basic dental diagnostic, minor palliative emergency, preventive, and restorative services to eligible, enrolled dependents of active duty members as set forth in paragraph (c) of this section.

(ii) *Authority to act for the plan.* The authority to make benefit determinations and authorize plan payments under the Active Duty Dependents Dental Plan rests primarily with the insurance, service plan, or prepayment dental plan contractor, subject to compliance with federal law and regulation and government contract provisions. The Director, OCHAMPUS, or designee, provides required benefit policy decisions resulting from changes in federal law and regulations and appeal decisions. No other persons or agents (such as dentists or Uniformed Services health benefits advisors) have such authority.

(iii) *Right to information.* As a condition precedent to the provision of benefits hereunder, the Director, OCHAMPUS or designee shall be entitled to receive information from an authorized provider or other person, institution, or organization (including a local, state, or U.S. Government agency) providing services or supplies to the beneficiary for which claims for benefits are submitted. Such information and records may relate to attendance, testing, monitoring, examination, or diagnosis of dental disease or conditions or treatment rendered; or services and supplies furnished to a beneficiary; and shall be necessary for the accurate and efficient administration and payment of benefits under this plan. Before a determination will be made on a claim of benefits, a beneficiary or active duty member must provide particular additional information relevant to the requested determination, when necessary. The recipient of such information shall in every case hold such records confidential except when—

(A) Disclosure of such information is authorized specifically by the beneficiary;

(B) Disclosure is necessary to permit authorized governmental officials to investigate and prosecute criminal actions; or

(C) Disclosure is authorized or required specifically under the terms of the Privacy Act or Freedom of Information Act (refer to paragraph (a)(7) of this section). For the purpose of determining the applicability of and implementing the provisions of other dental benefits coverage or entitlement, the Director, OCHAMPUS or a designee may release, without consent or notice to any beneficiary or sponsor, to any person, organization, government agency, provider, or other entity, any information with respect to any beneficiary when such release constitutes a routine use published in the Federal Register in accordance with DoD 5400.11–R (Privacy Act (5 U.S.C. 522a)). Before a person's claim of benefits will be adjudicated, the person must furnish to the Director, OCHAMPUS or designee information that reasonably may be expected to be in his or her possession and that is necessary to make the benefit determination. Failure to provide the requested information may result in denial of the claim.

(iv) *Dental insurance policy, prepayment, or dental service plan contract.* The Director, OCHAMPUS or designee shall develop for approval by OCHAMPUS, a standard insurance policy, prepayment agreement, or dental service plan contract designating OCHAMPUS as the policyholder or purchaser The policy shall be in the form customarily employed by the dental plan insurer, subject to its compliance with federal law and the provisions of this Regulation.

(v) *Dental benefits brochure*—(A) *Content.* The Director, OCHAMPUS or designee shall establish a dental benefits brochure explaining the benefits of the plan in common lay terminology. The brochure shall include the limitations and exclusions and other benefit determination rules for administering the benefits in accordance with the law and this part. The brochure shall include the rules for adjudication and payment of claims, appealable issues, and appeal procedures in sufficient detail to serve as a common basis for interpretation and understanding of the rules by providers, beneficiaries, claims examiners, correspondence specialists, employees and representatives of the government bodies, health benefits advisors, and other interested parties.

(B) *Distribution.* The dental benefit brochure shall be printed and distributed with the assistance of the Uniformed Services to all active duty members enrolling their dependents, health benefits advisors, major personnel centers at Uniformed Services installations, and authorized providers of care.

(vi) *Utilization review and quality assurance.* Claims submitted for benefits under the Active Duty Dependents Dental Plan are subject to review by the Director, OCHAMPUS or designee for quality of care and appropriate utilization. The Director, OCHAMPUS or designee is responsible for appropriate utilization review and quality assurance standards, norms, and criteria consistent with the level of benefits.

(vii) *Alternative course of treatment policy.* The Director, OCHAMPUS or designee may establish, in accordance with generally accepted dental benefit practices, an alternative course of treatment policy which provides reimbursement in instances where the dentist and beneficiary select a more expensive service, procedure, or course

[1] Copies may be obtained, if needed, from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

BEST COPY AVAILABLE

of treatment than is customarily provided. The benefit policy must meet the following conditions:

(A) The service, procedure, or course of treatment must be consistent with sound professional standards of dental practice for the dental condition concerned.

(B) The service, procedure, or course of treatment must be a generally accepted alternative for a service or procedure covered by this plan for the dental condition.

(C) Payment for the alternative service or procedure may not exceed the lower of the prevailing limits for the alternative procedure, the prevailing limits or scheduled allowance for the otherwise authorized benefit procedure for which the alternative is substituted, or the actual charge for the alternative procedure.

(2) *Benefits*—(i) *Diagnostic, preventive, and emergency palliative services.* Benefits may be extended for those dental services described as oral examination, diagnostic, emergency minor palliative, and preventive services defined as traditional prophylaxis (i.e., scaling deposits from teeth, polishing teeth, and topical application of fluoride to teeth) when performed directly by dentists or dental hygienists as authorized under paragraph (f) of this section. These services are defined (subject to the dental plan's exclusions, limitations, and benefit determination rules approved by OCHAMPUS and provided in the dental benefits brochure) using the American Dental Association, Council on Dental Plans' Code On Dental Procedures and Nomenclature (6th revision) as follows:

(A) *Diagnostic.* (*1*) Clinical oral examinations including initial (00110), periodic (00120),and emergency (00130).

(*2*) Radiographs appropriate to the diagnosis and prevention of dental disease, where such services are not directly related to non-covered major procedures. Subject to the dental plan's exclusions and limitations approved by OCHAMPUS, these procedures are included within the range of 00210 to 00340.

(*3*) Tests and laboratory examinations appropriate to the diagnosis and prevention of dental disease, where such services are not directly related to non-covered major procedures. These procedures (00410 to 00999) are included, subject ot the dental plan's exclusions and limitations as adopted by OCHAMPUS and provided in the dental benefits brochure.

(B) *Preventive.* (*1*) Dental prophylaxis, including adult 01110) and child 01120).

(*2*) Topical fluoride treatment, including prophylaxis for a child (01201) and an adult 01205), and (where the Director, OCHAMPUS or designee determines to be appropriate) without prophylaxis for a child (01203) and an adult (01204).

(*3*) Space maintenance with passive appliances for those procedures included within the range of 01510 and 01550.

(C) *Emergency palliative.* Minor palliative procedure for immediate and temporary relief of pain and suffering (09110).

(ii) *Restorative.* Benefits may be extended for basic restorative services of amalgam, composite restorations, and stainless steel crowns for primary teeth when performed directly by dentists or dental hygienists, or under orders and supervision by dentists, as authorized under paragraph (f) of this section. These services are defined (subject to the dental plan's exclusions, limitations, and benefit determination rules as adopted by OCHAMPUS and provided in the dental benefits brochure) using the American Dental Association, Council on Dental Plans' Code On Dental Procedures and Nomenclature (6th revision) as follows:

(A) Amalgam restorations, including polishing of one to four surfaces for primary and permanent teeth and included within the range of 02110 and 02161.

(B) Silicate restorations (02210).

(C) Resin restorations (subject to accepted dental practice) of one to four surfaces and included within the range of 02330 and 02387.

(D) Stainless steel crown for primary tooth (02930).

(E) Pin retention (02951).

(iii) *Dental appliance repairs.* Benefits may be extended for repairs to dentures when performed directly by dentists, or under orders and supervision by dentists as authorized under paragraph (f) of this section; subject to the dental plan's exclusions and limitations as adopted by OCHAMPUS and provided in the dental benefits brochure. These procedures are included within the range of 05510 and 05660.

(iv) *Services "By Report."* The following procedures are authorized when performed directly by dentists or dental hygienists only in unusual circumstances requiring justification of exceptional conditions directly related to otherwise authorized procedures. They are generally reserved for use where mental or physical impairements prevent the rendering of otherwise authorized procedures of this dental plan without one or more of these additional services. Use of the procedures may not result in the fragmentation of services normally included in a single procedure. These services are defined (subject to the dental plan's exclusions, limitations, and benefit determination rules as adopted by OCHAMPUS and provided in the dental benefits brochure) using the American Dental Association, Council on Dental Plans' Code On Dental Procedures and Nomenclature (6th revision) as follows:

(A) Local anesthesia (additional where not attendant to restorations or other procedures in which it is normally included—09210).

(B) Consultation (09310).

(C) House call (09440).

(D) Hospital call (09420).

(E) Office visit (after hours—09440).

(F) Drug injection (09610).

(G) Other drugs (09630).

(v) *Exclusion of adjunctive dental care.* Under limited circumstances, benefits are available for dental services and supplies under CHAMPUS when the dental care is medically necessary in the treatment of an otherwise covered medical (not dental) condition, is an integral part of the treatment of such medical condition, and is essential to the control of the primary medical condition; or is required in preparation for or as the result of dental trauma which may be or is caused by medically necessary treatment of an injury or disease (iatrogenic). These benefits are excluded under the Active Duty Dependents Dental Plan. For further information on adjunctive dental care benefits under CHAMPUS, see § 199.4 (e) (10) (i) and (ii) of this part.

(vi) *Benefit limitations and exclusions.* The Director, OCHAMPUS or designee may establish such exclusions and limitations as are consistent with those established by dental insurance and prepayment plans to control utilization and quality of care for the services and items covered by this dental plan. The exclusions and limitations which are established shall be published in the dental benefits brochure.

(3) *Beneficiary or sponsor liability*—(i) *Diagnostic, preventive, and emergency palliative services.* Enrolled dependents of active duty members or their sponsors are responsible for the payment of only amounts for services rendered by nonparticipating providers of care which exceed the equivalent of the statewide or regional prevailing fee levels as established by the insurer. Where the dental plan is unable to identify a participating provider of care within 35 miles of the dependent's place of residence with appointment availability within 21 calendar days, the dental plan will reimburse the

dependent, or sponsor, or the nonparticipating provider selected by the dependent within 35 miles of the dependent's place of residence at the level of the provider's usual fees.

(ii) *Restorative services.* Enrolled dependents of active duty members or their sponsors are responsible for payment of 20 percent of the amounts determined by the insurer for services rendered by participating providers of care or 20 percent of these amounts plus any remainder of the charges made by nonparticipating providers of care. Where the dental plan is unable to identify a participating provider of care within 35 miles of the dependent's place of residence with appointment availability within 21 calendar days, dependents or their sponsors are responsible for payment of 20 percent of the charges made by nonparticipating providers located within 35 miles of the dependent's place of residence.

(iii) *Dental appliance repairs.* Enrolled dependents of active duty members are responsible for payment of the cost sharing amounts as provided in paragraph (e)(4)(ii) of this section.

(iv) *Services "By report."* Enrolled dependents of active duty members or their sponsors are responsible for payment of these services in accordance with their relationship to the otherwise authorized benefit procedures. For example, home visit charges which occur primarily for the purpose of rendering restorative services require payment of the 20 percent, while a home visit for purposes of dental prophylaxis do not require payment of the 20 percent. Payment of any remaining amount in excess of the prevailing charge limits established by the insurer would be required for services rendered by nonparticipating providers in either of the examples given, subject to the exceptions for dependent lack of access to participating providers as provided in paragraph (e)(3) (i) and (ii) of this section.

(v) *Amounts over the dental insurer's established allowances for charges.* It is the responsibility of the dental plan insurer to determine allowable charges for the procedures identified as benefits of this plan. All benefits of the plan are based on the insurer's determination of the allowable charges, subject to the exceptions for lack of access to participating providers as provided in paragraphs (e)(3)(i) and (ii) of this section.

(f) *Authorized providers*—(1) *General.* This section sets forth general policies and procedures that are the basis for the Active Duty Dependents Dental Plan cost sharing of dental services and supplies provided by or under the direct supervision of dentists, and by dental hygienists within the scope of their licensure.

(i) *Listing of provider does not guarantee payment of benefits.* The fact that a type of provider is listed in this section is not to be construed to mean that the Active Duty Dependents Dental Plan will pay automatically a claim for services or supplies provided by such a provider. The Director, OCHAMPUS or designee also must determine if the patient is an eligible beneficiary, whether the services or supplies billed are authorized and medically necessary, and whether any of the authorized exclusions of otherwise qualified providers presented in this section apply.

(ii) *Conflict of interest.* See § 199.9(d)(2)(iv) of this part.

(iii) *Fraudulent practices or procedures.* See § 199.9(c) of this part.

(iv) *Utilization review and quality assurance.* Services and supplies furnished by providers of care shall be subjected to utilization review and quality assurance standards, norms, and criteria established by the dental plan. Utilization review and quality assurance assessments shall be performed by the dental plan consistent with the nature and level of benefits of the plan, and shall include analysis of the data and findings by the dental plan insurer from other dental accounts.

(v) *Provider required.* In order to be considered benefits, all services and supplies shall be rendered by, prescribed by, or furnished at the direction of, or on the order of an Active Duty Dependents Dental Plan authorized provider practicing within the scope of his or her license.

(vi) *Participating provider.* An authorized provider may elect to participate and accept the fee or charge determinations as established and made known to the provider by the dental plan insurer. The fee or charge determinations are binding upon the provider in accordance with the dental plan insurer's procedures for participation. The authorized provider may not participate on a claim-by-claim basis. The participating provider must agree to accept within one day of a request for appointment, beneficiaries in need of emergency palliative treatment. Payment to the participating provider is based on the lower of the actual charge or the insurer's determination of the allowable charge. Payment is made directly to the participating provider, and the participating provider may charge the beneficiary only for the 20 percent cost share of the allowable charge for authorized restorative services in addition to the charges for any services not authorized as benefits.

(vii) *Nonparticipating provider.* An authorized provider may elect for all beneficiaries not to participate and request the beneficiary or sponsor to pay any amount of the provider's billed charge in excess of the dental plan insurer's determination of allowable charges. Neither the government nor the dental plan insurer shall have any responsibility for any amounts over the allowable charges as determined by the dental plan insurer, except where the dental plan insurer is unable to identify a participating provider of care within 35 miles of the dependent's place of residence with appointment availability within 21 calendar days. In such instances of the nonavailability of a participating provider, the nonparticipating provider located within 35 miles of the dependent's place of residence shall be paid his or her usual fees, less the 20 percent cost share for restorative services and related services by report.

(A) *Assignment.* A nonparticipating provider may accept assignment of claims for all beneficiaries by filing the claims completed with the assistance of the beneficiary or sponsor for direct payment by the dental plan insurer to the provider.

(B) *Nonassignment.* A nonparticipating provider for all beneficiaries may request the beneficiary or sponsor to file the claim directly with the dental plan insurer, making arrangements with the beneficiary or sponsor for direct payment by the beneficiary or sponsor.

(2) *Dentists.* Subject to standards of participation provisions of this part, the following are authorized providers of care:

(i) Doctors of Dental Surgery (D.D.S.) having a degree from an accredited school of dentistry, licensed to practice dentistry by a state board of dental examiners, and practicing within the scope of their licenses, whether in individual, group, or clinic practice settings.

(ii) Doctors of Dental Medicine (D.M.D.) having a degree from an accredited school of dentistry, licensed to practice dentistry by a state board of dental examiners, and practicing within the scope of their licenses, whether in individual, group, or clinic practice settings.

(3) *Dental hygienists.* Subject to state licensure laws and standards of participation provisions of this part, dental hygienists having either an associate degree or baccalaureate degree from an accredited school of

dental hygiene, licensed to practice dental hygiene by a state board, and practicing within the scope of their licenses, whether in individual, group, or clinic practice settings. Dental hygienists are not authorized as independent providers of care except in a small number of states where independent practice is included in the state licensure provisions. In all other states, the dental hygienist performs services under the supervision of a dentist.

(4) *Alternative delivery systems*—(i) *General.* Alternative delivery systems may be established by the Director, OCHAMPUS or designee as authorized providers. Only dentists and dental hygienists shall be authorized to provide or direct the provision of authorized services and supplies in an approved alternative delivery system.

(ii) *Defined.* An alternative delivery system may be any approved arrangement for a preferred provider organization, dental health maintenance or clinic organization, or other contracted arrangement which is approved by OCHAMPUS in accordance with requirements and guidelines.

(iii) *Elective or exclusive arrangement.* Alternative delivery systems may be established by contract or other arrangement on either an elective or exclusive basis for beneficiary selection of participating and authorized providers in accordance with contractual requirements and guidelines.

(iv) *Provider election of participation.* Otherwise authorized providers must be provided with the opportunity of applying for participation in an alternative delivery system and of achieving participation status based on reasonable criteria for timeliness of application, quality of care, cost containment, and acceptance of reimbursement allowances.

(v) *Limitation on authorized providers.* Where exclusive alternative delivery systems are established, only providers participating in the alternative delivery system are authorized providers of care. In such instances, the dental plan shall continue to pay beneficiary claims for services rendered by otherwise authorized providers in accordance with established rules for reimbursement of nonparticipating providers where the beneficiary has established a patient relationship with the nonparticipating provider prior to the dental plan's proposal to subcontract with the alternative delivery system.

(vi) *Charge agreements.* Where the alternative delivery system employs a discounted fees-for-service reimbursement methodology or schedule of charges or rates which includes all or most dental services and procedures recognized by the American Dental Association, Council on Dental Care Programs "Code on Dental Procedures and Nonenclature (6th Revision)," the discounts or schedule of charges or rates for all dental services and procedures shall be extended by its participating providers to beneficiaries of the Active Duty Dependents Dental Plan as an incentive for beneficiary participation in the alternative delivery system.

(5) *Billing practices.* The Director, OCHAMPUS, or designee, approves the dental plan's procedures governing the itemization and completion of claims for services rendered by authorized providers to enrolled beneficiaries of the Active Duty Dependents Dental Plan consistent with the insurer's existing procedures for completion and submittal of dental claims for its other dental plans and accounts.

(6) *Reimbursement of authorized providers.* The Director, OCHAMPUS or designee, approves the dental plan methodology for reimbursement of services rendered by authorized providers consistent with law, regulation, and contract provisions, and the benefits of the Active Duty Dependents Dental Plan. The following general requirements for the methodology shall be met, subject to modifications and exceptions approved by the Director, OCHAMPUS or a designee.

(i) Nonparticipating providers (or the dependents or sponsors for unassigned claims) shall be reimbursed at the equivalent of not less than the 50th percentile of prevailing charges made for similar services in the same locality (region) or state, or the provider's actual charge, whichever is lower; less any cost share amount due for restorative services, except where the dental plan insurer is unable to identify a participating provider of care within 35 miles of the dependent's place of residence with appointment availability within 21 calendar days. In such instances of the nonavailability of a participating provider, the nonparticipating provider located within 35 miles of the dependent's place of residence shall be paid his or her usual fees, less the 20 percent cost share for restorative services and related services by report.

(ii) Participating providers shall be reimbursed at the equivalent of a percentile of prevailing charges sufficiently above the 50th percentile of prevailing charges made for similar services in the same locality (region) or state as to constitute a significant financial incentive for participation, or the provider's actual charge, whichever is lower; less any cost share amount due for restorative services.

(g) *Benefit payment*—(1) *General.* Active Duty Dependent Dental Plan benefit payments are made either directly to the provider or to the beneficiary or sponsor, depending on the manner in which the claim is submitted or the terms of the subcontract of an alternative delivery system with the dental plan insurer.

(2) *Benefit payments made to a participating provider.* When the authorized provider has elected to participate in accordance with the arrangement and procedures established by the dental plan insurer, payment is made based on the lower of the actual charge or the insurer's determination of the allowable charge. Payment is made directly to the participating provider as payment in full, less the 20 percent cost share of the allowable charge for any of the restorative services authorized as benefits. The beneficiary or sponsor is responsible only for any required cost-sharing.

(3) *Benefit payments made to a nonparticipating provider.* When the authorized provider has elected not to participate in accordance with the arrangement and procedures established by the dental plan, payment is made by the insurer based on the lower of the actual charge or the insurer's determination of the allowable charge. The beneficiary is responsible for payment of the 20 percent cost-share of the allowable charge for any restorative services authorized as benefits, and any amount of the charge for all services above the allowable charge. Where the dental plan is unable to identify a participating provider of care within 35 miles of the dependent's place of residence with appointment availability within 21 calendar days, dependents or their sponsors are responsible for payment of 20 percent of the charges made by nonparticipating providers located within 35 miles of the dependent's place of residence.

(i) Assigned claims are claims submitted directly by the nonparticipating provider and are paid directly to the provider.

(ii) Nonassigned claims are claims submitted by the beneficiary or sponsor and are paid directly to the claimant.

(4) *Dental Explanation of Benefits (DEOB).* An explanation of benefits is sent to the beneficiary or sponsor and provides the following information:

(i) Name and address of the beneficiary.

(ii) Social Security Account Number (SSAN) of the sponsor.

(ii) Name and address of the provider.

(iii) Services or supplies covered by the claim for which the DEOB applies.

(iv) Dates the services or supplies were provided.

(v) Amount billed; allowable charge; and amount of payment.

(vi) To whom payment, if any, was made.

(vii) Reasons for any denial.

(viii) Recourse available to beneficiary for review of claim decision (refer to paragraph (h) of this section).

(5) *Fraud*—(i) *Federal laws.* 18 U.S.C. 287 and 1001 provide for criminal penalties for submitting knowingly or making any false, fictitious, or fraudulent statement or claim in any matter within the jurisdiction of any department or agency of the United States. Examples of fraud include situations in which ineligible persons not enrolled in the Active Duty Dependents Dental Plan obtain care and file claims for benefits under the name and identification of an enrolled beneficiary; or when providers submit claims for services and supplies not rendered to enrolled beneficiaries; or when a participating provider bills the beneficiary for amounts over the dental plan insurer's determination of allowable charges.

(ii) *Suspected fraud.* Any person, including the dental plan insurer, who becomes aware of a suspected fraud shall report the circumstances in writing, together with copies of any available documents pertaining thereto, to the Director, OCHAMPUS, or a designee, who shall initiate an official investigaiton of the case.

(h) *Appeal and hearing procedures*—(1) *General.* This section sets forth the policies and procedures for appealing decisions made by the dental plan adversely affecting the rights and liabilities of beneficiaries, participating providers, and providers denied the status of authorized provider under the Active Duty Dependents Dental Plan. An appeal under the Active Duty Dependents Dental Plan is an administrative review of program determinations made under the provisions of law and regulation. An appeal cannot challenge the propriety, equity, or legality of any provision of law and regulation.

(i) *Initial determination*—(A) *Notice of initial determination and right to appeal.* (*1*) The dental plan contractor shall mail notices of initial determinations to the Active Duty Dependents Dental Plan beneficiary at the last known address. For beneficiaries who are under 18 years of age or who are incompetent, a notice issued to the parent or guardian constitutes notice to the beneficiary.

(*2*) The dental plan contractor shall notify providers of an initial determination on a claim only if the providers participated in the claim or accepted assignment.

(*3*) Notice of an initial determination on a claim by the dental plan contractor shall be made in the contractor's explanation of benefits (beneficiary) or with the summary of payment (provider).

(*4*) Each notice of an initial determination on a request for benefit authorization, a request by a provider for approval as an authorized provider, or a decision to disqualify or exclude a provider as an authorized provider under the Active Duty Dependents Dental Plan shall state the reason for the determination and the underlying facts supporting the determination.

(*5*) In any case when the initial determination is adverse to the beneficiary or participating provider or to the provider seeking approval as an authorized provider, the notice shall include a statement of the beneficiary's or provider's right to appeal the determination. The procedure for filing the appeal also shall be explained.

(B) *Effect of initial determination.* The initial determination is final, unless appealed in accordance with this section or unless the initial determination is reopened by OCHAMPUS or the dental plan contractor.

(ii) *Participation in an appeal.* Participation in an appeal is limited to any party to the initial determination, including OCHAMPUS, the dental plan contractor, and authorized representatives of the parties. Any party to the initial determination, except OCHAMPUS and the dental plan contractor, may appeal an adverse determination. The appealing party is the party who actually files the appeal.

(A) *Parties to the initial determination.* For purposes of these appeal and hearing procedures, the following are not parties to an initial determination and are not entitled to administrative review under this section.

(*1*) A provider disqualified or excluded as an authorized provider under the Active Duty Dependents Dental Plan based on a determination under another Federal or federally funded program is not a party to the OCHAMPUS action and may not appeal under this section.

(*2*) A sponsor or parent of a beneficiary under 18 years of age or guardian of an incompetent beneficiary is not a party to the initial determination and may not serve as the appealing party, although such persons may represent the appealing party in an appeal.

(*3*) A third party other than the dental plan contractor, such as an insurance company, is not a party to the initial determination and is not entitled to appeal, even though it may have an indirect interest in the initial determination.

(*4*) A nonparticipating provider is not a party to the initial determination and may not appeal.

(B) *Representative.* Any party to the initial determination may appoint a representative to act on behalf of the party in connection with an appeal. Generally, the parent of a minor beneficiary and the legally appointed guardian of an incompetent beneficiary shall be presumed to have been appointed representative without specific designation by the beneficiary.

(*1*) The representative shall have the same authority as the party to the appeal, and notice given to the representative shall constitute notice required to be given to the party under this part.

(*2*) To avoid possible conflicts of interest, an officer or employee of the United States, such as an employee or member of a Uniformed Service, including an employee or staff member of a Uniformed Service legal office, or a CHAMPUS advisor, subject to the exceptions in 18 U.S.C. 205, is not eligible to serve as a representative. An exception usually is made for an employee or member of Uniformed Service who represents an immediate family member. In addition, the Director, OCHAMPUS, or designee, may appoint an officer or employee of the United States as the OCHAMPUS representative at a hearing.

(iii) *Burden of proof.* The burden of proof is on the appealing party to establish affirmatively by substantial evidence the appealing party's entitlement under law and this part to the authorization of the Active Duty Dependents Dental Plan benefits or approval as an authorized provider. Any cost or fee associated with the production or submission of information in support of an appeal may not be paid by OCHAMPUS.

(iv) *Late filing.* If a request for reconsideration, formal review, or hearing is filed after the time permitted in this section, written notice shall be issued denying the request. Late filing may be permitted only if the appealing party reasonably can demonstrate to the satisfaction of the dental plan

contractor, or the Director, OCHAMPUS, or designee, that timely filing of the request was not feasible due to extraordinary circumstances over which the appealing party had no practical control. Each request for an exception to the filing requirement will be considered on its own merits.

(v) *Appealable issue.* An appealable issue is required in order for an adverse determination to be appealed under the provisions of this section. Examples of issues that are not appealable under this chapter include:

(A) A dispute regarding a requirement of the law or regulation.

(B) The amount of the dental plan contractor-determined allowable charge since the methodology constitutes a limitation no benefits under the provisions of this part.

(C) Certain other issues on the basis that the authority for the initial determination is not vested of OCHAMPUS. Such issues include but are not limited to the following examples:

(*1*) Determination of a person's eligibility as an enrolled beneficiary in the Active Duty Dependents Dental Plan is the responsibility of the appropriate Uniformed Service. Although OCHAMPUS and the dental plan contractor must make determinations concerning a beneficiary's enrollment, ultimate responsibility for resolving a beneficiary's eligibility and enrollment rests with the Uniformed Services. Accordingly, a disputed question of fact concerning a beneficiary's enrollment or eligibility will not be considered an apealable issue under the provisions of this section, but shall be resolved in accordance with paragraph (c) of this section.

(*2*) The decision to disqualify or exclude a provider because of a determination against that provider under another Federal or federally funded program is not an initial determination that is appealable under this part. The provider is limited to exhausting administrative appeal rights offered under the Federal or federally funded program that made the initial determination. However, a determination to disqualify or exclude a provider because of abuse or fraudulent practices or procedures under the Active Duty Dependents Dental Plan is an initial determination that is appealable under this part.

(vi) *Amount in dispute.* An amount in dispute is required for an adverse determination to be appealed under the provisions of this section, except as set forth in the following.

(A) The amount in dispute is calculated as the amount of money the dental plan contractor would pay if the services and supplies involved in dispute were determined to be authorized benefits of the Active Duty Dependents Dental Plan. Examples of amounts of money that are excluded by this part from payments for authorized benefits include, but are not limited to:

(*1*) Amounts in excess of the dental plan contractor-determined allowable charge.

(*2*) The beneficiary's cost-share amounts for restorative services.

(*3*) Amounts that the beneficiary, or parent, guardian, or other responsible person has no legal obligation to pay.

(B) There is no requirement for an amount in dispute when the appealable issue involves a denial of a provider's request for approval as an authorized provider or the determination to disqualify or exclude a provider as an authorized provider.

(C) Individual claims may be combined to meet the required amount in dispute if all of the following exist:

(*1*) The claims involve the same beneficiary.

(*2*) The claims involve the same issue.

(*3*) At least one of the claims so combined has had a reconsideration decision issued by the dental plan contractor.

Note.—A request for administrative review under this appeal process which involves a dispute regarding a requirement of law or regulation (paragraph (h)(1)(v)(A) of this section) or does not involve a sufficient amount in dispute (paragraph (h)(1)(vi) of this section) may not be rejected at the reconsideration level of appeal. However, the appeal shall involve an appealable issue and sufficient amount in dispute under these subsections to be granted a formal review or hearing.

(vii) *Levels of appeal.* The sequence and procedures of an Active Duty Dependents Dental Plan appeal are contained in the following.

(A) Reconsideration by the dental plan contractor.

(B) Formal review of OCHAMPUS.

(C) Hearing.

(2) *Reconsideration.* Any party to the initial determination made by the dental plan contractor may request a reconsideration.

(i) *Requesting a reconsideration*—(A) *Written request required.* The request must be in writing, shall state the specific matter in dispute, and shall include a copy of the notice of initial determination made by the dental plan contractor, such as the explanation of benefits.

(B) *Where to file.* The request shall be submitted to the dental plan contractor's office as designated in the notice of initial determination.

(C) *Allowed time to file.* The request must be mailed within 90 days after the date of the notice of initial determination.

(D) *Official filing date.* A request for a reconsideration shall be deemed filed on the date it is mailed and postmarked. If the request does not have a postmark, it shall be deemed filed on the date received by the dental plan contractor.

(ii) *The reconsideration process.* The purpose of the reconsideration is to determine whether the initial determination was made in accordance with law, regulation, policies, and guidelines in effect at the time the care was provided or requested or at the time the provider requested approval as an authorized provider. The reconsideration is performed by a member of the dental plan contractor's staff who was not involved in making the initial determination and is a thorough and independent review of the case. The reconsideration is based on the information submitted that led to the initial determination, plus any additional information that the appealing party may submit or the dental plan contractor may obtain.

(iii) *Timeliness of reconsideration determination.* The dental plan contractor normally shall issue its reconsideration determination no later than 60 days from the datee of its receipt of the request for reconsideration.

(iv) *Notice of reconsideration determination.* The dental plan contractor shall issue a written notice of the reconsideration determination to the appealing party at his or her last known address. The notice of the reconsideration determination must contain the following elements:

(A) A statement of the issue or issues under appeal.

(B) The provisions of law, regulation, policies, and guidelines that apply to the issue or issues under appeal.

(C) A discussion of the original and additional information that is relevant to the issue or issues under appeal.

(D) Whether the reconsideration upholds the initial determination or reverses it, in whole or in part, and the rationale for the action.

(E) A statement of the right to appeal further in any case when the reconsideration determination is less than fully favorable to the appealing party and the amount in dispute is $50 or more.

(v) *Effect of reconsideration determination.* The reconsideration determination is final if either of the following exist:

(A) The amount in dispute is less than $50.

(B) Appeal rights have been offered, but a request for formal review is not received by OCHAMPUS within 60 days of the date of the notice of the reconsideration determination.

(3) *Formal review.* Any party to the initial determination may request a formal review by OCHAMPUS if the party is dissatisfied with the reconsideration determination and the reconsideration determination is not final under the provisions of paragraph (b)(5) of this section. Any party to the initial determination made by OCHAMPUS may request a formal review by OCHAMPUS if the party is dissatisfied with the initial determination.

(i) *Requesting a formal review*—(A) *Written request required.* The request must be in writing, shall state the specific matter in dispute, shall include copies of the written determination (notice of reconsideration determination) being appealed, and shall include any additional information or documents not submitted previously.

(B) *Where to file.* The request shall be submitted to the Chief, Appeals and Hearings, OCHAMPUS, Aurora, Colorado 80045-6900.

(C) *Allowed time to file.* The request shall be mailed within 60 days after the date of the notice of the reconsideration determination being appealed.

(D) *Official filing date.* A request for a formal review shall be deemed filed on the date it is mailed and postmarked. If the request does not have a postmark, it shall be deemed filed on the date received by OCHAMPUS.

(ii) *The formal review process.* The purpose of the formal review is to determine whether the initial determination or reconsideration determination was made in accordance with law, regulation, policies, and guidelines in effect at the time the care was provided or requested, at the time the provider requested approval as an authorized provider, or at the time of the action by OCHAMPUS to disqualify or exclude a provider. The formal review is performed by the Chief, Appeals and Hearings, OCHAMPUS, or a designee, and is a thorough review of the case. The formal review determination shall be based on the information upon which the initial determination or reconsideration determination was based and any additional information the appealing party or the dental plan contractor may submit or OCHAMPUS may obtain.

(iii) *Timeliness of formal review determination.* The Chief, Appeals and Hearings, OCHAMPUS, or a designee, normally shall issue the formal review determination no later than 90 days from the date of receipt of the request for formal review by the OCHAMPUS.

(iv) *Notice of formal review determination.* The Chief, Appeals and Hearings, OCHAMPUS, or a designee, shall issue a written notice of the formal review determination to the appealing party at his or her last known address. The notice of the formal review determination must contain the following elements:

(A) A statement of the issue or issues under appeal.

(B) The provisions of law, regulation, policies, and guidelines that apply to the issue or issues under appeal.

(C) A discussion of the original and additional information that is relevant to the issue or issues under appeal.

(D) Whether the formal review upholds the prior determination or determinations or reverses the prior determination or determinations in whole or in part and the rationale for the action.

(E) A statement of the right to request a hearing in any case when the formal review determination is less than fully favorable, the issue is appealable, and the amount in dispute is $300 or more.

(v) *Effect of formal review determination.* The formal review determination is final if one or more of the following exist:

(A) The issue is not appealable. (See paragraph (h)(1)(v) of this section.)

(B) The amount in dispute is less than $300. (See paragraph (h)(1)(vi) of this section.)

(C) Appeal rights have been offered, but a request for hearing is not received by OCHAMPUS within 60 days of the date of the notice of the formal review determination.

(4) *Hearing.* Any party to the initial determination may request a hearing if the party is dissatisfied with the formal review determination and the formal review determination is not final under the provisions of paragraph (c)(5) of this section.

(i) *Requesting a hearing*—(A) *Written request required.* The request shall be in writing, state the specific matter in dispute, include a copy of the formal review determination, and include any additional information or documents not submitted previously.

(B) *Where to file.* The request shall be submitted to the Chief, Appeals and Hearings, OCHAMPUS, Aurora, Colorado 80045-6900.

(C) *Allowed time to file.* The request shall be mailed within 60 days after the date of the notice of the formal review determination being appealed.

(D) *Official filing date.* A request for hearing shall be deemed filed on the date it is mailed and postmarked. If a request for hearing does not have a postmark, it shall be deemed filed on the date received by OCHAMPUS.

(ii) *The hearing process.* The hearing shall be conducted as a nonadversary, administrative proceeding to determine the facts of the case and to allow the appealing party the opportunity personally to present the case before an impartial hearing officer. The hearing is a forum in which facts relevant to the case are presented and evaluated in relation to applicable law, regulation, policies, and guidelines in effect at the time the care was provided or requested, or at the time the provider requested approval as an authorized provider.

(iii) *Timeliness of hearing*—(A) Except as otherwise provided in this section, within 60 days following receipt of a request for hearing, the Director, OCHAMPUS, or a designee, normally will appoint a hearing officer to hear the appeal. Copies of all records in the possession of OCHAMPUS that are pertinent to the matter to be heard or that formed the basis of the formal review determination shall be provided to the hearing officer and, upon request, to the appealing party.

(B) The hearing officer, except as otherwise provided in this section, normally shall have 60 days from the date of written notice of assignment to review the file, schedule and hold the hearing, and issue a recommended decision to the Director, OCHAMPUS, or designee.

(C) The Director, OCHAMPUS, or designee, may delay the case assignment to the hearing officer if additional information is needed that cannot be obtained and included in the record within the time period specified above. The appealing party will be notified in writing of the delay resulting from the request for additional information. The Director, OCHAMPUS, or a designee, in such circumstances, will assign the case to a hearing officer within 30 days of receipt of all such additional information or within 60 days of receipt of the request for hearing, whichever shall occur last.

(D) The hearing officer may delay submitting the recommended decision if, at the close of the hearing, any party to the hearing requests that the record remain open for submission of additional information. In such circumstances, the hearing officer will have 30 days following receipt of all such additional information including comments from the other parties to the hearing concerning the additional information to submit the recommended

decision to the Director, OCHAMPUS, or a designee.

(iv) *Representation at a hearing.* Any party to the hearing may appoint a representative to act on behalf of the party at the hearing, unless such person currently is disqualified or suspended from acting in another Federal administrative proceeding, or unless otherwise prohibited by law, this part, or any other DoD regulation (see paragraph (a)(2)(ii) of this section). A hearing officer may refuse to allow any person to represent a party at the hearing when such person engages in unethical, disruptive, or contemptuous conduct, or intentionally fails to comply with proper instructions or requests of the hearing officer or the provisions of this part. The representative shall have the same authority as the appealing party, and notice given to the representative shall constitute notice required to be given to the appealing party.

(v) *Consolidation of proceedings.* The Director, OCHAMPUS, or a designee, may consolidate any number of proceedings for hearing when the facts and circumstances are similar and no substantial right of an appealing party will be prejudiced.

(vi) *Authority of the hearing officer.* The hearing officer, in exercising the authority to conduct a hearing under this part, will be bound by 10 U.S.C., Chapter 55 and this part. The hearing officer in addressing substantive, appealable issues shall be bound by the dental benefits brochure, policies, procedures, and other guidelines issued by the ASD(HA), or a designee, or by the Director, OCHAMPUS, or a designee, in effect for the period in which the matter in dispute arose. A hearing officer may not establish or amend the dental benefits brochure, policy, procedures, instructions, or guidelines. However, the hearing officer may recommend reconsideration of the policy, procedures, instructions or guidelines by the ASD(HA), or a designee, when the final decision is issued in the case.

(vii) *Disqualification of hearing officer.* A hearing officer voluntarily shall disqualify himself or herself and withdraw from any proceeding in which the hearing officer cannot give fair or impartial hearing, or in which there is a conflict of interest. A party to the hearing may request the disqualification of a hearing officer by filing a statement detailing the reasons the party believes that a fair and impartial hearing cannot be given or that a conflict of interest exists. Such request immediately shall be sent by the appealing party or the hearing officer to the Director, OCHAMPUS, or a designee, who shall investigate the allegations and advise the complaining party of the decision in writing. A copy of such decision also shall be mailed to all other parties to the hearing. If the Director, OCHAMPUS, or a designee, reassigns the case to another hearing officer, no investigation shall be required.

(viii) *Notice and scheduling of hearing.* The hearing officer shall issue by certified mail, when practicable, a written notice to the parties to the hearing of the time and place for the hearing. Such notice shall be mailed at least 15 days before the scheduled date of the hearing. The notice shall contain sufficient information about the hearing procedure, including the party's right to representation, to allow for effective preparation. The notice also shall advise the appealing party of the right to request a copy of the record before the hearing. Additionally, the notice shall advise the appealing party of his or her responsibility to furnish the hearing officer, no later than 7 days before the scheduled date of the hearing, a list of all witnesses who will testify and a copy of all additional information to be presented at the hearing. The time and place of the hearing shall be determined by the hearing officer, who shall select a reasonable time and location mutually convenient to the appealing party and OCHAMPUS.

(ix) *Dismissal of request for hearing—*

(A) *By application of appealing party.* A request for hearing may be dismissed by the Director, OCHAMPUS, or a designee, at any time before the mailing of the final decision, upon the application of the appealing party a request for dismissal must be in writing and filed with the Chief, Appeals and Hearings, OCHAMPUS, or the hearing officer. When dismissal is requested, the formal review determination in the case shall be deemed final, unless the dismissal is vacated in accordance with paragraph (h)(4)(ix)(E) of this section.

(B) *By stipulation of the parties to the hearing.* A request for a hearing may be dismissed by the Director, OCHAMPUS, or a designee, at any time before the mailing of notice of the final decision under a stipulation agreement between the appealing party and OCHAMPUS. When dismissal is entered under a stipulation, the formal review decision shall be deemed final, unless the dismissal is vacated in accordance with paragraph (h) (4) (ix) (E) of this section.

(C) *By abandonment.* The Director, OCHAMPUS, or a designee, may dismiss a request for hearing upon abandonment by the appealing party.

(*1*) An appealing party shall be deemed to have abandoned a request for hearing, other than when personal appearance is waived in accordance with paragraph (h) (4) (xi) (M) of this section, if neither the appealing party nor an appointed representative appears at the time and place fixed for the hearing and if, within 10 days after the mailing of a notice by certified mail to the appealing party by the hearing officer to show cause, such party does not show good and sufficient cause for such failure to appear and failure to notify the hearing officer before the time fixed for hearing that an appearance could not be made.

(*2*) An appealing party shall be deemed to have abandoned a request for hearing if, before assignment of the case to the hearing officer, OCHAMPUS is unable to locate either the appealing party or an appointed representative.

(*3*) An appealing party shall be deemed to have abandoned a request for hearing if the appealing party fails to prosecute the appeal. Failure to prosecute the appeal includes, but is not limited to, an appealing party's failure to provide information reasonably requested by OCHAMPUS or the hearing officer for consideration in the appeal.

(*4*) If the Director, OCHAMPUS, or a designee, dismisses the request for hearing because of abandonment, the formal review determination in the case shall be deemed to be final, unless the dismissal is vacated in accordance with paragraph (h) (4) (ix) (E) of this section.

(D) *For cause.* The Director, OCHAMPUS, or a designee, may dismiss for cause a request for hearing either entirely or as to any stated issue. If the Director, OCHAMPUS, or a designee, dismisses a hearing request for cause, the formal review determination in the case shall be deemed to be final, unless the dismissal is vacated in accordance with paragraph (h) (4) (ix) (E) of this section. A dismissal for cause may be issued under any of the following circumstances:

(*1*) When the appealing party requesting the hearing is not a proper party under paragraph (h) (1) (ii) (A) of this section of does not otherwise have a right to participate in a hearing.

(*2*) When the appealing party who filed the hearing request dies, and there is no information before the Director, OCHAMPUS, or a designee, showing that a party to the initial determination who is not an appealing party may be prejudiced by the formal review determination.

(*3*) When the issue is not appealable (See paragraph (h) (1) (v) of this section.)

(4) When the amount in dispute is less than $300 (See paragraph (h) (1) (vi) of this section.)

(5) When all appealable issues have been resolved in favor of the appealing party.

(E) *Vacation of dismissal.* Dismissal of a request for hearing may be vacated by the Director, OCHAMPUS, or a designee, upon written request of the appealing party, if the request is received within 6 months of the date of the notice of dismissal mailed to the last known address of the party requesting the hearing.

(x) *Preparation for hearing*—(A) *Prehearing statement of contentions.* The hearing officer may on reasonable notice, require a party to the hearing to submit a written statement of contentions and reasons. The written statement shall be provided to all parties to the hearing before the hearing takes place.

(B) *Agency records*—(1) *Hearing officer.* A hearing officer may ask OCHAMPUS to produce, for inspection, any records or relevant portions of records when they are needed to decide the issues in any proceeding before the hearing officer or to assist an appealing party in preparing for the proceeding.

(2) *Appealing party.* A request to a hearing officer by an appealing party for disclosure or inspection of OCHAMPUS or the dental plan contractor records shall be in writing and shall state clearly what information and records are required.

(C) *Witnesses and evidence.* All parties to a hearing are responsible for producing, at each party's expense, meaning without reimbursement of payment by OCHAMPUS, witnesses and other evidence in their own behalf, and for furnishing copies of any such documentary evidence to the hearing officer and other party or parties to the hearing. The Department of Defense is not authorized to subpoena witnesses or records. The hearing officer may issue invitations and requests to individuals to appear and testify without cost to the Government, so that the full facts in the case may be presented.

(D) *Interrogatories and depositions.* A hearing officer may arrange to take interrogatories and depositions, recognizing that the Department of Defense does not have subpoena authority. The expense shall be assessed to the requesting party, with copies furnished to the hearing officer and other party or parties to the hearing.

(xi) *Conduct of hearing*—(A) *Right to open hearing.* Because of the personal nature of the matters to be considered, hearings normally shall be closed to the public. However, the appealing party may request an open hearing. If this occurs, the hearing shall be open, except when protection of other legitimate Government purposes dictates closing certain portions of the hearing.

(B) *Right to examine parties to the hearing and their witnesses.* Each party to the hearing shall have the right to produce and examine witnesses, to introduce exhibits, to question opposing witnesses on any matter relevant to the issue even though the matter was not covered in the direct examination, to impeach any witness regardless of which party to the hearing first called the witness to testify, and to rebut any evidence presented. Except for those witnesses employed by OCHAMPUS at the time of the hearing or records in the possession of OCHAMPUS, a party to a hearing shall be responsible, that is to say no payment or reimbursement shall be made by CHAMPUS for the cost or fee associated with producing witinesses or other evidence in the party's own behalf, or for furnishing copies of documentary evidence to the hearing officer and other party or parties to the hearing.

(C) *Burden of proof.* The burden of proof is on the appealing party affirmatively to establish by substantial evidence the appealing party's entitlement under law and this Regulation to the authorization of Active Duty Dependents Dental Plan benefits or approval as an authorized provider. Any part of the cost or fee associated with producing or submitting in support of an appeal may not be paid by OCHAMPUS.

(D) *Taking of evidence.* The hearing officer shall control the taking of evidence in a manner best suited to ascertain the facts and safeguard the rights of the parties to the hearing. Before taking evidence, the hearing officer shall identify and state the issues in dispute on the record and the order in which evidence will be received.

(E) *Questioning and admission of evidence.* A hearing officer may question any witness and shall admit any relevant evidence. Evidence that is irrelevant or unduly repetitious shall be excluded.

(F) *Relevant evidence.* Any relevant evidence shall be admitted, unless unduly repetitious, if it is the type of evidence on which responsible persons are accustomed to rely in the conduct of serious affairs, regardless of the existence of any common law or statutory rule that might make improper the admission of such evidence over objection in civil or criminal actions.

(G) *Active Duty Dependents Dental Plan determination first.* The basis of the Active Duty Dependents Dental Plan determination shall be presented to the hearing officer first. The appealing party shall then be given the opportunity to establish affirmatively why this determination is held to be in error.

(H) *Testimony.* Testimony shall be taken only on oath, affirmation, or penalty of perjury.

(I) *Oral argument and briefs.* At the request of any party to the hearing made before the close of the hearing, the hearing officer shall grant oral argument. If written argument is requested, it shall be granted, and the parties to the hearing shall be advised as to the time and manner within which such argument is to be filed. The hearing officer may require any party to the hearing to submit written memoranda pertaining to any or all issues raised in the hearing.

(J) *Continuance of hearing.* A hearing officer may continue a hearing to another time or place on his or her own motion or, upon showing of good cause, at the request of any party. Written notice of the time and place of the continued hearing, except as otherwise provided here, shall be in accordance with this part. When a continuance is ordered during a hearing, oral notice of the time and place of the continued hearing may be given to each party to the hearing who is present at the hearing.

(K) *Continuance for additional evidence.* If the hearing officer determines, after a hearing has begun, that additional evidence is necessary for the proper determination of the case, the following procedures may be invoked:

(1) *Continue hearing.* The hearing may be continued to a later date in accordance with paragraph (d)(11)(x) of this section.

(2) *Closed hearing.* The hearing may be closed, but the record held open in order to permit the introduction of additional evidence. Any evidence submitted after the close of the hearing shall be made available to all parties to the hearing, and all parties to the hearing shall have the opportunity for comment. The hearing officer may reopen the hearing if any portion of the additional evidence makes further hearing desirable. Notice thereof shall be given in accordance with paragraph (d)(8) of this section.

(L) *Transcript of hearing.* A verbatim taped record of the hearing shall be made and shall become a permanent part of the record. Upon request, the appealing party shall be furnished a duplicate copy of the tape. A typed transcript of the testimony will be made only when determined to be necessary by OCHAMPUS. If a typed transcript is made, the appealing party shall be

furnished a copy without charge. Corrections shall be allowed in the typed transcript by the hearing officer solely for the purpose of conforming the transcript to the actual testimony.

(M) *Waiver of right to appear and present evidence.* If all parties waive their right to appear before the hearing officer for presenting evidence and contentions personally or by representation, it will not be necessary for the hearing officer to give notice of, or to conduct a formal hearing. A waiver of the right to appear must be in writing and filed with the hearing officer or the Chief, Appeals and Hearings, OCHAMPUS. Such waiver may be withdrawn by the party by written notice received by the hearing officer or Chief, Appeals and Hearings, no later than 7 days before the scheduled hearing or the mailing of notice of the final decision, whichever occurs first. For purposes of this section, failure of a party to appear personally or by representation after filing written notice of waiver, will not be cause for finding of abandonment and the hearing officer shall make the recommended decision on the basis of all evidence of record.

(N) *Recommended decision.* At the conclusion of the hearing and after the record has been closed, the matter shall be taken under consideration by the hearing officer. Within the time frames previously set forth in this section, the hearing officer shall submit to the Director, OCHAMPUS, or a designee, a written recommended decision containing a statement of findings and a statement of reasons based on the evidence adduced at the hearing and otherwise included in the hearing record.

(*1*) *Statement of findings.* A statement of findings is a clear and concise statement of fact evidenced in the record or conclusions that readily can be deduced from the evidence of record. Each finding must be supported by substantial evidence that is defined as such evidence as a reasonable mind can accept as adequate to support a conclusion.

(*2*) *Statement of reasons.* A reason is a clear and concise statement of law, regulation, policies, or guidelines relating to the statement of findings that provides the basis for the recommended decision.

(5) *Final decision*—(i) *Director, OCHAMPUS.* The recommended decision shall be reviewed by the Director, OCHAMPUS, or a designee, who shall adopt or reject the recommended decision or refer the recommended decision for review by the Assistant Secretary of Defense (Health Affairs). The Director, OCHAMPUS, or designee, normally will take action with regard to the recommended decision within 90 days of receipt of the recommended decision or receipt of the revised recommended decision following a remand order to the Hearing Officer.

(A) *Final action.* If the Director, OCHAMPUS, or a designee, concurs in the recommended decision, no futher agency action is required and the recommended decision, as adopted by the Director, OCHAMPUS, is the final agency decision in the appeal. In the case of rejection, the Director, OCHAMPUS, or a designee, shall state the reason for disagreement with the recommended decision and the underlying facts supporting such disagreement. In these circumstances, the Director, OCHAMPUS, or a designee, may have a final decision prepared based on the record, or may remand the matter to the Hearing Officer for appropriate action. In the latter instance, the Hearing Officer shall take appropriate action and submit a new recommended decision within 60 days of receipt of the remand order. The decision by the Director, OCHAMPUS, or a designee, concerning a case arising under the procedures of this section, shall be the final agency decision and the final decision shall be sent by certified mail to the appealing party or parties. A final agency decision under this paragraph (e)(1) will not be relied on, used, or cited as precedent by the Department of Defense or the dental plan contractor in the administration of the Active Duty Dependents Dental Plan.

(B) *Referral for review by ASD (HA).* The Director, OCHAMPUS, or a designee, may refer a hearing case to the Assistant Secretary of Defense (Health Affairs) when the hearing involves the resolution of policy and issuance of a final decision which may be relied on, used, or cited as precedent in the administration of the Active Duty Dependents Dental Plan. In such a circumstance, the Director, OCHAMPUS, or a designee, shall forward the recommended decision, together with the recommendation of the Director, OCHAMPUS, or a designee, regarding disposition of the hearing case.

(ii) *ASD(HA).* The ASD(HA), or a designee, after reviewing a case arising under the procedures of this section may issue a final decision based on the record in the hearing case or remand the case to the Director, OCHAMPUS, or a designee, for appropriate action. A decision issued by the ASD(HA), or a designee, shall be the final agency decision in the appeal and a copy of the final decision shall be sent by certified mail to the appealing party or parties. A final decision of the ASD(HA), or a designee, issued under this paragraph (e)(2) may be relied on, used, or cited as precedent in the administration of the Active Duty Dependents Dental Plan.

Linda M. Lawson,

*Alternate OSD Federal Register Liaison Officer, Department of Defense.*

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

### 33 CFR Part 165

[CCGD9 87-06]

## Safety Zone: Lake Michigan Waters Offshore at Michigan City, the Michigan City Entrance Channel, and Washington Park Marina

**AGENCY:** Coast Guard, DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Coast Guard is considering a proposal to establish a Safety Zone for the Lake Michigan waters offshore of Michigan City, IN, the Michigan City entrance channel, and Washington Park Marina. Within the Safety Zone, the Commander, Ninth Coast Guard District may restrict or prohibit movement of vessels and control other maritime activities. This rule will promote the safety of Pan American Games competitors, ancillary personnel, and spectators.

**DATES:** Comments must be received on or before July 13, 1987.

**ADDRESS:** Comments should be mailed to Commander (m), Ninth Coast Guard District, 1240 East Ninth Street, Cleveland, Ohio 44199-2060. The comments will be available for inspection and copying at Room 2019, 1240 East Ninth Street, Cleveland, Ohio 44199-2060. Normal officer hours are between 8:00 a.m. and 4:00 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

**FOR FURTHER INFORMATION CONTACT:** Commander Francis X. Owens or LT(jg) George H. Burns III, Marine Safety Division, 1240 East Ninth Street, Cleveland, Ohio 44199-2060, (216) 522-3919.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in this rulemaking by submitting written views, data, or

arguments. Persons submitting comments should include their names and addresses, identify this notice CGD9 87-06 and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed. The rules may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information: The drafters of this notice are Commander Dallas G. Schmidt, project officer, Marine Safety Office Chicago, and Commander Michael A. Leone, project attorney, Ninth Coast Guard District Legal Office.

**Discussion of Proposed Regulation**

The Michigan City, Indiana area will host the Tenth Pan American Games' Yachting Competition, beginning August 1, 1987 and culminating on August 18, 1987. The yachting races will draw spectator boating crowds, congesting the Michigan City entrance channel and portions of the offshore race courses. The spectator's right of reasonable access to the offshore competition sites, the staging area within the entrance channel, and the associated harbor area must be balanced against the safety requirements of competitors, officials, and spectators.

This temporary regulation is intended to manage the expected increase in traffic congestion in the Michigan City, Indiana entrance channel and a portion of offshore Lake Michigan during the period August 1, 1987 to August 18, 1987, in order to provide a safe area for all members of the maritime community.[1] The Commander, Ninth Coast Guard District may cancel the safety zone at an earlier date if safety considerations. permit it.

The primary objective of this rulemaking is to maintain the safe movement of competition vessels to their designated race courses, the safety of all vessels, the port, and the race areas. The Coast Guard has the responsibility in conjunction with local law enforcement agencies for the on-water safety of the Pan American Games yachting competition and must plan and prepare to meet any situations which could occur.

Accordingly, Coast Guard vessels carrying safety and law enforcement teams will patrol the Safety Zone during the periods that competitors are on the water. The primary mission of these teams will be to prevent or control hazardous boating activities, with an emphasis on facilitating the competition while minimizing the disruption of recreational boating.

The restrictions on recreational craft operating in the Safety Zone are necessary to prevent safety patrols from being overwhelmed by large numbers of recreational boats. While carrying out these port safety operations, every effort will be made to minimize restrictions on vessels and port activities. Unless otherwise directed, the Navigational Rules of the Road will always apply. These regulations will be reprinted in the Local Notice to Mariners.

**Economic Assessment and Certification**

This proposed regulation is considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transprotation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The regulation is of limited duration, limits access to certain areas without denying access to those who require it, and will not adversely affect commercial traffic. Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

**List of Subjects in 33 CFR Part 165**

Harbors, Marine safety, Navigation, Lake Michigan waters offshore Michigan City, Indiana, the Michigan City entrance channel, Washington Park Marina.

**Proposed Regulations**

**PART 165—[AMENDED]**

In consideration of the foregoing, the Coast Guard proposes to temporarily amend Part 165 of Title 33, Code of Federal Regulations as follows:

1. The authority citation for Part 185 continues to read as follows:

**Authority:** 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6 and 160.5.

2. Section 165.T0906 is added to read as follows:

**§ 165.T0906 Lake Michigan waters offshore of Michigan City, IN, the Michigan City Entrance Channel and Washington Park Marina.**

(a) *Effective Date.* Unless otherwise indicated in an individual subsection below, this temporary regulation is effective from August 1, 1987 through and including August 18, 1987.

(b) *Regulated Areas.* All waters and waterfront facilities within the following boundaries constitute a Safety Zone:

(1) The water area in Like Michigan beginning at latitude 41°51'00"N, longitude 87°02'00"W; thence east to latitude 41°51'00"N, longitude 86°52'00"W; thence south to the intersection of longitude 86°52'00" and the natural shoreline; thence along the natural shoreline and structures, across the Michigan City, Indiana channel entrance, to the intersection of latitude 41°43'00"N and the natural shoreline; thence west to latitude 41°43'00"N, longitude 87°02'00"W; thence north to the starting point; and

(2) All navigable waters and waterfront facilities within the Michign City channel area bounded on the north by the Michigan City channel entrance and on the east by the western edge of the Franklin Street bridge.

(c) *Regulations.* The regulations listed below apply to all Pan American Games yachting events.

(1) No vessels, other than participants, U.S. Coast Guad operated or employed small craft, public vessels, state and local law enforcement agency vessels and event committee boats shall remain in or enter those portions of the Pan American Games race areas which lie within Lake Michigan during the periods set forth for each event, unless cleared for such entry by a Coast Guard official.

(i) Pan American Games Race Areas:

(A) Area Alpha: Area Alpha will be bounded by the following coordinates:

Center—latitude 41°45.1'N; longitude 86°55.8'W
North—latitude 41°46.0'N
South—latitude 41°44.4'N
East—longitude 86°54.7'W
West—longitude 86°56.5'W

(b) Area Bravo: Area Bravo will be bounded by the following coordinates:

Center—latitude 41°46.5'N; longitude 86°59.1'W
North—latitude 41°48.1'N
South—latitude 41°44.8'N
East—longitude 86°56.4'W
West—longitude 87°01.5'W

(C) Area Charlie: Area Charlie will be bounded by the following coordinates:

Center—latitude 41°48.5'N; longitude 86°54.8'W
North—latitude 41°50.3'N

[1] The maps designating the traffic areas may be obtained by contacting the person listed under the caption "For Further Information Contact."

South—latitude 41°46.6'N
East—longitude 86°52.6'W
West—longitude 86°57.0'W

(d) Area Delta: Area Delta will be bounded by the following coordinates:
Center—latitude 41°46.0'N; longitude 86°54.0'W
North—latitude 41°46.7'N
South—latitude 41°45.2'N
East—longitude 86°52.8'W
West—longitude 86°55.0'W

(ii) Competition period: Approximately 8:00 A.M. to 4:00 P.M. daily, August 9, 1987 to August 18, 1987, inclusive.

(iii) Buoys, stake boats, and Coast Guard spectator control boats will mark the actual race courses within each designated race area.

(2) Between August 1 and August 18, 1987, no person may set fishing gear, nets, marker buoys or similar obstructions within the area of the defined Safety Zone. Any such obstructions shall be removed by their owners prior to August 1, 1987 and shall not be re-set until after August 18, 1987.

(3) When hailed by Coast Guard or Coast Guard Auxiliary vessels patrolling the Safety Zone, vessels shall come to an immediate stop. Vessels shall comply with all directions of Coast Guard official and local law enforcement authorities.

(4) No vessel may approach within 100 yards of a competition vessel.

(5) No vessel may approach within ¼ mile of the race course within each race area.

(6) No vessel may block, loiter in, or impede the through transit of vessels in the Michigan City channel entrance, channel, and Washington Park marina.

(7) Additional safety and crowd control restrictions during Pan American Games race periods may be imposed as circumstances require. These restrictions will be announced in the Local Notice to Mariners and by Marine Safety Broadcasts.

Dated: May 19, 1987

A. M. Danielsen,

*Rear Admiral, U.S. Coast Guard, Commander, Ninth Coast Guard District.*

33 CFR Part 179

[CGD 77-115]

## Defect Notification and First Purchaser Information

AGENCY: Coast Guard, DOT.

ACTION: Supplementary Notice of Proposed Rulemaking.

SUMMARY: This notice proposes amendments to the Defect Notification regulations in Part 179 of Title 33, Code of Federal Regulations. The intended effect of the proposal is to require boat and engine manufacturers to establish and maintain first purchaser lists and to require maine dealers to furnish the manufacturers with the information necessary to establish those lists: the serial numbers of new boats and engines sold and the names and addresses of retail first purchasers of those products. The manufacturers would use the information to locate the purchasers of boats and engines which have been recalled for defects which create a substantial risk of personal injury to the public and for failures to comply with applicable regulations. The proposed amendments are needed because many manufacturers do not maintain sufficient first purchaser lists or cannot obtain the information from dealers. As a result, attempts to notify purchasers during recall campaigns are inadequate. Additional editorial changes would clarify confusing language in the Defect Notification regulations and would reflect changes in the applicability of the part.

DATE: Comments must be received on or before August 27, 1987.

ADDRESSES: Comments should be submitted to Commandant (G-CMC/21), (CGD 77-115), U.S. Coast Guard, Washington, DC 20593-0001. Comments will be available for examination at the Marine Safety Council (G-CMC/21), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, between 8 a.m. and 3 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Alston Colihan, Project Manager, Office of Boating, Public, and Consumer Affairs (G-BBS/43), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593 (202) 267-0981, between 8 a.m. and 4 p.m. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION

### Request for comments:

Interested persons are invited to submit written views, data or arguments. Comments should include the name and address of the person making them and identify this notice (CGD 77-115). Receipt of comments will be acknowledged if a stamped, self-addressed postcard or envelope is enclosed.

The proposal may be changed in view of the comments received. All comments received will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination by interested persons at the Marine Safety Council address noted above. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

### Background:

The Coast Guard published a Notice of Proposed Rulemaking in the Federal Register on December 29, 1980 [45 FR 85475]. Because of Coast Guard concern at that time about the impact of the proposed amendments on the Coast Guard information collection budget, consideration of comments and publication of a final rule were delayed. The Coast Guard is seeking OMB approval for the proposed information collection requirements in 33 CFR 179.04.

Because more than six years have elapsed since publication of the Notice of Proposed Rulemaking, the Coast Guard is soliciting additional comments on the proposal. Also, because of confusing wording in the existing Defect Notification regulations, the Coast Guard is proposing editorial changes to the regulatory language in 33 CFR Part 178.

Section 4310(c)(1)(A) of Chapter I of Title 46, U.S. Code—Repair and Replacement of Defects—requires manufacturers of boats and associated equipment (inboard engines, outboard motors and sterndrive units) to notify first purchasers, and subsequent purchasers if they are known, of defects in their products which create a substantial risk of personal injury to the public or which fail to comply with applicable Federal regulations. The manufacturer's responsibility to notify first purchasers (and subsequent purchasers if they are known) lasts for a period of five years from the date of certification for boats and associated equipment to which a standard applies and for a period of five years from the date of manufacture if no standard applies. Part 179 of Title 33, Code of Federal Regulations implements these provisions.

The Defect Notification regulations in Part 179 of Title 33 have been in existence since November 1, 1972. In a number of the recall campaigns for boats and associated equipment monitored by the Coast Guard since 1972, many manufacturers did not know the names and addresses of more than 30 percent of the first purchasers of their products. As a result, the manufacturers could not notify many purchasers whose boats and engines contained defects which created a substantial risk of

personal injury or failed to comply with applicable regulations. This low rate of notification was the result of the failure of manufacturers to establish and maintain adequate first purchaser lists and from the failure of dealers to provide purchaser information to the manufacturers.

Section 4310(g) of Title 46, U.S. Code authorizes the Coast Guard to prescribe regulations that require dealers and distributors to assist manufacturers in obtaining information. Because of the low rate of notifications among recall campaigns monitored by the Coast Guard and the resulting negative effect this low notification rate has upon the safety of boats and associated equipment in the hands of the boating public, the Coast Guard again proposes these amendments to the Defect Notification regulations.

One measure of whether or not a manufacturer has exercised "reasonable diligence" in the notification and repair or replacement of defects in boats and associated equipment which create a substantial risk of personal injury to the public or fail to comply with applicable regulations under 46 U.S.C. 4310(c), is whether or not the manufacturer establishes a list of first purchasers and their addresses and sends the required notice to each person on the list. Since the dealer is the person who physically completes the retail sale of a product to the first purchaser, it is logical that he or she has greater access to information about the first purchaser. As a result, the dealer should be responsible for providing the manufacturer with the purchaser's name and address and an identification of the product: the Hull Identification Number of a boat or the serial number of an item of associated equipment.

These proposed amendments do not specify the method or system a manufacturer must use to collect first purchaser information from dealers. Rather, the proposed amendments require dealers to supply the information within 90 days of the retail sale of the boat or item of associated equipment. The Coast Guard believes that it is in the best interest of both manufacturers of boats and associated equipment and dealers of these products to establish mutually acceptable methods for recording and compiling first purchaser information.

Although the Notice of Proposed Rulemaking [45 FR 85475] included distributors, subsequent manufacturers and other persons in the distribution-manufacturing chain, the Coast Guard revised the proposed amendments to limit the requirement for the provision of first purchaser information to persons engaged in the retail sale of boats and associated equipment. A distributor who sells boats and associated equipment to a dealer would not know the name and address of the eventual retail purchaser of the product. However, if a distributor ever made a retail sale of a boat to a first purchaser, the distributor would be considered a dealer as the term is defined in the proposed amendments.

## Discussion of Comments

Twenty-eight comments were received in response to the Notice of Proposed Rulemaking (NPRM) published December 29, 1980 [45 FR 85475].

Three comments supported the proposed amendments.

Five comments misinterpreted the phrase "associated equipment" as it was used in the NPRM. According to 33 CFR 179.03(d), "associated equipment" means an inboard engine, outboard engine or sterndrive unit. Those who misinterpreted the definition thought that "associated equipment" included everything a dealer might sell such as boathooks, flashlights, life preservers, etc. Whenever the term "associated equipment" is used in this Supplementary Notice of Proposed Rulemaking, it refers only to inboard engines, outboard engines and sterndrive units.

Two comments stated that the proposed amendments involved too much paperwork. The Coast Guard considers the forwarding of the Hull Identification Number (HIN) from a boat or the serial number from an engine and the purchaser's name and address to the manufacturer a minimal amount of paperwork. In the Regulatory Evaluation, the Coast Guard estimates that it takes approximately four minutes to write down the HIN of a boat or serial number of an item of associated equipment and a purchaser's name and address. Also, depending upon the method established between a manufacturer and various dealers of the company's products, the length of time required to record and forward the information could be much shorter. The use of computer equipment for inventory control, for example, is becoming more prevalent in many businesses, both large and small, therefore minimizing repetitive paperwork.

Four comments didn't want the Coast Guard to require manufacturers to acknowledge receipt of first purchaser information from a dealer. These comments are accepted. The Coast Guard believes that the proposed requirement for acknowledgement of receipt of first purchaser information would involve unnecessary additional costs and paperwork.

Three comments urged the Coast Guard to exempt private label merchandisers from the proposed amendments requiring the provision of first purchaser information to the manufacturer. One comment, in particular, addressed three different groups involved in private label merchandising that could be adversely affected by the proposed amendments. Some private label merchandisers of high value products, would be reluctant to disclose purchaser information to the original manufacturer because of the potentially adverse effect the disclosure might have on the private label merchandiser's future market. The original manufacturer might attempt to circumvent the private label merchandiser by contacting purchasers directly. Second, mass merchandisers of small boats and outboard motors could be adversely affected. Because of the administrative burden that could be imposed for inexpensive boats and engines under the proposed amendments, some mass merchandisers might refuse to carry such products. As a result, the third group, the manufacturers of these small boats and outboard motors, might also lose their markets and they too could be adversely affected. The comment stated that the Coast Guard should include a provision in the regulations to enable a manufacturer to establish a formal agreement with another party, either the private label merchandiser or a manufacturer's agent, to maintain first purchaser lists and make the lists available for defect notification programs. The Coast Guard has accepted the recommendation presented in the comments. The proposed amendments are revised to allow a manufacturer to establish a formal agreement with a private label merchandiser or another party to assemble, record or maintain first purchaser information. A private label merchandiser or another party with such a formal agreement could also provide the notificaiton required under 46 U.S.C. 4310. However, since a manufacturer's duty to notify purchasers lasts for a period of five years, the failure of any such agreement means that the manufacturer would still be responsible for providing the required notification.

Another comment stated that the proposed regulations should not apply to everyone in the distribution chain. This comment is accepted. Although the NPRM [45 FR 85475] included distributors, subsequent manufacturers and other persons in the distribution-manufacturing chain, the Coast Guard is revising the proposed amendments to

limit the requirement for the provision of first purchaser information to persons engaged in the retail sale of boats and associated equipment. A distributor who sells to dealers would not know the name and address of the eventual purchaser of the products. If a distributor ever made a retail sale of a boat to a first purchaser, the distributor would be considered a dealer as the term is defined in the proposed amendments.

Several comments stated that the "warranty card" system currently required is sufficient. Another comment stated that the regulations should apply to the purchaser and not the dealer. One other comment stated that the proposed amendments should require the manufacturer to provide a return, self-addressed postcard with each boat or item of associated equipment with a note to the purchaser requesting his or her name and address. The Coast Guard did not accept these recommendations. All of these comments require the cooperation of the purchaser; however, the Coast Guard's experience has been that although many manufacturers currently use the system suggested by the comments, in many instances, purchasers have not returned warranty card information. The Coast Guard believes that under the Defect Notification regulations, the dealer is in a better position to provide boat and engine manufacturers with the required information. Also, the other procedures in a defect notification campaign, inspection and/or repair, usually require participation by the dealer who sold the boat or engine to the purchaser.

Two other comments concerning the use of warranty cards stated that their use is objectionable in some instances because most State warranties are more favorable than manufacturer warranties. According to the comments, completion of the warranty card could be construed as a waiver of the State warranty in favor of the less favorable manufacturer's warranty. These comments are not relevant to these proposed amendments which would require dealers, not purchasers, to supply first purchaser information.

Another comment stated that the information already exists; that dealers have sales invoices, title papers, financing contracts and other papers. The Coast Guard does not consider the documents cited in the comment sufficient to meet the intent of the proposed amendments. Not all companies maintain the same practices. One company's sales invoice for a boat, for example, might contain the make, model, model year and color of the boat, but not its HIN. Another company's invoice might contain the HIN of the boat or serial number from the engine, but not the purchaser's name and address. Not all States have laws which require titling and not all purchasers require financing.

Two comments wanted the Coast Guard to exempt inflatable boat manufacturers and dealers from the proposed amendments. The Coast Guard did not accept this recommendation. Any inflatable boat which bears an HIN is a boat as the term is used in 33 CFR Part 179 and would therefore be subject to these proposed amendments.

One comment objected to the proposed requirement for a dealer to provide the information within 90 days of the time of sale. The comment wanted the dealer to be allowed the option of holding the information until it is needed by the Coast Guard or the manufacturer. This recommendation was not adopted. The Coast Guard's experience has been that the typical reason for not submitting first purchaser information to a manufacturer is that the information is lost. The Coast Guard considers 90 days a reasonable period of time and minimizes the length of time a dealer has to store the information.

One comment stated that the Government is attempting to require dealers and manufacturers to perform what is obviously in the best interests of both parties and that the Coast Guard should not interfere with normal market procedures. Unfortunately, the Coast Guard has found that in many recall campaigns dealers have not provided first purchaser information to the manufacturers.

## Discussion of the Proposed Amendments

The National Boating Safety Advisory Council was consulted and its opinions and advice have been considered in the formulation of these amendments. The Council concurred with the approach suggested by the Coast Guard. The transcripts of the proceedings of the National Boating Safety Advisory Council at which this rule was discussed are available for examination in Room 4304, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC. The minutes of the meetings are available from the Executive Director, National Boating Safety Advisory Council, c/o Commandant (G–BBS), U.S. Coast Guard, Washington, DC 20593–0001.

Since the Federal Boat Safety Act of 1971 has been recodified as Chapter 43 of Subtitle II of Title 46 of the United States Code (U.S.C.), the authority citation for Part 179 is being revised to reflect the recodification.

Section 179.03 would be amended to remove and reserve the definition for "the Act" and include two new definitions for "first purchaser" and "dealer." These definitions are needed to clearly identify the retail buyer and seller of a boat or item of associated equipment.

Under the proposal, Part 179 would be amended to include a new Section 179.04, which would specify the first purchaser information requirement for manufacturers and dealers. The manufacturer of new boats or items of associated equipment would be required to establish and maintain a list of first purchasers. Each entry in a first purchase list would include the name and address of the first purchaser and the HIN, if a boat; or the serial number, if an item of associated equipment. The requirement to maintain a list of first purchasers would last for a period of five years from the date of certification or the date of manufacture of a boat or item of associated equipment. The proposed record retention requirement is consistent with 46 U.S.C. 4310(c)(2), because a manufacturer's duty to notify also lasts for a period of five years. Section 179.04 would require a dealer who makes a retail sale of a boat or item of associated equipment to furnish the name and address of the first purchaser and the HIN of the boat or serial number of the engine to the manufacturer of the product within 90 days. A dealer who was a private label merchandiser would have the option of maintaining first purchaser information and/or conducting defect notification provided there was a formal agreement with the boat or associated equipment manufacturer. Also, a manufacturer would be allowed to establish a formal agreement with another party for responsibility of collecting first purchaser information and/or conducting defect notification.

Sections 179.05, 179.07, 179.11 and 179.13 would be amended to clarify confusing language, and reflect the recodification of the Federal Boat Safety Act of 1971 as part of Title 46, of the U.S. Code.

Section 179.17 would be amended to reflect the recodification of the Federal Boat Safety Act of 1971 as part of the U.S. Code and cite the correct penalty provisions. The section would also be amended to clarify the penalties that may be assessed against a dealer who fails to provide first purchaser information.

**Regulatory Evaluation**

These regulations are considered to be non-major under Executive Order No. 12291 and non-significant under the DOT Regulatory Policies and Procedures (44 FR 11034; Feb. 26, 1979). The economic impact of this proposal has been found to be minimal. Therefore, a regulatory evaluation has not been prepared. The proposed amendments do not specify the method a dealer must use to collect first purchaser information and provide the information to the manufacturer. The Coast Guard believes that it is in the best interests of both manufacturers of boats and associated equipment and dealers of these products to establish mutually acceptable methods for recording and compiling first purchaser information. However, the Coast Guard estimates that it takes four minutes (.066 hrs.) to write down a purchaser's name and address and an identification of the product purchased. Preparation time could be even lower for dealers with computerized inventory systems who can log purchasers' names and addresses and the HINs or serial numbers from products purchased using a computer. The Coast Guard further estimates that the hourly wage for a secretary is $8.00. Thus, the estimated cost to gather first purchaser information for a boat or item of associated equipment is $.75 (.066 × $8.00) per product. The present postage for a first class letter is $.22. The Coast Guard considers a total cost of $.97 a minimal cost when compared to the total profit margin on a boat or item of associated equipment.

Since the impact of this final rule is expected to be minimal, the agency certifies that this rule will not have a significant economic impact on a substantial number of small entities.

**List of Subjects for 33 CFR Part 179**

Defect notification.

In consideration of the foregoing, the Coast Guard proposes to amend Part 179 of Title 33, Code of Federal Regulations as follows:

## PART 179—DEFECT NOTIFICATION

1. The authority citation for Part 179 is revised to read as follows:

Authority: 46 U.S.C. 4310; 49 CFR 1.46.

2. Section 179.01 is revised to read as follows:

**§ 179.01 Purpose.**

This Part prescribes rules to implement section 4310 of Subtitle II of Title 46, U.S. Code governing the notification of defects in boats and associated equipment.

3. Section 179.03 is revised by removing and reserving paragraph (a) and by adding two new paragraphs (e) and (f) to read as follows:

**§ 179.03 Definitions.**

(a) [Reserved]

* * * * *

(e) "First Purchaser" means any person who buys a new boat or item of associated equipment for their own use and not for the purposes of resale.

(f) "Dealer" means any person engaged in the retail sale of a new boat or item of associated equipment to a first purchaser.

4. Section 179.04 is added to read as follows:

**§ 179.04 First purchaser information.**

(a) Each manufacturer of new boats or items of associated equipment shall establish a list of first purchasers. Each entry in a first purchaser list shall contain the name and address of the first purchaser and:

(1) The Hull Identification Number, if a boat; or

(2) The serial number, if an item of associated equipment.

(b) Each manufacturer shall maintain the list of first purchasers for a period of five years from the date of certification or the date of manufacture of a boat or item of associated equipment.

(c) Each dealer who sells a new boat or item of associated equipment shall, within 90 days of the sale, furnish the manufacturer of the product or the person designated by the manufacturer with the following:

(1) The name and address of the first purchaser; and

(2) The Hull Identification Number if a boat or serial number if an item of associated equipment.

5. Section 179.05 is revised to read as follows:

**§ 179.05 Manufacturer discovered defects.**

Each manufacturer of a boat or item of associated equipment who discovers that one of its products fails to comply with a regulation prescribed pursuant to 46 U.S.C. 4302 or contains a defect which creates a substantial risk of personal injury to the public shall provide the notification required by 46 U.S.C. 4310(b) within 30 days.

6. Section 179.07 is revised to read as follows:

**§ 179.07 Notification of dealers.**

Each notification a manufacturer provides to dealers in accordance with 46 U.S.C. 4310(c)(1)(C) must be by means of a letter, telegram or other written document.

7. The introductory text in § 179.09 is revised to read as follows:

**§ 179.09 Contents of notification.**

Each notice required by 46 U.S.C. 4310(b) must include the following additional information:

* * * * *

8. Section 179.11 is revised to read as follows:

**§ 179.11 Defects determined by the Commandant.**

Each manufacturer notified by the Commandant under 46 U.S.C. 4310(f) of a failure to comply with a regulation prescribed pursuant to 46 U.S.C. 4302 or of a defect which creates a substantial risk of personal injury to the public shall within 30 days of receipt of the notification by the Commandant:

(a) Provide the notification required by 46 U.S.C. 4310 (c) and (d); or

(b) Provide evidence to the Commandant by certified mail that there is no failure to comply with a regulation or defect which creates a substantial risk of personal injury.

9. Section 179.13 is amended by revising paragraphs (a)(1), (a)(2) and (b) to read as follows:

**§ 179.13 Initial report to the Commandant.**

(a) A manufacturer who provides notification under 46 U.S.C. 4310 shall concurrently send to the Commandant by certified mail—

(1) A true or representative copy of each notice, bulletin, and other communication given to persons required to be notified under 46 U.S.C. 4310(c)(1);

(2) The total number of boats or items of associated equipment potentially affected by the defect which creates a substantial risk of personal injury or failure to comply with a regulation; and

(3) * * *

(b) If an item required by paragraph (a) of this section is not available at the time of the initial report to the Commandant, a manufacturer may submit the item when it becomes available.

10. Section 179.17 is revised to read as follows:

**§ 179.17 Penalties.**

(a) Each manufacturer who fails to provide a notification under 46 U.S.C. 4310(c) or fails to exercise reasonable diligence in fulfilling the undertaking to correct the defect or failure to comply under 46 U.S.C. 4310(d) is subject to the penalties prescribed in 46 U.S.C. 4311.

(b) Each manufacturer who fails to comply with any other provision of 46 U.S.C. 4310 or the regulations in this part

is subject to the penalties prescribed by 46 U.S.C. 4311.

(c) Each dealer who fails to comply with the regulations in this part is subject to the penalties prescribed by 46 U.S.C. 4311(c).

11. Section 179.19 is revised to read as follows:

**§ 179.19 Address of the Commandant.**

Each manufacturer who submits a report and communication to the Coast Guard required by this part shall send it to: Commandant (G–BBS), U.S. Coast Guard, Washington, DC 20593–0001.

Dated: May 22, 1987.

T.T. Matteson,

*Rear Admiral, U.S. Coast Guard, Chief, Office of Boating, Public and Consumer Affairs.*

[FR Doc. 87–12118 Filed 5–28–87; 8:45 am]

BILLING CODE 4910–14–M

## FEDERAL MARITIME COMMISSION

### 46 CFR Part 588

[Docket No. 87–11]

### Actions to Adjust or Meet Conditions Unfavorable to Shipping in the United States/Colombia Trade

**AGENCY:** Federal Maritime Commission.

**ACTION:** Notice of Proposed Rulemaking.

**SUMMARY:** The Federal Maritime Commission in response to a petition alleging the existence of conditions unfavorable to shipping in the foreign oceanborne liquid bulk trade between the United States and Colombia proposes rules which would suspend the tariffs of Flota Mercante Grancolombiana in the U.S./Colombia trade unless certification is received assuring that unfavorable conditions do not exist. The rule would adjust or meet apparent unfavorable conditions by imposing burdens on a Colombian carrier which approximate those placed on the Petitioner, O.N.E. Shipping, Ltd., a non-Colombian carrier, by Colombian laws and regulations.

**DATE:** Comments due on or before June 29, 1987.

**ADDRESS:** Comments (original and 15 copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573, (202) 523–5725.

**FOR FURTHER INFORMATION CONTACT:** Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573, (202) 523–5740.

**SUPPLEMENTARY INFORMATION:** Pursuant to the authority of section 19(1)(b), Merchant Marine Act, 1920 ("Section 19"), 46 U.S.C. app. 876, as implemented by 46 CFR Part 585, the Federal Maritime Commission ("Commission") is authorized and directed to make rules and regulations affecting shipping in the foreign trade of the United States in order to adjust or meet general or special conditions unfavorable to shipping in the foreign trade of the United States and which arise out of, or result from, foreign laws, rules or regulations, or from competitive methods or practices employed by owners, operators, agents or masters of vessels of a foreign country.

On May 29, 1986, O.N.E. Shipping, Ltd. ("O.N.E.") filed a petition pursuant to Section 19 requesting the Commission to issue regulations to adjust and meet conditions unfavorable to shipping in the U.S/Colombia trade. *Petition of O.N.E. Shipping Ltd. for Issuance of Regulations to Adjust and Meet Conditions Unfavorable to Shipping in the Foreign Trade of the United States* ("Petition"). The Petition alleged that the cargo preference laws of Colombia had damaged O.N.E.'s financial position by excluding O.N.E. from the U.S./Colombia liquid bulk trade. Notice of the Petition was published in the Federal Register on June 20, 1986 (51 FR 22561), and interested persons were invited to submit comments on the Petition no later than July 21, 1986. Subsequently, pursuant to a request by Flota Mercante Grancolombiana, S.A. ("Grancol"), a Colombian carrier, the Commission extended the deadline for comments until August 4, 1986. A comment on the Petition was submitted by Grancol.

On September 22, 1986, O.N.E. filed an amended Section 19 petition, including a discussion of recent Colombian maritime laws, enacted in July and August, 1986. *Amendment to Petition of O.N.E. Shipping, Ltd. for Relief Under Section 19 of the Merchant Marine Act, 1920* ("Amended Petition"). Notice of the Amended Petition was published in the Federal Register on October 15, 1986 (51 FR 36754), with comments invited by November 4, 1986.

On October 24, 1986, Grancol requested a 45-day extension of the November 4 deadline. Grancol advised that O.N.E. had no objection to such an extension. The Commission granted the request. On December 8, 1986, the Commission granted an additional 3-day extension until December 22, 1986, as requested by Grancol, which had advised that O.N.E. had no objection to the grant of such an extension.

Comments on the Amended Petition were submitted by Grancol and the Chemical Manufacturers Association ("CMA").

### Colombian Laws and Regulations

Decree [1] No. 994 of April 29, 1966, authorizes the Government of Colombia to establish percentages of Colombian imports and exports to be reserved to Colombian-flag carriers. Decree No. 1208 of July 21, 1966, which implemented Decree No. 994, reserves to Colombian-flag vessels no more than 50% of liquid bulk imports into Colombia.

Resolution No. 0097 of June 8, 1973, gave Grancol trading rights in the U.S. Gulf/Colombia liquid bulk trade, authorizing the carrier to transport the 50% reserved by Colombian law to Colombian-flag vessels, under space-charter agreements with Andino Chemical Shipping Co. ("Andino"), a third-flag carrier.

Colombian cargo reservation laws were further implemented by import licenses issued to Colombian importers by the Institute of Foreign Trade ("INCOMEX"). The reservation requirements applied only where there was Colombian-flag service. When Grancol obtained authority to serve the U.S./Colombia liquid bulk trade in 1973, a 100% cargo reservation stamp was applied in that trade. Subsequently, INCOMEX changed its stamp so that Colombian-flag carriage was required only for the first 50% of the cargo covered by each import license.

Decree No. 2324 of September 18, 1984, provides for accumulation of non-reserved Colombian bulk imports. That decree was not implemented until laws and regulations promulgated in mid-1986 began to apply it. Article 162 of the Decree states that the "free percentage [of cargo] may be accumulated within the [same] calendar year" from the imported bulk shipments of the same user of consignee, statistics to be maintained by Colombia's Maritime and Port Directorate General ("DIMAR"). Decree No. 2324 also includes a penalty provision (Article 83) which authorizes fines for violations of the cargo reservation laws. The fines must be levied against the importer, exporter, and/or carrier, and may be as much as twice the amount of the relevant freight charges.

Article 49 of Decree No. 2451 of July 31, 1986, provides that, when a Colombian carrier charters a vessel which transports both reserved and unreserved bulk cargo, only the percentage of deadweight tonnage which is designated as reserved cargo shall be used as the basis for calculating the maximum charter capacity permitted

[1] The principal laws and regulations discussed herein are appended to O.N.E.'s Petition and Amended Petition.

to the carrier, provided that the user, whether an importer or an exporter, agrees *not* to accumulate free tonnage for the purposes of Article 162 of Decree No. 2324.

Regulation No. 01 of August 8, 1986, issued by DIMAR, requires that, if a waiver of the cargo reservation law is granted, an appropriate seal be fixed to the import license. Regulation No. 01 also provides that DIMAR is to replace INCOMEX in administering the cargo reservation laws, and that the INCOMEX stamps will no longer be affixed to import licenses. However, Regulation No. 01 further states that the INCOMEX cargo reservation stamps will not be eliminated until Regulation No. 01's procedures are implemented and DIMAR issues appropriate communications.

**The Impact of Colombian Laws and Regulations on the U.S./Colombia Liquid Bulk Trade**

O.N.E. is operated by overseas Enterprises, Inc., which is U.S.-owned and operated, and serves liquid bulk trades using owned and chartered specialized vessels registered in a number of countries. Currently, O.N.E. provides regular service between U.S. (primarily Gulf Coast) ports and ports in Venezuela, Mexico, the Dominican Republic, Trinidad and Tobago, Haiti, Guatemala, Costa Rica, the Netherlands Antilles, Panama, and El Salvador.[2] O.N.E.'s Amended Petition relates exclusively to the U.S./Colombia liquid bulk parcel tanker trade ("the Trade").

According to O.N.E., approximately 1.5% of the liquid bulk parcel tanker cargo in the Trade is currently moved by third-flag carriers not associated with Colombian-flag carriers, whereas prior to the full implementation of Colombia's cargo preference laws such lines carried almost 100% of the Trade. O.N.E. advises that no U.S.-flag operators have participated in the Trade in the past, and none does so at the present time.

O.N.E. argues that the loss of substantial competition from third-flag carriers has raised and will continue to raise shipping costs artificially and will severely diminish the available quantity and quality of service necessary to satisfy the Trade. It contends that the manner in which Colombia implements its waiver procedures makes the potential waiver under Colombian law of 50% of liquid bulk cargoes unrealistic and meaningless. According to O.N.E., it is impractical for shippers to divide the small parcels typical of the trade between two carriers, the first of necessity Colombian-flag, and it is uneconomical for a carrier to participate in the carriage of less-than-parcel loads. Liquid parcel tanker operators allegedly cannot maintain a viable service on the basis that shippers may be willing to split their shipments.

The uncertainties created by the Colombian laws in such areas as waiver requirements, the "accumulation" provisions, the associate status standards, and even in the requirements imposed on Colombian-flag carriers, are said to be such that no shipper or carrier can determine how or in what manner they may be applied. O.N.E. further advises that U.S. shippers are reluctant to risk the penalty of a fine possibly amounting to twice the freight charges involved. O.N.E. allegedly has suffered extensive harm as a result of Colombian laws, attributing a loss of earnings and added operating costs to its inability to serve the Trade.

O.N.E. contends that, due to lack of carrier competition, U.S. liquid bulk exporters are faced with higher prices not only in the U.S./Colombia trade but also in neighboring trades, because carriers cannot offer the volume discounts which would be economical if they could serve the entire range of ports without having to by pass Colombia. O.N.E., citing *Actions to Adjust or Meet Conditions Unfavorable to Shipping in the United States/ Venezuela Trade*, Docket No. 82–58, Interim Report on Current Status of Proceeding, 21 S.R.R. 1627 (February 25, 1983), concludes that the "presence of discriminatory restrictions and the denial of fair and competitive access" constitutes conditions unfavorable to shipping in the foreign trade. O.N.E. therefore urges the Commission to suspend the tariffs of Grancol in the U.S./Colombia trade.

Grancol, on the other hand, urges the Commission to dismiss the Amended Petition. According to Grancol, whatever the difficulties of the past, today Colombian laws reserve no more than 50% of Colombia liquid bulk imports for Colombia-flag carriers, and importers may accumulate the unreserved cargo percentage on an annual basis. Grancol advises that third-flag carriers and Ligracol (a Colombian carrier jointly owned by Grancol and Andina) now compete for at least 50% of the southbound cargo, and all the northbound. Third-flag carriers, including O.N.E., are said to currently transport approximately 50% of the Trade.

Grancol concedes that all imports into Colombia, including liquid bulk, are subject to a licensing regime by the Government of Colombia. Grancol also acknowledges that prior to mid-1986 Colombian authorities did require the half of each licensed shipment be carried on Colombian or associated vessels. Because individual bulk shipments to Colombia are relatively small, Grancol states that there may have been an unintended hardship due to the practical difficulty of splitting small shipments. However, the implementing regulations of mid 1986 are seen by Grancol as strengthening the allegedly new, more open system brought about by the 1984 law (Decree No. 2324) which permits Colombian importers to accumulate the unreserved cargo percentage annually. Grancol explains that a present, for every ton an importer ships on a Colombian-flag or authorized space-chartered vessel, the importer is entitled to ship a ton on a third-flag vessel. This adjustment in the Colombian reservation system is said to give an importer the ability to ship both large and small parcels on third-flag vessels.

Grancol maintains that the procedures to be followed when shipping unreserved cargo on third-flag vessels, as set forth in Regulations No. 01, are simple. It explains that, generally, the importer presents an import license to DIMAR with a copy of a bill of lading for at least an equivalent amount of cargo shipped by the importer on a Colombian-flag or authorized space-charter vessel (import licenses no longer bear INCOMEX stamps); DIMAR will then stamp the license as unreserved, authorizing the importer to ship the entire cargo under any flag.

Grancol maintains that because Colombia's reservation laws have changed significantly since late 1984, O.N.E.'s statistics on third-flag carriage for the 1981–84 period are largely irrelevent. Grancol's statistics for September-November 1986, the three months following the issuance by DIMAR of Regulation No. 01, show Ligracol carrying 46.2% of cargo in the trade, Panamerican Tankers ("Panam"),[3] third-flag carrier, carrying 43.8%, and O.N.E. carrying 10%. Grancol notes that the 44% of the Trade carried by Panam as a third-flag carrier over the

[2] O.N.E. did not indicate that it was serving Colombia at the time its Amended Petition was filed in September, 1986. However, a comment on the Amended petition (discussed herein) filed in December, 1986 indicated that O.N.E. was serving the U.S./Colombia trade in autumn 1986.

[3] Grancol points out that, prior to June, 1986, Panam carried reserved cargo under a space charter agreement with Transpetrol, Ltd., a Colombian carrier, but that that space-charter arrangement is not longer in effect.

three-month period since issuance of the new regulations is significantly better than the average share of the trade it carried from 1981 to 1985 (approximately 19.6%). The new Colombian laws have thus clearly benefited the third-flag carrier, according to Grancol.

The Chemical Manaufacturers Association argures that the Colombian requirement to transport the first 50% of each liquid bulk shipment on Colombian-flag vessels or their designated associates is, in reality, far worse than 50/50 cargo reservation. CMA advises that bulk chemical shipments rarely can be economically split between a Colombian-flag vessel and a vessel of another flag. It explains that parcel tankers generally have about 10 to 30 segregated tanks with varying piping, heathing, cooling, venting and pumping systems designed to handle the specialized chemical cargoes, and that a typical bulk chemical shipment will approximate the size of the specialized tank in which it will be placed. Splitting the shipment between two vessels allegedly would result in unused capacity in the tanks of each vessel.

CMA states that rates are based on maximizing available capacity in each tank and that rates typically will decrease per ton as a shipper's volume increases. CMA thus argues that splitting shipments between two vessels would jeopardize the volume discounts. In addition, customers are said to be typically better served when their shipment is placed on a single vessel, delivered at one time with a single unloading, and with one set of paperwork. CMA claims that splitting shipments of hazardous chemicals increases the number of situations in which a transportation accident releasing toxic chemicals could occur.

Finally, CMA refers to the letters attached to the Amended Petition from Dow Chemical Latin America and PPG Industries, Inc., arguing that Colombian law limits their choices and results in noncompetitive rates. CMA therefore urges the Commission to impose Section 19 sanctions until the Government of Colombia removes its discriminatory and anticompetitive laws.

### Diplomatic Activities

On June 16, 1986, shortly after the original O.N.E. Petition was filed, the Commission requested that the Department of State ("Department" or "DOS") review the matter to determine whether it could be resolved through diplomatic channels, and if so, to make whatever efforts appropriate towards reaching such a resolution. The Commission renewed this request following the filing of the Amended Petition.

In response to its requests, the Commission has received three letters from DOS officials, dated July 24, 1986, January 9, 1987, and February 2, 1987, each containing diplomatic notes from the Government of Colombia. The January 9 letter reported that commercial discussions between representatives of O.N.E. and Colombian carriers occurred in Washington in mid-November, 1986. These discussions are said to have led to a visit by O.N.E. officials to Colombia the second week of December to meet with Colombian maritime authorities. The Department reported that an O.N.E. representative had stated that no commercial resolution was achieved as a result of those meetings, and that no further efforts had been discussed. The Commission was further advised that, in continuing discussions with the Government of Colombia, the Department:

> . . . intend[s] to stress to Colombian authorities that the unilateral reservation of significant quantities of commercial cargoes is inconsistent with U.S. maritime policy.

The Colombian note attached to the February 2, 1987 DOS letter contained the most thorough exposition of relevant Colombian laws and regulations of the three Colombian notes. The note was in the form of a letter from Samuel Alberto Yohai ("Yohai Letter"), Director General of INCOMEX, to the U.S. Ambassador to Colombia.

Mr. Yohai advises that Colombian law reserves no more than 50% of bulk cargo (Decree No. 994 of 1966, Decree No. 1208 of 1969, and Decree No. 2324 of 1984), and that nonassociated carriers can compete freely for the carriage of non-reserved cargo.

Mr. Yohai also reviews the procedure for foreign participation in the transport of bulk cargo (liquid or dry) which he reports as follows:

Decree No. 2324, Article 162, calls on the importer to account for, on an annual basis, the "reserved percentage" as well as the free cargo. In the case of the latter, its volume may be accumulated over the course of the year. Although an accounting based on the system of individual import licenses was consistent with the law, this procedure made it difficult for the importers, since dividing the cargo covered by each license into two or more shipments in practice limited their freedom to choose a carrier. Aware of the importers' difficulties, DIMAR issued Regulation No. 01 in August, 1986, establishing the system of choosing a carrier based upon the annual accumulation of cargo volumes. The procedures of Regulation No. 01, Article 6, do not discriminate against foreign carriers. Article 6 has a second objective, the confirmation of the right of entry of foreign vessels carrying free cargo. Information about the vessel and conditions of transport must be submitted by the importer.

According to Mr. Yohai, Article 49 of Decree No. 2415 of 1966 has nothing to do with the transport of cargo by foreign flags. He explains that Article 49 introduces restrictions on Colombian carriers, providing that these carriers can only charter foreign flag vessels up to 50% of the DWT of their own Colombian-flag vessels. Further, Mr. Yohai advises that when the bulk importer assigns part of its free cargo to a Colombian carrier, DIMAR does not count, within the authorized chartering capacity, the portion of free cargo that the importer decides to give the Colombian carrier. Mr. Yohai states that the importer thus waives its option to accumulate the cargo as reserved cargo.

### Discussion

Section 19(1)(b) of the Merchant Marine Act, 1920, authorizes and directs the Federal Maritime Commission:

> To make rules and regulations affecting shipping in the foreign trade not in conflict with law in order to adjust or meet general or special conditions unfavorable to shipping in the foreign trade, whether in any particular trade or upon any particular route or in commerce generally, and which arise out of or result from foreign laws, rules, or regulations or from competitive methods or practices employed by owners, operators, agents, or masters of vessels of a foreign country * * *.

The types of conditions which the Commission has found to be "unfavorable to shipping in the foreign trade" of the United States, within the meaning of Section 19, are set forth in the Commission's rules at 46 CFR 585.3. Among these are conditions which: (1) preclude vessels in the foreign trade of the United States from competing in the trade on the same basis as any other vessel (46 CFR 585.3(a)); (2) reserve substantial cargoes to the national flag or other vessels and fail to provide, on reasonable terms, for effective and equal access to such cargo by vessels in the foreign trade of the United States (46 CFR 585.3(b)); and (3) are discriminatory or unfair as between carriers, shippers, exporters, importers, or ports or between exporters from the United States and their foreign competitors (46 CFR 585.3(d)). The laws and regulations of the Government of Colombia governing transportation of liquid bulk cargoes in the Trade and complained of

by O.N.E. and some of the commenters appear to create the "unfavorable conditions" listed above.

There is no disagreement among those participating in this matter to date as to the fact that the Government of Colombia reserves 50% of liquid bulk imports to Colombian carriers. Decree No. 1206, which implemented Decree No. 994 explicitly reserves for Colombia-flag vessels (as defined by Colombian law) "no more than " 50% of all bulk liquid and refrigerated import and export cargoes. While "no more than" 50% could in theory mean *less* than 50%, from 197 to 1986, INCOMEX required Colombian-flag carriers for the first 50% of *each import shipment*. Neither Decree No. 2324 not its implementing regulation, Regulation No. 01 alters access to the 50% "reserved" portion of Colombia's liquid bulk imports. The change in the system of annual accumulation would only affect (and, according to Grancol and Colombian officials, ease) access to the "free" 50% of liquid bulk cargo.

Given the nature of the Trade, the requirement that the first 50% of each import shipment be carried on a Colombian-flag carrier, made it impractical for importers to choose non-Colombian flag carriers for tranportation of any portion of the shipment. While it is not possible on the present record to determine what O.N.E.'s market share in the Trade would have been in the 1977–86 period in the absence of Colombian cargo reservation requirements, it would appear that O.N.E. would likely have had a greater presence during that period, in the absence of those requirements. Given O.N.E.'s history of activity in the liquid bulk trades in contiguous countries for over twenty years, O.N.E.'s argument that service to Colombia would be a natural complement to its other services seems reasonable. It appears that O.N.E. has been precluded to some degree by the Colombian laws and regulations from competing in the Trade during the 1977–86 period.

Therefore, the Government of Colombia decrees in question not only "reserve substantial cargoes to the national flag" lines of Colombia, and "fail to provide for effective and equal access to such cargo" by non-Colombian-flag carriers within the meaning of 46 CFR 585.3(b), but also "preclude vessels in the foreign trade of the United States from competing in the trade on the same basis as any other vessel" within the meaning of 46 CFR 585.3(a).

Moreover, the laws and regulations of the Government of Colombia appear to have disadvantaged U.S. exporters. CMA members active in the Trade argue that their service options are extremely limited. The *de facto* requirement that shippers use Colombian-flag carriers is said to have denied those shippers the freedom to select their preferred carrier and, as a result, led to a lack of competition and higher rates. It is also noted that the Colombian liquid bulk cargo reservation laws have been applied to Colombia's import trade, and not to the export trade. It would appear that, while U.S. chemical exports to Colombia are being adverserly affected, the same cannot be said of Colombian liquid bulk exports to the United States. There is also the possibility here that U.S. exporters are bearing the burden of supporting the Colombian merchant marine.[4] Therefore, the Government of Colombia decrees appear to have a discriminatory or unfair impact upon U.S. exporters within the meaning of 46 CFR 585.3(d).
